Pinner High School: Mathematics

Mathematics GCSE - Edexcel (1MA1)

Mathematics A Level - Edexcel (9MA0)

Further Mathematics A Level - Edexcel (9FM0)

Intent

At Pinner High School the Mathematics curriculum is designed to link prior knowledge from KS2 through to the skills required for A Level Maths. The curriculum is delivered with a focus on problem-solving, logical thinking and decision-making skills alongside the mathematical content. We place a heavy focus on problem solving as this is a skill that helps develop creativity, resilience, imagination and lateral thinking. We strive to challenge all learners to make progress whilst nurturing a passion and curiosity of the subject whatever their ability. Real-life applications of Maths are made explicit to enable students to function with the demands of Maths in everyday life. We aim to support and inspire our students to choose to study A Level Maths and Further Maths.

Implementation

The department follows the Edexcel five-year scheme of work from Year 7 through to Year 11. This enables us to differentiate, make links and connections between topics and also content covered in previous and subsequent years. All year groups have a discrete problem-solving lesson once a week. At KS3, these give students an opportunity to develop the skills required to be able to solve complex problems. For example, they will carry out investigations, work on rich tasks from NRICH (<https://nrich.maths.org/>) and often work collaboratively. At KS4, the students work on exam technique during these lessons. We offer an option to study for GCSE Further Maths in order for students to experience some of the A level content. In order to make the curriculum more accessible and enjoyable we use a range of additional online resources such as Integral and SPARX Maths.

Impact

Our results over the past three years have been excellent and progress made in Maths compared to other subjects at Pinner continues to be strong, indicating the curriculum plan is working well. Students understand the relevance and importance of what they are learning in relation to real world concepts. Learners can resolve mathematical problems in real life situations. The fluidity of working from one scheme of work enables smoother transition from KS3 to GCSE and enables progress to be clearly tracked. Mathematics is a very popular subject at Sixth Form level and the Further Mathematics take-up is high. The teaching, support and guidance provided by the staff has resulted in successful offers at Oxbridge and Russell Group universities.

Career Development

A minimum of GCSE Grade 5 in Maths is required for the majority of Post-16 and Post-19 careers. For students who wish to study mathematics further, career potentials are wide and varied. Here is a list of a few careers:

Acoustic Consultant, Actuarial Analyst, Actuary, Astronomer, Chartered Accountant, Data Analyst, Data Scientist, Investment Analyst, Maths Research Scientist, Secondary School Teacher, Software Engineer, Sound Engineer and Statistician. The following websites offer more information about career opportunities with a maths background:

Maths Careers: <https://www.mathscareers.org.uk/careers/>

Institute of Maths: <https://ima.org.uk/support/careers/>

Plus Maths : <https://plus.maths.org/>

Assessment

Alongside summative assessments outlined below, students are assessed formatively in lessons. Teachers use a range of techniques including questioning, mini whiteboards and plenaries to gauge progress within each lesson and over time. This assessment is used to tailor their teaching to the needs of individuals and the whole class. Students are given regular opportunities to self-assess, peer assess and reflect on their learning in all year groups. Whole class assessment and feedback is also given.

KS3/KS4: Termly assessments based on content covered. Individual feedback is given in the form of a question-level analysis and a green box for students to engage with.

Year 11: Mock exams in December and March. These exams are analysed for more detailed feedback per question to aid preparation for the GCSE exam.

KS5: Regular marked unit assessments, feed forwards on topic tests and individual verbal feedback. Mock exam twice a year including unit assessments. Students are expected to have a pass mark of 60% at each unit and 70% for further maths students. Students who do not meet the pass mark will re-sit these tests.

Enrichment Opportunities & Super Curricular

- Pi Day Activities in lessons on the day
- Maths Ambassadors (KS5) helping students in lower years
- UKMT Junior, Intermediate and Senior Maths Challenges
- Level 2 Further Maths (A Level bridging course for Year 10 and Year 11 top end students)
- Head's Challenge: Mathematical Art Club, Maths Challenge Club, Chess Club, Logic Puzzles Club, STEP and MAT preparation club (KS5 only)

Commitment to Equality, Diversity & Inclusion

In KS3 all students access the same curriculum which supports and challenges all learners. We do not set a ceiling on achievement. In KS4, students are streamed by tier ensuring all curriculum content is covered by all students.

Maths needed to function in life, made explicit in life, is made explicit in curriculum through problem solving lessons which develop skills required to solve problems in other contexts.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 7	Algebra (Expressions, Functions and Formulae) <ul style="list-style-type: none"> - Functions - Simplifying expressions - Writing expressions - Expanding Brackets - Factorising - Writing formulae Number Skills <ul style="list-style-type: none"> - Four operations with integers and decimals - Directed number - Ordering integers - Rounding - Factors, multiples and primes - Types of numbers - Powers and roots - Order of operations 	Algebra (Equations) <ul style="list-style-type: none"> - Substitution - Solving one-step equations - Solving two-step equations - Solving equations with brackets Working with Fractions <ul style="list-style-type: none"> - Equivalent fractions - Comparing fractions - Simplifying fractions - Four operations with fractions - Fractions of amounts - Write a quantity as a fraction of another 	Working with Percentages <ul style="list-style-type: none"> - Fraction, decimal and percentage equivalence - Understand percentages - Percentages of amounts with and without a calculator - Write a quantity as a percentage of another Measures, Perimeter and Area <ul style="list-style-type: none"> - Measure lines and angles - Identify properties of 2D shapes - Lengths, mass and capacity - Perimeter of rectilinear shapes - Area of triangles and quadrilaterals - Convert between metric units 	Working with Ratio <ul style="list-style-type: none"> - Use ratio notation. - Simplify a ratio to its simplest form. - Share a total amount into a given ratio - Read map scales using ratios and metric units - Write ratios in the form 1:n and n:1 - Convert between scale and real-life models Lines and Angles <ul style="list-style-type: none"> - Use angle theorems with straight lines - Angles in triangles and quadrilaterals - Angles and parallel lines 	Sequences and Graphs <ul style="list-style-type: none"> - Term to term rules - Pattern sequences - Generate sequences - Position to term rules - Fibonacci and other special sequences Probability <ul style="list-style-type: none"> - The language of probability. - Calculate probabilities of single events - Experimental probabilities and expectation 	Analysing and Representing Data <ul style="list-style-type: none"> - Mode, median, mean and range of discrete data - Tally charts and frequency tables - Grouped data - Plot and read bar charts - Plot and read pictograms - Plot and read line graphs - Plot and read pie charts - Compare sets of data using averages and range
	Autumn Assessment			Spring Assessment		
Year 8	Number <ul style="list-style-type: none"> - Order and compare fractions, decimals and percentages - Laws of indices - Round using significant figures 	Straight Line Graphs <ul style="list-style-type: none"> - Recognise equations of lines parallel to the axes - Gradient of a line - Plot linear functions - Midpoints of line segments 	Fractions, Decimals and Percentages <ul style="list-style-type: none"> - Convert fractions to decimals. - Change a simple recurring decimal into a fraction. - Calculate percentage 	Area and Volume <ul style="list-style-type: none"> - Calculate the area of compound shapes - Calculate the surface area and volume of cubes and cuboids - Sketch nets of 3D solids 	Statistics, Graphs and Charts <ul style="list-style-type: none"> - Identify primary and secondary data. - Draw two-way tables. - Draw and interpret stem and leaf diagrams 	Probability <ul style="list-style-type: none"> - Identify mutually exclusive outcomes and events. - List all the possible outcomes two events in sample space diagrams

	<ul style="list-style-type: none"> - Estimate calculations - Estimate square roots - Write error intervals - HCF and LCM using prime factors <p>Proportion</p> <ul style="list-style-type: none"> - Recognise direct proportion - Solve problems with recipes and direct proportion - Convert between currencies - Solve 'best value' problems - Understand scale factors and solve problems with similar shapes - Interpret scale factors and ratio - Recognise inverse proportion 	<ul style="list-style-type: none"> - Write equations of straight lines in the form $y = mx + c$ - Identify parallel lines and their equations - Recognise graphs of direct proportion <p>Lines and Angles</p> <ul style="list-style-type: none"> - Solve geometrical problems by combining angle theorems - Exterior and interior angles 	<ul style="list-style-type: none"> - increase and decrease. - Work out an original quantity before a percentage increase or decrease - Calculate percentage change. <p>Expressions and Inequalities</p> <ul style="list-style-type: none"> - Write expressions and formulae. - Change the subject of a formula where the subject appears once - Multiply out double brackets and collect like terms. - Write inequalities from context - Solve one step and two step inequalities - Represent inequalities on number lines 	<ul style="list-style-type: none"> - Name the different parts of a circle. - Calculate the circumference. - Calculate the area of a circle. <p>Real Life Graphs</p> <ul style="list-style-type: none"> - Plot and read values from conversion graphs. - Plot and interpret distance-time graphs. - Plot real-life graphs from tables of values, including graphs with fixed costs - Describe trends and make predictions - Draw and interpret line graphs. - Interpret in a given context the gradient and y-intercept of linear and non-linear graphs. 	<ul style="list-style-type: none"> - Calculate averages from a frequency table. - Compare data using averages and range, including mean calculated from frequency table. - Compare data using graphs and statistics - Decide on the most appropriate average to use. - Draw scatter graphs. - Describe types of correlation. 	<ul style="list-style-type: none"> - Use frequency trees to find the probabilities of events with two or more conditions. - Use Venn Diagrams to display and calculate probabilities of two or three events. - Use set notation for the intersection, union and complement of events <p>Transformations</p> <ul style="list-style-type: none"> - Identify similar and congruent shapes - Describe and carry out translations. - Describe and carry out reflections - Describe and carry out rotations around a point - Enlarge a shape from a point and describe a given enlargement - Use a combination of reflection, rotation, enlargement and translation.
Year 9	Recap of Fundamental Number Skills	Recap of Algebra Skills	Consolidating Graphs, Charts, Interpreting and Representing Data	Graphs	Foundation	Foundation
	<ul style="list-style-type: none"> - Calculations - Decimal numbers 	<ul style="list-style-type: none"> - Simplify algebraic expressions. - Expand brackets. 		<ul style="list-style-type: none"> - Linear graphs - Graphing rates of change 	Transformations and constructions (F)	Ratio and proportion (F)
						<ul style="list-style-type: none"> - Writing ratios

	<ul style="list-style-type: none"> - Place value - Factors and multiples - Squares, cubes and roots - Index notation - Prime factors - Number problems and reasoning - Place value and estimation - HCF and LCM - Calculating with powers (indices) - Powers of 10 and standard form 	<ul style="list-style-type: none"> - Factorise linear and quadratic expressions. - Solve linear inequalities. - Substitute numbers into formulae. - Rearrange formulae. - Expressions, equations, formulae and identities. - Arithmetic, geometric and Fibonacci sequences. 	<ul style="list-style-type: none"> - Stem and leaf diagrams. - Frequency polygons - Pie charts. - Time series graphs. - Scatter graphs. - Averages - Two-way tables. <p>Recap of Fractions, Ratio and Percentages</p> <ul style="list-style-type: none"> - Fractions and mixed numbers. - Find quantities using ratios. - Convert between currencies and measures. - Recognise and use direct proportion. - Percentage increases and decreases. 	<ul style="list-style-type: none"> - Real-life graphs - Line segments - Quadratic graphs - Cubic and reciprocal graphs <p>Perimeter, area and volume</p> <ul style="list-style-type: none"> - Quadrilaterals, triangles, and compound shapes - Surface area of 3D solids - Volume of prisms - Circles - Cylinders, spheres, pyramids and cones 	<ul style="list-style-type: none"> - Plans and elevations - Translation - Rotation - Reflection - Enlargement - Combining transformations - Bearings and scale drawings - Constructions - Loci <p>Higher</p>	<ul style="list-style-type: none"> - Using ratios - Ratios and measures - Comparing using ratios - Using proportion - Proportion and graphs - Proportion problems <p>Higher</p>
					<p>Transformations and constructions (H)</p> <ul style="list-style-type: none"> - Plans and elevations - Bearings and scale drawings - Constructions - Loci - Enlarge shapes by negative scale factors <p>Number and Algebra (H)</p> <ul style="list-style-type: none"> - Negative and fractional indices - Rational and irrational numbers - Simplify surds - Rationalise a denominator - Non-linear sequences - Nth term of a quadratic sequence <p>Geometry and Measures (H)</p> <ul style="list-style-type: none"> - Calculate maximum and minimum possible values of a measurement - Calculate arc lengths, angles and areas of sectors - Volume and surface area of pyramids and cones 	<p>Graphs (H)</p> <ul style="list-style-type: none"> - Velocity-time graphs. - Equations of lines parallel or perpendicular lines. - Solve quadratic and cubic equations using graphs. - Interpret linear and non-linear real-life graphs. - Draw the graph of a circle.

Year 10	Graphs Transformations (F) <ul style="list-style-type: none"> - Coordinates - Linear graphs - Gradient - $y=mx+c$ - Real-life graphs - Distance-time graphs - Translation - Reflection - Rotation - Enlargement - Describe enlargements - Combining transformations Equations, inequalities Probability (H) <ul style="list-style-type: none"> - Solving quadratics equations - Completing the square - Solving simple simultaneous equations - More simultaneous equations - Solving linear and quadratic simultaneous equations - Solving linear inequalities - Combined events - Mutually exclusive events - Experimental probability - Independent events and tree diagrams - Conditional probability - Venn diagrams and set notation 	Ratio and proportion (F) <ul style="list-style-type: none"> - Writing ratios - Using ratios - Ratios and measures - Comparing using ratios - Using proportion - Proportion and graphs - Proportion problems Multiplicative reasoning(H) <ul style="list-style-type: none"> - Growth and decay - Compound measures - Ratio and proportion 	Right angled triangles Probability (F) <ul style="list-style-type: none"> - Pythagoras' theorem - Trigonometry: the sine ratio - Trigonometry: the cosine ratio - Trigonometry: the tangent ratio - Finding lengths and angles using trigonometry - Calculating probability - Two events - Experimental probability - Venn diagrams - Tree diagrams Similarity and congruence More trigonometry (H) <ul style="list-style-type: none"> - Congruence - Geometric proof ad congruence - Similarity - Similarity in 3D solids - Accuracy - Graph of sine function - Graph of cosine function - The tangent function - Calculating areas and sine rule - The cosine rule and 2D trigonometric problems - Solving problems in 3D - Transforming trigonometric graphs 	Multiplicative reasoning (F) <ul style="list-style-type: none"> - Percentages - Growth and decay - Compound measures - Distance, speed and time - Direct and inverse proportion Further statistics (H) <ul style="list-style-type: none"> - Sampling - Cumulative frequency - Box plots - Drawing histograms - Interpreting histograms - Comparing and describing populations 	Construction, loci and bearings Quadratic equations and graphs (F) <ul style="list-style-type: none"> - 3D solids - Plans and elevations - Accurate drawings - Scale drawings and maps - Constructions - Loci and regions - Bearings - Expanding double brackets - Plotting quadratic graphs - Using quadratics graphs - Factorising quadratic expressions - Solving quadratic equations algebraically More algebra (H) <ul style="list-style-type: none"> - Rearranging formulae - Algebraic fractions - Simplifying algebraic fractions - Surds - Solving algebraic fraction equations - Functions - Proof Equations and graphs Circle theorems (H) <ul style="list-style-type: none"> - Solving simultaneous equations graphically - Representing inequalities graphically - Graphs of quadratic functions - Solving quadratic equations graphically - Graphs of cubic functions - Radii and chords - Tangents - Angles in circles - Applying circle theorems 	Perimeter, area and volume (2) (F) <ul style="list-style-type: none"> - Circumference of a circle - Area of a circle - Semicircles and sectors - Composite 2D shapes and cylinders - Pyramids and cones - Spheres and composite solids

Year 11	Fractions, indices and standard form Congruence, similarity and vectors (F) <ul style="list-style-type: none"> - Multiplying and dividing fractions - The laws of indices - Writing large numbers in standard form - Writing small numbers in standard form - Calculating with standard form - Similarity and enlargement - Using similarity - Congruence - Vectors Vectors & geometric proofs (H) <ul style="list-style-type: none"> - Vectors and vector notation - Vector arithmetic - Parallel vectors and collinear points - Solving geometric problems 	More algebra (F) <ul style="list-style-type: none"> - Graphs of cubic and reciprocal functions - Non-linear graphs - Solving simultaneous equations graphically - Solving simultaneous algebraically - Rearranging formulae - Proof Proportion and graphs (H) <ul style="list-style-type: none"> - Direct proportion - Inverse proportion - Exponential functions - Non-linear graphs - Translating graphs of functions - Reflecting and stretching graphs of functions 	Revision Revisit knowledge of Units 1-20 to ensure all students have the ability to reach their full potential at GCSE	Revision Revisit knowledge of Units 1-20 to ensure all students have the ability to reach their full potential at GCSE	GCSE Examinations	GCSE Examinations
	October Mocks		January Mocks		GCSE Examinations	
Year 12	Pure <ul style="list-style-type: none"> - Algebraic Expressions - Quadratics - Equations and inequalities - Graphs and transformations Applied <ul style="list-style-type: none"> - Data collection - Measures of location and spread - Representations of data Further Maths <ul style="list-style-type: none"> - Pure maths year 1 - Applied maths year 1 	Pure <ul style="list-style-type: none"> - Straight line graphs - Circles - Algebraic methods Applied <ul style="list-style-type: none"> - Modelling in mechanics - Constant acceleration Further Maths <ul style="list-style-type: none"> - Pure maths year 1 - Applied maths year 1 	Pure <ul style="list-style-type: none"> - The binomial expansion - Trigonometric ratios Applied <ul style="list-style-type: none"> - Forces and motion - Forces and friction Further Maths <ul style="list-style-type: none"> - Pure maths year 2 - Applied maths year 2 	Pure <ul style="list-style-type: none"> - Trigonometric identities and equations - Vectors Applied <ul style="list-style-type: none"> - Correlation - Probability - Statistical distribution Further Maths <ul style="list-style-type: none"> - Pure maths year 2 - Applied maths year 2 	Pure <ul style="list-style-type: none"> - Differentiation - Integration Applied <ul style="list-style-type: none"> - Hypothesis testing - Variable acceleration Further Maths <ul style="list-style-type: none"> - Pure maths year 2 - Applied maths year 2 	Pure <ul style="list-style-type: none"> - Exponentials and logarithms - Revision - Exam practice Applied <ul style="list-style-type: none"> - Revision - Exam practice Further Maths <ul style="list-style-type: none"> - Revision - Exam practice
	<ul style="list-style-type: none"> - Unit Assessments at the end of each unit - Two Mock exams during the academic year - Further Maths students sit the external Maths A Level exam in May/June

Pinner High School: English

KS3: English

KS4: GCSE English Language and GCSE English Literature Edexcel

KS5: A Level English Literature B AQA

Intent

- To engage the imagination of every student so that they can enjoy the experience of English at PHS.
- To teach the skills of analysis, evaluation, comparison and creative writing.
- To encourage every student to express their ideas clearly and with conviction both out loud and in writing, and to be astute listeners.
- To experiment with their own creative writing and to be able to analyse its effects.
- To ensure that every single student can access the curriculum through challenging and scaffolded tasks.
- To ensure that all students can detect assumptions in non-fiction and media texts and to be alert to their cultural contexts.

Implementation

- We regard the English Department as a place of innovation and we strive to keep our teaching and learning practice up to date, relevant and flexible. We have a diverse and inspiring curriculum which has been adapted to suit the needs of our students to ensure progress and opportunities for independent learning.
- We offer challenging texts and explore a range of forms, including poetry, prose and drama. Our sequencing is based on building blocks of learning so that students can develop key skills with confidence.
- We take the interleaving approach within our curriculum so that we are continuously revisiting key skills.
- We enrich students with vocabulary through Word of the Week, modelling spoken language, and considering subject-specific vocabulary for each scheme of work.
- Pupils' learning is enhanced by enrichment activities such as theatre and author visits, reading groups, poetry slams and writing competitions.
- Our schemes of work offer opportunities for independent learning and wider reading is well-promoted through staff recommendations, library lessons and reading lists.

- We observe each other teach, and focus upon different aspects of the teaching and learning process as we do so. We have begun inter-departmental lesson observations as a way of sharing good practice and fostering interdisciplinary and cross-curricular links, such as our Year 9 Writing for Change unit. Through evaluating our teaching and the quality of learning that takes place in our department, we hope to develop as individuals and as a group. This also enables us to address misconceptions and add to our current schemes of work.
- Our combination of different responsibilities and levels of experience makes discussion of what we are doing, and why and how we are doing it, paramount. The ethos of the department is distinctive and induction into its philosophies and methods is a continuing process.
- Our homework policy enables our students the opportunity to learn beyond the curriculum through wider reading, research and writing tasks. We use lesson time to consolidate and peer/self assess, as well as reflect and improve work.
- As a team we undertake a range of CPD to continue our practice as subject specialists and to support our delivery of a varied, diverse and relevant curriculum.

Impact

- To make literature a source of pleasure and excitement for all students and to prepare them for a lifetime as readers as well as well-rounded citizens.
- To be aware of the power of images (both moving and still) and to be confident about analysing these.
- To understand how language works so that they can write accurately and adapt their register to suit the situation.
- Through studying literature, pupils' eyes are opened to the human experience; they explore meaning and ambiguity as well as the beauty and power of language.

Career Development

Jobs may include, but are not limited to: journalist, copywriter, teacher, marketing executive, editor, museum curator, freelance writer, librarian, publisher, web editor, author, social media manager, PR manager, archivist.

There are numerous other careers in fields where strong communication and written English skills are top priorities. For example, within sectors such as media, advertising, law, retail and leisure.

Assessment

The aim of the assessment policy is to ensure that class teachers can see how individual pupils are developing year on year and during the year, and thus to maximise student learning progress. Monitoring of pupil progress in Years 7 to 13 is achieved through regular assessments which are recorded, as well as book scrutiny and sampling, combined with teacher records in mark books.

KS3: 6 significant pieces of work for each unit plus a whole class feedback activity every half term.

KS4: 6 significant pieces of work, including mock examinations for each GCSE paper

KS5: 6 significant pieces of work for each half term, including mock examinations for each A-level paper

Enrichment Opportunities & Super Curricular

Subscriptions:

- Massolit: provides short, curriculum-mapped video lectures for GCSE and A Level.
- Emagazine: a quarterly magazine for A-Level students of English subjects. Available in the Library

Trips: We offer Globe theatre trips for KS4 students and organise author talks are throughout the year for all students, particularly to celebrate events such World Book Day. A-level students are offered trips related to units of study. We also promote competitions throughout the year such as poetry slams, creative writing and essay writing. All of these trips, events and competitions are linked to units of study.

Heads Challenge Curriculum:

- Debate club
- Reading club
- Poetry club
- KS4 Intervention
- Literature in Context Club

Commitment to Equality, Diversity & Inclusion

We seek to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. The Curriculum is a key way of meeting these objectives. It has been designed to meet the needs of each individual student, providing opportunities which stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework should be set to meet these goals in delivering a challenging curriculum. This should be designed by each department to further deepen and broaden the knowledge and skill set of its students. All homework should be set on Google Classroom and is regularly checked by the Head of Department.

Intent

Scientific understanding is vital for students to understand the world around them and to drive change. We have designed a KS3 curriculum that ensures that students learn essential aspects of both scientific knowledge and skills. We aim to inspire students by fostering a sense of curiosity and creativity in the subject.

We as a Science department aim to deliver a broad and ambitious curriculum that challenges and enables all groups of students to make progress and achieve their potential. We as a department strive to make KS3 Science accessible to all learners through specific measures including differentiated and scaffolded tasks. We stretch through challenge tasks that are carefully planned into the curriculum within lessons and homework to push our higher attaining students further.

Content knowledge is built upon using a spiral approach, revisiting, interleaving and building upon key knowledge. Fundamentals of scientific understanding are learnt first. Concepts are then revisited and developed with greater detail. New concepts which require foundational understanding are introduced later, and finally concepts requiring linking multiple scientific ideas are introduced. We have designed the KS3 curriculum by working backwards from where we want students to be when they leave school as well as our understanding of what it means to be (and think like) a real world scientist.

The following key concepts and skills are interleaved throughout the KS3 Science curriculum:

Scientific Knowledge

- **Biology:** Key concepts like cells, organ systems, ecosystems, and the diversity of life.
- **Chemistry:** The structure of matter, particles, chemical and physical changes, atoms, bonds, and reactions, as well as acids and alkalis.
- **Physics:** Forces, electricity, energy, sound, light, magnetism, and the composition of the Earth and solar system.
- **Scientific Principles:** Understanding that science can be used to explain phenomena, predict behaviour, and analyse causes.

Scientific Skills

- **Working Scientifically:** This is the process of scientific investigation, which includes:
- **Planning and devising investigations:** Identifying variables (control, independent, dependent) and writing hypotheses.
- **Collecting and recording data:** Using tables to record results, making simple observations, and drawing simple bar and line graphs with appropriate scales.
- **Analysing and interpreting data:** Evaluating findings and drawing conclusions, and presenting them to others.
- **Safety:** Learning about hazards, making risk assessments, and conducting investigations safely.

Communication:

- **Using technical terminology:** Building an extended specialist vocabulary for accurate and precise scientific descriptions.
- **Applying mathematical knowledge:** Using maths for data collection, presentation, and analysis.
- **Information Literacy:** Using a variety of sources, including scientific websites and books, to find information.

Implementation

We have designed our 2-year KS3 science curriculum for Years 7-8 so that both science-specific and general skills are developed through repeated experience with each encounter being of increasing complexity. This spiral approach ensures that key concepts and skills are interleaved throughout the 2 years. For example, the understanding of forces, atomic structure, and particles studied in Year 7 is built upon in Year 8 and provides a foundation for more advanced concepts at KS4. Practical skills are also progressively developed over the 2 years. These interleaved key skills and concepts are assessed through formative and summative assessments, allowing us to check and address any misunderstandings and misconceptions.

We aim to go beyond the National Curriculum by linking KS3 science concepts and skills with real-world examples and a variety of extra-curricular activities tailored to the Year 7-8 age group. Specific KS3 enrichment opportunities are listed further below. As a department, we set high expectations for all KS3 pupils which creates a culture and love of learning science from an early stage.

Independent learning is emphasised through consolidation tasks, flipped learning homework activities, research projects, and encouraging Year 7-8 students to explore science outside the classroom. Student resources are available through Google Classrooms.

Communication of scientific ideas is central to becoming a confident scientist, so our 2-year KS3 curriculum is designed to develop literacy and oracy through explicit teaching of keywords, use of glossaries, and regular use of connectives, discussions, write-ups and exam command words appropriate for the Year 7-8 level. KS3-appropriate further reading lists are compiled and shared with students. Differentiation is key throughout KS3 science delivery. Mathematical skills, including graphing and data interpretation, are embedded and revisited when appropriate.

We provide support and challenge relative to student abilities in Years 7-8, including stretching the most able. Specific KS3 stretch and challenge activities are listed below.

We deliberately sequence our 2-year KS3 curriculum to ensure students build long-term scientific knowledge. Time is built in to support students in Years 7-8 with developing revision techniques suitable for this level. Department leads have designed KS3 schemes of work with suggested age-appropriate activities and resources, ensuring consistency of delivery across the 2 years.

Impact

At the KS3 level, knowledge and understanding are assessed through a mixture of in-class formative assessment, recall tasks, homework activities, end of topic assessments and Year 7-8 mock exams in line with whole school systems. Topic specific KS3 content and skills that are assessed in each unit are listed below.

End of topic assessments are written into the KS3 schemes of work. These differentiated summative checkpoints help meet the needs of all learners and challenge all to achieve. Following each one there is a reflection lesson, allowing KS3 students to receive and respond to feedback.

We regularly use formative assessment in KS3 to check, model and build key knowledge. Students assess how much they know through informal assessments, questioning and reflection tasks appropriate for 11-13 year olds. This allows us to address any KS3 misconceptions.

We track and monitor student progress at KS3 using whole school data analysis. This enables us to introduce support measures where required for Years 7-8.

The following indicators are used to assess the impact of the 2-year KS3 science curriculum:

KS3 teacher assessments and progress of students in Years 7-8

Uptake and engagement in KS3 science extra-curricular clubs

Student voice feedback from Years 7-8

KS3 successes are celebrated using whole school and departmental systems appropriate for this age group, such as star of the lesson, KS3 awards, parent feedback, and recognition in KS3 science displays.

Career Development

Studying science at the Key Stage 3 level lays a crucial foundation for students' future career prospects in STEM fields. Through engaging with the core disciplines of biology, chemistry, and physics, students develop critical thinking, problem-solving, and analytical skills that are highly valued in the modern workforce. KS3 science nurtures curiosity, encourages experimentation, and promotes evidence-based reasoning, equipping students with the tools they need to excel in a wide range of science-related professions. By exploring scientific concepts and their real-world applications, students can discover their passions and make informed decisions about their future career paths.

Science-related professions:

- *Biomedical Engineer*
- *Forensic Scientist*
- *Environmental Scientist*
- *Pharmacologist*
- *Aerospace Engineer*
- *Geologist*
- *Biochemist*
- *Meteorologist*
- *Marine Biologist*
- *Medical Laboratory Technician*
- *Chemical Engineer*
- *Zoologist*
- *Astrophysicist*
- *Neuroscientist*
- *Botanist*
- *Microbiologist*
- *Renewable Energy Engineer*
- *Science Teacher or Professor*
- *Science Journalist or Science Communicator*
- *Patent Attorney specializing in scientific inventions*

These professions represent just a sample of the many exciting career opportunities available to students who develop a strong foundation in science during their KS3 education. By nurturing their scientific knowledge and skills, students can position themselves for success in these and many other rewarding science-related fields.

Assessment

Knowledge and understanding is assessed throughout Year 7 and 8 with mini-mid topic checks, as well as End-of-Topic Tests and End of Year Exams. As well as test attainment, students are also assessed on their attitude to learning which includes their participation and effort in class, as well as their effort in completing homework activities.

Feedback is given in a range of formats including live marking, individualised verbal feedback, and using whole-class feedback forms which celebrate successes, highlight individual misconceptions and ensure that individuals are given the opportunity to improve.

Enrichment Opportunities & Super Curricular

Extra and super curricular offers are a key part of any science department, and that is no different at Pinner High School. The opportunities below are split into two categories: Enrichment for all and stretch for the most able. Throughout the school year, students have access to a variety of activities designed to further enhance their knowledge and skills:

Enrichment for all:

Students may have the opportunity to participate in clubs and activities such as science club, gardening club, criminal minds club, STEM survival, STEM save the world, STEM in the real world, and scientific drawing club. These vary throughout the academic year depending on student interest and staff availability. We also organise trips to scientific institutions including London Zoo, the Science Museum, and the Natural History Museum. House competitions run throughout the year, and British Science Week provides particularly rich opportunities for hands-on learning activities, expert talks, and whole-school events.

Stretch for the most able:

Opportunities include CREST award club, external competitions, and virtual or in-person visits from scientists. These activities are offered when available throughout the school year.

Commitment to Equality, Diversity & Inclusion

Our curriculum has been designed to equip all students with an understanding of science and how to apply this in the real world. We aim to meet the needs of all students by 'teaching to the top' providing opportunities that stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework is set to meet these goals in delivering a challenging curriculum designed to further deepen and broaden the knowledge and skill set of its students. All homework is set on Google Classroom and is regularly checked.

Student achievement is analysed following data points and interventions are put into place at both classroom level and departmental level to ensure that all students are given the opportunity to reach their full potential. Pupil premium funding is also available to ensure that all students have the same opportunities. This includes funding for trips and workbooks/revision guides.

The curriculum has been designed to ensure that it is diverse (including INSET training to ensure that all teachers are aware of the challenges and ways of dealing with these). Teaching about a range of different scientists is a particular departmental focus. Some curriculum time has been built in to ensure that all students are able to revise effectively.

Within the curriculum, topics explore a range of social issues e.g. contraception, climate change and scientific bias which will support all students to become responsible citizens in an ever-changing world.

Building student cultural capital is vital for many of our students. As such, we aim to develop this both inside and outside of lessons (see the 'enrichment for all' section above').

SEN provision within the department

As part of our commitment to equality, diversity and inclusion, SEN provision at department level is a key focus for the curriculum and class teachers. The progress of SEN students is monitored carefully.

Curriculum planning

Spiral learning alongside regular linking of concepts between different units ensures that understanding of key concepts are secure. Real world applications help create a culture of curiosity. Extracurricular activities and trips (for all pupils) further help SEN students build a love of the subject outside of their lessons. Regular low stakes assessments give a regular opportunity for feedback to help ensure progress is made.

Lesson resources

Lesson resources are available on googleclassroom. To support this, students are given access to knowledge organisers, topic overviews and glossaries. Lessons are designed to include differentiation and modelling to further support SEN students. These include model answers, scaffolding and sentence starters. Consideration has been put into any equipment issues for those with physical needs (e.g. plastic pipettes, helping set up equipment, clear graph paper)

Classroom teaching

At a classroom adult support is available for SEN students who require it. Teachers work closely with their LSAs. Some students have access to technology to further support their learning. Routines are key in establishing a positive learning atmosphere. A key focus of this is how lessons start as this will provide a consistent foundation for the remainder of the lesson. Routines include greeting students at the door and meaningful starter activities including recall tasks. Seating plans are carefully considered taking specific student needs into account.

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
<p>Unit Title: 1 - Intro to KS3 Science 2 - Working Scientifically 3 - Particle Theory</p> <p>Aims: The aim of this unit is to give students an introductory knowledge of the key aspects of science. They will then gain a fundamental knowledge of states of matter and separating mixtures.</p> <p>Lesson / Content Overview: States of matter: Students will learn the particle model focusing on spacing, movement, and shape. Students will be introduced to a heating and cooling curve. Students will get introduced to the terms melting, cooling, freezing, gas pressure, and diffusion. Students will take part in an investigation based on diffusion. Separating mixtures: Students will explore and apply the experimental methods of filtration, evaporation, distillation and chromatography.</p> <p>Skills / Concepts on: Focus on developing key scientific practical skills</p> <p>Homework Homework is set once a week for science with a variety of tasks ranging from creating models of atoms and cells, to home experiments, to completing practice question booklets. Homework is posted on Google classroom, and may be handed in within lesson or via Google Classroom.</p>	<p>Unit Title: 4 - Cells 5 - Structure and function of body systems</p> <p>Aims: The aim of this unit is to give students an introductory knowledge of cells, cell transport and movement in living things.</p> <p>Lesson / Content Overview: Cells: This topic will enable students to learn about a variety of different types of cell, how their structure is related to function and how we use microscopes to observe them. Movement: This topic will build upon the students' knowledge of cells and they will be introduced to the hierarchy of organisation in animals. Students will learn about the main parts of the skeleton, the different types of joints and how muscles cause movement.</p> <p>Skills / Concepts on: Focus on using key pieces of biological equipment including microscopes</p>	<p>Unit Title: 6 - Waves: Sound 7 - Waves: Light</p> <p>Aims: The aim of this unit is to give students an introductory knowledge of waves and their properties, and how we use them in the real world.</p> <p>Lesson / Content Overview: This topic is split into two halves, sound waves and light waves. This will therefore enable students to learn about a variety of different types of wave, their properties, how we detect them and how we use them in the real world.</p> <p>Skills / Concepts on: Students focus on using scientific models.</p>	<p>Unit Title: 8 - Elements, atoms and compounds 9 - Reactions</p> <p>Aims: The aim of this unit is to give students an introductory knowledge of atoms, elements, compounds and the periodic table.</p> <p>Lesson / Content Overview: Atoms and elements: The particle model will first be introduced and the periodic table with the symbols to each element. Periodic table: Students will be given a periodic table to annotate, carry out and watch a series of experiments with Group 1 and 7 elements.</p> <p>Skills / Concepts on: Focus on chemical equations</p>	<p>Unit Title: 10 - Space 11 - Reproduction</p> <p>Aims: The aim of this unit is to give students an introductory knowledge of the structure of the earth and the universe, and to make sure students are aware of the changes in the body that happen in puberty and the process of human reproduction.</p> <p>Lesson / Content Overview: This topic is split into two halves, initially looking at the earth and its structure, then moving on to knowledge about the universe. This will therefore enable students to learn about what the earth is made from, parts of the solar system and objects in the universe as a whole. Human reproduction: Students learn about the different parts of the male and female reproductive systems, and how these can lead to fertilisation.</p> <p>Skills / Concepts on: Students focus on using scientific models</p>	<p>Unit Title: 12 - Acids and Alkalies End of Year 7 Exam</p> <p>Aims: The aim of this unit is to introduce students to acids and alkalis, their properties and reactions.</p> <p>Lesson / Content Overview: Acids and Alkalies: Students will learn about the pH scale, indicators, neutralisation reactions and the properties of acids and alkalis. Students will explore everyday examples of acids and alkalis and carry out practical investigations into their reactions.</p> <p>Skills / Concepts on: Focus on practical skills including safe handling of acids and alkalis, use of indicators, and observing chemical reactions.</p>
<p>Stretch & Challenge The most able students can be stretched by making specific links to the KS4 states of matter/changes of state topic, including concepts such as latent heat and an understanding of intermolecular force. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge Students will come across their first dissection during this topic (chicken wings). The most able can be stretched by being given the freedom to investigate the dissection for themselves rather than following written instructions. Stretch activities signposted at lesson level</p>	<p>Stretch & Challenge Many of the most able students can be stretched during the waves topic in terms of their understanding of wave properties and real-world applications. The most able students could also develop their critical thinking skills regarding how waves are used in different technologies.</p>	<p>Stretch & Challenge The most able students can be stretched by making specific links to the KS4 chemistry lessons including concepts such as polymers and the history of the periodic table. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge Many of the most able students can be stretched during the space topic in terms of their research skills. This will be particularly appropriate during their model solar system homework. The most able students could also develop their critical thinking skills regarding evidence for how the universe began and how it will end.</p>	<p>Stretch & Challenge Students will come across further dissections in the plant topic. The most able can be stretched by being given the freedom to investigate the dissection for themselves rather than following written instructions. Stretch activities signposted at lesson level</p>
<p>Reading A Little History of Science, William Bynum Student reading lists are compiled by literacy representatives at department level termly, shared with students and have been purchased by the library</p>	<p>Reading Horrible science: Microscopic monsters Student reading lists are compiled by literacy representatives at department level termly, shared with students and have been purchased by the library</p>	<p>Reading How to Invent Everything, Ryan North. Student reading lists are compiled by literacy representatives at department level termly, shared with students and have been purchased by the library.</p>	<p>Reading Horrible Science: Chemical Chaos by Nick Arnold The Disappearing Spoon by Sam Kean</p>	<p>Reading Horrible Figures, Margot Lee Shetterly Student reading lists are compiled by literacy representatives at department level termly, shared with students and have been purchased by the library.</p>	<p>Reading Horrible science: Painful Poisons Student reading lists are compiled by literacy representatives at department level termly, shared with students and have been purchased by the library.</p>

Y e ar 8

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
<p>Unit Title: 13 - Forces 14 - Health and Lifestyle</p> <p>Aims: The aim of this unit is to develop students' understanding of forces and their effects, and to explore the key factors that affect human health and lifestyle choices.</p> <p>Lesson / Content Overview: Forces: Students will learn about contact and non-contact forces, balanced and unbalanced forces, friction, air resistance, and how forces affect the motion of objects. Students will investigate the relationship between force, mass and acceleration. Health and Lifestyle: Students will explore the components of a balanced diet, the effects of drugs, alcohol and smoking on the body, and the importance of exercise and sleep. Students will learn about the digestive system and how nutrients are absorbed and used by the body.</p> <p>Skills / Concepts: Focus on using and manipulating equations and developing an understanding of how scientific knowledge applies to everyday health decisions.</p>	<p>Unit Title: 15 - The Periodic Table 16 - Electricity and Magnetism</p> <p>Aims: The aim of this unit is to deepen students' understanding of the periodic table, elements and their properties, and to introduce the principles of electricity and magnetism.</p> <p>Lesson / Content Overview: The Periodic Table: Students will explore the structure of the periodic table, groups and periods, patterns in reactivity, and properties of metals and non-metals. Students will study key groups including alkali metals, halogens and noble gases. Electricity and Magnetism: Students will learn about electric circuits, series and parallel circuits, current, voltage and resistance. Students will explore magnetic fields, electromagnets and their practical applications.</p> <p>Skills / Concepts: Focus on interpreting patterns and trends, and building and analysing electrical circuits.</p>	<p>Unit Title: 17 - Ecosystem Processes 18 - Separation Techniques</p> <p>Aims: The aim of this unit is to develop students' understanding of how organisms interact within ecosystems and to build upon their knowledge of separation techniques from Year 7.</p> <p>Lesson / Content Overview: Ecosystem Processes: Students will learn about photosynthesis, respiration, food chains and food webs, and the cycling of materials through ecosystems. Students will explore interdependence, competition and how organisms are adapted to their environment. Separation Techniques: Students will revisit and extend their understanding of filtration, evaporation, distillation and chromatography. Students will learn about more complex separation methods and apply these techniques to solve practical problems.</p> <p>Skills / Concepts: Focus on practical skills in separation techniques and understanding energy transfer in ecosystems.</p>	<p>Unit Title: 19 - Material Science 20 - Energy</p> <p>Aims: The aim of this unit is to introduce students to the properties of materials and their uses, and to develop their understanding of energy stores, transfers and resources.</p> <p>Lesson / Content Overview: Material Science: Students will learn about the properties of materials including density, thermal conductivity, electrical conductivity and strength. Students will explore how materials are chosen for specific applications and investigate composites and ceramics. Energy: Students will study energy stores, energy transfers, conservation of energy, and efficiency. Students will explore renewable and non-renewable energy resources and their impact on the environment.</p> <p>Skills / Concepts: Focus on using and manipulating equations, and evaluating the advantages and disadvantages of different energy resources.</p>	<p>Unit Title: 21 - Adaptations and Inheritance 22 - Motion and Pressure</p> <p>Aims: The aim of this unit is to develop students' understanding of how organisms are adapted to their environment and how characteristics are inherited, and to introduce the concepts of motion and pressure.</p> <p>Lesson / Content Overview: Adaptations and Inheritance: Students will learn about variation, adaptation, natural selection and evolution. Students will explore how characteristics are inherited, including basic genetics, dominant and recessive alleles, and genetic diagrams. Motion and Pressure: Students will study speed, distance-time graphs, and calculating average speed. Students will learn about pressure in solids, liquids and gases, and explore applications such as hydraulics and atmospheric pressure.</p> <p>Skills / Concepts on: Focus on interpreting scientific data about climate change and understanding geological time scales.</p>	<p>Unit Title: 23 - The Earth and Atmosphere End of KS3 Test</p> <p>Aims: The aim of this unit is to develop students' understanding of the structure of the Earth, the atmosphere, climate and the rock cycle.</p> <p>Lesson / Content Overview: The Earth and Atmosphere: Students will learn about the structure of the Earth including the core, mantle and crust, and plate tectonics. Students will explore the composition of the atmosphere, the carbon cycle, climate change and global warming. Students will study the rock cycle, types of rocks and how they are formed.</p> <p>Skills / Concepts on: Focus on interpreting scientific data about climate change and understanding geological time scales.</p>
<p>Stretch & Challenge: The most able students can be stretched by exploring Newton's laws of motion in greater depth and making links to KS4 content. In Health and Lifestyle, students can research the long-term effects of lifestyle choices and evaluate evidence from scientific studies. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge The most able students can be stretched by exploring the history and development of the periodic table, predicting properties of unfamiliar elements, and investigating complex circuit designs. Students can also research real-world applications of electromagnets in modern technology. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge The most able students can be stretched by exploring biogeochemical cycles in depth and analysing complex food webs. Students can design their own separation techniques for novel mixtures and make links to industrial applications. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge The most able students can be stretched by calculating efficiency in complex systems and exploring the science behind emerging technologies such as smart materials. Higher level debating skills can be developed through discussions about energy policy and environmental impact. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge The most able students can be stretched by exploring more complex genetic crosses, including sex-linked characteristics and codominance. Students can analyse velocity-time graphs and make links to KS4 content on acceleration and momentum. Stretch activities signposted at lesson level.</p>	<p>Stretch & Challenge The most able students can be stretched by analysing complex climate data, evaluating evidence for climate change, and exploring the evidence for plate tectonics. Students can research current scientific debates about climate change mitigation strategies. Stretch activities signposted at lesson level.</p>

Pinner High School: Biology

KS4: Separate Sciences – Biology AQA [8461], Combined Science - AQA Trilogy [8464]

KS5: Biology AQA [7402]

Intent

Scientific understanding is vital for students to understand the world around them and to drive change. We have designed a curriculum that ensures that students learn essential aspects of both scientific knowledge and skills. We aim to inspire students by fostering a sense of curiosity and creativity in the subject.

We as a Biology department aim to deliver a broad and ambitious curriculum that challenges and enables all groups of students to make progress and achieve their potential. We as a department strive to make Biology accessible to all learners through specific measures including differentiated and scaffolded tasks. We stretch through challenge tasks that are carefully planned into the curriculum within lessons and homework to push our higher attaining students further.

Content knowledge is built upon using a spiral approach, revisiting, and building upon key knowledge and skills at each key stage. Fundamentals of scientific understanding are learnt first. Concepts are then revisited and developed with greater detail. New concepts which require foundational understanding are introduced later, and finally concepts requiring linking multiple scientific ideas are introduced. We have designed the curriculum by working backwards from where we want students to be when they leave school.

The following key concepts and skills are interleaved throughout the biology curriculum:

Scientific Knowledge (AO1 & 2):

- *Cell biology*
- *Organisation and Transport within multicellular organisms*
- *Health and Disease*
- *Bioenergetics: Energy Transfers in Nature*
- *Homeostasis and the nervous system*
- *Genetics and reproduction*
- *Ecology*

Scientific skills (AO1, 2 & 3):

- *Predicting cause and effect*
- *Experiment design and risk assessment*
- *How and why we use scientific equipment*
- *Presenting, using and manipulating data*
- *Drawing conclusions*
- *Changing theories*

- *Real world use of Science*

Implementation

- *Ethics and implications*

We have designed our curriculum so that both biology-specific and general skills are developed through repeated experience, with each encounter being of increasing complexity (also a spiral approach). This spiral approach ensures that key concepts and skills are interleaved throughout the curriculum. For example, cell transport at GCSE builds upon prior knowledge of simple diffusion. This is then explored further at KS5 where students are introduced to facilitated diffusion and co-transport. Skills are also built upon, including practical skills - which are ultimately assessed through required practicals at KS4 and KS5. These interleaved key skills and concepts are assessed through summative and formative assessments throughout the curriculum, allowing us to check and address any misunderstanding or misconceptions.

We aim to go beyond the National Curriculum by linking concepts and skills with real world examples and a variety of extra-curricular and super-curricular activities. Specific enrichment opportunities are listed below in this document.

As a department we set high expectations for all pupils which creates a culture and love of learning in our classrooms. Independent learning is emphasised regularly through consolidation tasks, flipped learning homework activities, research projects, and encouraging students to explore biology outside of the classroom through our wide range of extra and super curricular activities (later listed in this document). Student support outside the classroom is very important and as such students have access to a number of websites that we have subscribed to on the students behalf to support their learning. Student resources are available to all students through google classrooms.

Communication of ideas is central to becoming a confident Scientist, so our curriculum is designed to develop literacy and oracy through explicit teaching of keywords (in particular root words, prefixes and suffixes), use of key word glossaries, and regular use of connective, discussion, experimental write up and exam command words.

Reading lists are compiled by literacy representatives and shared with students, many have been purchased by the library. Further reading material is shared with KS5 students regularly to extend their knowledge beyond the curriculum and our aspiring medics have been encouraged to complete EPQs or independent research projects.

Differentiation is key throughout the delivery of the curriculum. A focus is made on differentiation within lessons. Mathematical skills, including graphing and data interpretation are embedded within the curriculum and revisited when appropriate. At GCSE students are grouped into three categories: Combined foundation, Combined higher and Separate. We aim to provide support and challenge relative to student ability levels and student groups, including stretching the most able. Specific stretch and challenge activities outside the classroom are listed further down in this document. Department leads have designed schemes of work for teachers to use, with suggested activities and resources, ensuring consistency of delivery.

We have placed a considerable emphasis on our pupils building their long-term memories by deliberately sequencing our curriculum to ensure students build on prior knowledge across the key stages. A focus is placed on revision techniques and time is built into the curriculum to support students with this.

Teacher training is essential to the delivery of the Biology curriculum. Teacher knowledge audits are therefore regularly carried out and CPD sessions are encouraged when appropriate.

Impact

At topic and lesson level, knowledge and understanding will be assessed through a mixture of in-class formative assessment, recall tasks, homework activities and also summative end of topic assessments and mock exams in line with whole school systems. Topic specific content and skills that are assessed in each unit are listed further below in this document.

At the end of each topic, our students are expected to consolidate key knowledge and skills through carefully planned end of topic assessments, which are written into the scheme of work. These summative checkpoints are differentiated to help meet the needs of all learners and challenge all to achieve. This helps to ensure that all students do make sufficient progress. Following each summative checkpoint there is a reflection lesson, allowing students to receive and respond to whole class and individual feedback.

As a department we regularly use formative assessments to check, model and build key knowledge. Students are regularly assessed on how much they know through in class informal assessment, skillful questioning, and reflection tasks. It also allows us to pick up on any misconceptions and ensure lesson objectives are understood.

As a department, we diligently track and monitor student progress, using departmental and whole school data analysis systems and software. This enables us to effectively introduce support measures such as parent communication or targeted intervention where required.

Faculty department meetings ensure that we regularly reflect and engage on how to develop and evolve our curriculum. We also use learning walks, book looks, classroom observations, student feedback and data analysis to inform our immediate goals and long term plans. We aim to maintain high standards within the department through regular sharing of best practice.

At topic and lesson level, knowledge and understanding will be assessed through a mixture of in-class formative assessment, recall tasks, homework activities and also summative end of topic assessments and mock exams in line with whole school systems. Topic specific content and skills that are assessed in each unit are listed further down in this document.

The long term impact of the Biology curriculum will be to analyse the following:

- 1) How many students are continuing to study Biology beyond KS5?
- 2) How many students are selecting Biology at KS5?
- 3) How many students choose to study separate sciences at GCSE
- 4) Grades and progress of all students at KS4

Student success is celebrated by following whole school systems such as star of the lesson, subject prefects and positive feedback with parents. We also use departmental systems such as: polaroid moments within the regular whole class feedback.

Career Development

Due to the broad range of content covered and the analytical nature of Biology, there is a huge variety of potential career paths. Time is spent looking at these prior to students choosing their GCSE pathway.

- *Medicine: A large number of students studying biology will aspire to this career route. As such, a medics society extracurricular group is run at Ks5 level to further support students interested in medical careers. The most popular branches include: medicine, dentistry, ophthalmology and veterinary.*
- *Biochemistry: This is one of the largest research areas in Biology. As such, a number of units focus on this sub-discipline. The topic Biological Molecules covers the structure and function of a range of monomers and polymers, the bonds that form polymers and macromolecules, and also different biochemical tests.*
- *Law: Biology students often move into the legal sector due to the critical thinking and problem solving nature of the subject.*

Assessment

KS4: Knowledge and understanding is assessed through a mixture of in-class formative assessment, walking talking mocks, homework activities and summative assessments following each unit. Homework activities and unit assessments are consistent across the department ensuring consistency of delivery. Feedback is given following unit assessments using departmental whole class feedback forms which celebrate successes, highlight individual misconceptions and ensure that individuals are given the opportunity to improve.

KS5: Knowledge and understanding is assessed through a mixture of in-class formative assessment, walking talking mocks, homework activities, weekly consolidation tasks and summative assessments following each unit and at various data points (mock exams at Christmas and the end of yr12). Consolidation tasks take place weekly and are based on exam style questions. Marks for these consolidation tasks are recorded so that any student issues can be identified. Consolidation tasks and unit assessments are consistent across the department ensuring consistency of delivery. Feedback is given following assessments so that individuals are able to celebrate successes, highlight misconceptions and ensure that students are given the opportunity to improve. Practical skills are assessed using exam board CPAC criteria when appropriate.

Enrichment Opportunities & Super Curricular

Extra and super curricular offers are a key part of any science department, and that is no different at Pinner High School. The opportunities below are split into two categories: Enrichment for all and stretch for the most able. The opportunities listed below provide a snapshot of the opportunities available to students to further enhance their knowledge and skills:

Enrichment for all:

- *KS4: Science week enhancement activities including talks and whole school activities.*
- *KS5: Science week enhancement activities including talks and whole school activities, trips including Kew Gardens.*

Stretch for the most able:

- *KS4: University visits, university outreach opportunities and competitions, bioengineering taster days, criminal minds club, gardening club, zoology club, science movie makers, virtual and in person visits from scientists, entries to KS4 Biology Olympiads, library resources including scientific subscriptions and recommended reading lists. Enrichment and competition activities shared with students when they become available.*

KS5: KS5 medics society, university visits, virtual and in person visits from scientists, Kew Gardens trip, essay competitions, mentoring opportunities, online webinars, Biology in action trip, Biology Olympiads, EPQs and independent research projects, biology prefects lead practicals for feeder Primary schools, library resources including Scientific subscriptions and recommended reading lists.

Commitment to Equality, Diversity & Inclusion

Our curriculum has been designed to equip all students with an understanding of science and how to apply this in the real world. We aim to meet the needs of all students by 'teaching to the top' providing opportunities that stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework is set to meet these goals in delivering a challenging curriculum designed to further deepen and broaden the knowledge and skill set of its students. All homework is set on Google Classroom and is regularly checked.

Student achievement is analysed following data points and interventions are put into place at both classroom level and departmental level to ensure that all students are given the opportunity to reach their full potential. Period 7 intervention sessions are available to students who require further support. 1:1 support is available for SEN students who require it. Pupil premium funding is also available to ensure that all students have the same opportunities. This includes funding for trips and workbooks/revision guides.

The curriculum has been designed to ensure that it is diverse (including INSET training to ensure that all teachers are aware of the challenges and ways of dealing with these). Teaching about a range of different scientists is a particular departmental focus. Some curriculum time has been built in to ensure that all students are able to revise effectively.

Within the curriculum, topics explore a range of social issues e.g. contraception, climate change and scientific bias which will support all students become responsible citizens in an ever-changing world.

Building student cultural capital is vital for many of our students. As such, we aim to develop this both inside and outside of lessons (see the 'enrichment for all' section above'). Mock interviews and university preparation is also available for KS5 students.

	Autumn 1:	Autumn 2:	Spring 1:	Spring 2:	Summer 1	Summer 2:
Year 9	<p>Topic Title: Unit 1a - Cell structure Unit 1c - Moving substances</p> <p>Aims: Building on KS3 knowledge of cells to enhance student knowledge of the different types of cells and how substances are transported between them.</p> <p>Lesson / Content Overview: 1 – Microscopes 2 – Animal and plant cells 3 – Eukaryotic and prokaryotic cells 4 – Specialisation in animals 5 – Specialisation in plants 6 – Diffusion 7 – Osmosis 8 – Active transport 9 – Exchanging materials</p> <p>Skills / Concepts on: There are two required practicals in this unit (microscopy and osmosis). There is therefore a focus on practical work. Knowledge of how to convert units is also needed in order to calculate magnification.</p>	<p>Topic Title: Unit 1b - Cell division</p> <p>Aims: Building on KS3 knowledge of cells to enhance student knowledge of how cells divide to allow growth and repair.</p> <p>Lesson / Content Overview: 1 – Cell division 2 – Growth and differentiation 3 – Stem cells 4 – Stem cell dilemmas</p> <p>Skills / Concepts on: Students develop their evaluative skills by considering the advantages and disadvantages of stem cell research. There is a big focus on ethics in this unit.</p>	<p>Topic Title: Unit 2a – Organisation and the digestive system</p> <p>Aims: Building on KS3 knowledge of the digestive system to enhance student knowledge of how our different organs work together to help us break down food.</p> <p>Lesson / Content Overview: 1 – Tissues and organs 2 – The human digestive system 3 – The chemistry of food 4 – Catalysts and enzymes 5 – Factors affecting enzyme action 6 – Making digestion efficient</p> <p>Skills / Concepts on: There are two required practicals in the topic (food tests and effect of pH on enzymes). Focus will be on graphing skills to analyse rate of reactions.</p>	<p>Topic Title: Unit 2b – Organising, breathing and circulation in animals Unit 2c - Organisation in plants</p> <p>Aims: Building on KS3 knowledge of the circulatory system to build on knowledge of the blood and the heart.</p> <p>Also builds upon knowledge of changing state to explain the process of transpiration in plants.</p> <p>Lesson / Content Overview: 1 – The blood 2 – The blood vessels 3 – The heart 4 – Helping the heart 5 – Breathing and gas exchange 6 – Tissues and organs in plants 7 – Transport systems in plants 8 - Evaporation and transpiration</p> <p>Skills / Concepts on: Students will observe or complete a heart dissection. There is a focus on how to correctly and safely use dissecting instruments.</p>	<p>Topic Title: Unit 4a – Photosynthesis</p> <p>Aims: Building on KS3 knowledge of photosynthesis to enhance student knowledge of the photosynthesis and its limiting factors</p> <p>Lesson / Content Overview: 1 – Photosynthesis 2 – Rate of photosynthesis 3 – How plants use glucose 4 – Making the most of photosynthesis</p> <p>Skills / Concepts on: Required practical focuses on identifying independent, dependent and control variables in an investigation.</p>	<p>Topic Title: Unit 4b – Respiration</p> <p>Aims: Developing knowledge of respiration from KS3 to include the equations for aerobic, anaerobic respiration in humans and fermentation and the implications of it in the real world.</p> <p>Lesson / Content Overview: 1 – Aerobic respiration 2 – The response to exercise 3 – Anaerobic respiration 4 – Metabolism and the liver</p> <p>Skills / Concepts on: Focus on planning investigations and writing a method</p>

	<p>Homework: <i>Homework is set once a week for each of the 3 sciences at GCSEs. This homework is set in accordance with the schools CARP model, with a variety of homework tasks, supporting students with Consolidation, Application, Reading and Preparation work. Students often complete consolidation tasks through the My-GCSE-Science website and Practice exam questions using Classroom42. In the lead-up to exams, students are given homework that will support them with their revision.</i></p>					
	<p>Stretch and Challenge: <i>Specific stretch activities include: magnification calculations involving unit conversions. Students are required to apply their knowledge to unfamiliar contexts.</i> <i>Challenge activities are signposted during the lesson and will be completed using red pen</i></p>	<p>Stretch and Challenge: <i>Specific stretch activities include: link to prophase, metaphase, anaphase and telophase at A-level standard. Students can be introduced to therapeutic stem cell cloning. Debating skills can also be developed here.</i> <i>Challenge activities are signposted during the lesson and will be completed using red pen</i></p>	<p>Stretch and Challenge: <i>Specific stretch activities include: students calculating the rate of reaction from the gradient of a graph.</i> <i>Challenge activities are signposted during the lesson and will be completed using red pen</i></p>	<p>Stretch and Challenge: <i>Specific stretch activities include: links to lung diseases and how they influence gas exchange (emphysema). There is also an opportunity to develop dissection skills here.</i> <i>Students can compare the breathing systems of mammals, to fish and insects.</i> <i>Challenge activities are signposted during the lesson and will be completed using red pen</i></p>	<p>Stretch and Challenge: <i>After completing the required practical, students could plan their own investigation to explore the effect of other limiting factors of photosynthesis.</i> <i>Challenge activities are signposted during the lesson and will be completed using red pen</i></p>	<p>Stretch and Challenge: <i>Students can conduct and complete their own investigation into the effects of exercise on the body.</i> <i>Students can be asked to link anaerobic respiration to brewing alcohol and bread baking.</i> <i>Challenge activities are signposted during the lesson and will be completed using red pen</i></p>

Y e a r	Topic Title: <i>Unit 3a - Communicable disease</i> Aims: <i>Applying knowledge of pathogens to understand different types of communicable diseases, caused by a range of pathogens.</i>	Topic Title: <i>Unit 3b – Non-communicable disease</i> <i>Unit 3c - Preventing and treating disease</i> Aims: <i>Building on prior knowledge of cell division to enhance student knowledge of the different types of cancer and the risk factors involved.</i> <i>Applying knowledge of disease to explain how the spread of disease can be prevented</i>	Topic Title: <i>B10 – The human nervous system</i> Aims: <i>This content is mostly new, therefore knowledge of the nervous system, the eye and brain must be established so students can appreciate how this is relevant in a real life context.</i>	Topic Title: <i>B11 – Hormonal coordination</i> Aims: <i>Building on knowledge from KS3 (reproduction) to enhance knowledge of the hormones involved in the menstrual cycle and their influence in contraception and IVF treatment as well as learning how hormones affect plant growth</i> Topic Title: <i>B17 Organising an ecosystem</i> Aims: <i>Building on prior knowledge of ecosystems to understanding or how materials are cycled (using knowledge of photosynthesis and respiration)</i>	Topic Title: <i>B16 - Adaptations, interdependence and competition</i> Aims: <i>Building on prior knowledge of adaptations in nature, students will explore how organisms interact with each other</i>	Aims: <i>GCSE End of year 10 Examination and feedback</i>
	Lesson / Content Overview: 1 – Pathogens and disease 2 – Preventing infections 3 – Viral and bacterial diseases 4 – Diseases caused by fungi and protists 5 – Human defence responses 6 - Plant diseases and responses Skills / Concepts on: <i>The required practical for this unit focuses on aseptic technique and growing bacteria safely in a lab.*</i>	Lesson / Content Overview: 1 – Non-communicable disease 2 – Cancer 3 – Smoking and the risk of disease 4 – Diet, exercise and disease 5 – Alcohol and other carcinogens Skills / Concepts on: <i>Focus on the difference between correlation and causation. Data interpretation.</i> Lesson / Content Overview: 1 – Vaccination 2 – Antibiotics and painkillers 3 – Developing and discovering drugs 4 – Monoclonal antibodies * Skills / Concepts on: <i>This is a particularly relevant topic as a result of Covid-19. Students will be required to analyse data and suggest methods to prevent the spread of disease in the future.</i>	Lesson / Content Overview: 1 – Principles of homeostasis 2 – The structure and function of the human nervous system 3 – Reflex actions 4 – The brain* 5 – The eye* 6 – Common problems of the eye* Skills / Concepts on: <i>Focus on the required practical which involves students applying their knowledge in order to evaluate data,</i>	Lesson / Content Overview: 1 – Principles of hormonal control 2 – The control of blood glucose 3 – Treating diabetes 4 – The role of negative feedback 5 – Human reproduction 6 – Hormones and the menstrual cycle 7 – The artificial control of fertility 8 – Infertility treatments 9 - Hormones in plants* Skills / Concepts on: <i>Focus on applying scientific concepts to the real world</i> Lesson / Content Overview: 1 – Feeding relationships 2 – Materials cycling 3 – The carbon cycle 4 – Rates of decomposition* Skills / Concepts on: <i>Focus on the application of biological cycles that link with GCSE chemistry.</i>	Lesson / Content Overview: 1 –Importance of communities 2 – organisms in their environment 3 – Competition in animals and plant 4 – Adaptations in animals and plants Skills / Concepts on: <i>Students will complete a required practical on distribution of organisms and use mathematical skills to work out the mode, median and mean in terms of abundance of the organism.</i>	

Assessment: <i>There is a short knowledge test at the end of the topic</i>	Assessment: <i>There is a short skills test at the end of the topic</i> Assessment: <i>There will be a 40min end of unit assessment covering unit 3: Infection & Response (topics 5, 6 and 7)</i>	Assessment: <i>There is a short skills test at the end of the topic</i>	Assessment: <i>There will be a 40min end of unit assessment covering unit 5 (topics 10 and 11)</i> Assessment: <i>There is a short knowledge test at the end of the topic</i>	Assessment: <i>There is a short skills test at the end of the topic</i>	Assessment:
Homework: <i>Homework is set once a week for each of the 3 sciences at GCSEs. This homework is set in accordance with the schools CARP model, with a variety of homework tasks, supporting students with Consolidation, Application, Reading and Preparation work. Students often complete consolidation tasks through the My-GCSE-Science website and Practice exam questions using Classroom42. In the lead-up to exams, students are given homework that will support them with their revision.</i>					
Stretch and Challenge: <i>This chapter lends itself well to developing graph analysis skills. HAP can learn to describe what graphs are showing, and analyse them to draw conclusions. Challenge activities are signposted during the lesson and will be completed using a red pen.</i>	Stretch and Challenge: <i>There is excellent opportunity for stretch and challenge as students explore the difference between correlation and causation. Students can also suggest how scientific studies can be improved and the importance of peer review can be discussed. Challenge activities are signposted during the lesson and will be completed using a red pen.</i> Stretch and Challenge: <i>There is excellent opportunity for stretch and challenge as students explore the difference between correlation and causation. Students can also suggest how scientific studies can be improved and the importance of peer review can be discussed. Challenge activities are signposted during the lesson and will be completed using a red pen.</i>	Stretch and Challenge: <i>Students can be provided with different symptoms of brain injuries and use this to make links to what area of the brain was damaged. Other problems of the eye can be explored, e.g. colour blindness. Students could research how the eyes of different animals are similar/ different to our own. Challenge activities are signposted during the lesson and will be completed using a red pen.</i>	Stretch and Challenge: <i>Stretch activities include: students can explore examples of positive feedback loops. How does this compare to negative feedback loops? Linking of hormones involved in reproduction and methods of contraception and infertility treatments will stretch the most able. Challenge activities are signposted during the lesson and will be completed using a red pen.</i> Stretch & Challenge <i>Stretch and challenge activities include links to chemistry (recap carbon cycle). *Students will also complete a required practical on decay of milk and gain mathematical skills to interpret data. Students can be introduced to A-level ideas such as the nitrogen cycle. Challenge activities are signposted during the lesson and will be completed using a red pen.</i>	Stretch and Challenge: <i>This topic introduces students to A Level concept of exploring organisms in the environment and preparing the mto use the equipment independently while being respectful to nature. Challenge activities are signposted during the lesson and will be completed using a red pen.</i>

		"The Immortal Life of Henrietta Lacks" by Rebecca Skloot				
	Autumn 1:	Autumn 2:	Spring 1:	Spring 2:	Summer 1	Summer 2:
Year 11	Topic Title: <i>B18 - Biodiversity</i> Aims: <i>To build upon prior knowledge of food chains by exploring energy transfer between organisms and looking at the impact humans have had on biodiversity and how we can become more sustainable</i>	Topic Title: <i>B13 – Reproduction</i> Aims: <i>Building on knowledge of cell division from B2 to understand more about DNA and the genome.</i>	Topic Title: <i>B14 - Variation and evolution</i> Aims: <i>Building on knowledge of evolution and natural selection from KS3 to understand more about variation and cloning techniques.</i>	Topic Title: <i>B15 - Genetics and evolution</i> Aims: <i>Building on knowledge from KS3 to further understand the theory of evolution.</i>	Topic Title: <i>B12 - Waste Management (Separate science only)</i> <i>Combined Science Revision for GCSE</i> Aims: <i>Building on B10 knowledge of homeostasis and B1 knowledge of cell transport to develop students' knowledge of how we remove waste from our bodies.</i>	Aims: <i>GCSE Examination</i>
	Lesson / Content Overview: 1 – The human Population 2 – Land, water and air pollution 3 – Deforestation and peat destruction 4 – Climate change 5 – Maintaining biodiversity 6 - Biomass & trophic levels* 7 - Food security and sustainability* Skills / Concepts on: Focus on the application of biodiversity in the real world.	Lesson / Content Overview: 1 –Types of reproduction 2 – Cell division in sexual reproduction 3 –DNA and the genome 4 –Protein synthesis 5 –Gene expression and mutation 6 –Inheritance in action 7 –Inherited disorders 8 –Screening for genetic disorders Skills / Concepts on: Focus on using genetic diagrams to calculate probability of inherited characteristics.	Lesson / Content Overview: 1 – Variation 2 – Evolution by natural selection 3 – Selective breeding 4 – Genetic engineering 5 – Cloning 6 – Ethics of genetic engineering Skills / Concepts on: Focus on the evaluation of the ethics of genetic technologies and how this could impact our lives in the future.	Lesson / Content Overview: 1 – The history of genetics 2 – Theories of evolution 3 – Accepting Darwin's ideas 4 – Evolution and speciation 5 – Evidence for evolution 6 – Fossils and extinction 7 – Antibiotic resistant bacteria 8 – Classification Skills / Concepts on: Focus on the use of evidence to see how scientific theories have developed over time	Lesson / Content Overview: 1 – Controlling body temperature 2 – Removing waste products 3 – The human kidney 4 – Dialysis 5 – Kidney transplants Skills / Concepts on: Focus on applying scientific concepts to the real world and evaluative skills.	Lesson / Content Overview:
	Assessment: There will be a 40min end of unit assessment covering unit 7:Ecology (topics 16, 17 and 18)	Assessment: There is a short skills test at the end of the topic	Assessment: There is a short knowledge test at the end of the topic	Assessment: There will be a 40min end of unit assessment covering unit 6:Inheritance, evolution and variation (topics 13, 14 and 15)	Assessment: Practice questions and revision strategies	Assessment:
	Homework: Homework is set once a week for each of the 3 sciences at GCSEs. This homework is set in accordance with the schools CARP model, with a variety of homework tasks, supporting students with Consolidation, Application, Reading and Preparation work. Students often complete consolidation tasks through the My-GCSE-Science website and Practice exam questions using Classroom42. In the lead-up to exams, students are given homework that will support them with their revision. Within Year 11, Exam questions and full past papers will feature more frequently within homework tasks.					

	<p>Stretch and Challenge: Specific stretch activities include: link to A-level standard looking at biomass energy transfer and calculations. Students can develop critical thinking skills. Challenge activities are signposted during the lesson and will be completed using red pen</p>	<p>Stretch and Challenge: Online homework tasks are set using our online packages (My GCSE Science and Kerboodle). Students complete homework once per week. There will be additional consolidation work set over the Christmas break. Leading up to the end of unit test, students complete summary and practice questions. Challenge activities are signposted during the lesson and will be completed using red pen</p>	<p>Stretch and Challenge: Students can be stretched by introducing some unusual classification groups. Students can also consider different organisms that may have been difficult to classify. Most able students will develop an appreciation for how scientific theories are constantly changing. Challenge activities are signposted during the lesson and will be completed using red pen.</p>	<p>Stretch and Challenge: Stretch and challenge activities include links to chemistry (recap combustion word equations). Students can also revise knowledge of renewable energy sources and climate change. Students can be introduced to A-level ideas such as the nitrogen cycle. Challenge activities are signposted during the lesson and will be completed using red pen</p>	<p>Stretch and Challenge: A focus on the in-depth structure of the kidney (introducing A-level terminology) will stretch the most able. Students could analyse the structure of a camel's kidney and observe how it is adapted to conserve water. Stretch activities signposted at lesson level</p>	
	<p>Reading: "The Climate Book" by Greta Thunberg</p>	<p>Reading: "The selfish gene" by Richard Dawkins</p>	<p>Reading: "The Adoration of Jenna Fox" by Mary E. Pearson</p>	<p>Reading: "Sapiens" by Yuval Noah Harari</p>	<p>Reading: "The Sixth Extinction: An Unnatural History" by Elizabeth Kolbert</p>	<p>Reading:</p>
	Autumn 1:	Autumn 2:	Spring 1:	Spring 2:	Summer 1	Summer 2:

Y e a r 1 2	Unit Title: Section 1 - Biological molecules Section 2 - Cell structure Aims: <i>Building on KS4 knowledge of carbohydrates, proteins and lipids.</i> <i>Building on KS4 knowledge of cell structure.</i>	Unit Title: Section 1 - Biological molecules Section 2 – Cell structure Aims: <i>Extend knowledge of DNA structure to include DNA replication and RNA.</i> <i>Building on KS4 knowledge of methods of transport</i>	Unit Title: Section 4 – Genetic information, variation and relationships between organisms Section 2 – Cell structure Aims: <i>Building on KS4 knowledge of genetics to improve subject knowledge of protein synthesis and variation.</i> <i>Building on KS4 knowledge of pathogens and disease to further understand the workings of the immune response.</i>	Unit Title: Section 4 – Genetic information, variation and relationships between organisms Section 3 - Organisms exchange substances with the environment Aims: <i>Building on KS4 knowledge of classification and biodiversity.</i> <i>Extent KS4 knowledge of the digestive and respiratory system.</i> <i>Building on KS4 knowledge of the circulatory system and transport systems in plants.</i>	Unit Title: Section 5 – Energy transfer in and between organisms Aims: <i>Building on KS4 knowledge of bioenergetics and nutrients cycling</i>	Aims:
	Lesson / Content Overview: Topic 1 – Biological molecules Topic 3 - Cell structure Skills / Concepts on: <i>Focus on applications of biological molecules in the real world</i> <i>There are a number of required practicals for this unit. There is therefore a focus on practical skills throughout this term.</i>	Lesson / Content Overview: Topic 2 - Nucleic acids Topic 4 - Transport across cell membranes Skills / Concepts on: <i>Focus on the applications of Biology in the real world and applying knowledge to unfamiliar contexts</i> <i>There are a number of required practicals for this unit. There is therefore a focus on practical skills throughout this term.</i>	Lesson / Content Overview: Topic 8 - DNA, genes and protein synthesis Topic 9 - Genetic diversity Topic 5 - Cell recognition and the immune system Skills / Concepts on: <i>Focus on the applications of Biology in the real world and applying knowledge to unfamiliar contexts.</i>	Lesson / Content Overview: Topic 10 - Biodiversity Topic 7b Mass transport in plants Topic 6 - Exchange Topic 7a Mass Transport in animals Skills / Concepts on: <i>Students focus on planning quantitative investigations on variation. This will also include a focus on data analysis and statistical calculations.</i> <i>Dissection skills are developed during this unit. There is a focus on how to safely and correctly use dissection instruments.</i>	Lesson / Content Overview: Topic 11 – Photosynthesis Topic 13 – Energy and ecosystems Skills / Concepts on: <i>Respiration (A-level topics) can be introduced in preparation for year 13</i>	Lesson / Content Overview:
	Assessment: <i>Settling in test at the start of year 12</i> <i>End of chapter test for Topic 1: Biological molecules.</i> <i>End of chapter test for Topic 3: Cells</i> <i>Required Practical 1: Enzyme controlled reaction</i> <i>Required Practical 2 Root tip Squash</i>	Assessment: <i>End of chapter test for Topic 2:Nucleic acids</i> <i>End of chapter test for Topic 4:Cell transport</i> <i>Required practical 3:Osmosis</i> <i>Required practical 4: Transport across the cell membrane</i>	Assessment: <i>End of chapter test for Topic 8 DNA, genes & protein synthesis</i> <i>End of chapter test for Topic 9: Genetic Diversity</i> <i>Required Practical 6: Aseptic Techniques</i>	Assessment: <i>End of chapter test for Topic 10: Biodiversity</i> <i>End of chapter test for Topic 6: Exchange</i> <i>End of chapter test for Topic 7: Mass transport</i> <i>Required Practical 5: Heart/Fish dissection</i>	Assessment: <i>End of chapter test for Topic 13: Energy in ecosystems</i> <i>Required practical 7: Plant pigment chromatography</i> <i>Required practical 8: Activity of chloroplast</i>	Assessment:

	<p>Homework: Homework is set twice a week within Year 12, with a total of 5 hours of work set for students to complete independently. This homework is set in accordance with the school's CARP model, with a variety of homework tasks, supporting students with Consolidation, Application, Reading and Preparation work. Students often complete consolidation tasks through worksheets and online quizzing platforms such as Wayground, and development of application is supported through exam questions from 'StudyMind' and 'PMT'. Students are also regularly set flipped learning work to prepare them for the following week of lessons.</p> <p>Weekly independent learning expectations include, finishing incomplete notes from class, creating flashcards of keywords from lessons, completing a mind-map of a subtopic each week.</p>					
	<p>Stretch and Challenge: Medics society group.</p> <p>Students can explore additional specialised cells.</p> <p>Students can explore additional proteins like collagen and keratin</p> <p>Students can link their knowledge of the cell cycle to explain how various cancer treatments work.</p> <p>Stretch activities signposted at lesson level</p>	<p>Stretch and Challenge: Medics society group.</p> <p>When learning about DNA replication, mutations can be introduced.</p> <p>Discussion of the Meselson-Stahl experiment and analysis of their results will stretch the most able.</p> <p>Higher level thinking could be applied by asking students to evaluate the ethical issues associated with vaccination programmes.</p> <p>Stretch activities signposted at lesson level</p>	<p>Stretch and Challenge: Medics society group.</p> <p>Stretch activities could include: providing students with data from experimental work investigating the role of nucleic acids e.g. the Hershey-Chase experiment and asking them to interpret it.</p> <p>More able students could complete further research into mutations such as sickle cell anaemia, albinism, cancer and Down's syndrome. Beneficial mutations can also be explored (eg. lactase enzyme)</p> <p>Stretch activities signposted at lesson level</p>	<p>Stretch and Challenge: Medics society group.</p> <p>Students could research and investigate comparative anatomy and embryology.</p> <p>Designing their own dissection practical and selecting appropriate equipment to carry out the dissection.</p> <p>Stretch activities signposted at lesson level</p>	<p>Stretch and Challenge: Medics society group.</p> <p>Students learn how to use specialist equipment during required practicals and interpret data and come to a valid conclusion.</p>	
	<p>Reading: "The Song of the Cell" by Siddhartha Mukherjee</p> <p>"Life on the Edge: The Coming of Age of Quantum Biology" by Jim Al-Khalili</p>	<p>Reading: "The Immortal Life of Henrietta Lacks" by Rebecca Skloot</p>	<p>Reading: "The Body: A Guide for Occupants" by Bill Bryson</p> <p>"The Hot Zone: The Chilling True Story of an Ebola Outbreak" by Richard Preston</p>	<p>Reading: "Caesar's Last Breath: The Epic Story of The Air Around Us" by Sam Kean</p> <p>"The Brilliant Abyss: Exploring the Majestic Hidden Life of the Deep Ocean, and the Looming Threat That Imperils It" by Helen Scales</p> <p>"The Sixth Extinction: An Unnatural History" by Elizabeth Kolbert</p>	<p>Reading: "The Hidden Life of Trees" by Peter Wohlleben</p>	Reading:
	Autumn 1:	Autumn 2:	Spring 1:	Spring 2:	Summer 1	Summer 2:

Y e a r 1 3	<p>Unit Title: Section 5 – Energy transfer in and between organisms Section 7 - Genetics, populations, evolution and ecosystems.</p> <p>Aims: Building on KS4 knowledge of bioenergetics and nutrients cycling Building on KS4 knowledge of genetics and inheritance and applying it to real life contexts.</p>	<p>Unit Title: Section 6 - Organisms respond to changes in their environment Section 7 - Genetics, populations, evolution and ecosystems.</p> <p>Aims: Developing knowledge of the human nervous system from KS4. Building on KS4 knowledge of genetics and inheritance and applying it to real life contexts.</p>	<p>Section 6 - Organisms respond to changes in their environment Section 8 – The control of gene expression</p> <p>Aims: Extend knowledge of homeostasis from KS4 Build upon knowledge of mutation and gene expression Build upon knowledge of stem cells and the human genome project from KS4</p>	<p>Aims: Essay writing skills/Required Practical catch up sessions/ Revision</p>	<p>Aims: A Level Exams</p>
	<p>Lesson / Content Overview: Topic 12 – Respiration Topic 17 - Inherited change Topic 18 - Populations and evolution</p> <p>Skills / Concepts on: There is therefore a focus on practical skills during required practical 9. Focus on using genetic diagrams to calculate probability of inherited characteristics. There is a focus on data analysis and statistical calculations.</p>	<p>Lesson / Content Overview: Topic 14 - Response to stimuli Topic 15 - Nervous coordination of muscle Topic 19 - Populations in ecosystems</p> <p>Skills / Concepts on: Focus on using modelling to describe the passage of an action potential. There is a focus on data analysis and statistical calculations.</p>	<p>Lesson / Content Overview: Topic 16 - Homeostasis Topic 20 –Gene expression Topic 21 - Recombinant DNA technology</p> <p>Skills / Concepts on: Understanding the applications of homeostasis in the real world, including unfamiliar contexts. Focus on the applications of Biology in the real world and applying knowledge to unfamiliar contexts. Understanding the applications of DNA technologies in the real world.</p>		
	<p>Assessment: End of chapter test for Topics 11 & 12 Photosynthesis & Respiration End of chapter test for Topic 17:Inherited Change Required practical 9: Respiration in yeast</p>	<p>Assessment: End of chapter test for Topic 14: Response to Stimuli End of chapter test for Topic 15: Nervous End of chapter test for Topic 19: Populations in Ecosystems Students will also have November Mocks</p> <p>Required Practical 10: Response to stimuli Required Practical 12: Distribution of species</p>	<p>Assessment: End of chapter test for Topic 16: Homeostasis End of chapter test for Topic 20: Gene Expression End of chapter test for Topic 21: Recombinant DNA</p> <p>Required Practical 11: Glucose in urine</p>		

<p>Homework:</p> <p>Homework is set twice a week within Year 12, with a total of 5 hours of work set for students to complete independently. This homework is set in accordance with the school's CARP model, with a variety of homework tasks, supporting students with Consolidation, Application, Reading and Preparation work. Students often complete consolidation tasks through worksheets and online quizzing platforms such as Wayground, and development of application is supported through exam questions from 'StudyMind' and 'PMT'. Students are also regularly set flipped learning work to prepare them for the following week of lessons.</p> <p>Weekly independent learning expectations include, finishing incomplete notes from class, creating flashcards of keywords from lessons, completing a mind-map of a subtopic each week.</p> <p>In addition to the above Year 12 expectations, Year 13 students are expected to complete a past exam paper each half-term, and a 2 practice essays each half-term.</p>	
<p>Stretch and Challenge: <i>Medics society group.</i> <i>Students could research examples involving sex linkage eg Duchenne muscular dystrophy and Haemophilia.</i> <i>Students could also conduct a chi-square statistical test by flipping a coin or rolling a dice.</i> <i>Stretch activities signposted at lesson level</i></p>	<p>Stretch and Challenge: <i>Medics society group.</i> <i>Planning an investigation to assess how woodlice respond to different variables. This would provide a good opportunity for stretching and challenge.</i> <i>To further develop investigative skills, students may carry out investigations into receptors within the skin.</i> <i>Stretch activities signposted at lesson level</i></p> <p>Stretch and Challenge: <i>Medics society group.</i> <i>Students could use calculators with exponential functions and a logarithmic scale to represent the increase in the number of copies of DNA fragments present after multiple cycles of PCR.</i> <i>The Virtual PCR lab would also stretch the most able.</i> <i>Students could also identify examples of DNA fingerprinting in the news. This may include the identification of most suitable zoo animals for breeding programmes, medical diagnosis, forensic science.</i></p>
<p>Reading: <i>"The Omnivore's Dilemma: A Natural History of Four Meals" by Michael Pollan</i></p>	<p>Reading: <i>"Sapiens" by Yuval Noah Harari</i> <i>"Do No Harm: Stories of Life, Death and Brain Surgery" by Henry Marsh</i></p> <p>Reading: <i>"The Code Breaker" by Walter Isaacson</i> <i>"The selfish gene" by Richard Dawkins</i></p>

Those lessons with * will be for separate Biology students to be completed in year 11

Curriculum Overview: CHEMISTRY

KS4: Separate Sciences – Chemistry AQA [8462], Combined Science - AQA Trilogy [8464]

KS5: Chemistry AQA [7405]

Intent

Scientific understanding is vital for students to understand the world around them and to drive change in the world. We have designed a curriculum that ensures that students learn essential aspects of both scientific knowledge and skills, as well as fostering a sense of curiosity and creativity in the subject. We aim to inspire students by fostering a sense of curiosity and creativity throughout the curriculum.

We as a Chemistry department aim to deliver a broad, ambitious curriculum that challenges and enables all groups of students to make progress and achieve their potential. Content knowledge is built upon using a spiral approach, revisiting and building upon key knowledge and skills at each key stage. Fundamentals of atomic structure, the building blocks are learnt first. Concepts are then revisited and developed with greater detail. New concepts which require foundational understanding are introduced later, and finally concepts requiring linking multiple scientific ideas are introduced.

This is the following key skills are interleaved throughout the Chemistry curriculum:

Scientific Knowledge (AO1 & 2):

- *Atomic structure and the Periodic Table*
- *Structure, bonding and the properties of matter*
- *Chemical changes*
- *Energy changes in chemistry*
- *Rate and extent of chemical change*
- *Organic Chemistry and Chemical analysis*
- *Earth and atmospheric science*

Scientific skills (AO1, 2 & 3):

- *Predicting cause and effect*
- *Experiment design and risk assessment*
- *How and why we use scientific equipment*
- *Scientific vocabulary, quantities, units, symbols and nomenclature*
- *Presenting, using and manipulating data*
- *Drawing conclusions*
- *Changing theories*
- *Real world use of Science*
- *Ethics and implications*

Implementation

We have designed our curriculum so that both Chemistry-specific and general skills are developed through repeated experience, with each encounter being of increasing complexity. This spiral approach ensures that key concepts are interleaved throughout the curriculum; in the context of content increasing complexity (also a spiral approach). For example, the concept of electrolysis, separating ionic compounds by electricity is taught after atomic structure, ions and bonding has been introduced. This is explored further in KS5 with electrode potential of metals. These interleaved key skills and concepts are assessed through formative and summative assessments throughout the curriculum allowing check and address misunderstanding or misconceptions.

As a department we set high expectations for all pupils which creates a culture of exploration and love of learning in our classrooms. Independent learning is emphasised regularly through consolidation tasks, flipped learning homework activities, research projects and encouraging students to explore Chemistry outside the classroom. Student support outside the classroom is very important and as such students have access to a number of websites that we have subscribed to on the students behalf, to support learning. Student resources are available to all students through google classrooms

We aim to go beyond the National Curriculum by linking concepts with real world examples, these are woven throughout the curriculum and a variety of enrichment opportunities listed below in this document.

Communication of ideas is central to becoming a confident Scientist, so our curriculum is designed to develop literacy and oracy through explicit teaching of keywords (in particular root words, prefixes and suffixes), use of key word glossaries, and regular use of connective, discussion, experimental write up and exam command words.

Differentiation is key throughout the delivery of the curriculum. A focus is made on differentiation within lessons. Mathematical skills, including graphing and data interpretation are embedded within the curriculum and revisited when appropriate. At GCSE students are grouped into three categories Combined foundation, Combined higher and Separate. We aim to provide support and challenge relative to student ability levels and student groups. Specific stretch and challenge activities outside the classroom and are listed below. Department leads have designed schemes of work for teachers to use, with suggested activities and resources, ensuring consistency of delivery. Student support is very important and as such students have access to a number of websites to support their learning (including a Pinner High School science specific site). The Library has key texts and access to online versions.

We have placed considerable emphasis on our students building their long-term memories by deliberately sequencing our curriculum to ensure students build on prior knowledge across the key stages. A focus is placed on revision techniques and time is built into the curriculum to support students with this.

Teacher training is essential to the delivery of the Chemistry curriculum, in particular for non-specialist teachers. Teacher knowledge audits are therefore regularly carried out and CPD sessions run where appropriate.

Impact

At topic and lesson level, knowledge and understanding will be assessed through a mixture of in-class formative assessment, recall tasks, homework activities and also summative end of topic assessments and mock exams in line with whole school systems. Topic specific content and skills that are assessed in each unit are listed further below in this document.

At the end of each topic, our students are expected to independently consolidate key knowledge and skills through carefully planned end of topic assessments which are written into the scheme of work. These summative checkpoints are differentiated to help meet the needs of all learners and challenge all to achieve. This helps to ensure that students make sufficient progress. Following each summative checkpoint there is a reflection lesson, allowing students to receive and respond to whole class and individual feedback.

We as a department, regularly use formative assessment to check, model and build key knowledge. Students regularly assess how much they know through in class informal assessments, skilful questioning and reflections tasks. It also allows us to pick up on any misconceptions and ensure lesson objectives are understood.

As a department, we diligently track and monitor student progress using departmental and whole school data analysis systems and software. This enables us to effectively introduce support measures such as parent communication or targeted intervention where required.

Faculty department meetings ensure that we regularly reflect and engage on how to develop and evolve our curriculum. We also use learning walks, book looks, classroom observations, student feedback and data analysis to inform our immediate goals and long term plans. We aim to maintain high standards within the department through regular sharing of best practice.

The long term impact of the Chemistry curriculum will be to analyse the following:

- 1) How many students are continuing to study Chemistry beyond KS5
- 2) How many students are selecting Chemistry at KS5
- 3) Grades and progress of all students at KS4

Student successes are celebrated by following whole school systems, such as star of the lessons, end of year awards, subject prefects and positive feedback with parents. We also use departmental systems such as polaroid moments within the regular whole class feedback following each assessment.

Career Development

Chemistry is an essential science that impacts numerous aspects of our lives, driving advancements in healthcare, technology, sustainability, and our understanding of the world. Career potential for those who take Chemistry is wide and varied with opportunities to innovate and make scientific breakthroughs. Here is a list of a few careers:

Forensic scientist, Analytical chemist, Pharmacist, Environment scientist, Chemical engineer as well as Medicine and Dentistry. Students have the opportunity to take part in Crest Award projects at Pinner High that enable students design and carry out investigations of their own.

Assessment

KS3: Knowledge and understanding is assessed through a mixture of in-class formative assessment, homework activities and summative assessments each half term. Homework activities and half termly assessments are consistent across the department ensuring consistency of delivery. Feedback is given following assessments using departmental whole class feedback forms which celebrate successes, highlight individual misconceptions and ensure that individuals are given the opportunity to improve.

KS4: Knowledge and understanding is assessed through a mixture of in-class formative assessment, walking talking mocks, homework activities and summative assessments following each unit. Homework activities and unit assessments are consistent across the department ensuring consistency of delivery. Feedback is given following unit assessments using departmental whole class feedback forms which celebrate successes, highlight individual misconceptions and ensure that individuals are given the opportunity to improve.

KS5: Knowledge and understanding is assessed through a mixture of in-class formative assessment, walking talking mocks, homework activities, weekly consolidation tasks and summative assessments following each unit and at various data points (mock exams at Christmas and the end of yr12). Consolidation tasks take place weekly and are based on exam style questions. Marks for these consolidation tasks are recorded so that any student issues can be identified. Consolidation tasks and unit assessments are consistent across the department ensuring consistency of delivery. Feedback is given following assessments so that individuals are able to celebrate successes, highlight misconceptions and ensure that students are given the opportunity to improve. Practical skills are assessed using exam board CPAC criteria when appropriate.

Enrichment Opportunities & Super Curricular

Extra and super curricular offers are a key part of any science department, and that is no different at Pinner High School. The opportunities below are split into two categories: Enrichment for all and stretch for the most able. The opportunities listed below provide a snapshot of the opportunities available to students to further enhance their knowledge and skills:

Enrichment for all:

- *KS3: Weekly science club enhancing student knowledge, trips for all students to scientific institutions including London Zoo, Science museum, natural history museum, house competitions, science week enhancement activities including talks and whole school activities.*
- *KS4: Science week enhancement activities including talks and whole school activities.*
- *KS5: Science week enhancement activities including talks and whole school activities, trips including the National Physical Laboratory.*

Stretch for the most able:

- *KS3-KS4: CREST award club, external competitions, university visits, virtual and in person visits from scientists. Library resources including Scientifica subscriptions are available with enrichment and stretch activities shared with students when they become available. Students given help with any applications to these (e.g. STEM potential programs, competitions, work experience opportunities)*
- *KS5: KS5 Engineering group, medical group, university visits, virtual and in person visits from scientists, entries to KS5 Chemistry Olympiads, Library resources including Scientifica subscriptions. Enrichment and stretch activities shared with students when they become available. Students given help with any applications to these (e.g. STEM potential programs, competitions, work experience opportunities)*

Commitment to Equality, Diversity & Inclusion

Our curriculum has been designed to equip all students with an understanding of science and how to apply this in the real world. We aim to meet the needs of all students by 'teaching to the top' providing opportunities that stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework is set to meet these goals in delivering a challenging curriculum designed to further deepen and broaden the knowledge and skill set of its students. All homework is set on Google Classroom and is regularly checked.

Student achievement is analysed following data points and interventions are put into place at both classroom level and departmental level to ensure that all students are given the opportunity to reach their full potential. Period 7 intervention sessions are available to students who require further support. 1:1 support is available for SEN students who require it. Pupil premium funding is also available to ensure that all students have the same opportunities. This includes funding for trips and workbooks/revision guides.

The curriculum has been designed to ensure that it is diverse (including INSET training to ensure that all teachers are aware of the challenges and ways of dealing with these). Teaching about a range of different scientists is a particular departmental focus. Some curriculum time has been built in to ensure that all students are able to revise effectively.

Within the curriculum, topics explore a range of social issues e.g. contraception, climate change and scientific bias which will support all students become responsible citizens in an ever-changing world.

Building student cultural capital is vital for many of our students. As such, we aim to develop this both inside and outside of lessons (see the 'enrichment for all' section above'). Mock interviews and university preparation is also available for KS5 student.

SEN provision within the department

As part of our commitment to equality, diversity and inclusion, SEN provision at department level is a key focus for the curriculum and class teachers. Progress of SEN students is monitored carefully.

Curriculum planning

Spiral learning alongside regular linking of concepts between different units ensures that understanding of key concepts are secure. Real world applications help create a culture of curiosity. Extracurricular activities and trips (for all pupils) further help SEN students build a love of the subject outside of their lessons. Regular low stakes assessments give a regular opportunity for feedback to help ensure progress is made.

Lesson resources

Lesson resources are available on googleclassroom. To support with this, students are given access to knowledge organisers, topic overviews and glossaries. Lessons are designed to include differentiation and modelling to further support SEN students. These include model answers, scaffolding and sentence starters. Consideration has been put into any equipment issues for those with physical needs (e.g. plastic pipettes, helping set up equipment, clear graph paper)

Classroom teaching

At a classroom adult support is available for SEN students who require it. Teachers work closely with their LSAs. Some students have access to technology to further support their learning. Routines are key in establishing positive a learning atmosphere. A key focus of this is how lessons start as this will provide a consistent foundation for the remainder of the lesson. Routines include greeting students at the door and meaningful starter activities including recall tasks. Seating plans are carefully considered taking specific student needs into account.

Year 9 is an important transition year in science, our ambitious curriculum supports students in consolidating learning through practise, building on prior knowledge and introducing skills and knowledge which allow students to excel as scientists. During this year, students are introduced to foundational key concepts and skills that will support their success ensuing that they are confident in application and learning of both substantive and disciplinary knowledge. Year 9 builds on foundational knowledge that is taught in Years 7 and 8. Through our strong links with local primary schools our KS3 curriculum has been designed to ensure that students are challenged in their learning from the very beginning of Year 7, this creates capacity to ensure that the Year 9 curriculum bridges KS3 and KS4 learning. Some examples of these foundational threshold concepts include a strong understanding of diffusion, cell components, cell specialisation, the structure of an atom, and trends of reactivity in the periodic table.

In addition to their main lessons, Year 9 students take part in dedicated skills sessions designed to strengthen their 'working scientifically skills' - an area of the National Curriculum that students must continue to develop from KS1 through to KS5. The lessons that Year 9 are taught to support them with these skills include: "Understanding Variables", "How to draw a line of best fit", and "Rearranging physics formulae". These lessons have all been designed specifically for Pinner High School students, and is a unique approach to curriculum design that allows us to not only support students in their transition to Key-stage 4, but extend their scientific thinking in these areas.

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
<p>Unit Title: <i>C1 Atomic Structure</i></p> <p>Aims: Students will develop their understanding of atoms as fundamental chemical building blocks; how to interpret chemical formulae and extend their KS3 knowledge of the law of the conservation of mass, leading them to balance chemical equations.</p> <p>Lesson / Content Overview: 1 – Atom Structure 2 – Isotopes 3 – Separating mixtures 4 – Electronic structure 5 – Ions 6 – Compounds and mixtures 7 – States of matter and distillation 8 – Chromatography and calculations</p> <p>Skills / Concepts on: Focus on the development and use of models within science.</p>	<p>Unit Title: <i>C1 The Periodic Table</i></p> <p>Aims: Students will learn about the development of the periodic table, including the work of Dalton, Newlands, and Mendeleev. Students should understand how each stage in the development of the periodic table was facilitated by new evidence becoming available. They should also be able to identify the importance of an inherent pattern to the elements and how this guided Mendeleev's thinking.</p> <p>Lesson / Content Overview: 1 – The Periodic table and development 2- Group 0 3- Group 1 4 – Group 7 5 – Explaining trends / state symbols 6- Balancing equations</p> <p>Skills / Concepts on:</p>	<p>Unit Title: <i>C2 Structure and bonding</i></p> <p>Aims: Students will develop their understanding of states of matter, the different types of bonding and how the bonding of a substance affects its bulk properties.</p> <p>Lesson / Content Overview: 1- Ionic bonding 4- Giant ionic structures 5 – Covalent Structures 6 – Structure of simple molecules</p> <p>Skills / Concepts on: Students should understand that covalent, metallic, and ionic bonding is strong, but that it is how the particles interact (intermolecular forces) that determines properties such as melting point, boiling point, and electrical conductivity.</p>	<p>Unit Title: <i>C3 Structure and bonding</i></p> <p>Aims: Students will develop their understanding of states of matter, the different types of bonding and how the bonding of a substance affects its bulk properties.</p> <p>Lesson / Content Overview:</p> <p>7 – Giant covalent structures 8- Special case study: Carbon 9 – Nanoparticles</p> <p>Skills / Concepts on:</p>	<p>Unit Title: <i>C5 Chemical Changes</i></p> <p>Aims: Students will revise and develop their understanding of the reactivity series from KS3. They will apply their understanding of the reactivity series to displacement reactions and the extraction of metals, as well as introducing higher-tier students to the concepts of oxidation and reduction as the loss and gain of electrons respectively.</p> <p>Lesson / Content Overview:</p> <p>1 – The reactivity series 2 – Displacement reactions 3 – Extracting metals 4 – Salts from metals 5 – Salts from insoluble bases 6- Making more salts 7 – Neutralisation and the pH scale 8- Strong and weak acids.</p> <p>Skills / Concepts on:</p>	<p>Unit Title: <i>C6a Collision theory</i></p> <p>Aims: Students will learn about the factors that affect the rate of a reaction and apply their knowledge on endothermic and exothermic reactions to equilibrium reactions and predict position of the equilibrium.</p> <p>Lesson / Content Overview:</p> <p>1 – Rates of reaction 2 – Collision theory 3 –The effect of temperature 4 – The effect of concentration and pressure 5- The effect of catalysts</p>

	<p><i>They should also be able to identify trends in properties and reactivity.</i></p>			<p><i>Students will also learn about salts and how they are prepared, including from metals and acids, acids and bases, and acids and carbonates. Students should be able to prepare a pure, dry sample of a salt from an insoluble metal oxide or carbonate as part of the required practical.</i></p>	
Homework <i>Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.</i>	Homework <i>Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.</i>	Homework <i>Online homework tasks are set using our online packages. Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
<p>Unit Title: <i>C4 Chemical calculations</i></p> <p>Aims: Students will build upon their understanding of the structure of atoms and sub-atomic particles to understand relative atomic mass and relative formula mass, the mole and Avogadro's constant, moles to concentrations.</p> <p>Lesson / Content Overview: 1 – Relative masses and moles 2 – Equations and calculations 3 – From masses to balanced equations 4 – Volume of gases</p> <p>Skills / Concepts on: Students will carry out a titration as part of the required practical, with higher-tier students using their results to calculate the concentration of an unknown solution.</p>	<p>Unit Title: <i>C5 Electrolysis</i></p> <p>Aims: Students are introduced to electrolysis. They will build upon their knowledge from Chapter C3 to explain why ionic compounds can undergo electrolysis when molten or in solution. They should also be able to explain the movement of particles during electrolysis, and the reactions that occur at the electrodes.</p> <p>Lesson / Content Overview: 1 – Introduction to electrolysis 2 – Changes at the electrodes 3 – The extraction of aluminium 4 – Electrolysis of aqueous solutions</p> <p>Skills / Concepts on: Students will then apply their understanding of electrolysis to the extraction of aluminium, and learn how to investigate the electrolysis of a solution. They should be able to predict the products of electrolysis and higher-tier students should be able to write balanced half equations.</p>	<p>Unit Title: <i>C6 Rates and equilibrium</i></p> <p>Aims: Students will learn about the factors that affect the rate of a reaction and apply their knowledge on endothermic and exothermic reactions to equilibrium reactions and predict position of the equilibrium.</p> <p>Lesson / Content Overview: 1 – Rates of reaction 2 – Collision theory 3 – The effect of temperature 4 – The effect of concentration and pressure 5 – The effect of catalysts 6 – Reversible reactions 7 – Energy and reversible reactions 8 – Dynamic equilibrium 9 – Altering conditions</p> <p>Skills / Concepts on: Focus on graphing skills specifically calculate the gradient of a tangent to the curve on these graphs as a measure of rate of reaction at a specific time.</p>	<p>Unit Title: <i>C7 Crude oil and fuels</i></p> <p>Aims: Students will learn about hydrocarbons and been introduced to the alkanes, as well as some of the reactions of hydrocarbons, including combustion (both complete and incomplete) and cracking.</p> <p>Lesson / Content Overview: 1 – Hydrocarbons 2 – Fractional distillation of oil 3 – Burning hydrocarbon fuels 4 – Cracking hydrocarbons</p> <p>Skills / Concepts on: To write balanced symbol equations for the complete combustion of hydrocarbons and to describe the conditions of cracking.</p>	<p>Unit Title: <i>C8 – Chemical analysis</i></p> <p>Aims: Students about various techniques for analyzing substances; tests for gases, chromatography and positive and negative ions.</p> <p>Lesson / Content Overview: 1 – Pure substances and mixtures 2 – Analysing chromatograms 3 – Testing for gases</p> <p>Skills / Concepts on:</p> <p>Required practical: Investigate how paper chromatography can be used to separate and tell the difference between coloured substances. Students should calculate R_f values.</p>	<p>Unit Title: <i>C9 The Earth's atmosphere</i></p> <p>Aims: Students will gain an understanding of the origins of the atmosphere, students should also understand how it has evolved over time.</p> <p>Lesson / Content Overview: 1 – History of our atmosphere 2 – Our evolving atmosphere 3 – Greenhouse gases 4 – Global climate change 5 – Atmospheric pollutants</p> <p>Skills / Concepts on: Students will develop the ability to evaluate models and interpreting and evaluating evidence for scientific theories.</p>

<p>Unit Title: <u>Physical Chemistry:</u> 1. Atomic Structure 3. Bonding</p> <p>Aims: Atomic Structure revises the idea of the atom, looking at evidence for sub-atomic particles, introduce the mass spectrometer and the arrangement of the electrons. Bonding revisits the three strong types of bonds and introduced the three types of weaker- forces that act on molecules and drawing shapes of molecules.</p> <p>Lesson / Content Overview: -Fundamental particles -Mass spectrometer -Arrangement of electrons -Covalent, ionic and metallic bonding -Electronegativity and forces acting on molecules. -Shapes of molecules.</p> <p>Skills / Concepts on: Focus on drawing shapes of molecules and electronic structure.</p>	<p>Unit Title: <u>Physical Chemistry:</u> 2. Amount of substance 5. Kinetics <u>Organic Chemistry:</u> 11. Introduction to organic chemistry</p> <p>Aims: <u>Amount of substance</u> builds on quantitative chemistry, moles is used to compare equal numbers of atoms and molecules of different substances. Balanced equations are used to describe and measure the efficiency of chemical processes. <u>Kinetics</u> shows the rate of reaction with the Maxwell-Boltzmann distribution. <u>Introduction to Organic Chemistry</u> looks at the nature of carbon compounds and the different types of formulae that can be used to describe organic compound and IUPAC naming system.</p> <p>Lesson / Content Overview: - Relative atomic mass, the moles and Avogadro constant, balanced equations, atom economies- and percentage yield. - Collision Theory, Maxwell-Boltzmann distribution and catalysts - Carbon compounds, nomenclature and isomerism.</p> <p>Skills / Concepts on: Using standard form in calculations; Using appropriate significant figures</p>	<p>Unit Title: 4. Energetics 12. Alkanes 13. Halogenalkanes</p> <p>Aims: Energetics builds upon the concepts of exothermic and endothermic reactions with the different ways of measuring enthalpy changes. Alkanes covers crude oil and the chain length in alkanes can be cracked. Halogenalkanes looks at how these compounds are formed, react and their role in depletion of the ozone layer.</p> <p>Lesson / Content Overview: - Exothermic and endothermic reactions - Enthalpy, measuring enthalpy, Hess' Law and thermochemical cycles - Alkanes, fractional distillation, cracking and formation of halogenoalkanes - Nucleophilic substitution and elimination reactions in halogenoalkanes</p> <p>Skills / Concepts on: Students should be able to use Hess's law to perform calculations, including calculation of enthalpy changes for reactions from enthalpies of combustion or from enthalpies of formation.</p>	<p>Unit Title: 6. Equilibria; 7. Oxidation, reduction and redox equations 14. Alkenes</p> <p>Aims: Equilibria further covers the study of the equilibrium constant, K_c, considers how the mathematical expression for the equilibrium constant enables us to calculate how an equilibrium yield will be influenced by the concentration of reactants and products Oxidation, reduction and redox equations covers separate half-equations written for the oxidation or reduction processes. These half-equations can then be combined to give an overall equation for any redox reaction. Alkenes further studies the high electron density of the carbon-carbon double bond leads to attack on these molecules by electrophiles.</p> <p>Lesson / Content Overview: -Equilibrium reaction and changing conditions, the equilibria constant and calculations - Oxidation, reduction and redox equations - Alkenes and its reactions and addition polymers</p> <p>Skills / Concepts on: Students will be able to combine half equations</p>	<p>Unit Title: 9. Group 2, the alkaline earth metals 15. Alcohols</p> <p>Aims: Group 2 alkaline earth metals covers the trends in the solubilities of the hydroxides and the sulfates of these elements are linked to their use. Barium sulfate, magnesium hydroxide and magnesium sulfate have applications in medicines whilst calcium hydroxide is used in agriculture to change soil pH, which is essential for good crop production and for maintaining the food supply. Alcohols further covers the uses and production, with a particular focus on ethanol.</p> <p>Lesson / Content Overview: -The physical and chemical properties of Group 2 -Alcohols, ethanol production, reactions of alcohols</p> <p>Skills / Concepts on: Students should be able to use chemical knowledge and understanding to explain some of the trends in physical and chemical properties of Group 2 elements. Appreciate that science doesn't always have neat explanations for unexpected, observed properties.</p>	<p>Unit Title: 8. Periodicity 10. Group 7, the halogens 16. Organic analysis</p> <p>Aims: Periodicity covers the structured organisation of the known chemical elements from which they can make sense of their physical and chemical properties. Group 7 covers trends in their physical properties are examined and explained as well as challenges in studying the properties of elements in this group include explaining the trends in ability of the halogens to behave as oxidising agents and the halide ions to behave as reducing agents.</p> <p>Organic analysis considers some of the analytical techniques used by chemists, including test-tube reactions and spectroscopic techniques.</p> <p>Lesson / Content Overview: -The Periodic Table and trends in the properties of elements in Period 3 and ionisation energies -Chemical reactions of halogens, reaction of halide ions and uses of chlorine -Test-tube reactions, mass spectroscopy and infrared spectroscopy</p> <p>Skills / Concepts on: Students should be able to use precise atomic masses and the precise molecular mass to determine the molecular formula of a compound</p>

Pinner High School: Physics

KS4: Separate Sciences – Physics AQA [8463], Combined Science - AQA Trilogy [8464]

KS5: Physics AQA [H556]

Intent

Scientific understanding is vital for students to understand the world around them and to drive change. We have designed a curriculum that ensures that students learn essential aspects of both scientific knowledge and skills. We aim to inspire students by fostering a sense of curiosity and creativity in the subject.

We as a Physics department aim to deliver a broad and ambitious curriculum that challenges and enables all groups of students to make progress and achieve their potential. We as a department strive to make Physics accessible to all learners through specific measures including differentiated and scaffolded tasks. We stretch through challenge tasks that are carefully planned into the curriculum within lessons and homework to push our higher attaining students further.

Content knowledge is built upon using a spiral approach, revisiting, interleaving and building upon key knowledge and skills at each key stage. Fundamentals of scientific understanding are learnt first. Concepts are then revisited and developed with greater detail. New concepts which require foundational understanding are introduced later, and finally concepts requiring linking multiple scientific ideas are introduced. We have designed the curriculum by working backwards from where we want students to be when they leave school.

The following key concepts and skills are interleaved throughout the Physics curriculum:

Scientific Knowledge (AO1 & 2):

- Forces and fields
- Forces and their effects
- Energy stores and energy transfers
- Space

Scientific skills (AO1, 2 & 3):

- Predicting cause and effect
- Experiment design and risk assessment
- How and why we use scientific equipment
- Presenting, using and manipulating data
- Drawing conclusions
- Changing theories
- Real world use of Science
- Ethics and implications

Implementation

We have designed our curriculum so that both physics-specific and general skills are developed through repeated experience with each encounter being of increasing complexity. This spiral approach ensures that key concepts and skills are interleaved throughout the curriculum. For example, electromagnetism studied in year 11 builds up an understanding of

forces which is studied in year 10 (as well as KS3) and electricity which is studied in year 9 (as well as KS3). This is then explored further at KS5 where students are introduced to electromagnetic fields. Skills are also built upon, including practical skills which are ultimately assessed through required practicals at KS4 and KS5. These interleaved key skills and concepts are assessed through formative and summative assessments throughout the curriculum allowing us to check and address any misunderstanding and misconceptions.

We aim to go beyond the National Curriculum by linking concepts and skills with real world examples and a variety of extra-curricular and super curricular activities. Specific enrichment opportunities are listed further below in this document.

As a department we set high expectations for all pupils which creates a culture and love of learning in our classrooms. Independent learning is emphasised regularly through consolidation tasks, flipped learning homework activities, research projects, and encouraging students to explore Physics outside the classroom through our wide range of extra and super curricular activities (listed later in this document). Student support outside the classroom is very important and as such students have access to a number of websites that we have subscribed to on the students behalf, to support their learning. Student resources are available to all students through google classrooms.

Communication of ideas is central to becoming a confident Scientist, so our curriculum is designed to develop literacy and oracy through explicit teaching of keywords (in particular root words, prefixes and suffixes), use of key word glossaries, and regular use of connective, discussion, experimental write up and exam command words. Further reading lists are compiled by literacy representatives at department level and shared with students. Many of these have been purchased by the library. Suggested further reading books for each half term are also listed further down in this document.

Differentiation is key throughout the delivery of the curriculum. A focus is made on differentiation within lessons. Mathematical skills, including graphing and data interpretation are embedded within the curriculum and revisited when appropriate. At GCSE students are grouped into three categories: Combined foundation, Combined higher and Separate. We aim to provide support and challenge relative to student ability levels and student groups, including stretching the most able. Specific stretch and challenge activities outside the classroom are listed further down in this document.

We have placed a considerable emphasis on our pupils building their long-term memories by deliberately sequencing our curriculum to ensure students build on prior knowledge across the key stages. A focus is placed on revision techniques and time is built into the curriculum to support students with this.

Teacher training is essential to the delivery of the Physics curriculum, in particular for non-specialist teachers. Teacher knowledge audits are therefore regularly carried out and CPD sessions run where appropriate. Department leads have designed schemes of work for teachers to use, with suggested activities and resources, ensuring consistency of delivery.

Impact

At topic and lesson level, knowledge and understanding will be assessed through a mixture of in-class formative assessment, recall tasks, homework activities and also summative end of topic assessments and mock exams in line with whole school systems. Topic specific content and skills that are assessed in each unit are listed further below in this document.

At the end of each topic, our students are expected to independently consolidate key knowledge and skills through carefully planned end of topic assessments which are written into the scheme of work. These summative checkpoints are differentiated to help meet the needs of all learners and challenge all to achieve. This helps to ensure that students make sufficient progress. Following each summative checkpoint there is a reflection lesson, allowing students to receive and respond to whole class and individual feedback.

We, as a department, regularly use formative assessment to check, model and build key knowledge. Students regularly assess how much they know through in class informal assessments, skilful questioning and reflections tasks. It also allows us to pick up on any misconceptions and ensure lesson objectives are understood.

As a department, we diligently track and monitor student progress using departmental and whole school data analysis systems and software. This enables us to effectively introduce support measures such as parent communication or targeted intervention where required.

Faculty department meetings ensure that we regularly reflect and engage on how to develop and evolve our curriculum. We also use learning walks, book looks, classroom observations, student feedback and data analysis to inform our immediate goals and long term plans. We aim to maintain high standards within the department through regular sharing of best practice.

The following indicators are also used to assess the long term impact of the Physics curriculum:

1. How many students are continuing to study Physics beyond KS5
2. How many students are selecting Physics at KS5 (14 in 2021 sixth form intake, 17 in 2022 sixth form intake)
3. How many students choose to study separate sciences at GCSE
4. Grades and progress of all students at KS4 (+0.75 p8 VA in 2022)

Student successes are celebrated by following whole school systems, such as star of the lessons, end of year awards, subject prefects and positive feedback with parents. We also use departmental systems such as polaroid moments within the regular whole class feedback following each assessment.

Careers Development

Due to the analytical and mathematical nature of Physics, there is a huge variety of potential career paths. Time is spent looking at these prior to students choosing their GCSE pathway.

- Engineering: This is the largest career route for students studying Physics. As such, Engineering extra-curricular groups are run at both Ks4 and Ks5 level to further support students interested in Engineering careers. The most popular branches of Engineering include Mechanical, Electronic, Civil and Software Engineering
- Medical Physics: This is one of the largest research areas in Physics. As such, a number of units focus on medical uses of physics, including a specific lesson in the GCSE electromagnetic waves topic and also a medical physics focus in the radiation topic.
- Finance: Physics students often move into the financial sector due to the mathematical and problem solving nature of the subject.

Assessment

KS4: Knowledge and understanding is assessed through a mixture of in-class formative assessment, walking talking mocks, homework activities and summative assessments following each unit. Homework activities and more formal unit assessments are consistent across the department ensuring consistency of delivery. Feedback is given following unit assessments using departmental whole class feedback forms which celebrate successes, highlight individual misconceptions and ensure that individuals are given the opportunity to improve.

KS5: Knowledge and understanding is assessed through a mixture of in-class formative assessment, walking talking mocks, homework activities, weekly consolidation tasks and summative assessments following each unit and at various data points (mock exams at Christmas and the end of yr12). Consolidation tasks take place weekly and are based on exam style questions. Marks for these consolidation tasks are recorded so that any student issues can be identified. Consolidation tasks and unit assessments are consistent across the department ensuring consistency of delivery. Feedback is given following assessments so that individuals are able to celebrate successes, highlight misconceptions and ensure that students are given the opportunity to improve. Practical skills are assessed using exam board CPAC criteria when appropriate.

Enrichment Opportunities & Super Curricular

Extra and super curricular offers are a key part of any science department, and that is no different at Pinner High School. The opportunities below are split into two categories: Enrichment for all and stretch for the most able. The opportunities listed below provide a snapshot of the opportunities available to students to further enhance their knowledge and skills:

Enrichment for all:

- **KS4:** Science week enhancement activities including talks and whole school activities.
- **KS5:** Science week enhancement activities including talks and whole school activities, trips including the National Physical Laboratory, CERN in Switzerland.

Stretch for the most able:

- **KS4:** KS4 Engineering group, university visits, virtual and in person visits from scientists, entries to KS4 Physics Olympiads, Library resources including Scientifica subscriptions. Enrichment and stretch activities shared with students when they become available. Students given help with any applications to these (e.g. STEM potential programs, competitions, work experience opportunities)
- **KS5:** KS5 Engineering group, medical group (relevant to medical physics units), university visits, virtual and in person visits from scientists, entries to KS5 Physics Olympiads, Library resources including Scientifica subscriptions. Enrichment and stretch activities shared with students when they become available. Students given help with any applications to these (e.g. STEM potential programs, competitions, work experience opportunities)

Commitment to Equality, Diversity & Inclusion

Our curriculum has been designed to equip all students with an understanding of science and how to apply this in the real world. We aim to meet the needs of all students by 'teaching to the top' providing opportunities that stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework is set to meet these goals in delivering a challenging curriculum designed to further deepen and broaden the knowledge and skill set of its students. All homework and lesson resources are shared on Google Classroom and homework is regularly checked.

Student achievement is analysed following data points and interventions are put into place at both classroom level and departmental level to ensure that all students are given the opportunity to reach their full potential. An additional science skills lesson is set to support students with exam technique and scientific skills. Pupil premium funding is also available to ensure that all students have the same opportunities. This includes funding for trips and workbooks/revision guides.

The curriculum has been designed to ensure that it is diverse (including INSET training to ensure that all teachers are aware of the challenges and ways of dealing with these). Teaching about a range of different scientists is a particular departmental focus. Some curriculum time has been built in to ensure that all students are able to revise effectively.

Within the curriculum, topics explore a range of social issues e.g. climate change, energy resources, nuclear issues and scientific bias which will support all students to become responsible citizens in an ever-changing world.

Building student cultural capital is vital for many of our students. As such, we aim to develop this both inside and outside of lessons (see the 'enrichment for all' section above'). Mock interviews and university preparation is also available for KS5 students.

SEN provision within the department

As part of our commitment to equality, diversity and inclusion, SEN provision at department level is a key focus for the curriculum and class teachers. Progress of SEN students is monitored carefully.

Curriculum planning

Spiral learning alongside regular linking of concepts between different units ensures that understanding of key concepts are secure. Real world applications help create a culture of curiosity. Extracurricular activities and trips (for all pupils) further help SEN students build a love of the subject outside of their lessons. Regular low stakes assessments give a regular opportunity for feedback to help ensure progress is made.

Lesson resources

Lesson resources are available on google classroom. To support this, students are given access to knowledge organisers, topic overviews and glossaries. Lessons are designed to include differentiation and modelling to further support SEN students. These include model answers, scaffolding and sentence starters. Consideration has been put into any equipment issues for those with physical needs (e.g. plastic pipettes, helping set up equipment, clear graph paper)

Classroom teaching

At a classroom adult support is available for SEN students who require it. Teachers work closely with their LSAs. Some students have access to technology to further support their learning. Routines are key in establishing a positive learning atmosphere. A key focus of this is how lessons start as this will provide a consistent foundation for the remainder of the lesson. Routines include greeting students at the door and meaningful starter activities including recall tasks. Seating plans are carefully considered taking specific student needs into account.

	Autumn 1:	Autumn 2:	Spring 1:	Spring 2:	Summer 1	Summer 2:
Year 9	Unit Title: P1 – Conservation and dissipation of energy Aims: Building on KS3 knowledge of energy to enhance student knowledge of the different types of energy and how we use them in the real world. Lesson / Content Overview: 1 – Types of energy 2 – Conservation of energy 3 – Energy and work	Unit Title: P2 – Energy transfer by heating Aims: Building on KS3 knowledge of heat to enhance student knowledge of how thermal energy is transferred and the applications of it. Lesson / Content Overview: 1 – Conduction 2 – Infrared radiation 3 – Specific heat capacity 4 – Heating and insulating	Unit Title: P3 – Energy resources Aims: Building on KS3 knowledge of energy resources to enhance student knowledge of how we generate electricity and the challenges associated with this Lesson / Content Overview: 1 – Non-renewable energy 2 – Renewable energy	Unit Title: P4 – Electric circuits Aims: Building on KS3 knowledge of electricity to enhance student knowledge of electricity. Lesson / Content Overview: 1 – Current and charge 2 – Potential difference 3 – Resistance 4 – Component characteristics 5 – Electric charge	Unit Title: P5 – Electricity in the home Aims: Applying knowledge of electricity to understand how it is used in the real world. Lesson / Content Overview: 1 – Alternating currents 2 – Cables and plugs 3 – Electrical energy 4 – Electrical power 5 – Appliances and efficiency	Unit Title: P6 – Molecules and matter Aims: Applying knowledge of particles and heating to enhance knowledge of particles and how they are linked with pressure and temperature. Lesson / Content Overview: 1 – Density 2 – States of matter 3 – Changes of state and latent heat

	4 – Power 5 – Gravitational energy 6 – Kinetic energy 7 – Elastic energy 8 – Energy dissipation 9 – Efficiency Skills / Concepts on: Focus on using and manipulating equations	Skills / Concepts on: There are two required practicals in this unit. Therefore there is a focus on practical skills, especially hazard awareness.	Focus on the local and global citizenship issues associated with different ways of generating electricity.	Skills / Concepts on: Students focus on different models of electricity, creating analogies between electricity and the real world.	Skills / Concepts on: Focus on electrical safety.	4 – Internal energy 5 – Gas pressure, temperature and volume Skills / Concepts on: The required practical for this unit focuses on method writing skills.
	Homework Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.	Homework Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.	Homework Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.	Homework Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.	Homework Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.	Homework Online homework tasks are set using our online packages. Leading up to the chapter test, students complete summary and practice questions.
	Stretch & Challenge Specific in class activities include calculations involving prefixes and unit conversions. Energy transfers for more complicated systems are also discussed (e.g. humans). Stretch activities signposted at lesson level.	Stretch & Challenge Mathematical skills involved in the SHC practical calculations are challenging, especially for yr9 students. Students can be stretched by giving them less scaffolding during this part of the course. Stretch activities signposted at lesson level	Stretch & Challenge Higher level debating skills lend themselves to this topic. In particular developing arguments for views that you do not necessarily believe in (e.g. arguments for/against fossil fuels/nuclear power). Stretch activities signposted at lesson level.	Stretch & Challenge Higher level practical skills lend themselves to this topic, in particular during the required practical. Producing complex circuits stretch student understanding. Modelling skills are also part of this unit with the most able students being able to identify a variety of more complex analogies to electricity. Stretch activities signposted at lesson level	Stretch & Challenge Specific n class activities include calculations involving prefixes and unit conversions. Energy, power and efficiency calculations can sometimes use different units – these provide excellent stretch opportunities. Stretch activities signposted at lesson level	Stretch & Challenge The most able students can be stretched by making specific links to the more challenging force and pressure topics that students will be studying in yr10. Understanding of intermolecular forces will help stretch the most able. Stretch activities signposted at lesson level

Homework Weekly consolidation work based on exam style questions designed to check and consolidate student knowledge.
	Stretch & Challenge Engineering Scholars group. Many students find calculations for this half term hard. The most able should be able to deal with multi-step calculations so further practice with this is required. Stretch activities signposted at lesson level	Stretch & Challenge Engineering Scholars group. Practical's during this half term provide an opportunity for students to start planning and designing their own experiments. Stretch activities signposted at lesson level	Stretch & Challenge Engineering Scholars group. In class and homework stretch activities when appropriate. Stretch activities include higher level extended response tasks, mathematical/graphing skills and further real world applications. A focus on critical thinking for challenging students. Stretch activities signposted at lesson level	Stretch & Challenge Wizard; the life and times of Nikola Tesla by Marc J Seifer provides excellent stretch for the electricity topic In class and homework stretch activities when appropriate. Stretch activities signposted at lesson level	Stretch & Challenge QED by Richard Feynman should be encouraged as further reading for the most able students. In class and homework stretch activities when appropriate. Stretch activities signposted at lesson level	Stretch & Challenge Professor Povey's Perplexing Problems by Thomas Povey provides excellent stretch for the further mechanics topic In class and homework stretch activities when appropriate. Stretch activities signposted at lesson level
	Reading The Physics Book: Big ideas simply explained – Jim Al-Khalili	Reading Engineering for teens – Pamela McCauley	Reading Quantum Physics for beginners: Into the light – John Stoddard	Reading How to make your own electricity – Dillan Powell	Reading QED – Richard Feynman	Reading Absolute zero and the conquest of cold – Tom Shachtman
	Autumn 1:	Autumn 2:	Spring 1:	Spring 2:	Summer 1	Summer 2:
Year 13	Unit Title: Section 7 – Fields Aims: Building on KS4 knowledge of magnetism, electricity and gravity to enhance student knowledge of fields and their applications in the real world. Lesson / Content Overview: Topic 21 – Gravitational fields	Unit Title: Section 8 – Nuclear physics Aims: Developing knowledge of radioactivity and applying it to how it is used in the real world. Lesson / Content Overview: Topic 26 – Radioactivity Topic 27 – Nuclear energy Skills / Concepts on:	Unit Title: Section 9 – Options topic Aims: Focusing on the optional topic that students would like to study Lesson / Content Overview: Students will study one of the following optional topics: <ul style="list-style-type: none"> • Astrophysics • Medical Physics • Electronics 	Unit Title: Content revision Aims: Revisit knowledge from KS5 to ensure all students have the ability to reach their full potential at A-level. Lesson / Content Overview: Content revision for all topics Skills / Concepts on:	Unit Title: A-level examinations	Unit Title: A-level examinations

Pinner High School: Art

KS3: Art and Design

KS4: Fine Art GCSE - AQA (8202)

KS5: Fine Art A Level - AQA (7202)

Intent

- In Art lessons we aim to build confidence, encourage students to take ownership of their work and to develop their own creative thinking. Young people should enjoy their learning and be proud of the work they have produced. We aim for all students to find an aspect of Art they can engage with and enjoy, in an environment where they feel safe and supported in their learning.
- Art has an important role to play in children's learning and is an essential form of communication and expression. The PHS Art department aims to support and collaborate with students as they express themselves and explore their visual environment.
- Our belief is that Art is for everyone, we wish to encourage young people to challenge preconceptions, to take risks and to show resilience. We want to build our student's self-esteem and develop their confidence so that they are able to take ownership of their learning and celebrate their successes.
- A key ambition for the Art curriculum is to boost student's creative confidence whilst building on Art skills and techniques as they progress through each year. Lessons are planned and sequenced to allow students to experience a range of approaches to making Art. Pupils are given regular opportunities to explore a variety of art-based skills including drawing, painting, printing, mixed- media, collage, 3D, ceramic, photography and digital art.
- Each Art unit allows students opportunities to explore a diverse range of artists, contexts and references as they develop their own response.
- We aspire for every young person to be reflective in their practice. We would like students to consider ways in which creative skills are transferable across disciplines and are useful across their education and personal development.
- Art units are planned to give students an insight into the overarching ideas, skills, techniques and visual literacy used by artists and designers as part of a creative cycle. We aim to give students an increasing awareness of the opportunities available within Art and Design - an understanding that there are many varied approaches and forms of Art, leading to different skills and career pathways.
- The Key Stage 3 Art Curriculum follows the national curriculum and is designed to allow students to work towards key areas of further study in Art and Design: Research and Develop, Explore and Refine, Observe and Record, Respond and Present. Each Art unit is planned to give students opportunities to work from first hand observation in a variety of ways, for example by looking at real objects, drawing outside, and taking photographs for their own reference.
- The PHS Art curriculum aims to be ambitious for all pupils by having open-ended areas of challenge at various points throughout students' Art experience; Staff are well trained and able to support young people in their creative journey at the appropriate moment. An increasing emphasis is placed on students' ability to learn and solve problems independently as they progress through the art curriculum.
- Students have the opportunity to explore a range of ideas leading to a personalised outcome. As students progress towards Key Stage 4 and 5, the department aims to offer activities that encourage self-directed learning. Students develop their technical ability alongside working in an experiential and imaginative way by responding to individualised subject matter.

Implementation

- We provide a safe environment with high expectations of behaviour and learning, with close monitoring of equipment and modelling safe practice. Students learn to reflect on their experiences and learn to use materials safely and appropriately.
- As a department we plan collaboratively, committed to creating relevant resource material and content across our department that reflects current thinking in Art and Design and broader society. Regular art-based training opportunities are provided for staff.
- Specialist Art teachers are able to recognise students' existing areas of strength and aim to set appropriate activities to extend each student's progress, with consideration to their initial starting points and special educational needs. The PHS Art curriculum uses adapted learning strategies and tailored resources to promote progress for all individuals and lessons are designed to stretch and challenge learners appropriately.
- We take into account the importance of building student confidence and recognise the various ways in which different students can be successful in this subject.
- The Art curriculum allows opportunities for key skills, knowledge and techniques to be explored in a variety of ways, to build upon what has been learnt previously and to ensure this is embedded as far as possible for all learners.
- A variety of formative assessment opportunities are used as part of the planned learning activities at Key Stage 3 and tutorial style discussions are used at Key stage 4 and 5 to encourage appropriate working practice.
- We have a multi-disciplined and appropriately resourced curriculum including computer access with specialist Art software e.g Photoshop.
- A broad GCSE Fine Art course offers students the opportunity to explore a full range of techniques and processes before working using their preferred methods to create personalised outcomes as the course progresses.
- We provide opportunities for self-directed learning particularly at Key 4 and 5. We support students to select contexts that are relevant and take into account their particular needs and interests to enhance their experience.
- After-school Art studio time and additional practical workshops are made available in cases where students need further access to materials and teacher guidance.
- We provide appropriate opportunities to Visit museums and galleries or take part in visiting artist workshops. We devise opportunities to establish cross-curricular and literacy links, support and promote whole school initiatives such as Pinnfest, school magazine, house events, club activities, school production.
- We regularly celebrate student creative outcomes using opportunities to display and share artwork.

Impact

- Confidence and Well-being: Students should enjoy their learning and be proud of the work they have produced. Individual enjoyment of activities and the therapeutic qualities of the subject are key to the wellbeing of students in our school community.
- Inclusivity: Students are encouraged to explore and celebrate similarities and differences between people, places and cultures.
- Students learn to be understanding and respectful of others' work, opinions and abilities. Students have the opportunity to work collaboratively, share ideas, engage in class critique and discussions as they become aware of artists, art periods, art styles and develop visual communication skills. We would hope to build confidence and encourage students to take ownership of their work and to develop their own creative thinking.
- SMSC (Spiritual, Moral, Social and Cultural): Students learn to communicate and develop ideas, they consider meaning and feelings. Art gives students the opportunity for independent thought and personal responses.

- At KS3, the majority of students show sustained progress across the Art modules in Year 7 and Year 8. They have Art lessons for 2 lessons a week for their Art rotation term, giving them a condensed but high quality experience in the subject allowing them to experience the creative process across a full range of art media. Students also have a period of Art and Design once a fortnight across the whole year.
- The Year 7 and 8 curriculum is delivered through a series of connected mini projects developing visual analysis and understanding of a diverse range of Artists. The KS3 curriculum is planned to support students in developing skills, knowledge and techniques, enabling them to make the necessary progress towards KS4. It is important for our Art curriculum to take into account students ' varying previous primary experiences in the subject.
- Our KS3 Clubs give access to a range of supplementary art activities throughout the year, including drawing, painting, sculpture and clay, digital art and tactile activities such as knitting and embroidery.

Key Stage 3 Art Practical (Double Lessons) Termly Carousel	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6
Year 7 INSPIRED BY NATURE	Observation Explore observational drawing techniques inspired by 3d natural forms.(Skulls, shells) Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Clay Relief Explore texture and relief through the medium of clay sculpture . Assessment: <i>Student Self-Evaluation and Formal Teacher Assessment point.</i>	Textiles Based Design Explore tactile and adventurous drawing techniques and materials. Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Relief Printmaking Explore mark-making and pattern through relief printmaking. (poly-tile) Assessment: <i>Student Self-Evaluation and Formal Teacher Assessment point.</i>	Collage and Digital Art Focus on Collage Composition and development of Pattern. Introduction to Photoshop Editing tools. Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Experiments with Media Trials with paint and other experimental media. (Science/ Petri Dish Inspired) Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>
Year 8 OUR SURROUNDINGS	Observation Exploration of Observational Drawing techniques inspired by the school building and built environment. Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Exploring Ideas Observation Task: Transparent Vessel - developing 3D shape and tonal skill. Personalisation Task: Combine imagination with realism. Assessment: <i>Student Self-Evaluation and Formal Teacher Assessment point.</i>	Digital Drawing Explore digital drawing using tablets. Editing and Experiment using Photoshop layers. Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Composition Collage -Develop an Understanding of Composition inspired by structures. Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Clay Sculpture Students Develop layered Clay Relief Sculptures in response to their understanding of perspective. Assessment: <i>Student Self-Evaluation and Formal Teacher Assessment point.</i>	Printmaking Develop Relief Printmaking: Collagraph Compositions inspired by architecture. Assessment: <i>Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>
Key Stage 3 Fortnightly Art	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2

Year 7	Observation	Artist Investigations	Paint Experimentation	Painting Development	Tactile Experiments	Adventurous Drawing
INSPIRED BY NATURE	An Introduction to Observational Drawing methods. (Explore Shapes and Forms from Plant Life) <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Artists in Context An investigation into ways that artists are inspired by nature. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Colour theory and Watercolor Painting practice techniques. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Individual Watercolour Painting Outcome : Application of painting technique. <i>Assessment: Student Self-Evaluation and Formal Teacher Assessment point.</i>	Use of varied materials to create a response inspired by science and Cells <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Exploring unconventional methods of drawing e.g sgraffito. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>
Year 8	Observation Develop Observation and Drawing Technique -3d shapes and lego structure sketches) <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Perspective Technique Develop understanding using Perspective - One point perspective drawings <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Painting Technique Application of watercolour Painting technique, personal outcome (atmospheric perspective) <i>Assessment: Student Self-Evaluation and Formal Teacher Assessment point.</i>	Artist Investigations Street Art and Public Art in context. Consider the intentions and ideas behind street art. Investigate street art as a timeline. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Exploring Materials Street Artist Inspiration - experimental paint techniques. Use of mixed media in layers. Creating and Working into background surfaces. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Exploring Ideas Create a mixed media outcome based on the student's chosen imagery. Consider appropriate references. (linked to street art inspiration) <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>
Year 9, 10 and 11 3 periods a week	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 9 IDENTITY	Introduction to Identity Theme and Portraiture. Drawing skills and technique workshops. e.g observation, proportion, experimental methods. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Introduction to Sketchbook Development Work. Students learn how to document and annotate development drawings and ideas. Text Portrait - digital editing. <i>Assessment: Student Self-Evaluation and Formal Teacher Assessment point. (Portfolio/sketchbook)</i>	Artist Investigations Contextual studies and planning towards a final portrait personal outcome. Including photography and composition.	Large Scale Portrait Create a final personal response based on experiments and planning.	Still Life - Drawing Skill Workshops Develop composition through observational drawing and personal choice of Photography references. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Identity Still Life Outcome Contextual studies and development planning towards a final personal outcome (Large scale work) <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>
Year 10	Drawing Technique and	Acrylic Painting Skill	Component 1: Introduction	Component 1: Project	Component 1: SUSTAINED	Component 1: SUSTAINED

ABSTRACT/ Component 1 Thematic Project development	Media Workshops Investigate abstract themes. Abstract paper and rope sculpture. Sketchbook documentation, Students take inspiration from a series of relevant artists - Mark-making, clay, relief printmaking. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Building Task Photography challenge - students capture a series of photographic images and develop successful compositions into a large scale painted outcome. <i>Assessment: Student Self- Evaluation and Formal Teacher Assessment point.</i>	to Student Led Topic. Introduction to thematic work, mind-mapping, artist research, image collection and observational drawing. Sketchbook expectations. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Development Digital editing, Photoshop ideas, experimentation, creating a personal response. Thematic fabric transfer painting. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	PHASE Students move towards personalised project direction. Development of ideas towards a large scale. <i>Assessment: Student Self- Evaluation and Formal Teacher Assessment point.</i>	PHASE Reflection on project direction, refined media experiments. Evidence of Each AO provided for chosen areas of interest. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>
Year 11 GCSE FINE ART	Component 1: SUSTAINED PHASE Experimental Techniques, Visual response to artists., Photography and Image selection <i>Assessment: Ongoing formative feedback given based on portfolio/ sketchbook work.</i>	Component 1: SUSTAINED PHASE Students prepare ideas for the final outcome to be completed in mock practical time (10 hours)	Component 2- Externally Set Assignment Students select a topic from the paper provided by AQA Mind mapping, investigating artists, exploring materials.	Component 2- Externally Set Assignment Students refine their use of materials and techniques. Record and document project ideas.	Component 2- Externally Set Assignment (NEA) 10 hours of sustained studio time to produce final outcome under controlled conditions. <i>(All Component 2 work submitted for assessment)</i>	Evidence Presented for Assessment Component 1 and 2 - evidence is selected and presented as evidence for the final assessment process. <i>(Internal standardisation and external moderation process)</i>
Key Stage 5 A-Level 6 periods per week	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 12 A- LEVEL FINE ART	Thematic Investigation Skills materials and technique workshops, Ideas development Composition, Image Selection, Artist reference, Experimental Drawing techniques <i>Assessment: Ongoing Formative feedback given</i>	Thematic Investigation Printmaking: Lino, Mono and Screenprint, Digital Editing. Exploration of painting techniques. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Thematic Investigation Individual planning towards a final outcome (AO4) Students Refine their use of materials and techniques. Record project ideas. <i>Assessment: Ongoing Formative feedback given based on portfolio/ sketchbook work.</i>	Large Scale Sustained Outcome Students work on a final large scale outcome in response to the theme. Create a final piece alongside sketchbook documentation of ideas and processes.	Personal investigation - Component 1 Students will select their own topic theme based on a series of suggested titles. Students map out initial ideas and begin investigating the chosen theme. <i>Assessment: Student Self- Evaluation and Formal</i>	Personal Investigation - Component 1 Students work towards a large scale outcome in response to their chosen theme so far during a sustained period of time. <i>Assessment: Student Self- Evaluation and Formal</i>

	<i>based on portfolio/sketchbook work.</i>		<i>sketchbook work.</i>	<i>Assessment: Student Self-Evaluation and Formal Teacher Assessment point.</i>	<i>Assessment: Ongoing Formative feedback given based on portfolio/sketchbook work.</i>	<i>Teacher Assessment point.</i>
Year 13 A- LEVEL FINE ART	Personal Investigation - Component 1 Practical and written elements of Coursework. Skills and technique workshops. Generation of Ideas Contextual studies. <i>Assessment: Ongoing formative feedback given based on portfolio/sketchbook work.</i>	Personal Investigation - Component 1 Leading up to Final Piece created during Sustained 15 hours (Mock Practical time) Create Sketchbook evidence to support the making process. <i>Assessment: Student self-Evaluation and Formal Teacher Assessment point.</i>	Component 2- Externally Set Assignment Students select a topic from the paper provided by AQA Mind Mapping, Investigating Artists and contexts, Exploring materials. <i>Assessment: Ongoing formative feedback given based on portfolio/sketchbook work.</i>	Component 2- Externally Set Assignment Students Refine their use of materials and techniques. Record and document project ideas. <i>Assessment: Ongoing formative feedback given based on portfolio/sketchbook work.</i>	Component 2- Externally Set Assignment (NEA) 15 hours Sustained Studio Time to produce final outcome under controlled conditions. <i>(All component 2 work submitted for assessment)</i>	Evidence Presented for Assessment Component 1 and 2 - Evidence is selected and presented as evidence for the final assessment process. <i>(Internal standardisation and external moderation process)</i>

Pinner High School: Design & Technology

KS3: Design and Technology

KS4: Art & Design: Three-Dimensional Design GCSE AQA 8205

KS5: Art & Design: Three-Dimensional Design A Level AQA 8205

Intent

Design and Technology is an inspiring, rigorous and practical subject which prepares all young people to live and work in the designed and made world. Cultural capital is explored across the key stages by appreciation of the work of others locally, nationally and internationally, the subject identifies and relates schemes of learning to real contextual challenges focussing upon people, communities or businesses.

Design and Technology builds on the skills and knowledge pupils have already learnt at primary school as a result of baseline testing and transition work staff are well informed of the pupils starting point as they commence KS3.

The DT curriculum is collaboratively and coherently planned and sequenced across KS3, KS4 & KS5 to ensure that pupils build on all aspects of prior learning and stretches and challenges all pupils regardless of starting point. All teachers are made aware of any disadvantaged pupils on the D&T department tracking sheets and class lists, all teachers are reminded of their responsibility to ensure that any obstacles to learning are removed. The department supports the needs of all pupils regardless of any potential barriers as we believe in 'success for all'.

Close tracking of all pupils continues to be an intrinsic part of our monitoring in D&T to ensure all pupils' progress is regularly reviewed and intervened/supported where appropriate.

Design and Technology at Pinner High School has a significant impact on students' education and future careers. It promotes critical thinking, problem-solving, and creativity, while bridging the gap between theory and practice. The subject fosters an entrepreneurial mindset, introduces career pathways, and prepares students for the demands of the modern workforce, ultimately empowering them to contribute meaningfully to society.

Implementation

The Design & Technology provision at Pinner High is delivered over 2x 50-minute sessions a week at KS3 for 1 term, 3x 50-minute sessions a week for KS4 and 6x 50-minute sessions a week for KS5.

The department's schemes of learning are based upon the national curriculum for Design and Technology which lead on to a GCSE in Design & Technology. KS4 work is evidenced even in year 7 as we instil in all our pupil's high academic rigour and challenge from the outset.

Teachers are enthusiastic about their subjects and share this passion with all our pupils. As a result, the vast majority enjoy and achieve in Design & Technology with many pupils choosing to study beyond KS3. D&T staff use academic language consistently and appropriately in their subject specific teaching and learning. Pupils are encouraged to use tier 2 & 3 language in lessons both verbally and in extended written work for example in evaluations.

At the heart of our creative curriculum is the engagement of pupils with practical tasks. These tasks specifically serve identified needs, solve problems, and function. It is considered essential that these learning activities reflect the nature of the subject within a range of contexts. These include the world of work, the development of communities and society, the environment (sustainability impact) and the ways in which technologies or technological solutions address or affect these. Pupils are encouraged to make, share, justify and discuss value judgements with respect to their own design decisions.

Impact

Design and technology plays a significant role in the Pinner High School curriculum, providing students with valuable skills and knowledge that can have a lasting impact on their education and future careers. Here are some of the key impacts:

1. We encourage students to think **critically** and develop **problem-solving skills**. We teach them to **analyse** challenges, **identify** potential solutions, and work through the design process to create innovative **solutions**.
2. We foster **creativity** and encourage students to think outside the box. We allow them to **explore** their imagination, **generate** new ideas, and develop **innovative** designs. These skills are valuable not only in the field of design but also in various other areas where creative thinking is required.
3. We provide students with the opportunity to apply **theoretical** knowledge to practical projects. The subject bridges the gap between theory and practice by allowing students to **design, create, and test** their ideas, which enhances their understanding of **concepts** and promotes a deeper level of learning.
4. We encourage an entrepreneurial mindset by fostering **creativity, problem-solving, and innovation**. Our subject inspires students to identify opportunities, take risks, and develop a proactive approach to designing and creating products or solutions.
5. Design and technology can introduce students to potential career paths in design, engineering, architecture, product development, and other related fields. It provides a foundation for further study and can inspire students to pursue careers in areas where they can apply their skills and interests.

Overall, Design and Technology in our school curriculum has a **transformative** impact on students' education by fostering **creativity, critical thinking, problem-solving, and technological literacy**. These skills and knowledge prepare students for future challenges, equip them for the workforce, and empower them to contribute to society in meaningful ways.

	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6
Year 7	Introduction to the workshop as well as Health & Safety rules within the workshop environment.	Using the design process to design and make a key ring including going through research, design and development.	Students will be introduced to tools and machines in the workshop. Learning basic skills of how to use materials (Acrylic) with the consideration of there characteristics.	An introduction to designers: Zaha Hadid, Gerrit Rietveld, Charles Rennie Mackintosh, Ettore Sottsass, Raymond Templier and conducting a product analysis	Following the design process to make a clock based on a designer. Design Brief & Specification Design Ideas & Design Development	Prototype & Final Design. Pinner High School: Food Preparation and Nutrition

Food Preparation and Nutrition GCSE - Eduqas

Intent

We provide a **broad, balanced, inspiring and relevant** Food Preparation and Nutrition curriculum for our students at Pinner High School. It aims to develop **passion, independence, resilience, creativity and instil a love of learning** in our students from their very first encounter with the subject, in year 7. The Food Preparation and Nutrition curriculum aims to provide students with **invaluable life skills and knowledge required** to cook nutritious and healthy dishes for themselves and others. It will also enable students to make **informed choices** about their future in particular **further studies** and wider **career opportunities**. The Food Preparation and Nutrition curriculum is not only planned for students to achieve top grades in examinations, but also to equip them to become **well rounded, confident, life-long learners** with effective **transferable skills** who will make valuable contributions to the society in which they live.

What are the key subject specific skills or knowledge students must acquire through the key stage journeys of our curriculum?

Food Preparation and Nutrition is an **inspiring, rigorous and practical subject**. Students **develop an understanding of and apply the principles of health and nutrition**. They **learn to cook a variety of dishes, predominantly savoury dishes to feed themselves and others in a healthy and varied way**. Students **develop competence** in using a range of cooking techniques, utensils and electrical equipment, different methods of heat transfer and awareness of how to use their senses to season dishes well and combine ingredients. They also learn to adapt recipes to meet the nutritional needs of different groups of people. They understand the source, seasonality and characteristics of a broad range of ingredients.

Why is our curriculum designed the way it is?

The Food Preparation and Nutrition curriculum is delivered on a carousel with Art and Design and Technology at key stage 3. This means that each year group from years 7 to 8 studies the subject for a duration of 12 weeks per year while at key stage 4 (years 9-11) students have 3 lessons of Food each week for a whole year. Students are taught the technical knowledge, understanding and skills of Food Preparation and Nutrition through a variety of creative and practical approaches. Lessons are structured successively and take into account students' prior learning while developing a deeper understanding of challenge, new knowledge and skills in our students.

At key stage 3 due to the fact that we rotate each term and only see students for 12 double lessons, there are three practical lessons to every theory lesson. Hence, students are set a variety of relevant weekly home learning tasks that will promote greater independence, consolidate their learning and stimulate creativity as they continue to engage with the subject outside the classroom. At key stage 4 double lessons are used for delivering the practical elements of the course while theory is delivered in single lessons. Students are also expected to spend at least one hour completing a variety of home learning tasks each week.

Implementation

How are lessons structured?

Lessons are divided into three main parts: a "Do Now" activity, main and plenary. A 10 minute "Do Now" is given to focus students on their learning once they enter the room. Lessons are designed with the needs and abilities of the students in mind. Lessons are sequenced progressively and build on prior learning, starting with the least difficult to the

most advanced knowledge, skills and techniques or from concrete to more abstract concepts. Lessons are engaging, interactive, meaningful and challenging and links are made to real life situations so that students can make connections and deepen their understanding of the subject. Students understand the significance of what they are learning and are able to determine how Food Preparation and Nutrition relates to the wider scheme of things.

Department strategies: What are the important features of lessons and why?

Lessons are differentiated to ensure that all learners are challenged and that they make the expected level of progress in line with their abilities. **Key words** are taught and are often displayed on the slide with the lesson objectives and success criteria. Key words are taught as matching items, card sorting activities and fill in the blank spaces in most lessons. **Assessment** is built into lessons to check students' understanding and to correct misconceptions. Questions are also targeted at specific students to stretch and challenge them. Students often **evaluate and analyse** their product at the end of each practical as a home learning task so that they know what they have done well and where they have gone wrong to avoid making the same mistakes in the future. Home learning tasks are also set to reinforce what they have learnt in theory and practical lessons and allow for deeper understanding of the subject.

Adult guides and **accurate subject knowledge** are provided so that non-specialists and support staff can **feel confident** and supported with their subject knowledge and skills. With regards to practical lessons, recipe cards with step by step instructions, as well as images to match each step, are produced for students and adults to use in preparing and cooking each dish. Each recipe card has a set of reflective questions at the back for those students who have completed their making and washing up before the lesson ends. Students are often provided with video links to watch on recipes they will be preparing in the next lesson in order to develop independence.

What does a typical lesson look like? What would you see?

Food Preparation and Nutrition is an inspiring, rigorous and practical subject. Students who study Food Preparation and Nutrition enjoy the subject and are usually fully engaged with their learning. Lessons are often student centred and designed to meet the needs of all learners. Students are encouraged to ask and answer questions in order to deepen their understanding and clarify misconceptions. Students will complete both practical and written work that will help to enhance and deepen their thinking on food, nutrition and food science.

Impact

Success factor: What does student success look like? What can the students now do & demonstrate as a result of our curriculum implementation?

Students have been able to demonstrate independence and creativity in their learning. Students enjoy the study of Food Preparation and Nutrition and are very passionate about the subject. Students' knowledge, understanding and skills have heightened. Food Preparation and Nutrition is a very popular subject at key stage 4, as we currently have a healthy number of students studying Food Preparation and Nutrition in years 9-11. In addition, a number of students who studied GCSE Food Preparation and Nutrition at the end of the course in year 11, have gone on to pursue a Food Preparation and Nutrition related course at post 16 level at other institutions. In addition, Food Preparation and Nutrition is among the top performing subjects at Pinner High school.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 7	<p>Students are taught the importance of health and safety and how to use equipment safely and with precision to cook a wide range of cross-cultural dishes to feed themselves and others in a healthy and varied way. Some of these dishes include: sweet and savoury salads, Fruit Crumble, Spaghetti Bolognese and Ratatouille. Students also demonstrate their knowledge in using sensory testing vocabulary to evaluate and analyse the food they have made in detail while considering the views of the users.</p> <p>Assessment is at the end of the unit.</p>	<p>Students develop their understanding of nutrients and their relationship to the body. They learn to use the information on food labels to make informed food choices. They continue to demonstrate a range of cooking skills, techniques and methods of cooking in preparing dishes to include Thai Green Curry, Vegetable Pasta Bake, Bread Rolls, Pizza, Cheese Cake, and Fairy Cakes.</p>	<p>Students are taught the importance of health and safety and how to use equipment safely and with precision to cook a wide range of cross-cultural dishes to feed themselves and others in a healthy and varied way. Pinner High School: Business

Business GCSE - Pearson Edexcel

Business A Level - Pearson Edexcel (9BS0)

Intent

- Business at Pinner High School aims to inspire students to understand the importance of the business world and equip them with the knowledge and skills to prepare them for all aspects of working life. Studying Business will allow students to think commercially and creatively, to understand the dynamics of business as well as develop decision making, problem solving, quantitative and analytical skills. At both GCSE and A Level, students are introduced to business models, theories and techniques which they apply to real life business case studies.
- Our intent is for students to learn essential business concepts, terminology, and principles, including areas such as marketing, finance, operations, and entrepreneurship. By studying business, students gain valuable knowledge and skills related to different parts of the business world, equipping them with the foundations necessary to navigate and contribute to the broader economy.
- We aim to meet the diverse needs of all our students, including those with special educational needs (SEND), PP (pupil premium) as well as HAP (our high ability pupils) to have equal opportunities to reach their full potential.

Implementation

- Lessons are organised to ensure a logical progression of topics, with opportunities for revision, consolidation of learning, and effective retrieval practice.
- Clear learning outcomes and objectives are shared at the beginning of each lesson. These outcomes focus on knowledge of key concepts and skills that students should learn and understand by the end of the lesson. This helps students to understand what they will be learning and what success looks like.
- In order to engage our students and foster practical understanding, we incorporate real-world examples and case studies into our teaching. By illustrating business concepts and their applications in practical situations, students are able to relate theoretical knowledge to real-life scenarios, enhancing their comprehension and skills.
- We regularly employ various assessment methods such as end-of-topic tests, exam practice questions, and effective teacher questioning to gauge students' comprehension and identify any misconceptions. This allows us to provide constructive feedback to students to help them improve and reflect on their learning.
- We place great emphasis on the continuous development of key skills within our Business curriculum. Through an interleaving approach, these skills are revisited and reinforced regularly, ensuring students' proficiency and retention.
- To support individual student progress, we maintain records of their performance through shared data tracking sheets which are updated after each assessment and half termly. This enables us to see progress and identify students in need of early intervention who may require additional support.
- SEND students are supported to achieve their potential through differentiated worksheets, printing of lesson resources and the use of laptops. PP students are provided with revision textbooks and supported to access the learning materials.
- In Business we contribute to supporting and promoting literacy skills among our students through critical reading of business texts, case studies and news articles, which enhances their comprehension and analysis abilities. Key terms and business vocabulary are explicitly taught at both KS4 and KS5, encouraging students to utilise these terms in their discussions and written work. We also develop their mathematical skills through the analysis and interpretation of a range of data, using diagrammatic representations, using formulas and calculations.

- Students are provided with opportunities to track their learning and progress through RAG rated personal learning checklists. These are completed at the end of each topic, allowing students to reflect on their learning, evaluate their understanding of topics and identify areas for further development.
- Independent learning skills are built into lessons including research tasks, case study analysis, collaborative group work, presentations, and peer and self-assessment. These activities empower students to take ownership of their learning and develop valuable skills for lifelong learning.
- Teachers in the department employ a range of effective teaching and learning methods, including modelling, scaffolding, high order questioning, differentiation, and the use of exam technique writing frames, with a particular focus on the students' needs and abilities in each of their classes.
- To ensure the highest standards of teaching, our staff are encouraged to participate in relevant CPD (Continuing Professional Development) opportunities. This enhances their subject knowledge and keeps them up to date with changes in specifications. We promote the sharing of high-quality teaching pedagogy through department meetings and whole-school training. We regularly update our teaching and learning resources to take account of changes in the economy and these are shared through our department Google Drive.

Impact

- At Pinner High School, our curriculum has a positive impact on students interested in pursuing higher education in business or related fields. The GCSE course provides a strong foundation by providing students with comprehensive knowledge that enables them to study the subject further at A Level. The successful completion of the A Level course ensures students have a solid grounding for university-level business courses. A significant number of our students have chosen to study the subject further at University.
- Regular assessments inform teachers of student understanding and identify misconceptions. This can be measured through end of topic tests, mock exams as well as teacher Q&A. Regular use of timed exam responses allows us to monitor student progress effectively.
- To measure student progress, we use evidence from mock exam results as an objective measure of academic achievement, while half-termly data analysis provides a comprehensive view of each students' progress over time. Furthermore, judgements and feedback on business research tasks and presentations at A Level are directly linked to assessment objectives (AO1-AO4).
- To ensure quality assurance teachers are observed each term to maintain high standards of teaching, while student focus group discussions allow us to gather valuable feedback in order to make necessary improvements. Regular checks of books at KS4 and folders at KS5 help to monitor assessment feedback, peer/self-assessment, the quality of student work and their engagement. Additionally, moderation of student work and mock exam scripts ensures consistency and fairness in the assessment process.

Careers

Our hope is for Pinner High School Business students to become informed consumers, employees, managers, and entrepreneurs of the future. The transferable skills gained through studying business would equip them to enter a wide range of careers. Studying business will lead to students becoming more informed citizens, consumers, employees, future employers and entrepreneurs. Studying Business can lead to specific job roles in:

- Business Development
- Marketing
- Recruitment
- Banking and finance

- Administration
- Accounting and Finance
- Business Management

Curriculum Plan: KS5: Edexcel A level Economics A (9EC0)

Intent

- To stimulate a passion and love for Economics at Pinner High School, we aim to promote the ability to think like economists, enabling students to develop logical arguments and make sound economic judgments.
- We emphasise the importance of understanding fundamental economic concepts and their application in real-world situations. Students will gain knowledge about how markets work, comprehend the dynamics of supply and demand, explore economic efficiency, and address crucial economic challenges such as poverty, inequality, and environmental sustainability. Through this understanding, they will be equipped to evaluate the impact of policies and decisions on a national and global scale.
- We strive to empower students to justify economic arguments with rigour. By critically analysing economic events, they will be able to scrutinise these arguments and strengthen their economic reasoning skills. We also want our students to be able to think analytically, reach logical conclusions based on data, and make judgements on future changes to markets and the economy.
- To develop fluency in the use of the economic toolkit, which involves the use of diagrammatic analysis in both micro-economics and macro-economics which will enable them to apply economic principles effectively. We aim to encourage the development of inquiry and analytical skills through data analysis and applying economic theories and models to economic problems.
- Our curriculum fosters a holistic understanding of economics by encouraging students to make connections across themes and topics covered in the specification. This approach supports synoptic learners to see the interconnectedness of various economic concepts.
- We aim to meet the diverse needs of all our students, including those with special educational needs (SEND), PP (pupil premium) as well as HAP (our high ability pupils) to have equal opportunities to reach their full potential.
- We recognise the importance of developing transferable skills that go beyond economics. Our students will enhance their quantitative and qualitative skills, improve their communication abilities, develop critical thinking, and strengthen problem-solving capabilities. These skills will equip them for success in various academic and professional pursuits.

Implementation

- Lessons are thoughtfully organised to ensure a logical progression of topics, with opportunities for revision, consolidation of learning, and effective retrieval practice.
- Clear learning outcomes and objectives are shared at the beginning of each lesson. These outcomes focus on knowledge of key concepts and skills that students should learn and understand by the end of the lesson. This helps students to understand what they will be learning and what success looks like.
- In order to engage students and foster practical understanding, we incorporate real-world examples and case studies into our teaching. By illustrating economic concepts and their applications in practical situations, students are able to relate theoretical knowledge to real-life scenarios, enhancing their comprehension and skills. In order to inspire our students, we invite expert speakers and encourage them to enter national competitions linked to the subject.
- We regularly employ various assessment methods such as end-of-topic tests, exam practice questions, and effective teacher questioning to gauge students' comprehension and identify any misconceptions. This allows us to provide constructive feedback to students to help them improve and reflect on their learning.
- We place great emphasis on the continuous development of key skills within our Economics curriculum. Through an interleaving approach, these skills are revisited and reinforced regularly, ensuring students' proficiency and retention.
- To support individual student progress, we maintain records of their performance through shared data tracking sheets which are updated after each assessment and half termly. This enables us to see progress and identify students in need of early intervention who may require additional support.
- SEND students are supported to achieve their potential through differentiated worksheets, printing of lesson resources and the use of laptops. PP students are provided with revision textbooks and supported to access the learning materials.
- In Economics we contribute to supporting and promoting literacy skills among our students through critical reading of economics texts, case studies and news articles, which enhances their comprehension and analysis abilities. Key terms and economics vocabulary are explicitly taught at both KS4 and KS5, encouraging students to utilise these terms in their discussions and written work. We also develop their mathematical skills through the analysis and interpretation of a range of data, using diagrammatic representations to illustrate economic concepts and the use of formulas and calculations.
- Students are provided with opportunities to track their learning and progress through RAG rated personal learning checklists. These are completed at the end of each topic, allowing students to reflect on their learning, evaluate their understanding of topics and identify areas for further development.

- Independent learning skills are built into lessons including research tasks, case study analysis, collaborative group work, presentations, and peer and self-assessment. These activities empower students to take ownership of their learning and develop valuable skills for lifelong learning.
- Teachers in the department employ a range of effective teaching and learning methods, including modelling, scaffolding, high order questioning, differentiation, and the use of exam technique writing frames, with a particular focus on the students' needs and abilities in each of their classes.
- To ensure the highest standards of teaching, our staff are encouraged to participate in relevant CPD (Continuing Professional Development) opportunities. This enhances their subject knowledge and keeps them up to date with changes in specifications. We promote the sharing of high-quality teaching pedagogy through department meetings and whole-school training. We regularly update our teaching and learning resources to take account of changes in the economy and these are shared through our department Google Drive.

Impact

- At Pinner High School, our curriculum has a positive impact on students interested in pursuing higher education in business or related fields. The GCSE course provides a strong foundation by providing students with comprehensive knowledge that enables them to study the subject further at A Level. The successful completion of the A Level course ensures students have a solid grounding for university-level Economics courses. A significant number of our students have chosen to study the subject further at University.
- Regular assessments inform teachers of student understanding and identify misconceptions. This can be measured through end of topic tests, mock exams as well as teacher Q&A. Regular use of timed exam responses allows us to monitor student progress effectively.
- To measure student progress, we use evidence from mock exam results as an objective measure of academic achievement, while half-termly data analysis provides a comprehensive view of each students' progress over time. Furthermore, judgements and feedback on business research tasks and presentations at A Level are directly linked to assessment objectives (AO1-AO4).
- To ensure quality assurance teachers are observed each term to maintain high standards of teaching, while student focus group discussions allow us to gather valuable feedback in order to make necessary improvements. Regular checks of books at KS4 and folders at KS5 help to monitor assessment feedback, peer/self-assessment, the quality of student work and their engagement. Additionally, moderation of student work and mock exam scripts ensures consistency and fairness in the assessment process.
- Beyond assessments, students will acquire the confidence and skills necessary to excel in various situations outside the classroom. Our hope is for Pinner High School Economics students to become informed consumers, employees, managers, and entrepreneurs of the future. The transferable skills gained through studying Economics would equip them to enter a wide range of careers including Economist, Data Analyst, Accountant, Investment Banker, Financial Risk Analyst, Stockbroker, Researcher.

Enrichment Opportunities & Super Curricular

- Trips: Bank of England – links to topics on interest rates, monetary policy & inflation
- Guest speakers - Bank of England – Positive Money, Green Party on Degrowth, Chief Examiner on NHS, Q&A for A level students looking at the role of the BOE in the economy
- Financial Times Student Advocates
- Economics Olympiad
- Student Investor Challenge
- My Money Week activities
- Global Money Week activities
- Subscription to the Economist
- Wide range of learning material for Economics in the school library

Commitment to Equality, Diversity & Inclusion

- Having an inclusive classroom with positive representation
- Using a range of diverse learning material in our teaching
- Differentiating tasks/activities
- Using student profiles and planning accordingly
- Mixed ability classes which support and challenge all our learners

We seek to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. The Economics Curriculum is a key way of meeting these objectives. It has been designed to meet the needs of each individual student, providing opportunities which stretch and excite. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress from Key Stage 4 and into KS5. Homework is set to meet these goals in delivering a challenging curriculum. It is designed to further deepen and broaden the knowledge and skill set of our students. All homework is set on Google Classroom and is regularly checked by the Head of Department. The following plan allows time for teachers to incorporate projects, research tasks and group work on various topics without compromising on being able to finish the content over the 3 academic years.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 9 Introduction to Economics	Main economic groups and factors of production <ul style="list-style-type: none"> - The basic economic problem - Scarce resources, unlimited wants and the economic problem - Opportunity cost - Economic choices and sustainability - The role of markets - Market; sectors; product and factor markets - Specialisation and exchange Assessment: Test on 1.1 topics	Demand <ul style="list-style-type: none"> - Demand curves - shifts and movements - Causes and consequences of shifts and movements - Price elasticity of demand - Importance of PED for consumers/producers Assessment: Demand knowledge test 2.2	Supply <ul style="list-style-type: none"> - Supply curve - shifts and movements - Causes and consequences of shifts and movements - Price elasticity of supply - Importance of PES for consumers/producers - Price - Equilibrium price and quantity - Interaction of demand and supply - Determination of price - Allocation of resources - Market forces, equilibrium price and quantity Assessment: Drawing supply curves and PES calculations test 2.3	Competition and market economy <ul style="list-style-type: none"> - Competition and price - Impact of competition on producers and consumers - Monopoly and oligopoly - Role of producers - Production - Production and productivity - Cost, Revenue, profit and loss calculations Assessment: Questions on the market forces of S & D	Production <ul style="list-style-type: none"> - Importance of cost, revenue, profit and loss - Economies of scale - The labour market - Determination of wages - Gross and net pay calculations Assessment: Calculations test	The role of money and the financial markets <ul style="list-style-type: none"> - Importance of financial sector - Effect of changes in interest rates - Interest rate calculations Assessment: Questions on the financial sector and calculations <i>End of year mock</i>
Year 10 National & International Economics	Recap of year 9 topics <ul style="list-style-type: none"> - Government objectives - Economic growth - GDP and GDP per capita - Recent and historical GDP data - Determinants of economic growth - Costs and benefits of economic growth Assessment: Questions on economic growth and calculating GDP/GDP per capita	Unemployment <ul style="list-style-type: none"> - Employment and unemployment, types of unemployment - Claimant Count - Unemployment rate calculations - Recent and historical unemployment data - Causes and consequences of unemployment Assessment: Knowledge test on key terms and data questions	Fair distribution of income & wealth <ul style="list-style-type: none"> - Distribution of income and wealth - Income and wealth calculations - Causes and consequences of differences in income and wealth - Price stability and inflation - Real and nominal values - Consumer price index Assessment: Exam practice Questions on calculating income/wealth and CPI	Price stability and inflation <ul style="list-style-type: none"> - Recent and historical data on inflation - Causes and consequences of inflation - Fiscal policy - Sources of Government spending & revenue - Government budget – surplus, balanced, deficit - Effects of fiscal policy - Costs and benefits of supply side policies - Measures to redistribute income and wealth - taxation Assessment: Exam practice questions on inflation and fiscal policy.	Monetary policy <ul style="list-style-type: none"> - How monetary policy affects growth, employment and price stability - Effects of monetary policy - Supply side policy - Costs and benefits of supply side policies Assessment: Knowledge test on policies	Limitation of markets <ul style="list-style-type: none"> - Externalities - Government policies to correct externalities - Impact of policies to correct externalities - Cost and benefits of policies to correct externalities Assessment: Exam questions on market failure <i>End of year mock</i>

Year 11	Recap year 10 topics	Balance of Payments	Exchange rates	REVISION & EXAM PRACTICE	REVISION & EXAM PRACTICE	EXAM SEASON
National & International Economics	<ul style="list-style-type: none"> - Importance of international trade - International trade - Free trade agreements - Balance of Payments - BOP surpluses and deficits <p>Assessment: Exam questions on free trade and knowledge test</p>	<ul style="list-style-type: none"> - Recent and historical international trade data - The importance of BOP for the UK economy - Exchange rates - Exchange Rates & currency conversion - Recent and historical exchange rate data <p>Assessment: Calculations and exam practice questions</p>	<ul style="list-style-type: none"> - Effect of changes in exchange rate - Globalisation - Development measures - Costs and benefits of Globalisation in developed countries - Costs and benefits of globalisation in less developed countries. <p>Assessment: Exam practice questions</p>			

A-level Economics-A is a **synoptic linear course**: students are required to **make links** between the different themes and between micro-economics and macro-economics within the specification and will be examined on their ability to do so at the end of the two year course. In order to develop these skills students will study micro-economics (Theme 1 & 3; markets and business behaviour) and macro-economics (Theme 2 & 4; the 'bigger picture') in parallel; three lessons of microeconomics (Theme 1, 3) and three lessons of macroeconomics (Theme 2, 4) each week as follows.

Year	Micro-economics	Macro-economics
Yr12	Theme 1 – Introduction to Markets, Failure, and Intervention - Mrs Balfour	Theme 2 – The National Economy and Macro Policy - Miss Patel
Yr13	Theme 3 - Business behaviour and the labour market - Mrs Balfour	Theme 4 - A Global Perspective - Miss Patel

Year	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
	Theme 1: 1.1, 1.2 Economics as a social science Positive and normative economic statements The economic problem Production possibility frontiers Specialisation and the division of labour Free market economies, mixed economy and command economy Rational decision making Theme 2: 2.1, 2.2	Theme 1: 1.2 Demand Price, income and cross elasticities of demand Supply Elasticity of supply Price determination Price mechanism Consumer and producer surplus Theme 2: 2.3, 2.4	Theme 1: 1.2, 1.3 Indirect taxes and subsidies Alternative views of consumer behaviour Types of market failure Externalities Theme 2: 2.4, 2.5	Theme 1: 1.3, 1.4 Public goods Information gaps Government intervention in markets: - Price schemes (minimum and maximum price) - Information provision - Direct provision - Tradeable pollution permits - Regulation Theme 2: 2.4, 2.5, 2.6	Theme 1: 1.4 Government failure Exam practice and revision Theme 2: 2.6 Conflicts and trade offs between objectives and policies Theme 1 Aims To analyse how governments can worsen or fail to maximise welfare on intervention: through	Exam Practice and Revision across Theme 1 and Theme 2. Overall Skills practiced Diagrammatic analysis of failures and interventions in markets and AD/AS diagrammatic analysis with respect to macroeconomic events and policy Paper 1/2 Section A exam technique Paper 1/2 Section B: Data Response exam technique 25m technique Application of real-world market failure and macroeconomic events

Economic growth	The characteristics of AS	Causes of growth	Demand-side policies: Monetary Policy	imperfect information, administration and monitoring costs etc.	e.g. 2008 Global Financial Crisis
Inflation	Short-run AS	Output gaps	Supply-side policies	Students should be able to use examples of government failure to evaluate the various methods of intervention for different purposes in various markets.	Numerical calculations Evaluation of government interventions (CLASPP) 25m essay practice using skills mat and writing frame
Employment and unemployment	Long-run AS	Trade (business cycle)	Theme 1 Aims:	Theme 2 Aims	Exam technique
Balance of Payments	National income	The impact of economic growth	To understand market failure and the different types continued:	To analyse how macroeconomic objectives may be achieved via demand side policies: fiscal and monetary policy and supply side policies and to be able to illustrate the impact of these macro-economic tools via AD/AS analysis and to evaluate their efficacy in real world context.	
The characteristics of AD	Injections and withdrawals	Possible macroeconomic objectives	<ul style="list-style-type: none"> - Public goods – explaining why these represent missing markets if left to the private sector e.g. due to the free rider problem 	To understand the role of demand side policies in addressing the impacts of the global financial crisis on the UK economy post 2008.	
Consumption (C)	Equilibrium levels of real national output	Demand-side policies: fiscal policy	<ul style="list-style-type: none"> - Information gaps – how these can lead to misallocation of resources e.g. asymmetric information and adverse selection in relation to complex goods – cars and computers 	To be able to evaluate the efficacy of these macroeconomic policies. Students may use the CLASPP tool.	
Investment (I)	The multiplier	Theme 1 Aims:	To understand how and why governments intervene in markets to correct market failures and to make diagrammatic illustrations of these methods across a range of contexts e.g. indirect tax of demerit goods, subsidies for merit goods, price controls, tradeable pollution permits etc.		
Government expenditure (G)	Theme 1 Aims:	To explore and understand how markets work through an understanding of the functions of price: signalling, rationing and incentive and to use the underlying assumptions of rational economic decision making.	To be aware of and evaluate some of the alternative views of consumer behaviour including reasons why consumers may not behave rationally e.g. rules of thumb/heuristics		
Net trade (X-M)		To understand the Law of Demand: the reasons for the inverse relationship between price and quantity of demand including the Law of Diminishing marginal utility.	To understand why the market fails to maximise welfare – students need to be aware of a range of examples and be able to explain and evaluate with the use of complex diagrammatic analyses		
Theme 1 Aims:			To be able to evaluate the efficacy of these interventions for		
To develop an understanding of the basic economic problems of scarcity and choice, of how economic modelling is used and through understanding the parallels and differences between Economics and the study of sciences.					
To be able to model the issue of scarcity, illustrating opportunity cost by the use of production possibility curves and apply these to different scenarios.					
To understand the drawbacks and benefits of economic specialisation;					

<p>focussing the use of factors of production into a narrow range of activities with a particular focus on the division of labour</p> <p>To be able to evaluate the merits and drawbacks of planned economies versus free market economic systems of resource allocation in order to maximise welfare and of mixed economic systems between the two extremes, with reference to country examples.</p> <p>To understand the concept of rational decision making by market agents, such as consumers and producers in terms of maximising behaviour and marginal analysis.</p> <p>Theme 2 Aims</p> <p>To understand the key measures of macro-economic performance in terms of UK data trends for, factors affecting and effects of the following and the units used to measure them and the limitations of these measures:</p> <ul style="list-style-type: none"> - Economic growth – use of GDP per capita figures, GNI, real versus nominal, PPP 	<p>price factors that may shift/affect demand and supply in difference scenarios or industries</p> <p>To be able to illustrate these using accurate and fully labelled demand and supply diagrams showing old and new equilibria.</p> <p>To understand the factors influencing the responsiveness of demand to changes in price, income and to changes in prices of related goods (complements and substitutes), respectively: Price, income and cross elasticities of demand (PED, YED, XED).</p> <p>To understand and apply price elasticity of supply and the factors affecting the responsiveness of quantity supplied by producers to changes in price e.g. availability of stock, workers or land.</p> <p>To be able to calculate PED, YED, XED, PES using the correct formulae and construct demand and supply diagrams to illustrate them. Students should understand why PED, YED, XED and PES are important to market agents and their decision making.</p>	<p>(e.g. negative production and positive consumption externality diagrams)</p> <p>Theme 2 Aims:</p> <p>To be able to analyse the causes of short run and long run growth, the former relating to a movement towards the PPF and closing of a negative output gap.</p> <p>To be able to evaluate the impacts of economic growth on the macro-economy and economic agents now and in the future.</p> <p>To understand apply understanding of the trade cycle and its different phases.</p> <p>To understand output gaps and issues relating to positive and negative output gaps in relation to the trade cycle and to be able to link this back to measures of economic performance e.g. inflation and economic growth.</p> <p>To understand the macro-economic objectives and how they may be achieved via demand side policies: fiscal and to be able to illustrate the impact of</p>	<p>correcting market failure. Students may use the CLASPP tool to help them with this*</p> <p>Theme 2 Aims:</p> <p>To be able to analyse the causes of short run and long run growth, the former relating to a movement towards the PPF and closing of a negative output gap.</p> <p>To be able to evaluate the impacts of economic growth on the macro-economy and economic agents now and in the future.</p> <p>To understand apply understanding of the trade cycle and its different phases.</p> <p>To understand output gaps and issues relating to positive and negative output gaps in relation to the trade cycle and to be able to link this back to measures of economic performance e.g. inflation and economic growth.</p> <p>To understand the macro-economic objectives and how they may be achieved via</p>	<p>Theme 1 Lesson / Content Overview:</p> <p>Teacher led PPTs covering 1.4 facilitating student understanding and application and 'Read Now' with Q&A tasks linking theory to economic events.</p> <p>Diagrammatic analysis of market failure and government interventions such as minimum price schemes applied to alcohol, agriculture or wages, and tradeable pollution permits etc. using demand and supply diagrams through a range of given scenarios; showing original and new equilibria and consumer and producer surplus changes and deadweight loss where relevant.</p> <p>Articles with Q&A on real world application of these interventions e.g. energy price cap or rent caps or EU cap and trade system.</p> <p>Diagrammatic analysis of market failure and interventions.</p> <p>Answer 5, 8, 10, 12m, 15m marker exam questions: data response questions analysing and evaluating specific market failures and interventions. These</p>
---	---	--	---	---

<ul style="list-style-type: none"> - Inflation – cost push versus demand pull factors, CPI/RPI measures and calculations - Employment - Unemployment – Claimant count versus - Balance of Payments – different components and focus on factors affecting and impacts of changes in the balance of trade of the current account. <p>To understand Aggregate Demand and the factors affecting and characteristics of each of its components in detail and the relative importance of these components:</p> <ul style="list-style-type: none"> - Consumption (C) - Investment (I) - Balance of Trade/ net trade (X-M) <p>Theme 1 Lesson / Content Overview:</p> <p>Students identify opportunity costs in their everyday decision making about how best to use their finite resources, which include time and energy as well as money and factors of production and those faced by market</p>	<p>To be able to interpret all the numerical values relating to elasticities</p> <p>To understand the functions of the price mechanism in allocating resources through; rationing, incentive & signalling functions.</p> <p>To recognise the price mechanism in the context of different types of markets; including local, national and global markets</p> <p>To be able to explain the distinction between consumer and producer surplus, their significance and illustrate them on a demand and supply diagram.</p> <p>Theme 2 Aims:</p> <p>To understand the characteristics of Aggregate Supply and distinguish between Short-run AS and Long-run AS (and Keynesian and Classical distinctions of AS)</p> <p>To be able to analyse the distinct factors impacting short and long-run AS</p> <ul style="list-style-type: none"> - Short run AS factors linked to factors affecting cost of production nationally given that they are 	<p>these macro-economic tools via AD/AS analysis.</p> <p>To understand the role of demand side policies in addressing the impacts of the global financial crisis on the UK economy post 2008.</p> <p>To be able to evaluate the efficacy of these macroeconomic policies. Students may use the CLASPP tool.</p> <p>Theme 1 Lesson / Content Overview:</p> <p>Teacher led PPTs covering 1.2 1.3 facilitating student understanding and application and 'Read Now' with Q&A tasks linking theory to economic events.</p> <p>Constructing diagrams analysing impact of changes in demand and supply factors, including indirect taxes and subsidies using demand and supply diagrams through a range of given scenarios; showing original and new equilibria and consumer and producer surplus.</p>	<p>demand side policy: fiscal and to be able to illustrate the impact of these macro-economic tools via AD/AS analysis and to evaluate their efficacy in real world context.</p> <p>To understand the role of demand side policies in addressing the impacts of the global financial crisis on the UK economy post 2008.</p> <p>To be able to evaluate the efficacy of these macroeconomic policies. Pinner High School: Computer Science

KS3: Computing

KS4: GCSE (9-1) Computer Science - OCR (J277)

KS5: A Level Computer Science - OCR (H446)

Curriculum Aim

To prepare students for the digital world through a broad, balanced, and challenging curriculum that promotes technology, creativity, and global citizenship, encouraging them to think big and succeed in the field of computer science

Intent

The Computer Science curriculum is designed to help students learn about three main areas in Computing: Information Technology, Digital Literacy, and Computer Science. They gain skills to use computers effectively, create digital products, and be responsible digital citizens. They also learn about staying safe online, understanding the impact of technology, and important moments in our digital world. Additionally, they study Computer Science, which involves how computers work, global communication, problem-solving using computational thinking, and creating algorithms and programs.

Throughout the curriculum, students are encouraged to work independently, think deeply, and write effectively about what they learn. There are various opportunities for extra learning, such as competitions and programs like Bebras, CyberFirst Girls, App Development, and the Inspiring Digital Enterprise Award. We also plan to organise a trip to Bletchley Park, the first computer's home.

For students with special educational needs, we provide appropriate support and adjustments so they are not disadvantaged. Enrichment opportunities are available for high-achieving pupils. They can explore advanced topics, participate in coding competitions, and engage in research projects to foster their curiosity, creativity, and deeper understanding of the subject. We want to challenge and stimulate their abilities, allowing them to reach their full potential and develop their skills and passion for computer science.

We regularly assess students' progress using various methods such as practical projects, presentations, and written assignments. We provide constructive feedback to help students understand their strengths and areas for improvement. This ongoing assessment and feedback process guides their learning journey and ensures they receive appropriate support when needed.

The curriculum is differentiated by outcome so that resources, approaches and outcomes are open to all students of all abilities. The curriculum is delivered and brought to life by a specialist and experienced team of dedicated staff. The team of specialist, enthusiast staff ensure that high expectations are set and the Pinner High Values are embedded throughout.

Implementation

In Years 7-8, students engage in the study of KS3 Computing, encompassing all aspects of the National Curriculum. The curriculum focuses on imparting knowledge of computer science, information technology, and digital literacy. A significant emphasis is placed on fostering deep understanding and broadening knowledge through diverse questioning, problem-solving activities, as well as formal interim and end-of-unit tests to assess comprehension and retention of the curriculum content.

The KS3 course is thoughtfully designed to be both challenging and captivating. Students learn the art of designing, utilising, and evaluating computational abstractions, while grasping essential algorithms that embody computational thinking. They also develop logical reasoning skills to compare various alternative algorithms for solving similar problems. Through the utilisation of both text and non-text based programming languages, students engage in designing and constructing modular programs to tackle a wide array of computational problems.

Furthermore, students grasp the fundamentals of basic logic and its applications in circuits and programming. They acquire an understanding of binary representation for numbers and perform operations on binary numbers. In addition, students comprehend the hardware and software components that constitute computer systems, including their communication methods, as well as the storage and execution of instructions.

Students delve into the realm of digital manipulation and representation of diverse types of data. They undertake creative projects that involve the selection, utilisation, and integration of multiple applications across various devices to accomplish challenging objectives. Throughout these endeavours, students demonstrate their ability to create, reuse, revise, and repurpose digital artefacts, paying attention to factors such as trustworthiness, design, and usability.

Moreover, students are educated on the safe, respectful, responsible, and secure usage of technology. This encompasses safeguarding their online identity and privacy, recognizing inappropriate content, contacts, and behaviour, as well as understanding the procedure for reporting concerns.

The beginning of KS4 marks the students beginning their GCSE Computer Science journey with a focus on computer systems. They revise binary and learn about the HEX number system. They explore computer system architecture, memory types, communication processes in networks, data security, software types, and the broader impact of technology, including legislation, ethics, and environmental considerations.

In Year 10, students further develop their programming skills while applying their knowledge to theoretical exams. They cover advanced topics such as computational thinking, algorithms, programming techniques, robust systems, boolean logic, programming languages, and integrated development environments. These units equip students with the skills needed to tackle programming challenges and apply theoretical knowledge effectively in exams.

Year 11 is a crucial year where students deepen their understanding of Computer Science. The curriculum addresses any knowledge gaps identified from Year 10 assessments and focuses on challenging topics. Students are provided with resources from subscription platforms like Craig and Dave, Computer Science UK, and Smart Revise to support their learning. These platforms offer educational materials, interactive tutorials, and practice resources for independent study. This personalised approach encourages self-directed learning, allowing students to strengthen their knowledge, understanding, and skills.

The KS5 curriculum aims to equip students with a comprehensive understanding of the principles and concepts that underpin the field of computer science. Through this curriculum students will develop the essential knowledge, skills, and understanding required to pursue further studies or careers in this dynamic discipline. They will delve into the realm of computational thinking and problem-solving, honing their abilities to analyse problems, design algorithms, and implement solutions using appropriate programming languages. In doing so they will gain proficiency in programming, exploring different paradigms and mastering program structure, data types, control flow, and modularization. The curriculum will also delve into algorithms and data structures, providing students with a toolbox of sorting and searching algorithms, as well as an understanding of linked lists, stacks, queues, trees, and graphs. Students will gain insight into computer systems, unravelling the intricacies of binary representation, Boolean logic, computer components, operating systems, networks, and security. Moreover, they will study the principles and protocols that underpin computer networks, including the Internet, while also delving into database systems and software development methodologies. The curriculum will shed light on the social, legal, ethical, and security aspects of computing, fostering an awareness of the impact of computer science on society and the ethical responsibilities of computer scientists. Throughout the curriculum, students will engage in practical programming projects, problem-solving tasks, and investigative work, ensuring they develop their computational thinking, programming skills, and ability to critically evaluate the implications of computer science in the wider world.

Impact

By implementing our comprehensive and ambitious Computer Systems curriculum, we anticipate a significant impact on the technical proficiency, problem-solving abilities, and critical thinking skills of our students. Throughout the curriculum, individuals will develop a deep understanding of computer systems, including hardware, software, and networks, as well as the broader impact of technology on society.

Through our curriculum, students will gain the knowledge and skills to analyse complex computer-related issues, evaluate evidence, and make informed judgments. They will be able to understand the interconnected nature of computer systems and their role in various domains, such as communication, data storage, and security. By fostering their critical thinking and problem-solving abilities, we aim to equip students with the capacity to address real-world challenges and adapt to the rapidly evolving field of computer systems.

Moreover, our curriculum aims to inspire a sense of digital citizenship and ethical responsibility. Students will develop an understanding of the social, legal, and ethical implications of computer systems, including issues related to privacy, security, and the ethical use of technology. By promoting discussions and activities centred around responsible digital behaviour, we aim to cultivate a generation of technologically literate individuals who value privacy, respect intellectual property, and are mindful of the ethical considerations in the use of computer systems.

Through their engagement with the curriculum, students will also develop a broader awareness of the societal and global impact of computer systems. They will gain insight into the environmental considerations of technology, including energy consumption and electronic waste management. Furthermore, they will understand the implications of technology on various aspects of society, such as employment, education, healthcare, and communication.

This comprehensive understanding of computer systems and their impact will empower our students to make informed decisions and contribute positively to the digital world. They will possess the knowledge, skills, and attitudes necessary to navigate the complexities of computer systems responsibly and ethically. By nurturing a generation of technologically proficient and socially conscious individuals, our curriculum seeks to shape a future where technology is harnessed for the benefit of all, fostering inclusivity, cooperation, and sustainability in the digital era.

Beyond the Curriculum

- **Coding in Different Languages:** Our curriculum goes beyond focusing on a specific programming language, such as Python. We believe in exposing students to a variety of programming languages to broaden their horizons and enhance their skill set. Throughout their journey, students will explore block-based languages like Java, visual programming tools like App Lab for game development, as well as web development languages like HTML, CSS, and JavaScript. By learning different languages, students can grasp diverse programming paradigms and problem-solving approaches.
- **Emerging Technologies:** In line with the rapidly evolving tech landscape, our curriculum introduces students to emerging technologies such as artificial intelligence (AI), machine learning, and data science. Students will dive into the applications of these technologies, analyse their societal impact, and consider ethical considerations. By exploring these cutting-edge fields, students will be prepared for the future and equipped with the skills necessary to navigate the ever-changing technological landscape.
- **Coding Competitions and Hackathons:** We strongly encourage students to participate in coding competitions and hackathons as part of our curriculum. These events provide opportunities for students to challenge themselves, collaborate with peers, and showcase their coding abilities. By engaging in these activities, students can cultivate essential skills like teamwork, creativity, and problem-solving. Additionally, participating in coding competitions and hackathons allows students to connect with a wider community of computer science enthusiasts, fostering a sense of camaraderie and providing avenues for continued growth and learning.

By incorporating a comprehensive curriculum that covers various programming languages, explores emerging technologies, and encourages participation in coding competitions and hackathons, we aim to provide our students with a well-rounded and practical education in computer science. Through these experiences, they will develop the necessary skills, knowledge, and mindset to thrive in the dynamic and ever-expanding field of technology.

Enrichment opportunities

KS3 Two clubs: Inspiring Digital Enterprise Award and Java Programming

Recommended reading and watching

The Computer Science reading and watching list provided encompasses a wide range of topics within the field of computer science, artificial intelligence, and related areas. It includes both historical accounts and future-oriented perspectives, providing readers with a comprehensive understanding of the subject. From "A Brief History of Artificial Intelligence" by Michael Wooldridge to "The Atlas of AI" by Kate Crawford, these works explore the origins, current state, and potential future developments of artificial intelligence. Books like "The Alignment Problem" by Brian Christian and "Artificial You" by Susan Schneider delve into the ethical and philosophical implications of AI, while "Understanding the Digital World" by Brian W. Kernighan provides essential knowledge about computers, the internet, privacy, and security. The list also covers various aspects of coding and programming, including "Essential Computational Thinking" by Ricky J. Sethi and "Software Engineering at Google" by Titus Winters. Furthermore, it includes works that shed light on the historical context of computing, such as "The Codebreakers of Bletchley Park" by Christopher Andrew and "Ada Lovelace Cracks the Code" by Rebel Girls. Movies like "Hidden Figures," "The Imitation Game," and "Coded Bias" offer cinematic portrayals of significant events and issues in computer science and AI. Overall, this reading and watching list provides a comprehensive and diverse collection of resources to explore and deepen one's understanding of computer science and its impact on society.

Careers

Students with a Computer Science GCSE and A-Level qualification have a solid foundation in computer science principles and programming skills, which can open up a range of career opportunities in the field. Here are some potential career paths for students with these qualifications:

- Software Developer/Engineer
- Web Developer
- Data Analyst/Scientist
- Systems Analyst
- Network Administrator
- Cybersecurity Analyst
- IT Consultant
- Database Administrator
- Game Developer
- Machine Learning Engineer

Homework and Consolidation <p>Year 13 students are required to work on their programming project independently throughout the year ensuring they meet the interim deadlines at the end of each term. Students are also expected to complete set homework and continue with revision throughout the year.</p>					

Curriculum Overview: Mandarin

KS3: Jinbu 1. Option to participate in the Mandarin Excellence Programme.

KS4: GCSE Chinese (Spoken Mandarin) (8673). Option to participate in the Mandarin Excellence Programme.

KS5: Year 12 and 13: Edexcel A Level Mandarin

Intent

By the end of Key Stage 3, students should have an awareness of the distinctive linguistic features of Chinese, such as characters and tones. Students should be able to talk and write simply about themselves and their likes and dislikes.

By the end of Key Stage 4, students should be able to give and justify opinions, and to use all three time frames. Students should be able to talk and write paragraphs about themselves and the world around them.

By the end of Key Stage 5, students should be able to talk and write at length about a number of topics, including social issues and aspects of Chinese culture. Students should be familiar with a range of sayings and sentence structures, and should be able to use these devices in the correct contexts.

Implementation

Literacy: Students are introduced to techniques which enable them to recognise the Chinese characters and decode meaning. Students are given the opportunity to read and write sentences and full texts through a range of different classroom activities.

Speaking: Students develop their speaking skills through a variety of tasks, such as role plays, battleships, class surveys, competitions, leader boards, speed dating, hot seating and other activities to promote spontaneous speaking, building skills outlined in the Pinner High School Oracy Success Criteria

https://docs.google.com/document/d/1NA4SJMVHfatrAI-zXFQm_B0mDguA-azO/edit?usp=sharing&ouid=106195038582587635029&rtpof=true&sd=true

Listening: Students' listening skills are developed through various listening activities, including listening to short audio quizzes, watching short video clips and singing Chinese songs. In addition, the teachers make use of the target language in class to maximise students' exposure to spoken Chinese.

Translation: Translation is an examined skill at GCSE. Students are taught to understand the word order of Chinese sentences with the help of 'Chinglish', or word-for-word translation. Students cultivate an ability to translate from Chinese to English and from English to Chinese from Year 7 onwards.

Cultural Knowledge: Throughout lessons, students are taught about cultural differences and similarities between British and Chinese culture including festivals, education, music and food. For all year groups, we supplement the textbooks with a wide variety of other resources, including realia and multimedia content. Students' independent learning is supported by notes and handouts in their exercise books, homework tasks, and resources uploaded to Google Classroom.

In KS3, students are introduced to reading and writing the Chinese characters from the start. Students are supported to move from writing individual words to writing full sentences in characters. At KS3, our lessons are based on the *Jinbu 1* textbook, which is supplemented with a large variety of teacher-created resources.

In KS4, students practice writing in paragraphs. This is supported through retrieval of KS3 knowledge and regular vocabulary tests. At Key Stage 4, students maintain a vocabulary book with new words, which they are encouraged to refer to in class and when completing homework at home. The Year 9 curriculum is based on the *Jinbu 2* textbook. In Years 10 and 11, we use the Pearson GCSE Chinese textbook.

Key Stage 5 lessons make use of authentic cultural material including books and films in the target language. Our teachers take an active role in ongoing national discussions about assessment and resources for KS5 Mandarin study.

Impact

The impact of our curriculum is assessed through a number of indicators including retention at GCSE and Key Stage 5, and elective participation in the Mandarin Excellence Programme. We are proud to enter a healthy number of students for the GCSE in Mandarin each year (usually two classes of students), particularly since it is common for the Mandarin GCSE cohort in other schools to number fewer than 20 students. We credit the pleasing uptake at GCSE in part to our commitment to offering Mandarin across the ability range at Key Stage 3 and 4. Our sixth form is still in its infancy, but we are proud to be the only state school in Harrow to offer Mandarin at Key Stage 5.

Our school is committed to delivering the Mandarin Excellence Programme, an intensive programme requiring 4 hours of teaching and 4 hours of homework each week. Students in Years 7 to 10 can apply to join. We are proud of the strong performance which our MEP students show on the annual hurdle tests. Most importantly, we are pleased to see students across all year groups demonstrating an interest in and enjoyment of learning languages, and an understanding and appreciation of other cultures.

Careers

‘China’s growing international stature’ has been acknowledged as ‘by far the most significant geopolitical factor in the world today’ in the March 2021 Integrated Review of Security, Defence, Development and Foreign Policy. Proficiency in Chinese Mandarin is a highly regarded skill by employers in the UK and around the world in fields such as international trade, diplomacy, education, translating and interpreting, financial consultancy, the cultural industries, journalism, law, advertising, the civil service, policy making, event management, security, tourism, and many more areas. We support students in considering how to utilise Mandarin in their future careers by hosting talks by professionals, and providing bespoke advice on next steps to our students, particularly those in Key Stage 5.

Assessment

Verbal feedback, peer feedback and self-assessment (using green pen), and literacy marking are provided on a regular basis within the course of lessons. Peer feedback is written feedback (using green pen) about what was good and what could have been improved. During self-assessment, students use a green pen to mark their own work (using a mark scheme provided by the teacher) or to reflect on the progress demonstrated in a piece of work.

At Key Stage 3, students are assessed on listening, reading, and writing once each term. At Key Stage 4 and 5, teachers provide written feedback about a piece of work twice every half term. This might be an assessment, a piece of homework or a piece of classwork. Students are given a green box task to complete in order to use the feedback to improve their work.

We use AQA for GCSE, and A-Level and Pre-U at Key Stage 5. Students on these courses participate in mock exams at least once a year. Students on the Mandarin Excellence Programme (in Years 7, 8, 9 and 10) also participate in the annual national hurdle tests.

Enrichment Opportunities & Super Curricular

The Mandarin teaching staff provide an extensive number of Period 7 sessions, primarily aimed at the Mandarin Excellence Programme and Key Stage 4 students. We also offer whole-school activities such as house events, martial arts workshops, and bubble tea reward schemes. We ran a school trip to Beijing in 2019. When travel restrictions allow, we are looking forward to running more trips, including through the Mandarin Excellence Programme.

Commitment to Equality, Diversity & Inclusion

A respect for and understanding of other cultures and worldviews is embedded into our curriculum. We seek to make links to English and the many other languages with which pupils are familiar in lessons. We are proud of our commitment to offer Mandarin across the ability range, including through specialised differentiated support for lower ability pupils and pupils with SEND, as well as the Mandarin Excellence Programme for students who are ready for a further challenge. Our teaching staff also reflect a mix of native and non-native Chinese speakers.

Pinner High School: Spanish

KS3: Spanish Viva

KS4: GCSE Edexcel (1SP1)

Intent

This course aims to teach students to develop their Spanish language skills in a variety of contexts; to gain a broad understanding of the culture of countries and communities where the language is spoken. It encourages enjoyment of language learning and the recognition that language and communication skills enable students to take their place in a multilingual global society.

The development of proficiency focuses on acquiring skills in listening, speaking, reading, writing and translation.

Implementation

The Spanish courses are delivered using a variety of methods to input and practice language and cultural content.

Schemes of all Key Stages are written by the department and based on the Pearson Edexcel resources/ exam board. The Viva materials and Active Learn digital platform are used in the KS3 and 4 courses, Hodder Boost is used at KS5.

Year 7 has 4 lessons per fortnight in Spanish & Mandarin and students opt for one language to continue studying from year 8 onwards. Year 8 students have 5 lessons per fortnight. In KS3, lesson planning is influenced by the Pearson Viva course, which adheres to the National Curriculum. In years 9-11 there are 6 lessons per fortnight, lessons are planned around the Pearson Viva GCSE course. This is the last year of the 2016 specification for year 11. In year 9 and 10, planning is in line with the new 2026 specification. Typically, in KS4 there are 5 class groups in Spanish, taught in mixed ability groups.

Teaching staff use Rosenshine's Principles and Bloom's Taxonomy to guide delivery. The schemes and tasks in the text books are supplemented with teachers' own resources, games and presentations as well as some of the latest MFL pedagogical ideas from NCELP and the Conti method- but the latter have not been adopted wholly as department strategy. The plan for how students produce tasks reflects the different learning styles, level of challenge, abilities and the interests of the class, which encourages all students to progress.

Listening:

Teachers conduct lessons using as much target language as possible to ensure the students can maximise their exposure to the sound of the language.

Students listen to audio tracks to get used to a variety of voices and accents spoken by native speakers, they watch video clips, sing and repeat in a choral response. The comprehension tasks are designed so that students can match sounds to the written word, respond with a physical action to a spoken instruction, hold conversations, select details from longer spoken texts, translate and transcribe from audio and make inferences.

Speaking:

Students are encouraged to participate as much as possible in the target language, they receive instruction in phonics at the beginning of the course and revisit it frequently. In order to develop confidence, pronunciation skills, spontaneity and fluency, students complete a wide range of practice tasks such as choral repetition, role play sketches, describing pictures, conducting class surveys and interviews.

Reading:

Students start by identifying single words and work towards being able to understand and translate longer sentences and paragraphs of up to 50 words. Reading material can be dialogues, fact files, short bios, cartoon strips, lyrics, poems and short excerpts from literature. Students use reading texts as guides or models from which to create their own written texts as well as to broaden their knowledge of sentence structure and vocabulary. The comprehension tasks develop skills in paying attention to key details, word order, Spanish to English translation, grammar identification, use of synonyms and inference.

Writing:

Students learn the phonics of the Spanish alphabet from the start of the course and this helps them to quickly develop good spelling and dictation skills. Through the repetition of high frequency verb patterns, students learn how to form sentences describing their daily lives and expressing opinions with reasons. Students are given the chance to write for different purposes such as facts files, short bios, postcards, posters and interviews. Memory recall of words and verbs is checked regularly with vocabulary tests to improve accuracy in translation and spelling.

Impact

The Curriculum develops transferable skills in focused listening, memorisation, decoding, inference, attention to detail and communication. The tasks encourage students to become more independent and confident. Students gain awareness, tolerance and open mindedness about other ways of life, religions, celebrations and customs because they are shown the cultures and social issues from Spanish -speaking countries. The aim is to foster appreciation and enjoyment, the ability to succeed in national assessments such as GCSE and Alevel and to communicate in another language in real-life situations.

Career Development

Proficiency in Spanish is a highly regarded skill by employers in the UK and around the world in international trade, diplomacy, education, translating and interpreting, financial consultancy, the cultural industries, journalism, law, advertising. The civil service, policy making, event management, security, tourism, and many more areas. Studying Spanish will also help you develop good English language skills which will be useful for all career paths.

Government: diplomat, UNESCO official, court interpreter, immigration officer, international lawyer.

Communication: reporter, foreign correspondent, content creator, translator, travel journalist.

Finance : foreign market broker, international accountant.

Travel and tourism: hospitality manager, tour guide, travel agent, flight attendant, airport personnel,

Business: international lawyer, advertising executive, sales person, public relations manager, recruitment consultant, international account manager, bilingual customer support, international banking officer.

Education: teacher, translator, textbook author.

Assessment

Tests in Writing and Speaking skills, for all years, are marked by the teacher for praise and correction and students will receive a marking criteria sheet with their attainment highlighted and their teacher's comments on 'what went well' and 'even better if.' Students will take 'action after feedback' to practise or improve an aspect of their work, suggested by the teacher.

In-class tasks on Listening and Reading skills are self- assessed or peer-assessed in class using green pen.

Homework is auto-marked in the digital platform Pearson Active Learn and is checked weekly by teachers.

Enrichment

Spelling Bee Yr 7 Term 1

Theatre Performance Yr 8 Term 2

Restaurant Trip Yr 8 Term 3

Trip to Spain every other year Yr7-10 invited

Spanish Estrellas weekly as part of Head's Challenge Yr 7-9 (invitation only for HAP linguists)

GCSE Revision support/ lecture trips to London Yr10 & 11

Commitment to Equality, Diversity & Inclusion

The teachers model good practice of EDI in their conduct, language and their classroom expectations and they treat students fairly and without discrimination. The Pinner Values are at the centre of teaching and learning in the department.

The aims of teaching a language involve demonstrating different countries, life styles, cultures and customs and this is modelled to students by showing respectful curiosity and encouraging fascination. For example learning about Day of the Dead in Mexico, faith celebrations such as Holy Week in Spain, positive BIPOC and people of diverse gender and sexuality represented in the teaching of modern music and the media.

The resources we use reflect our commitment to EDI, so we are consciously inclusive of the diverse protected characteristics depicted in visuals and images. We aim to reach students of all levels and abilities, so there are options to complete tasks with varying levels of support.

Pinner High School: Drama

KS3: Drama and Theatre

KS4: GCSE (9-1) Drama - Edexcel (1DRO)

KS5: A Level Drama and Theatre - Edexcel (1DRO)

Intent

The drama department aims to provide students with an ability to express themselves creatively and demonstrate their knowledge through in class performances and out of class extracurricular activities. Students at KS3 will complete a variation of assessments including devised, scripted and written in order to prepare them for the Edexcel courses we offer at both GCSE and A Level. The goal is to provide an equal opportunity for all students, regardless of their experience in drama and theatre, and to create and perform work that inspires and challenges all involved.

Implementation

Our schemes of learning have been invented and adapted to suit the needs and abilities of our cohort at Pinner High School, including opportunities for cross-curricular projects and tasks that allow students to create work that can be shared in one of our many performance evenings throughout the year. At KS3, lessons are produced with a practical focus, with some lessons accompanied by a short booklet based task. At the end of each unit, students will complete a performance and 'green box question' – a reflective assignment to evaluate the topic so far. At KS4, lessons are still produced with a practical focus, however students should complete an equal amount of research, revision and exam-style questions demonstrated through written work. Students at this point are encouraged to work independently with a gradual move from in class written tasks to home based written tasks by the end of KS4. By encouraging this independence, there is more time in the classroom for collaborative learning as seen in most industry settings.

Impact

Our robust curriculum at both KS3 and KS4 prepares students for any further education within The Arts, as it introduces them to the many areas of theatre, including performance and design elements. For students at KS3 who do not continue in drama, the schemes of learning taught so far will help to: prepare for public speaking exams in English; analytical and critical thinking needed in humanities subjects; creative expression to support any additional arts subjects such as art, music and technology design; leadership, teamwork and delegation to assist with PE or other sports activities; and a developed understanding of the wider world to stimulate thinking in PSHE, PRE and other social sciences. If students do continue to develop their craft at KS4/5, we work with them to master their areas of strength and, where possible, tailor assessments to highlight these skills, as well as providing one-to-one support on how to enhance their vocal and physical skills as per general practice.

Career Development

Drama provides students with various opportunities within the Creative Arts Industry, which is consistently one of the UK's highest earning industries. Some popular and common job roles include, but are not limited to, actor, director, stage manager, lighting or sound technician, costume designer, makeup and mask designer, theatre educator (TiE), teacher/coach, and presenter (TV/Film/News).

More widely, students who have studied Edexcel A Level Drama have gone on to study at Russell Group Universities, specialising in Law, Social Sciences (criminology, psychology, sociology, etc), Health and Social Care, English Literature and/or Language, to name a few, aided greatly by their creative studies at A Level. A recent report by The Cultural Learning Alliance (2017) found that studying Drama can improve students' creativity and risk taking; skills that are highly valuable in later life. It was also said that cultural learning has a significant part to play in addressing social inequality, and showed a marked increase in students' cognitive abilities across all subjects.

Students can speak with their Drama teachers for upcoming opportunities or enable alerts from websites such as The Stage for performance or design based opportunities in their local area. Our Drama department formed strong professional relationships with local groups such as Unique and WAC Arts who regularly offer a combination of free and funded workshops throughout term and holiday time. Most recently, 2 KS5 students who attended the WAC Arts podcasting workshop have set up a Pinner High School podcast which can be found [here](#). We encourage all KS5 students to download the Eric App and use their social media accounts to stay up-to-date with internships, auditions and work-experience opportunities across the UK.

Assessment

Students will be assessed each lesson through an in class performance. Depending on the scheme of learning at that time, this will be either a devised performance (made by a group in class) or a scripted performance (written by playwright). To do this, students will typically have one lesson to prepare a piece that applies a key technique or element to their performance. At the end of each unit, students will have an extended period to apply, rehearse and present their work. At KS3, students are assessed using 'I Can' statements, which can be found at the beginning of each unit's section in their booklet. At KS4/5, students are assessed based on the relevant Component criteria set out by Edexcel. Students will complete 1 summative assessment each unit made up of: 1 performance and 1 writing task.

KS3 – In KS3 students will typically change units every half term with an extended unit in Y8 to ensure readiness for transition into the GCSE Curriculum.

KS4 – In KS4 students will complete longer units with extended assessment tasks in line with the 3 components set out by exam board Edexcel.

KS5 – In KS5 students will complete longer units with extended assessment tasks in line with the 3 components set out by exam board Edexcel.

Enrichment opportunities & Super Curricular

Students are offered the chance to participate in school productions by opting in to 'production club' throughout KS3. At KS3-5, students will need to formally audition if they wish to perform in a school production. Production club will run in line with the Heads Challenge Curriculum and combine students from subjects such as Drama, Music, Art and DT to create a community based learning environment that allows all areas of creativity to excel.

In the current curriculum, students at KS3 will be given opportunities to watch performances by external companies, KS4 and KS5 students where possible, with the chance to attend live theatre performances as and when appropriate. Students at KS4 and KS5 will attend live theatre performances as per the exam board requirements for their Component 3 exam.

In addition to this, there is a subject wide 'Drama Leaders' project students can opt into for a chance to lead rehearsal and production clubs, assist and direct with productions and help to contribute ideas to upcoming trips, performances and changes to the curriculum. This opportunity was created with student voice at the forefront, ensuring each member of our school feels valued within the department. This opportunity is not limited to subject specialist students, meaning students who have not chosen Drama GCSE or A Level can still be included. This programme comes with out-of-school and celebration opportunities to promote a community of collaboration and responsibility. At KS5, the department runs a mentoring programme to support KS3 and KS4 lessons and rehearsals.

Commitment to Equality, Diversity & Inclusion

We seek to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. We do so by providing schemes of learning to students that celebrate the differences in culture, personality and skill with tasks designed that rely heavily on students bringing their personal experiences or viewpoints to the lesson. All students are given the equal pathways in Drama regardless of skill, experience or ability, with the option to specialise in either performance or design. Our inclusive school productions mean all students who audition or select 'Production Club' as part of their Heads Challenge choice will be given a role to play as either performers, designers or crew members based on their preference. In the past 2 years, the department has successfully produced 8 performances involving students from KS3-5.

In each year group, we aim to provide schemes of learning that encourage pupils to explore their differences, including their heritage and culture. In Year 7, our Myths and Legends unit teaches students about Greek Theatre, but also asks pupils to bring in stories from their culture. In Year 8, students will complete an extended devising project where they will be challenged into evaluating their personal response to certain stimuli and tasks. In Year 9, we dedicate an entire half term to teaching students about the work of a range of practitioners, such as Augusto Boal, Talawa Theatre Company, Mind The Gap, and many more, to ensure students transition into the GCSE with a clear understanding of the various backgrounds that have helped to build the subject.. In Years 10-13,, we have selected texts for the Component 2 exam from playwrights that we feel represent our current cohort, diverse in background, style and writing.

Year 7	Autumn 1: Drama Fundamentals	Autumn 2: The Terrible Fate of Humpty Dumpty	Spring 1: Melodrama	Spring 2: Shakespeare (Cross Curricular)	Summer 1 Charlie and The Chocolate Factory (Musical Theatre)	Summer 2: Myths and Legends (Greek Theatre)
	<p>Aims: To provide foundation knowledge of the fundamentals of Drama, including how to make a scene, how to perform on stage and how to evaluate a performance.</p>	<p>Aims: To develop an understanding of how to use scripts for a performance, as well as exploring the hidden moral and ethical issues surrounding a common children's story.</p>	<p>Aims: To be introduced to a style of theatre that requires exaggerated performances in order to communicate meaning to the audience.</p>	<p>Aims: Students will workshop a selection of Shakespeare's work, including The Tempest, A Midsummer Night's Dream, Macbeth and Hamlet.</p> <p><i>Cross Curricular Links:</i> <i>English</i></p>	<p>Aims: To develop an understanding of how ensemble performances are created and performed using the characters from CATCF.</p>	<p>Aims: A variety of stories based on Greek mythology that also considers the history and cultures of our many students.</p>
	<p>Lesson / Content Overview: To develop key performance skills related to voice, physicality and devising. Some of the techniques explored include: freeze frames, mime, monologue, cross-cutting and narration.</p>	<p>Lesson / Content Overview: Students will be introduced to a script and explore the ways in which scripts are formed. Students will explore key extracts and analyse and evaluate the themes of trust, friendship, responsibility and the rule of law.</p>	<p>Lesson / Content Overview: Students will need to develop an understanding of the key performance aspects involved in Melodrama, including gesture, movement and projection, and their audience awareness through the use of asides.</p>	<p>Lesson / Content Overview: Students will be introduced to the iambic pentameter, key scenes and characters, and write monologues in the style of Shakespeare. They will explore the original performance conditions and consider language, costume, lighting and sound.</p>	<p>Lesson / Content Overview: Students will explore the characteristics associated with each child in this well-known story, and use their knowledge developed over the year to work in larger groups to present ensemble performances.</p>	<p>Lesson / Content Overview: Students will be challenged on their ability to perform in more abstract styles, including techniques such as physical theatre and chorus. Greek Theatre will be an area of challenge in this unit introduced to all students.</p>

	<p>Assessment: Devised: Students create a performance including the new techniques they have learnt.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Scripted: Students use the script from the text to rehearse and perform an extract.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised: Students create a performance in the style of Melodrama based on a current event.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised: Students create a performance based on a key scene from the text, demonstrating their knowledge of the text.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Scripted: Students use the script from the text to rehearse and perform an extract in a musical theatre style.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised: Students will create a scene based on one of the Myths and Legends explored in the half term.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>
Homework: Students will complete 1 piece of HW every other lesson. These are mostly found in our extended learning booklet, but will also be found via Google Classroom unless stated otherwise in the lesson.						
Stretch and Challenge: Each lesson aims to have stretch and challenge built in that vary depending on the unit. In some instances, this will be the use of an advanced technique, an introduction to subject specific content requiring higher order thinking, or leadership roles. Students are encouraged to join extra-curricular clubs/productions to challenge themselves in relation to their Drama progress. Optional challenge tasks can be found throughout the extended learning booklet.						
Reading: Scripts explored this year include: The Terrible Fate of Humpty Dumpty, Charlie and The Chocolate Factory and excerpts of various Shakespeare plays and Greek Myths. Students will be asked to read these during lessons and/or home learning. Students may find it useful to do some additional reading of Ancient Mythology and look over the KS3 BBC Bitesize top-tips for Drama.						
Year 8	Autumn 1: Horror	Autumn 2: Sparkleshark	Spring 1 and Spring 2: Devising (Extended Project)		Summer 1: Guernica (Cross Curricular)	Summer 2: Knife Crime (Theatre in Education)
	<p>Aims: To analyse a new genre of performance and develop an understanding of how to build tension in performance.</p>	<p>Aims: To enhance our understanding of how to use scripts for a performance, as well as exploring the hidden moral and ethical issues.</p>	<p>Aims: To use 'social media' as a stimulus for devising, working in groups for an extended project lasting a full term.</p>		<p>Aims: To explore the techniques used to create abstract theatre related to the WW2 tragedy of Guernica. <i>Cross Curricular Links: Art, History</i></p>	<p>Aims: To be introduced to the term 'Theatre in Education' (TiE) and create a piece that educates the audience on the dangers and impact of knife crime.</p>
	<p>Lesson / Content Overview: Using a range of theatrical elements and techniques, students will develop their understanding of how</p>	<p>Lesson / Content Overview: Students will be introduced to a script and explore the ways in which scripts are formed. Students will</p>	<p>Lesson / Content Overview: This unit mirrors Component 1 of the GCSE and requires students to recall all techniques taught in KS3 and appropriately apply them to their chosen scene.</p>		<p>Lesson / Content Overview: Students will look at skills such as physical theatre, proxemics and gesture in order to develop an</p>	<p>Lesson / Content Overview: Lessons will explore techniques such as direct address and narration in order to enhance students'</p>

	<p>tension is built during a performance. They will then produce a piece of theatre that falls into the 'horror' genre by devising scenes using these components.</p>	<p>explore key extracts and analyse and evaluate the themes of trust, friendship, responsibility and the rule of law.</p>	<p>Students will present, reform, refine and evaluate work over 12 weeks, resulting in a final performance between 5-10 minutes long. They will consolidate their performance knowledge and be asked to work with the same group for an extended period, requiring consideration to communication, analysis and leadership skills.</p>	<p>understanding of how to show status in a scene and build tension. Using Pablo Picasso's 'Guernica' as inspiration, students will look into the roles of generals and civilians in society and war.</p>	<p>understanding of how theatre can be devised to educate an audience. Students will then explore the case study of local resident, Josh Hanson, who was a victim of knife crime in 2015 and create a piece based on this topic.</p>
	<p>Assessment: Devised: Students create a 'horror' performance where tension is built throughout.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Scripted: Students use the script from the text to rehearse and perform an extract.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised: Students will work as part of an ensemble to create a piece inspired by the stimuli given: social media.</p> <p>Written: Students will complete an accompanying written portfolio evaluating their progress for this unit, made of 6 questions, approximately 1500 words long. This will be completed alongside practical development individually.</p>	<p>Assessment: Devised: Students create a performance about the tragedy of Guernica in an abstract style.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised: Students create a performance about knife crime in a typical TiE style.</p> <p>Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>
<p>Homework: Students will complete 1 piece of HW every other lesson. These are mostly found in our extended learning booklet, but will also be found via Google Classroom unless stated otherwise in the lesson.</p>					
<p>Stretch and Challenge: Each lesson aims to have stretch and challenge built in that vary depending on the unit. In some instances, this will be the use of an advanced technique, an introduction to subject specific content requiring higher order thinking, or leadership roles. Students are encouraged to join extra-curricular clubs/productions to challenge themselves in relation to their Drama progress. Optional challenge tasks can be found throughout the extended learning booklet.</p>					
<p>Reading: Scripts explored this year include: Sparkleshark. Additionally, students will be given an article as part of their Devising unit as stimuli. Students will be asked to read this during lessons and/or home learning. Students may find it useful to do some additional reading relating to social media and knife crime, and look over the KS3 BBC Bitesize top-tips for Drama.</p>					
<p>Year 9</p>	<p>Autumn 1: Mugged (Component 2)</p>	<p>Autumn 2: Practitioners</p>	<p>Spring 1 and Spring 2: Blood Brothers</p>	<p>Summer 1 and Summer 2: Devising (Extended Project)</p>	
	<p>Aims: A National Theatre Connections play based around the murder of a</p>	<p>Aims: Students will be introduced to a number of different practitioners from across the</p>	<p>Aims: Students will explore Willy Russell's play in depth for a term, with various formative assessments linked to Component 2 and Component 3 of the GCSE.</p>	<p>Aims: To use the term, 'torn' as a stimulus for devising, working in groups for an extended project lasting a full term.</p>	

	<p>young boy and the community reaction following his death. An exploration into Naturalism as a style of theatre.</p>	<p>world and conduct additional research to create theatre in the chosen practitioner's style.</p>		
	<p>Lesson / Content Overview: Students will perform key extracts from the script and explore the work of theatre practitioner Konstantin Stanislavski. This scheme of learning will reintroduce students to key concepts such as units and objectives, emotion memory and other naturalistic techniques.</p>	<p>Lesson / Content Overview: Students will develop their inquiry skills in order to conduct out of class research into chosen practitioners and their work. This carousel style scheme gives students the opportunity to circle back to a practitioner of their choice and create a specialist piece in their style.</p>	<p>Lesson / Content Overview: Students will complete a combination of assessments, including a scripted assessment of a key scene from the text. Students will also explore the social, cultural and historical context related to the play and develop their wider knowledge of the text as a whole. Students will deep dive into the key characters from the play and consider how staging, lighting, sound and costume impact a performance. They will also have an opportunity to devise a monologue in response to Mickey's "I wish I was our Sammy" extract, using the same writing style as Russell.</p>	<p>Lesson / Content Overview: This unit mirrors Component 1 of the GCSE and requires students to recall all techniques taught in KS3 and appropriately apply them to their chosen scene. Students will present, reform, refine and evaluate work over 12 weeks, resulting in a final performance between 10-15 minutes long. They will consolidate their performance knowledge and be asked to work with the same group for an extended period, requiring consideration to communication, analysis and leadership skills.</p>
	<p>Assessment: Scripted: Students use the script from the text to rehearse and perform an extract. Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised/Presentation: Students use the script from the text to rehearse and perform an extract. Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Scripted: Students use the script from the text to rehearse and perform an extract. Written: Students will complete an accompanying written task evaluating their progress for this unit.</p>	<p>Assessment: Devised: Students create a performance based on a key scene from the text, demonstrating their knowledge of the text. Written: Students will complete an accompanying written portfolio evaluating their progress for this unit, made of 6 questions, approximately 1500 words long. This will be completed alongside practical development individually.</p>
	<p>Homework: Students will complete mostly research based tasks or recap quizzes based on their current unit. In each half term, there are also a number of optional Champion Tasks to extend knowledge and promote creativity. Students will receive up to 6 pieces of compulsory homework per half term.</p>			
	<p>Stretch and Challenge: Each lesson aims to have stretch and challenge built in that vary depending on the unit. In some instances, this will be the use of an advanced technique, an introduction to subject specific content requiring higher order thinking, or leadership roles. Students are encouraged to join extra-curricular clubs/productions to challenge themselves in relation to their Drama progress.</p>			
	<p>Reading: Scripts explored this year include: Mugged and Blood Brothers, two naturalistic plays. Students may find it useful to do some additional reading of key texts, written with the intention to be performed in a naturalistic style. Students should select texts that have been written Pre 2000 and revise the context of playwrights to develop their subject knowledge. Additional reading can also be found in the KS4 BBC Bitesize Drama folder – Edexcel exam board.</p>			
<p>Year 10</p>	<p>Autumn 1 and Autumn 2: DNA</p>	<p>Spring 1: Live Theatre Evaluation</p>	<p>Spring 2: Performance from Texts</p>	<p>Summer 1 and Summer 2: Devising</p>

	(Component 3)	(Component 3)	(Component 2)	(Component 1)
	<p>Aims: DNA is a play by Dennis Kelly exploring themes of adolescence, trust, law, death and relationships. Students will complete written work, including a Section A mock paper and explore the play practically to develop their understanding of key characters, scenes and context.</p>	<p>Aims: To watch a live theatre performance and analyse and evaluate the elements of theatre</p>	<p>Aims: Students will deep dive into a list of set texts and work on rotation in a workshop style unit, performing key scenes and analysing character, plot and performance.</p>	<p>Aims: To use 'boundaries' as a stimulus for devising, working in groups for an extended project lasting a full term.</p> <p>Students will complete this exam as per the unit requirements before the end of the academic year – 40%</p>
	<p>Lesson / Content Overview: Students will develop the required knowledge to complete the Section A part of their Component 3 exam. Students will think critically and creatively as a performer, designer and director. There will be opportunities for students to conduct their own research into playwrights, practitioners and original performance conditions. There will be opportunities in this unit for students to consider how costume, lighting, set, sound and staging is designed, to direct others and perform as part of a group and individually.</p>	<p>Lesson / Content Overview: Students will develop the required knowledge to complete the Section B of their Component 3 exam. Students may be taken to see a live show, or, watch a recorded performance for this unit. Students will analyse and evaluate the performance seen in writing.</p>	<p>Lesson / Content Overview: Students will perform key extracts from a list of set texts and use techniques such as cross-cutting, chorus, mime, soundscape, physical theatre and more to bring an extract to life. Students will need to memorise lines as part of a monologue, duologue or group performance.</p>	<p>Lesson / Content Overview: This unit will mark the completion of Component 1 of the GCSE and requires students to recall all techniques taught in KS3 and appropriately apply them to their performance. Students will present, reform, refine and evaluate work over 12 weeks, resulting in a final performance between 15-20 minutes long. They will consolidate their performance knowledge and be asked to work with the same group for an extended period, requiring consideration to communication, analysis and leadership skills.</p>
	<p>Assessment: <u>Scripted:</u> Students use script from the text to rehearse and perform key extracts. <u>Written:</u> Students will complete a full Section A paper in exam.</p>	<p>Assessment: <u>Written:</u> Students will complete a full Section B paper in exam conditions.</p>	<p>Assessment: <u>Scripted:</u> Students use the script from the text to rehearse and perform an extract.</p>	<p>Assessment: <u>Devised:</u> Students will work as part of an ensemble to create a piece inspired by the stimuli given: social media. <u>Written:</u> Students will complete an accompanying written portfolio evaluating their progress for this unit, made of 6 questions, approximately 1500 words long. This will be completed alongside practical development individually.</p>
	<p>Component 3 – 40% Section A – 45 marks Section B – 15 marks Total: 60 marks</p>	<p>Component 2 – 20% Performance 1 – 24 marks Performance 2 – 24 marks Total: 48 marks</p>	<p>Component 1 – 40% Performance – 15 marks Written Portfolio – 45 marks Total: 60 marks</p>	
	<p>Homework: Students will complete revision, research and coursework during home learning. Students will also be expected to attend 1 group rehearsal per week during Component 1 and Component 2 units.</p>			
	<p>Stretch and Challenge: Each lesson aims to have stretch and challenge built in that vary depending on the unit. In some instances, this will be the use of an advanced technique, an introduction to subject specific content requiring higher order thinking, or leadership roles. Students are encouraged to join extra-curricular clubs/productions to challenge themselves in relation to their Drama progress</p>			

	<p>Reading: Scripts explored this year include: Adult Child/Dead Child, East is East and Find me (C2) and DNA (C3). Students may find it useful to do some additional reading of key texts, written with the intention to be performed in an abstract style. Students should select texts that have been written Pre 2000 and revise the context of playwrights to develop their subject knowledge. Additional reading can also be found in the KS4 BBC Bitesize Drama folder – Edexcel exam board. Lastly, any practitioner study, for example, 'The Complete Toolkit' – Stanislavsky', is advisable.</p>					
Year 11	Autumn 1: DNA/Devising (Component 1/3)	Autumn 2: DNA/LTE (Component 3)	Spring 1: Performance from Texts (Component 2)	Spring 2: PFT/DNA/LTE (Component 2/3)	Summer 1: DNA/LTE (Component 3)	Summer 2: Exam/Study Leave
	<p>Aims: Students will revisit Component 3 set text DNA and complete a mock paper. There will also be time in this unit to finalise C1 CW.</p>	<p>Aims: Students will revisit Component 3 set text DNA and complete a mock paper. There may also be a theatre trip during this time.</p>	<p>Aims: Students will complete their Component 2 exam during this time including 2 extracts of performance from text. There may also be a theatre trip during this time</p>	<p>Aims: Students will complete their Component 2 exam during this time including 2 extracts of performance from text. Once complete students will revisit Component 3 requirements in preparation for the exam.</p>	<p>Aims: Students complete exam practice in preparation for Component 3 exam.</p>	
	<p>Lesson / Content Overview: Students will secure their understanding of how to respond to Section A of the Component 3 exam. Additional reading can also be found in the KS4 BBC Bitesize Drama folder – Edexcel exam board. Lastly, any practitioner studying, for example, 'The Complete Toolkit' – Stanislavsky, is advisable.</p>				
Year 12	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1 and Summer 2
	<p>Unit Title: Introduction to A Level</p> <p>Aims: To gain an understanding of the A Level course as a whole and be introduced to the Component 1 and Component 3 assessments.</p> <p>Lesson / Content Overview: Students develop skills related to Component 1 including improvisation, analysing texts and devising from a text as a stimulus. Students will complete a live theatre visit to develop writing skills for Component 3 – Section A. Students will explore the work of various playwrights and practitioners Frantic Assembly.</p>	<p>Unit Title: Devising</p> <p>Aims: To devise and perform an original piece of theatre relating to a chosen text and practitioner.</p> <p>Lesson / Content Overview: Students will be given an extract from a text and an accompanying practitioner. They will then work in groups to develop a performance inspired by the characters, key themes and content in the style of a chosen practitioner. Students will complete 1000 words of their portfolio to analyse and evaluate their work. Students will explore the work of Antonin Artaud.</p>	<p>Unit Title: That Face</p> <p>Aims: To explore Section B of Component 3 through the Polly Stenham text, <i>That Face</i>. To consolidate our learning through performance (Component 2).</p> <p>Lesson / Content Overview: Detailed study of the text and enhanced rehearsal techniques to provide knowledge and understanding of how to direct a production. Students will experiment with various elements of theatre and develop writing skills to respond to questions relating to the text (Comp 3 - Section B). Students will explore the work of Konstantin Stanislavski and Sanford Meisner.</p>	<p>Unit Title: Metamorphosis</p> <p>Aims: To develop an understanding of how artistic intention can impact story-telling through Franz Kafka's original text adapted by Stephen Berkoff, <i>Metamorphosis</i>.</p> <p>Lesson / Content Overview: Building on script exploration, <i>Metamorphosis</i> provides students with the opportunity to enhance their understanding of scriptwriting and communicating through movement and abstract dialogue. Students will complete physicality-based workshops and demonstrate their understanding of the text through performance. Students will revisit their knowledge of Antonin Artaud.</p>	<p>Unit Title: Component 1: Devising (40%)</p> <p>Aims: This component will be externally moderated and make up 40% of the final A Level grade. To devise and perform an original piece of theatre relating to a chosen text and practitioner. Texts and practitioners will be chosen based on cohort interest.</p> <p>Lesson / Content Overview: Students will be given an extract from a text and an accompanying practitioner. They will then work in groups to develop a performance inspired by the characters, key themes and content in the style of a chosen practitioner. Students will need to complete an accompanying portfolio of 3000 words detailing the devising process, analysing the work of the chosen practitioner and evaluating their contributions to the piece. The portfolio can be answered over the course of the term and final submission will be accepted post-performance.</p>
	Skills / Concepts on:		Skills / Concepts on:		Skills / Concepts on:

	Devising, Context, Practitioners, Analysing, Evaluating, Performance, Abstract Drama, Theatre of Cruelty.	Artistic Intention, Context, Practitioners, Playwrights, Analysing, Evaluating, Vocal and Physical Skills, Abstract and Naturalistic Drama. 	Assessment: Component 1 – Devising (performance and portfolio Q5-6) Component 3 – Section A	Assessment: Component 2 – Performance From Text Component 3 – Section B	Assessment: Component 1 – 40% Performance – 25-30 minutes Portfolio – 3000 words	
	Homework Students are required to complete a minimum of x2 independent rehearsals per week (1hr per rehearsal slot) and can book studio space to do so via their class teacher. Students will also be required to complete timed exam practice where relevant. In addition to this, students will be set various research and development tasks throughout the year.			
	Stretch & Challenge Students are encouraged to attend/gain exposure to as much live theatre as possible, including both professional and amateur productions to improve critical thinking and analysis and evaluation skills. Where possible, students should evaluate live theatre performance and practices through presentations and critical reviews. To encourage leadership, we run a 'Drama Champions' scheme where KS5 students can assist in KS3 and 4 lessons, support and lead rehearsals at GCSE and direct elements of our annual school productions.			
	Reading Please see the KS5 reading list.			
Year 13	Autumn 1	Autumn 2 and Spring 1	Spring 2 and Summer 1	Summer 2
	Unit Title: Woyzeck Aims: To gain an understanding of how Component 3, Section C is assessed through exploration of set text: Georg Büchner's <i>Woyzeck</i> . Lesson / Content Overview: Students will analyse the text's characters, concepts, themes and original performance conditions. Performances of key scenes and development of a performance concept will be developed throughout the term with consideration to Bertolt Brecht's 'Epic Theatre'.	Unit Title: Component 2: Texts in Performance (20%) Aims: This component will be externally examined and make up 20% of the final A Level grade. Students will need to rehearse and present 2 performances from texts of choice (classic and/or contemporary). Combinations of groupings will depend on class size. Lesson / Content Overview: Students will develop vocal and physical skills, interpretation and realisation of artistic intentions for performance. There will be emphasis on collaboration and leadership, with students required to make informed dramatic choices for performance.	Unit Title: Component 3: Theatre Makers in Practice (40%) Aims: This component will be externally examined and make up 40% of the final A Level grade. Students will spend this term finalising their knowledge of how the Component 3 exam is completed in preparation for the final summer examination. Lesson / Content Overview: Revision strategies, exam practice and additional research.

Reading Please see the KS5 reading list.			

KS3: Subject Name **MUSIC**

KS4: Specification & Subject Name **MUSIC GCSE (EDUQAS)**

Intent

Our **Intent for Music** at this school contributes to the whole school curriculum intent by enabling students to explore music from different genres, eras, and cultures through listening, appraising, composing, and performing.

The overarching intent of our curriculum for Music is to maintain and/or stimulate pupil's curiosity, interest, and enjoyment of music. Pupils will experience music through listening and appraising, performance, and composition spanning a range of eras, genres, and cultures.

In addition to fulfilling the school aims Music courses and activities should: -

- Broaden the musical experience of all pupils.
- Reflect pupil's interests and aspirations.
- Enable pupils to develop their potential through practical activities such as Listening, Performing and Inventing
- Cater for all ability levels.

The Music department has defined some core first-order concepts that we feel are essential to the development of knowledge and understanding. These are listening, appraising, composing, and performing.

Implementation

We teach Music via a series of carefully sequenced units which are organised around enquiry questions and the development of the substantive and disciplinary knowledge of the subject.

The music curriculum ensures students listen, perform, create and evaluate. This is embedded in the classroom activities as well as various extracurricular clubs and opportunities. The elements and basic theory of music are taught in the classroom lessons so that students can discuss and evaluate how it is made up, performed, and appreciated. Students also learn and develop their instrumental skills through whole class performing and also within smaller group settings. Students also have opportunities to compose using different methods linking to and building on their performing, listening, and appraising skills.

Endpoints for each unit, in terms of the knowledge we intend pupils to acquire, are clearly defined in the MTP and shared with pupils and parents/carers.

Throughout KS3 departmental planning will identify the key knowledge concepts to be learned by pupils, embedded in long-term memory, and to be checked by teachers during lessons and via more formal assessment.

Impact

The impact of the curriculum will be seen regularly in the knowledge pupils express in discussion and written work of various types during lessons and as homework.

Over time, assessment information will indicate that pupils have a secure grasp of the intended knowledge for particular units as well as prior learning.

Career Development

What careers might a student be able to go into? Where can they find out more about this?

Performing

Classical/popular musician, session musician, live sound technician

Composing

Song writer, composer (film/TV/advertising/gaming)

Producing/engineering

Studio engineer, producer, maintenance, roadie

Other

Music publisher, journalist, scout, A & R

Assessment

How do you assess – what is your departmental feedback and assessment policy?

KS3 – termly report and half-termly whole-class feedback. Ongoing verbal feedback

KS4 – assessed listening and appraising assessments, recorded performances with exam assessment criteria, ongoing feedback for composition work

Enrichment Opportunities & Super Curricular

What trips, subscriptions, or Heads Challenge Curriculum will you plan to deliver to enrich the curriculum and take students beyond the classroom in their learning? When do these take place in the year and how do they link to programmes of study?

- School trips to theatre performances, concerts, and art trips to Europe.
- Weekly performances, Performances at Open Days, Winter Concert, Cluster Carol Concert, End of Year Musical show, and Pinnfest.
- Period 8 choir, orchestra/ensembles opportunities. H/C Ukulele Band for Y7/8 and Keyboards for beginners for Y9.
- Weekly Instrumental lessons (piano, drums, guitar/electric guitar, violin, viola, cello, double bass, woodwinds, brass instruments).
- Opportunities to participate at Harrow Music Arts Festivals for Piano, Guitar, Voice, etc.

Commitment to Equality, Diversity & Inclusion

How do you as a department consider equality, diversity, and inclusion within your subject?

To help with our curriculum policy is the below:

We seek to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. The Curriculum is a key way of meeting these objectives. It has been designed to meet the needs of each individual student, providing opportunities that stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework should be set to meet these goals in delivering a challenging curriculum. This should be designed by each department to further deepen and broaden the knowledge and skill set of its students. All homework should be set on Google Classroom and is regularly checked by the Head of Department.

Curriculum Overview: Geography

KS3 Geography

KS4 Geography GCSE - AQA (8035)

KS5 Geography A Level - AQA (7037)

Intent

The intent of the Geography curriculum is to foster a deep understanding of the interaction between humans and the environment, while developing the language and spatial thinking skills to analyse and engage with contemporary geographical issues. Throughout the curriculum, the Geography department intend to cultivate a strong foundation for this by focusing on the 7 Geographical concepts outlined by the Geographical Association: Place, Space, Scale, Interdependence, Physical & Human Processes, Sustainability, and Culture & Diversity, by embedding a broad range of Physical and Human topics across KS3-5 to inspire learning for the subject (see below).

The Geography department strive to cultivate a culture of 'thinking analytically' by embedding a range of skills that go above and beyond the National Curriculum; from interpreting maps, data and geospatial technologies, to extensive fieldwork opportunities from KS3-5 and the use of geographical information systems (GIS) we aim to empower students to make informed decisions and solve real world problems. We are also committed to creating an inclusive learning environment that celebrates diversity and promotes intercultural understanding. Our curriculum embraces a global perspective, encouraging students to explore the interconnectedness of societies, economies and environments around the world. We aim to support them with this by continually developing students' skills in critical thinking, communication, and collaboration which enables them to engage actively in discussions and debates on global challenges, thus ensuring they leave the classroom with a greater sense of global citizenship than when they arrived.

Implementation

The implementation of our curriculum will be carried out through a comprehensive, inclusive and engaging approach that fosters a deep understanding of geography and its relevance to our student's lives. The following outlines our implementation strategies and key considerations:

1. *An Inclusive, Ambitious and Enriching Curriculum.* Inspired by the national curriculum standards, we have incorporated and extended key concepts and learning objectives to provide students with the opportunity to stretch their interest and understanding, while also providing a coherent progression of knowledge and skills from key stage to key stage. This ensures a well-rounded and balanced education in geography that is accessible to all.
2. *Resources and Materials.* The Geography department takes great pride in providing students with a wide range of resources and materials to support effective teaching and learning; inclusive of textbooks, digital resources, maps/atlas, and geospatial technologies. We also embed a variety of real-world examples, case studies, and fieldwork opportunities to enhance a more extensive application of geographical concepts.

3. *Teacher Professional Development.* The Geography department recognises the importance of ongoing professional development, and is something that we take great pride in. We regularly participate in training and workshops with subject societies and organisations such as the Royal Geographical Society, the Geographical Association, Tutor2U, the Harrow Collegiate Alliance, and our exam board AQA. This professional development enhances the delivery of our inclusive, challenging and enriching curriculum and evolves this where necessary. Incorporating best practices in pedagogy, assessment and differentiation is something we strive to continue to do consistently and effectively to engage students in meaningful and interactive geography lessons.
4. *Fieldwork.* The curriculum recognises the essential role fieldwork experiences play in geography education so we promote and facilitate opportunities for practical fieldwork to ensure students have first-hand experiences of observing and collecting data in a range of environments.
5. *Integrating Technology.* The Geography department appreciates the importance of the ability of technology to enhance learning experiences for students of varying abilities, and its capacity to promote digital literacy. Geospatial technologies, interactive mapping tools, and data visualisation platforms are embedded in our curriculum to engage students with hands-on activities, data analysis, and exploration of real-world geographical occurrences.
6. *Assessment and Feedback.* In-line with the PHS assessment policy, the Geography curriculum includes a broad range of differentiated assessment strategies to measure progress and understanding over a range of time periods. We employ formative assessments such as quizzes, discussions and projects to provide ongoing oral feedback and support student learning. Summative assessments include a series of scheduled examinations to assess students' mastery of geographical knowledge and skills.
7. *Cross-Curricular Connection.* We encourage students to make interdisciplinary connections by integrating geography with other subjects such as history, science and social studies. This approach helps students understand the interrelationships between different disciplines and fosters a holistic understanding of the world.
8. *Monitoring and Evaluation.* Within the curriculum we have established a framework for monitoring and evaluating the effectiveness of its implementation. This involves regular feedback from teachers, students, and parents, as well as ongoing assessment of student performance and progress. Based on the evaluation findings, adjustments and improvements will be made to ensure the curriculum remains effective and relevant.

Through the careful implementation of our geography curriculum, we aim to provide our students with a rich and meaningful experience of Geography education. By fostering a deep understanding of geography, we strive to prepare students to become informed, geographically-literate citizens who are equipped to navigate and positively contribute to an increasingly interconnected global society.

Impact

By implementing our comprehensive and ambitious Geography curriculum, we anticipate a significant impact on the intellectual, social, and global awareness that our students are able to present which will be reflected in their enhanced critical thinking and problem-solving abilities. Across our curriculum individuals will learn to analyse complex geographical issues, evaluate evidence and make informed judgements, thus ensuring they are equipped to understand the interconnected nature of the world and the problems that exist within it.

Moreover, our curriculum aims to inspire learning, foster a sense of global citizenship and cultural understanding. Students will develop an appreciation for the diverse cultures, environments, and perspectives that exist worldwide. Through this understanding, they will become more empathetic and respectful towards others, promoting inclusivity, cooperation, and harmony in an increasingly interconnected world. As students engage with the curriculum's focus on human-environment interactions and sustainable development, they will gain an appreciation for environmental stewardship. They will understand the impact of human actions on the Earth's ecosystems and learn to make responsible choices to mitigate environmental degradation.

This will contribute to a generation of environmentally-conscious individuals who possess the knowledge and skills to address pressing issues such as climate change, social inequality, and economic disparities, and strive towards a more equitable and sustainable future. These students will be well-informed, geographically literate, and globally aware individuals who will possess the knowledge, skills and attitudes necessary to understand and shape the world around them.

Career Development

The skills embedded in the Geography curriculum will be useful for a broad range of careers, from commerce and the public sector, to transport and tourism. Geography provides students with extensive research and analysis skills, which are highly transferable and regarded by many reputable employers. Geography careers offer opportunities to develop solutions to some of the most pressing issues for modern society, including climate change, natural hazard management, overpopulation and urban expansion. These are some of the careers available to students that study Geography:

1. Urban Planner	6. Climate Change Analyst	11. Conservation Scientist	16. Cultural Resource Manager	21. Environmental Policy Analyst
2. Environmental Consultant	7. Transportation Planner	12. Location Analyst	17. Geographical Information Officer	22. Site Selection Analyst
3. Geographic Information Systems (GIS) Analyst	8. Market Research Analyst	13. International Development Consultant	18. Tourism and Travel Consultant	23. Demographer
4. Cartographer	9. Remote Sensing Specialist	14. Geospatial Intelligence Analyst	19. Landscape Architect	24. Forestry Technician
5. Sustainability Specialist	10. Disaster Management Specialist	15. Real Estate Analyst	20. Natural Resource Manager	25. Water Resource Manager

For more information, the Geography Department recommend the following websites:

- <https://www.rgs.org/geography/choose-geography/careers/resources-for-graduating-students/finding-jobs-in-geography/>
- <https://jobs.prospect-us.co.uk/>
- <https://www.greenjobs.co.uk/>

Assessment

The Geography curriculum fosters progress and an understanding of geographical knowledge and skills through a range of formative and summative assessment strategies. For example:

- Verbal feedback
- Peer feedback
- Self-feedback
- Whole class feedback
- Teacher-written feedback

KS3 – One marked assessment per half term. Students will respond to teacher feedback in a reflection green box. Feedback will vary between individual or whole class feedback. Students will gain regular feedback through verbal and modelled examples. All marks are recorded on google classroom for parents and students to see.

KS4 - Two marked assessments per half term. One assessment will be retrieval-based, analysing students' understanding of content taught earlier in the curriculum. Students will then receive whole-class feedback and a reflection activity to complete. The second assessment will be testing knowledge and understanding of content that is currently being taught in lessons. Students will receive individualised feedback for this and a differentiated green-box task. Students will gain regular feedback through verbal and modelled examples through using exam style questions and mark schemes. Students will also have SPaG marking in all assessments. All marks are recorded on google classroom for parents and students to see.

KS5 – Every 2 weeks students will complete a summative assessment, ranging from an essay to knowledge quizzes. These are designed to monitor students' understanding of the vast topics covered within the curriculum. Students will regularly apply knowledge to exam questions and spend lessons solely working on essay writing. All marks are recorded on google classroom for parents and students to see.

Enrichment Opportunities & Super Curricular

For our KS3 programme, all students conduct an on-site fieldwork investigation to look at 'to what extent is Pinner High School at risk of flooding?'. As part of the summer term 'Rivers' unit, students will apply their theoretical knowledge of how different surfaces pose greater flood risk, by conducting an infiltration experiment in different locations around the school grounds. This investigation introduces students to the principles of fieldwork, which provides a secure foundation to embark on subsequent fieldwork investigations at GCSE and beyond, as well as the skill of report-style writing which can be applied to science and coursework-based subjects. Furthermore, we offer super-curricular workshops in partnership with external organisations, most recently with the engineering and development consultancy Mott McDonald, which are tailored to the most able students and provide insight into careers and real-world applications of the geography concepts taught in our curriculum.

For our GCSE programme, we take Year 10 students to the River Chess. We visit Chesham Moor and Scotsbridge Mill to investigate the drainage basin characteristics and flood risks studied in the KS4 curriculum. The Chess is 18 km long and chalk-based river with an aquifer in Chesham. The purpose of this fieldwork is to measure different river sections using fieldwork tools and measure factors such as the width, depth, velocity, bedload angularity, and flood risk. We spend the day at the river and take measurements from the lower, middle and upper course. Students enjoy being able to understand how their written work links with being physically present in a river environment.

In the same academic year we also take students to East London as part of their human fieldwork. Part of the aims of the Olympics were to completely transform an area of East London to leave a lasting legacy or impact not just for sport but for the urban area in which thousands of people live. Students are taken around the Stratford area to complete environmental quality surveys, service tallies, land-use surveys, complete questionnaires and take pictures of contrasting areas around the region. They enjoy looking at how regeneration can impact areas very differently and get to have a quick lunch break at Westfield shopping centre.

At A-Level, students are taken to Slapton for a 5-day residential trip at the end of Year 12. This is to help support them for their NEA which is completed during Year 13. Fieldwork investigations prepare students for designing their independent geographical investigation. Students will have the opportunity to collect data (individually or in groups) and then work on their own to contextualise, analyse and report their work to produce an independent investigation with an individual title that demonstrates required fieldwork knowledge, skills and understanding for the AQA exam board. This contributes to 20% of their A level result. Furthermore, in order to supplement our Year 13 students' final exam preparation, we organise for them to attend a revision booster workshop run by Tutor2U, where students have a direct interface with AQA examiners and are able to fine tune their exam-specific skills in accordance with the assessment objectives laid out by the specification.

The Geography department take great pride in contributing breadth and depth to the Heads Challenge Curriculum:

- Miss Bhatti offers students the opportunity to be a part of the *EcoSchools Award Programme*. EcoSchools is an internationally recognised program that helps schools become more environmentally sustainable. It provides a framework for integrating sustainability practices into curriculum, operations, and community involvement. By promoting environmental

awareness, involving students, and addressing various aspects of sustainability, EcoSchools empowers schools to take action, reduce their environmental impact, and educate future generations about environmental stewardship. Over the course of the year students will work on improving and providing evidence of sustainability within the PHS community.

- Mr Pointer runs *Transport Club* in conjunction with PHS's Inclusion Department, where students are able to engage with their hobby and enthusiasm for transport, as well as participate in the TfL STARS Award. STARS is TfL's accreditation scheme for London schools and nurseries. It inspires young Londoners to travel to school sustainably, actively, responsibly and safely by championing walking, scooting and cycling. The aim for Transport Club, through completing a range of activities contributing to the school's existing STARS Gold accreditation, is to encourage a modal shift in the PHS community away from car travel to school, and for 90% of students to travel actively. Some of the activities involved include presenting an assembly on active travel, and delivering a range of activities for other students and staff during Active Travel Week.
- Mrs Walji runs the *Around The World* club where each week students learn about a new country, so that by the end of the term they have a better understanding of different cultures and societies around the world. Students explore the stunning, diverse scenery of countries while looking at its physical geography and breath-taking views, and to really understand what it offers, which attracts tourists from all corners of the world. In their final week, they showcase their presentation to the rest of the class in the hope of winning the prize and many golden tickets are awarded.
- In 2021, sixth form students in our department took part in the Mayor of London's *Climate Kick-Start Challenge*, where they were one of 5 London schools to be awarded a grant of £10,000, which was personally presented to students by Mayor Sadiq Khan. This prestigious and competitive grant, awarded to PHS students due to the quality and precision demonstrated in designing their proposal, was used to fund the construction of a bike shed at the front of the school made from sustainably-sourced materials. The project has proven to be highly successful in encouraging sustainable and active travel amongst staff and students, and serves as a permanent symbol of PHS geography students' impact on the school community and environment.

Commitment to Equality, Diversity & Inclusion

The Geography department at PHS takes great pride in considering and embedding opportunities to regularly address and show importance to equality, diversity and inclusion in the following ways:

- *Representation and Perspectives:* The curriculum includes a range of diverse examples, case studies, and perspectives from different regions, cultures, and communities. It aims to represent a broad collection of ethnicities, socio-economic backgrounds, and abilities, allowing students to see themselves reflected in the curriculum and fostering a sense of inclusion.
- *Multicultural and Global Perspectives:* The curriculum goes beyond a singular national or Eurocentric focus and incorporates global perspectives and explores the interconnections between different cultures, societies, and environments worldwide, fostering an appreciation for cultural diversity and promoting global citizenship.
- *Challenging Stereotypes and Bias:* The curriculum actively challenges stereotypes, biases, and discriminatory narratives. It encourages critical thinking and provides opportunities for students to analyse how geographical knowledge and representation can perpetuate inequalities. Our teachers facilitate discussions that promote empathy, understanding, and respect for different cultures and perspectives.
- *Inclusive Teaching and Learning Practices:* Geography teachers adopt inclusive pedagogical approaches that cater to different learning styles and abilities. This includes using a variety of resources, providing multiple ways for students to demonstrate their understanding, and creating a supportive and inclusive classroom environment where all students feel valued and respected.
- *Accessibility and Accommodations:* The curriculum materials, resources, and assessments are accessible to all students, including those with disabilities or learning differences. PHS ensures that necessary accommodations and support services are provided to enable full participation and equitable learning outcomes for every student.

- **Continuous Professional Development:** The Geography department engages in continuous professional development to enhance our understanding of diversity, inclusion, and equality. Training programs and workshops equip us with the necessary tools and knowledge to effectively implement an inclusive geography curriculum and create an inclusive learning environment.
- **Collaboration and Partnerships:** The Geography department successfully collaborates with local communities, organisations, and diverse stakeholders to enrich the curriculum and ensure diverse perspectives are represented. This includes guest speakers, field trips, partnerships with the Harrow Collegiate and schools wider afield, and involving our very own students in curriculum planning and delivery.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 7	<p>Unit Title: How and why is the UK's human and physical geography unique?</p> <p>Aims: Students will develop knowledge of the physical landscapes of the UK and understand the makeup of the British Isles and be able to find physical features, read off climate graphs and understand the diversity within the UK.</p> <p>Lesson / Content Overview: Baseline test What are the main concepts in geography? What makes up the British Isles? What are the main physical features of the UK? What is the UK's weather and climate like? How can climate graphs be used to understand the physical geography of places? How has the UK's employment structure changed over time? How diverse is the UK's population? Revision knowledge organiser</p> <p>Assessment: End of topic test (multi-choice, skills Qs, short-answer Qs)</p>	<p>Unit Title: How can geographers use maps to investigate places?</p> <p>Aims: To be able to use the eight points of a compass, four and six-figure grid references, and symbols to build their knowledge of the United Kingdom and the wider world.</p> <p>Lesson / Content Overview: What different types of maps are used by geographers? How can scale be used to interpret maps? How can OS map symbols be used to understand features of a landscape? How can the compass rose be used to describe location and direction? How can 4 figure grid references be used to describe location? How can 6 figure grid references be used to describe location? How do contour lines help geographers understand the shape of landscapes? How can using latitude and longitude be used to describe location?</p>	<p>Unit Title: To what extent has globalisation benefited India's development?</p> <p>Aims: Students explore ways in which they are linked to flows of people, capital, goods and services; they discuss advantages and disadvantages of globalisation and analyse the intercultural change using India as the case study.</p> <p>Lesson / Content Overview: What is globalisation? What are the causes of globalisation? What are the advantages and disadvantages of globalisation? What characteristics make India a unique country? What are India's main physical geography features? What are India's main human geography features? What is 'New India' and how has the country developed its economy and population over time? How has globalisation impacted India's human geography? How has industrial development impacted India's economy and population?</p>	<p>Unit Title: How has the Earth's climate been changed by natural and man-made factors?</p> <p>Aims: Students will understand natural and enhanced causes of climate change and will assess responsibility for these causes. Students will evaluate the effects of climate change at local, national and global scales.</p> <p>Lesson / Content Overview: What is global warming? What evidence is there that the Earth's climate has changed over time? What are the natural causes of climate change? What are the human causes of climate change? How has man-made climate change impacted people and environments? How is climate change disrupting people's everyday lives? How can mitigation and adaptation strategies be used to respond to climate change impacts?</p>	<p>Unit Title: What are the causes and impacts of population change?</p> <p>Aims: Understanding and explaining global population trends and how this links to economic development. Students interpret population models and explore causes and effects of migration.</p> <p>Lesson / Content Overview: What is 'population' and what are the global trends? What factors lead to variations in life expectancy? How can geographers use population pyramids to understand development levels in countries? What factors cause population density to vary between places? What are the causes and impacts of overpopulation? To what extent was China's one child policy a success? What are the main factors causing migration between places?</p>	<p>Unit Title: What does the future hold for the Middle East region?</p> <p>Aims: Students will be able to locate the area in which the region is in, identify different biomes within the region, and understand the contemporary issues and challenges facing people and environments in the region.</p> <p>Lesson / Content Overview: What and where is the Middle East? How does the Middle East's climate vary? How and why does population distribution vary in the Middle East? How is the UK and the Middle East connected? How has the availability of oil impacted the Middle East's development? What are the causes and impacts of the Syrian war?</p> <p>Assessment: GIS virtual fieldwork investigation - to what extent has Dubai's development impacted the land use and environmental quality of the city?</p>

	Reading The Big Book of the UK: Facts, folklore and fascinations from around the United Kingdom - Imogen Williams	Reading Beyond the Map - Alastair Bonnett	Reading All about India: Introduction to India for kids - Shalu Sharma	Reading It's Your World: Get Informed, Get Inspired & Get Going! - Chelsea Clinton	Reading If the World Were a Village: A Book about the World's People - David J Smith	Reading Where Is the Middle East? Geography of the Middle East Baby Professor
	Future Links Y8 - Rivers Unit (explaining physical geography reasons for UK weather patterns)	Future Links Y8 - map skills embedded in <i>all</i> future KS3 units Y8 - Rivers Unit (interpreting physical landscapes)	Future Links Y8 - China Unit (evaluating impacts of globalisation on emerging economies) Y8 - Africa Unit (evaluating the historical context of globalisation)	Future Links Y8 - Natural Hazards (explaining how climate change is making multiple hazard zones more vulnerable) Y8 - Extreme Global Impacts (assessing the role of climate change in impacting populations)	Future Links Y8 - China (explaining China's changing demographic structure) Y8 - Ecosystems (evaluating the role of population growth on ecosystem stress) Y8 - Extreme Global Impacts (assessing the impact of population growth on complex geographical issues)	Future Links Y8 - Africa (assessing human and physical challenges facing developing regions)

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 8	<p>Unit Title: To what extent is China a global superpower?</p> <p>Aims: To be able to understand how China is developing into a newly emerging economy and a global superpower, and how the issues of population are linked to physical geography.</p> <p>Lesson / Content Overview: What is the importance of the Asian continent to the world? What characteristics make China a unique country? What are the main features of China's landscape and climate? How did China become the most populated country in the world? To what extent did the one child policy benefit modern-day China?</p>	<p>Unit Title: To what extent are the world's ecosystems under threat?</p> <p>Aims: To understand how the world's ecosystems are varied and how climate change and other man-made threats are having an impact on the world's biomes.</p> <p>Lesson / Content Overview: What is an ecosystem and what are its main features? What is a biome and what different biomes exist on Earth? What are the UK's main ecosystems? What are the main features of the rainforest biome? What are the main features of the hot desert biome? How do ecosystems exist in urban areas? (Documentary)</p>	<p>Unit Title: Why are some places more at risk of natural hazards than others?</p> <p>Aims: To be able to understand the causes and impacts of natural hazards and the way we can protect ourselves against them. To assess the reasons why some places are more vulnerable than others.</p> <p>Lesson / Content Overview: What is a natural hazard? What are plate tectonics and how do they work? How does an earthquake happen at plate boundaries? How does a tsunami form and why are some places more vulnerable?</p>	<p>Unit Title: Why is Africa a misunderstood continent?</p> <p>Aims: To be able to understand how countries in Africa are developing and how the historical impacts have paved the formation of Africa.</p> <p>Lesson / Content Overview: What makes Africa a unique continent? Why do negative perceptions exist about Africa and its people? What are the main physical geography features of Africa? Documentary - Seven Worlds One Planet: Africa How has Africa's colonial past shaped its present? How developed are African countries?</p>	<p>Unit Title: How do river processes and the water cycle impact human populations?</p> <p>Aims: To be able to understand how the water cycle impacts the formation of river landforms, the factors influencing flood risk, and solutions to flood management.</p> <p>Lesson / Content Overview: What are the main features of the River Thames basin? How does the water cycle transfer water around the planet? How do the characteristics of a river change from the source to the mouth? How does the shape of the land change along a river? How do waterfalls form?</p>	<p>Unit Title: How does ice shape physical and human landscapes?</p> <p>Aims: To understand the physical processes and features in glacial landscapes, and how the human geography of ice landscapes is both highly significant and contested.</p> <p>Lesson / Content Overview: How has ice shaped the world and the UK? How are glaciers formed and what are their main features? How do glaciers shape the land through erosion? How do glaciers shape the land through deposition? Why are glaciers important for people who live by them?</p>

<p>How has economic development posed challenges for China? How developed is China today? How does China's human development compare to other countries? To what extent is China an energy superpower? How does China's energy use compare to the UK? To what extent did the Three Gorges Dam benefit China's development? Revision knowledge organiser</p> <p>Assessment: End of topic test (multi-choice, skills Qs, short-answer Qs, 6 mark mini-essay)</p> <p>Skills: Pie chart Comparative data Choropleth map Population pyramid</p> <p>Concepts: Students will start by understanding the importance of Asia and then will begin exploring China's location and its many diverse physical features, before going on to learn about the country's economic growth. Finally, they will explore energy use and developments and challenges.</p>	<p>How is climate change threatening the health of ecosystems? To what extent do international agreements successfully reduce climate change and protect ecosystems? What does the future hold for ecosystems around the world? Revision knowledge organiser</p> <p>Assessment: End of topic test (multi-choice, skills Qs, short-answer Qs)</p> <p>Skills: Biome mapping 6 marker exam practise Atlas work Video conceptualisation</p> <p>Concepts: Students will look at the global distribution of biomes and ecosystems, linked to their understanding of global climatic zones. Students will investigate how ecosystems are being impacted by climate change as well as human interactions with the environment in these regions.</p>	<p>How does a volcano form and what are the different types? Why do people live in tectonically active areas? How can places reduce the risk of natural hazards? How do earthquake proof buildings reduce impacts? Revision knowledge organiser</p> <p>Assessment: In-class, extended essay on the causes, impacts and response to tsunami events.</p> <p>Skills: Proportional circle mapping Diagram annotation Diamond 9 plenary SEEP analysis</p> <p>Concepts: Students will study different types of natural hazards and will then use this knowledge, combined with their understanding of development, to evaluate countries' management of tectonic hazards. They will also have the opportunity to create an earthquake proof building in class.</p>	<p>What factors have helped African countries become emerging economies? How does development contrast between Nigeria and South Africa? How has the trading of resources impacted African countries? What are the opportunities and challenges faced by the Sahel region? Revision knowledge organiser</p> <p>Assessment: End of topic test (skills Qs, multi-choice, short-answer Qs, 6 mark mini-essay)</p> <p>Skills: Video analysis Long mark questions Line graph analysis HDI data interpretation Extended PEEL paragraph writing</p> <p>Concepts: Students within this topic explore the range of climates, landscapes, populations, and cultures that exist within Africa's 53 countries. Common misconceptions of Africa are explored in the second lesson, which highlight the wide diversity of opportunities, challenges, and lifestyles within Africa.</p>	<p>What is a meander and how does it form? What factors influence flood risk in areas?</p> <p>Fieldwork Investigation: 'To what extent is Pinner High School at risk of flooding?' Over 3-4 lessons, students will complete an on-site fieldwork investigation to study infiltration rates on different surfaces around the school grounds, and use GIS (Survey123) to record and present findings. They will write up their findings in a report-style, which will comprise their assessment for the unit.</p> <p>Skills: GCSE keyword expansion Landform recognition (satellite images, OS maps) Sketching landforms and processes Primary data collection in fieldwork (infiltration rates) Analysis and evaluation of primary fieldwork</p> <p>Concepts: This unit of work has been put in the summer to help prepare students for their GCSE topics. This allows them to understand the basic concepts and key terms that are studied in later years, as well as introduce students to the principles of fieldwork. Student's will build upon their knowledge of the water cycle and will explore all the fluvial processes at work within a drainage basin.</p>	<p>What are the main features of the Arctic's human and physical geography? Why are indigenous people in the Russian Arctic under threat? Who owns the Arctic? How is land used in a post-glacial environment? (research using GIS) Revision knowledge organiser</p> <p>Assessment: End of topic test (multi-choice, skills Qs, short-answer Qs)</p> <p>Skills: Landform recognition from satellite images Landform sketching Working out ice retreat using scale Model making of glacier Reading comprehension Using GIS to investigate land use</p> <p>Concepts: Students will build on their understanding of geomorphological processes from the previous Rivers topic, to understand how glaciers have created distinctive landforms. They will then explore how and why human uses and demands for ice landscapes has been a source of both economic prosperity and contestation.</p>
--	--	---	---	--	--

Homework, Stretch & Challenge

We have a strong commitment to providing students with a varied and challenging curriculum. At the beginning of each topic, students are given a homework grid where students have a choice of 4 tasks to complete, and only need to do one of them per fortnight. This includes a range of different activities to support our lower ability and stretch our higher ability students. These tasks frequently include an independent research element for students to stretch their knowledge beyond the PHS and KS3 National Curriculum, and to pursue topics of interest in depth and rigour. For the rivers topic (Y8 Term 5), students are instead given a homework booklet with tasks to consolidate and memorise the physical processes taught in lesson. At the beginning of each topic, recommended reading lists are shared with students to develop literacy, a love of reading and an interest in geography both related to and beyond the curriculum.

<p>Aims: To identify and describe a range of tectonic hazards across the globe. To be able to explain the physical processes that lead to specific tectonic hazards including earthquakes and volcanoes with case studies from areas of varying degrees of wealth. To identify management strategies that reduce the impact of tectonic hazards.</p> <p>Lesson / Content Overview: What are natural hazards and where do they occur? Distribution of tectonic activity and theories of the earth Types of plate margins, and the tectonic activity they cause Types of volcanoes Comparative Case Studies: Italy VS Nepal Why do people live in tectonically active areas? How to reduce the risk of tectonic activity (MP3)</p> <p>Skills / Concepts on: <u>Skills:</u> Map analysis Locational description Image analysis Exam question practice Independent research - case study SEEP identification Sketch diagram and annotation Evaluation of factors</p> <p><u>Concepts:</u> Convection currents Ridge push and slab pull Continental drift</p>	<p>Aims: To be able to use the Global Atmospheric Circulation System to explain why specific weather hazards occur in different regions of the globe. To identify the conditions required for tropical storm formation and the features of a developed tropical storm. To explain the causes, impacts and responses of tropical storms using one named example. To comparatively identify weather hazards affecting the UK and explain the causes, SEEP impacts and management strategies of one named example with the suggestion that these events will be becoming more prevalent due to climate change.</p> <p>Lesson / Content Overview: What is weather and what affects it? Global atmospheric circulation system How are tropical storms formed? What is the structure of a tropical storm? Tropical storm case study: Typhoon Haiyan What weather hazards do the UK experience? UK Case Study: Somerset Levels Extreme weather events in the UK</p> <p>Skills / Concepts on: <u>Skills:</u> SEEP identification Exam question practice Image analysis Diagram annotations Independent research and note-taking Locational description Graph/data creation and analysis Evaluation of factors</p>	<p>Aims: <u>P1 - SA: Climate Change:</u> To describe the natural and human causes of climate change, and the range of effects it causes. To identify and evaluate the mitigation and adaptation strategies to manage climate change.</p> <p><u>P1 - SB: Ecosystems:</u> To describe the characteristics of an ecosystem and identify a range of ecosystems that exist across the globe.</p> <p>Lesson / Content Overview: <u>Climate Change:</u> Evidence for climate change What are the natural causes of climate change What are the human causes of climate change? How can we mitigate the effects of climate change How can we adapt to climate change?</p> <p><u>Ecosystems:</u> L1 - What are the characteristics of an ecosystem? L2 - Case Study: Epping Forest L3 - How does change impact ecosystems? L4 - What are global ecosystems and where are they located?</p> <p>Skills / Concepts on: <u>Skills:</u> Graph analysis Image analysis Exam question practice Data analysis Evaluation of factors Locational description Diagram annotation Independent research and note-taking Graph/data creation and analysis Evaluation of factors</p>	<p>Aims: To identify tropical rainforest characteristics, including adaptations and interdependence. Use a case study to investigate why deforestation takes place and the ways it has devastating economic and environmental impacts. To suggest ways that the tropical rainforest can be managed sustainably.</p> <p>Lesson / Content Overview: What are the characteristics of a tropical rainforest? <u>Case Study: Brazilian Rainforest (Amazon):</u> What are the causes of deforestation? What are the impacts of deforestation? How can we sustainably manage a tropical rainforest?</p> <p>Skills / Concepts on: <u>Skills:</u> Diagram annotation Graph construction and analysis Exam question practice Independent research activities Data analysis Independent research and note taking SEEP Identification</p> <p>Concepts: Interdependence Nutrient cycles Tropical rainforest plant and animal adaptations Deforestation</p>	<p>Aims: To identify hot desert characteristics, including adaptations and interdependence. Use a case study to investigate the opportunities and challenges that a hot desert environment can provide. To explore causes of desertification and strategies to reduce the risk of desertification using named examples from around the world.</p> <p>Lesson / Content Overview: What are the characteristics of the hot desert biome? <u>Case Study: Thar Desert</u> Where is the Thar Desert? What are the opportunities and challenges that people in the Thar Desert face? <u>Case Study: Sahel Desert</u> Where is the Sahel Desert? How are people in the Sahel desert tackling desertification?</p> <p>Skills / Concepts on: <u>Skills:</u> Independent research and note-taking Graph analysis Image analysis Exam question practice Locational description Map analysis SEEP identification</p> <p>Concepts: Desertification Development</p>	<p>Aims: To describe the global trend of urban change and the factors that affect this. To explore the implications of urbanisation using a case study of a major city in an NEE, examining the opportunities and challenges, and examples of strategies to improve the quality of life for the urban poor.</p> <p>Lesson / Content Overview: Where is urban change taking place? What factors are affecting global urbanisation? <u>Case Study: Lagos, Nigeria</u> Where is Lagos? How is Lagos important? What opportunities exist in Lagos? What challenges exist in Lagos? Squatter settlements in Lagos Water supply and pollution in Lagos Urban planning in Lagos Traffic congestion in Lagos</p> <p>Skills / Concepts on: <u>Skills:</u> Independent research and note-taking Image analysis Graph/chart analysis Data analysis Exam question practice Locational description Map analysis SEEP identification</p> <p>Concepts: Development Urbanisation Rural-urban migration System-D/informal economy</p>

Paper 2 - Section A: Urban Issues and Challenges <i>Global and HIC City Case Study</i>	Human Fieldwork + Paper 2 – Section B: The Changing Economic World <i>Global</i>	Paper 2 – Section B: The Changing Economic World <i>NEE Example + NEE Case Study</i>	Paper 2 – Section B: The Changing Economic World <i>HIC Case Study</i>	Physical Fieldwork + Paper 1 - Section C: Physical Landscapes in the UK <i>River Landscapes in the UK</i>	Paper 1 - Section C: Physical Landscapes in the UK <i>River Landscapes in the UK</i>						
Year 10	Prior Links: Concept of development in Yr7 Units: Globalisation and India, and The Middle East and Yr8 Units: China, and Africa Sustainability in Yr7 Climate Change and Yr8 Extreme Global Impacts Units.	Prior Links: Concept of development in Yr7 Units: Globalisation and India, and The Middle East and Yr8 Units: China, and Africa						Prior Links: Yr7 The UK, and Yr8 Rivers Units			
	Aims: To examine the urban change in London, inspecting the opportunities and challenges created. To investigate a regeneration project in this city, and urban sustainability management, for features such as water and energy conservation, waste recycling, and creation of green space Lesson / Content Overview: Where are the UK's urban areas? How important is London? What are the impacts of national and international migration on the growth and character of London? How has urban change created social and economic opportunities? How has urban change created employment opportunities? How has urban change created social, economic and environmental opportunities? How has urban change created social and economic challenges? Brownfield and greenfield sites How has urban change created environmental challenges?	Aims: To explain the causes of global variations in economic development, and evaluate the various methods of measuring global development, including the DTM , HDI and Brandt Line. Lesson / Content Overview: <i>Pre-fieldwork lessons x 2</i> <i>Fieldwork</i> <i>Post-fieldwork lessons x 2</i> What is development? How do we measure development? What is the DTM and what does it tell us about development? What causes uneven development? What are the consequences of uneven development? How can the global development gap be closed? An evaluation into different types of aid	Aims: To assess the various strategies used to reduce the global development gap with reference to one example from an NEE. To investigate an NEE case study and evaluate the methods of development and impacts on the wider economy and quality of life of the population. Lesson / Content Overview: <i>Case Study: Jamaica</i> How has Jamaica used tourism to develop? Has tourism successfully helped Jamaica develop? <i>Case Study: Nigeria</i> Where is Nigeria? What are the social, environmental, political and cultural characteristics of Nigeria? How is Nigeria nationally and internationally important? How have TNCs impacted Nigeria's development? How has international aid impacted Nigeria's development?	Aims: To comparatively examine the UK's economy by exploring factors such as the causes of economic change since the industrial revolution and an example of modern industrial development can be more environmentally sustainable. To evaluate the impact of economic development in the UK and explaining solutions to problems such as the north-south divide. To explain the ways in which the UK links with the wider world. Lesson / Content Overview: How and why has the UK's economy changed? What is the UK's post-industrial economy like? What is the impact of industry on the UK's physical environment and how can it be more sustainable?	Aims: To identify the ways that river valleys change as they flow downstream through various fluvial processes. Lesson / Content Overview: What are river landscapes like? What are fluvial processes? How does erosion shape the land? How do erosion and deposition shape the land? <i>Pre-fieldwork lessons x 2</i> <i>Fieldwork</i> <i>Post fieldwork lessons x 2</i>	Aims: Using a specific example from the UK, describe the landforms resulting from various processes and factors including fluvial processes, geology, human activity. To analyse the costs and benefits of various river flood management strategies, and to assess the overall effectiveness of a specific flood management scheme in the UK. Lesson / Content Overview: <i>Case Study: River Tees</i> Causes of flooding Hydrographs Hard engineering strategies Soft engineering strategies Case study: Banbury	Skills / Concepts on: Skills: Hydrograph analysis Independent research and note-taking Evaluation of flood management Image analysis Graph/data analysis Exam question practice	Skills / Concepts on: Skills: Hydrograph analysis Independent research and note-taking Evaluation of flood management			

<p>How was the Lower Lea Valley regenerated to create urban change? How can urban areas be more sustainable? How can transport be more sustainable in cities?</p> <p>Skills / Concepts on:</p> <p>Skills: Map analysis SEEP identification practice exam questions Independent research and note-taking Debate Graph/chart analysis</p> <p>Concepts: Regeneration Gentrification SEEP identification Integrated transport systems</p>	<p>Skills / Concepts on:</p> <p>Skills: Graph and data analysis Graph and data reproduction Independent research and note-taking Exam question practice SEEP Identification</p> <p>Concepts: Demographic Transition Model Brandt Line Development Quality of Life</p>	<p>What impact has economic development had on Nigeria's environment? How has economic development impacted the Quality of Life of Nigeria's people?</p> <p>Skills / Concepts on:</p> <p>Skills: SEEP Identification Map analysis Practice exam questions Data analysis Evaluation - advantages/disadvantages Debate Graph/chart analysis</p> <p>Concepts: Quality of Life Development Aid VS Trade</p>	<p>What social and economic changes have occurred in the UK's rural landscape? How is the UK's infrastructure been improved and developed? What regional differences and inequalities exist in the UK? What is the UK's place in the wider world?</p> <p>Skills / Concepts on:</p> <p>Skills: Chart/graph analysis Independent research and note-taking Evaluation of factors Exam question practice</p> <p>Concepts: North-south divide Development Post-industrial economy</p>	<p>Concepts: Hydrographs Bradshaw model fluvial processes Long and cross profiles</p>	<p>Image analysis Graph/data analysis Exam question practice</p> <p>Concepts: Hydrographs Bradshaw model fluvial processes Long and cross profiles</p>

Autumn 1 Paper 1 - Section C: Physical Landscapes in the UK <i>Coastal Landscapes in the UK</i>		Autumn 2 Paper 2 - Section C: The Challenges of Resource Management	Spring 1 Paper 3 - Section B: Fieldwork	Spring 2 Revision + Paper 3 - Section A: Issues Evaluation	Summer 1 Revision + Paper 3	Summer 2 Revision + Paper 3
Year 11	<p>Prior Links: Significant references in the context of impacts made in Yr7 Climate Change Unit, and Yr8 Extreme Global Impacts Unit</p>	<p>Prior Links: Concept of resources and resource scarcity included in Yr8 Africa, and Extreme Global Impacts Units</p>	<p>Prior Links: KS3 Fieldwork experience</p>	<p>Prior Links: Skills developed from Yr7 including data analysis (maps, tables, graphs etc), source analysis, and long-answer writing</p>	<p>Prior Links: During KS3 students were assessed once per HT, and twice per HT. Throughout this time students have developed effective and specific revision strategies for geography in-class and independently.</p>	
	<p>Aims: To identify the ways that coastal regions can be influenced by factors such as wave type, weathering and fluvial processes. To describe the formation of distinctive landforms with reference to a specific UK coastline with major landforms of erosion and deposition. To analyse the costs and benefits of various coastal management strategies, and to assess the overall effectiveness of a specific coastal management scheme in the UK.</p> <p>Lesson / Content Overview: Types of waves How do destructive waves shape the land? How does the sea transport material? What landforms are created by deposition? <u>Case Study: Dorset Coastline</u> What causes a cliff to collapse? Hard engineering strategies Soft engineering strategies Case Study: Medmerry</p> <p>Skills / Concepts on: <u>Skills:</u></p>	<p>Aims: To explain the significance and unequal distribution of food, water and energy globally. To explore the changing demands and provisions of these resources in the UK and opportunities and challenges created as a result. To be able to examine in greater depth water security across differing physical, political and economic environments. Students will then explore strategies to increase water supply with a focus on sustainability.</p> <p>Lesson / Content Overview: Global distribution of water, food and energy UK - Food sources UK - Management of food resources UK - Energy sources UK - Management of energy Global water supply Factors affecting water availability Impacts of water insecurity Strategies for water supply UK water supply Example of large scale water supply Sustainable water use</p>	<p>Aims: To prepare students for Paper 3 - Section B: Fieldwork by working through various enquiry processes involving techniques such as data collection methods and analysis of data.</p> <p>Lesson / Content Overview: Maths skills Map skills Practice exam questions Grid references Scale Contours Map interpretation Onwards - Unfamiliar fieldwork booklet</p>	<p>Aims: To prepare students for their GCSE exams by providing revision time involving techniques such as knowledge organisers, practice exam questions and quizzes etc.</p> <p>To prepare students for Paper 3 - Section A: Issues Evaluation by supporting with the analysis of the Pre-Released Material received in May</p> <p>Lesson / Content Overview: Revision of all topics: <u>Challenges of Natural Hazards:</u> Tectonic Hazards Weather Hazards Climate Change <u>The Living World: Ecosystems</u> Tropical Rainforest Hot Deserts <u>Urban Issues and Challenges:</u> Urban issues: Lagos Urban issues: London <u>The Changing Economic World</u> Development Nigeria</p>	<p>Aims: To prepare students for their GCSE exams by providing revision time involving techniques such as knowledge organisers, practice exam questions and quizzes etc.</p> <p>To prepare students for Paper 3 - Section A: Issues Evaluation by supporting with the analysis of the Pre-Released Material received in May</p> <p>Lesson / Content Overview: Revision of all topics: <u>Challenges of Natural Hazards:</u> Tectonic Hazards Weather Hazards Climate Change <u>The Living World: Ecosystems</u> Tropical Rainforest Hot Deserts <u>Urban Issues and Challenges:</u> Urban issues: Lagos Urban issues: London <u>The Changing Economic World</u> Development Nigeria</p>	<p>Aims: To prepare students for their GCSE exams by providing revision time involving techniques such as knowledge organisers, practice exam questions and quizzes etc.</p> <p>To prepare students for Paper 3 - Section A: Issues Evaluation by supporting with the analysis of the Pre-Released Material received in May</p> <p>Lesson / Content Overview: Revision of all topics: <u>Challenges of Natural Hazards:</u> Tectonic Hazards Weather Hazards Climate Change <u>The Living World: Ecosystems</u> Tropical Rainforest Hot Deserts <u>Urban Issues and Challenges:</u> Urban issues: Lagos Urban issues: London <u>The Changing Economic World</u> Development Nigeria</p>

Year 12

Homework and Consolidation

Throughout their course, students will be asked to engage with a variety of materials to further their understanding of the topics that they are studying. A broad range of homework is provided from independent/guided research and case study analysis to TEDtalks and exam style questioning. This is done with the intention of guaranteeing that all students of varying abilities are able to engage with a broad range of channels of information, practising and securing the skills necessary for their success in professional careers once they leave us.

Stretch and Challenge

Within the department, we have ensured that students of all abilities are able to extend their critical thinking of the unit by ensuring that each lesson contains a broad range of challenge questions or tasks. We guarantee that all students are able to access these activities by applying open-ended enquiries, discussion tasks, as well as wicked and super-wicked questioning.

Term 1

Paper 1 Physical Geography	Paper 2 Human Geography
<p>Unit Title: Paper 1: Section A - Water and Carbon Cycles <i>The Water Cycle</i></p> <p>Prior Links Y11 - Physical Landscapes in the UK (Rivers) Y9 - The Challenges of Natural Hazards and Climate Change Y9 - The Living World - Tropical Rainforests</p> <p>Aims: To describe the distribution and size of stores of water To explain the processes influencing the changes in global water stores, including hydrological flows and transfers. To explain the drainage basin as an open system using various inputs and outputs. To explain runoff variations and flood hydrographs To explain changes in the water cycle over time involving storm events, water abstraction and other processes. Using a case study to illustrate and analyse key themes from this unit and consider factors such as the impact of precipitation on drainage basin stores etc.</p> <p>Lesson / Content Overview: What are systems and models? What is the global distribution and size of stores of water? Factors driving changes in water stores The drainage basin hydrological cycle Water balance (soil moisture graph) The rivers regime (hydrographs) Case Study: River Eden Changes in the water cycle over time Water insecurity</p> <p>Skills / Concepts on: <u>Skills:</u></p>	<p>Unit Title: Paper 2: Global Systems and Global Governance</p> <p>Prior Links Y10 - Changing Economic World</p> <p>Aims: To understand the economic, political and social changes associated with technological and other driving forces which have been a key feature of global economy and society in recent decades. Students will be able to explain how increased interdependence and transformed relationships between peoples. They will be able to explain how global systems can sometimes act to promote stability, growth and development but can also cause inequalities, conflicts and injustices for people and places.</p> <p>Lesson / Content Overview: Globalisation Flows of capital Flows of labour Flows of product Production, consumption and distribution Flows revision Formative assessment Distribution and consumption Factors in globalisation Trading blocs Global marketing</p> <p>Skills / Concepts on: <u>Skills:</u></p>

<p>Qualitative and quantitative skills e.g. simple mass balance, unit conversions and analysis and presentation of field data.</p> <p>Concepts</p> <p>Flows and transfers Inputs and outputs Water balance Stores Dynamic Equilibrium Positive/negative feedback loops Hydrographs</p>	<p>Choropleth map Gini coefficient Line graphs Image analysis Independent research and note-taking</p> <p>Concepts:</p> <p>Trade agreements Power relations International trade Geopolitical events Business marketing</p>
<p>Reading</p> <p>Water: A Turbulent History - Stephen Halliday Global Governance: Why? What? Whither? - Thomas Weiss</p>	
<p style="text-align: center;">Term 2</p>	<p style="text-align: center;">Paper 1 Physical Geography</p>
<p>Unit Title: Paper 1: Section A - Water and Carbon Cycles <i>The Carbon Cycle</i></p> <p>Prior Links: Y9 - The Challenges of Natural Hazards and Climate Change Y9 - The Living World - Tropical Rainforests</p> <p>Aims: To describe the distribution and size of stores of carbon To explain the processes that influence the changes in global carbon stores e.g. photosynthesis, weathering, carbon sequestration etc. To explain changes in the carbon cycle over time including natural variations and human impacts To explain the carbon budget and the impact of the carbon cycle on the planet. Using a case study of a tropical rainforest to illustrate and analyse key themes across the unit and their relationship to the environmental change and human activity.</p> <p>Lesson / Content Overview: Intro to carbon cycles The stores of carbon Changes to carbon stores</p>	<p>Unit Title: Paper 2: Global Systems and Global Governance</p> <p>Prior Links: Y10 - Changing Economic World</p> <p>Aims: To be able to explain how trading relationships and patterns between large, highly developed economies such as the United States, the European Union, emerging major economies such as China and India and smaller, less developed economies are developing. Students will look at a variety of different TNCs and will be able to explain their spatial organisation, production, linkages, trading and marketing patterns.</p> <p>Lesson / Content Overview: Revision Mock exams Global systems Interdependence International trade Trading patterns Role of TNCs Global governance</p>

<p>Impacts of changes to carbon stores Carbon sequestration Case Study: The Amazon Rainforest</p> <p>Skills / Concepts on:</p> <p><u>Skills:</u> Qualitative and quantitative skills e.g. simple mass balance, unit conversions and analysis and presentation of field data.</p> <p><u>Concepts</u> Flows and transfers Inputs and outputs Carbon sequestration Carbon budget Stores Dynamic Equilibrium Positive/negative feedback loops</p>	<p>Global commons Revision Global commons - Antarctica Physical Geography</p> <p>Skills / Concepts on:</p> <p><u>Skills:</u> Flow chart Triangular graphs Dispersion diagrams Image analysis Independent research and note-taking</p> <p><u>Concepts:</u> Quotas/ tariffs/taxes Global common Global governance Food commodities Conflict</p>
<p>Reading Wilding - Isabella Tree Transnational Corporations and Uneven Development (RLE International Business) - Rhy Jenkins</p>	
<p>Term 3</p>	
<p>Paper 1 Physical Geography</p>	<p>Paper 2 Human Geography</p>
<p>Unit Title: Paper 1: Section B - Coastal Systems</p> <p>Prior Links: Y11 - Coastal Landscapes in the UK</p> <p>Aims: To address the concepts of landform and landscape, and how specific landforms combine to form characteristic landscapes</p>	<p>Unit Title:</p> <p>Paper 2: Global Systems and Global Governance/ Contemporary Urban Environments</p> <p>Prior Links: Y9 - Urban Issues and Challenges Y10 - Changing Economic World</p> <p>Aims:</p>

<p>To explain various systems and processes that exist within coastal environments including, geomorphological processes, coastal processes, sediment sources and budes etc.</p> <p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> Coasts: open and closed systems Energy and landscape High energy coastlines and sediment cells Tides, currents and storm surges Coastal erosional landforms <p>Skills / Concepts on:</p> <p><u>Skills:</u></p> <ul style="list-style-type: none"> Qualitative and quantitative skills such as observational, measurement and geospatial mapping, data manipulation and statistical skills applied to field measurements <p><u>Concepts</u></p> <ul style="list-style-type: none"> Flows and transfers Place and space Inputs and outputs Energy Stores Dynamic Equilibrium Positive/negative feedback loops Eustatic and isostatic 	<p>Students will start their new topic on urbanisation and its importance in human affairs. Students will be able to map global patterns of urbanisation and demonstrate the changes in urbanisation, suburbanisation, counter-urbanisation, urban resurgence. They will also start the next part of the topic, which is focusing on Antarctica and how contemporary geography, including climate, of Antarctica has a role as a global common. They will be able to illustrate its vulnerability to global economic pressures</p> <p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> Climate - Antarctica Climate graph Threats to Antarctica Protection of Antarctica NGOs Consequences of global governance Exam practice Urban environments Causes of urban growth Megacities Suburbanisation Counter urbanisation <p>Skills / Concepts on:</p> <p><u>Skills:</u></p> <ul style="list-style-type: none"> Climate graph Image analysis Debate Graph/chart analysis Independent research Presentations <p><u>Concepts:</u></p> <ul style="list-style-type: none"> Urbanisation Counterurbanisation Sustainable development Critical appraisal Integration
<p>Reading</p> <p>The Lie of the Land: The explosive story of how Britain was form - Ian Vince Antarctica - Mel Friedman</p>	
<p>Term 4</p>	

Paper 1 Physical Geography	Paper 2 Human Geography
<p>Unit Title: Paper 1: Section B - Coastal Systems</p> <p>Prior Links: Y11 - Coastal Landscapes in the UK</p> <p>Aims: Researching examples to explain the development of specific landscape and the landforms within it To evaluate the human intervention in coastal landscapes including traditional approaches and sustainable ones Using a local case study to illustrate and analyse fundamental coastal processes and challenges faced in their sustainable management Using a contrasting case study to illustrate and analyse how it presents risks and opportunities for human activity and evaluate human responses.</p> <p>Lesson / Content Overview: Coastal transportation and deposition Weathering, mass movement and run-off Factors affecting coastal erosion Human intervention at the coast Onwards - pre-field trip preparation</p> <p>Skills / Concepts on: Skills: Qualitative and quantitative skills such as observational, measurement and geospatial mapping, data manipulation and statistical skills applied to field measurements</p> <p>Concepts Flows and transfers Inputs and outputs Energy Stores Dynamic Equilibrium Positive/negative feedback loops</p>	<p>Unit Title: Paper 2: Contemporary Urban Environments</p> <p>Prior Links: Y9 - Urban Issues and Challenges</p> <p>Aims: For students to be able to appreciate human diversity and develop awareness and insight into issues associated with economic inequality, social segregation and cultural diversity in contrasting urban areas. They will also study the strategies to manage these issues. Students learn about the new urban landscapes; town centre mixed developments, cultural and heritage quarters, fortress developments, gentrified areas, edge cities and the concept of the postmodern western city.</p> <p>Lesson / Content Overview: Urban resurgence Deindustrialisation Assessment Urban forms New urban landscape Tackling poverty Cultural diversity Economic inequality Social and economic examples Revision</p> <p>Skills / Concepts on: Skills: Image analysis SEEP Identification Map analysis Data analysis Evaluation - advantages/disadvantages</p> <p>Concepts: Inequality Environmental determinism Development Physical vs human</p>

<p style="text-align: center;">Reading</p> <p style="text-align: center;">White Sands: Experiences from the Outside World - Geoff Dyer The New Urban Crisis: Gentrification, Housing Bubbles, Growing Inequality, and What We Can Do About It - Richard Florida</p>	
Term 5	
<p style="text-align: center;">Unit 3 - Fieldwork and NEA</p>	<p style="text-align: center;">Paper 2 Human Geography</p>
<p>Unit Title: Fieldwork + NEA</p> <p>Prior Links: <i>Y10 - Unit 3 Fieldwork and Geographical Applications</i></p> <p>Aims: To prepare students to undertake fieldwork to support their NEA write-up.</p> <p>Lesson / Content Overview: Students are required to undertake a minimum of 4 day fieldwork in relation to processes in both physical and human geography. Students will begin working on their independent investigations with the guidance and expertise of their classroom teacher e.g. advise on health and safety considerations, use of equipment and potential ethical concerns, advice on good practice etc. A-Level students at PHS are currently taken on a 4-night residential trip to FSC Slapton Ley in Devon, which takes place in the second half of the Summer term.</p> <p>Before trip: Introduction to NEA structure and expectations; student handbook given. Pre field trip lessons on fieldwork location and characteristics of area</p> <p>During trip: Introduction to primary fieldwork techniques in human and physical geography Writing and approval of independent investigation proposal form Collection of primary data Introduction to data presentation techniques</p> <p>After trip: Draft copy of first 2 sections (Area 1 & Area 2) completed - self-assessment using checklist. Data presentation and analysis Conclusions and evaluation Complete draft submitted - self-assessment using checklist.</p>	<p>Unit Title: Paper 2: Contemporary Urban Environments</p> <p>Prior Links: <i>Y9 - Contemporary Urban Environments</i> <i>Y10 - Changing Economic World</i></p> <p>Aims: To prepare students for their mock exams by doing revision of the topic and completing the topic on the challenges of the urban environment. They will also look at the impact of urban forms and processes on local climate and weather. They will look at the issues associated with catchment management in urban areas and the development of sustainable urban drainage systems (SUDS). They will be able to look at river restoration and conservation in damaged urban catchments and reference it to a specific project</p> <p>Lesson / Content Overview: Urban heat island effect Urban heat island consequences Urban air pollution Pollution and hydrograph Urban precipitation Sustainable urban drainage River restoration Waste Revision</p> <p>Skills / Concepts on:</p>

<p>*Final submission date in March.</p> <p>Skills / Concepts on: https://www.aqa.org.uk/subjects/geography/as-and-a-level/geography-7037/subject-content/geography-fieldwork-investigation</p>	<p>Skills: Hydrograph formation Image analysis Choropleth map Graph and data analysis Graph and data reproduction</p> <p>Concepts: Governance policy Urban climate Urban drainage Environmental degradation</p>
Term 6	
<p>Paper 1 Physical Geography & Unit 3 - NEA and Fieldwork</p>	<p>Paper 2 Human Geography</p>
<p>Unit Title: NEA + Mocks</p> <p>Prior Links: <i>Y10 - Unit 3 Fieldwork and Geographical Applications</i></p> <p>Aims: Continue supporting students with their NEA and mocks.</p> <p>Lesson / Content Overview: Preparing students for their A level mock exams by providing revision time involving techniques such as knowledge organisers, practice exam questions and quizzes etc.</p> <p>Skills / Concepts on: https://www.aqa.org.uk/subjects/geography/as-and-a-level/geography-7036/subject-content/geographical-skills-checklist</p>	<p>Unit Title: <i>Paper 3: NEA, Exam Papers</i></p> <p>Aims: To prepare students to undertake fieldwork to support their NEA write-up and complete the topic of changing urban environments.</p> <p>Lesson / Content Overview: Environmental problems Sustainability London Mumbai Case study revision Whole topic revision Revision Revision Mock exams NEA trip NEA write up</p> <p>Skills / Concepts on: Skills: Maths skills</p>

	<p>mean, mode, median. Measures of dispersion – range, interquartile range and standard deviation. Inferential and relational statistical techniques to include Spearman's rank correlation and application of significance tests.</p> <p>Line graphs – simple, comparative, compound and divergent. Bar graphs – simple, comparative, compound and divergent. Scatter graphs, and the use of the best fit line. Pie charts and proportional divided circles. Triangular graphs. Graphs with logarithmic scales. Dispersion diagrams.</p> <p><u>Concepts:</u> How to link the qualitative to the qualitative</p>
--	--

Year 13	
<p>Homework and Consolidation</p> <p>Throughout their course, students will be asked to engage with a variety of materials to further their understanding of the topics that they are studying. A broad range of homework is provided from independent/guided research and case study analysis to TEDtalks and exam style questioning. This is done with the intention of guaranteeing that all students of varying abilities are able to engage with a broad range of channels of information, practising and securing the skills necessary for their success in professional careers once they leave us.</p>	
<p>Stretch and Challenge</p> <p>Within the department, we have ensured that students of all abilities are able to extend their critical thinking of the unit by ensuring that each lesson contains a broad range of challenge questions or tasks. We guarantee that all students are able to access these activities by applying open-ended enquiries, discussion tasks, as well as wicked and super-wicked questioning.</p>	
Term 1	
<p>Paper 1 Physical Geography</p>	<p>Paper 2 Human Geography</p>
<p>Unit Title: Paper 1: Section C - Hazards</p> <p>Prior Links: <i>Y9 - Challenges of Natural Hazards - Natural and Tectonic Hazards</i></p> <p>Aims: This optional section of our specification focuses on the lithosphere and the atmosphere, which intermittently but regularly present natural hazards to human populations, often in dramatic and sometimes catastrophic fashion. Students will first explore the context of natural hazards and their management, followed by the theory of plate tectonics, volcanic and seismic hazards, storm hazards and then wildfires.</p>	<p>Unit Title: Paper 2: Changing Places</p> <p>Prior Links: <i>Y9 - Urban Issues and Challenges</i></p> <p>Y10 - Changing Economic World</p> <p>Aims:</p>

<p>Lesson / Content Overview:</p> <p>Introduction to hazards Hazard Perception Hazard Management Seismic Hazards Constructive Boundaries Destructive Boundaries Conservative and hotspots Vulcanicity Volcanic Hazards Seismic Hazards Seismic Impacts (Haiti) Haiti vs Japan</p> <p>Skills / Concepts on:</p> <p><u>Skills</u> Use of key subject specific and technical terminology. Opportunities to develop skills such as drawing, labelling and annotating diagrams. Online research into volcanic hazards. Construct a range of graphs and use statistical skills. Developing extended writing skills. Using atlas maps. Producing annotated maps. Engage with remotely sensed satellite data.</p> <p><u>Concepts</u> Hazard perception Hazard management Geophysical Hazards Plate tectonics Distribution & magnitude Preparation & response Vulcanicity Seismicity Tropical Storms Wildfires Multi-Hazardous Environment</p>	<p>Students are to understand people's engagement with places, their experience of them and the qualities they ascribe to them, all of which are of fundamental importance in their lives. Students acknowledge this importance and engage with how places are known and experienced, how their character is appreciated, the factors and processes which impact upon places and how they change and develop over time. Through developing this knowledge, students will gain understanding of the way in which their own lives and those of others are affected by continuity and change in the nature of places which are of fundamental importance in their lives.</p> <p>Lesson / Content Overview:</p> <p>What is place Sense of place Perception of place Social and spatial exclusion Categories of place Perception vs sense Exogenous and endogenous factors Character of place NEA</p> <p>Skills / Concepts on:</p> <p><u>Skills</u> Poem analysis Independent research and note-taking Video analysis Image analysis Graph/data analysis Use of key subject specific and technical terminology Developing extended writing skills Measurement and various mapping skills, together with data manipulation and statistical skills including those associated with and arising from fieldwork.</p> <p><u>Concepts</u> Place vs space Perception of place Outsider Insider</p>

Pinner High School: HISTORY

Intent

- Our History curriculum at Pinner High aims to inspire our students to discover, question and evaluate the past. We aim to foster a love of learning and develop our pupils into becoming active citizens through ensuring that pupils are taught a broad and balanced curriculum across the key stages.
- Our curriculum is designed to build upon prior knowledge which allows our pupils to create a mental timeline of the past. We cover key disciplinary concepts like: empire, migration and power through studying and revisiting them at different stages within the curriculum to build greater understanding of the past. Equally, our history curriculum is designed to prompt history as a discipline and teach our pupils to become historians. Our students will do this by studying all the second order historical concepts: cause and consequence; change and continuity; historical interpretations; evidence and sources; historical significance and similarity and differences.
- We as a history department aim to plan and deliver an ambitious curriculum that challenges and enables all groups of students to make progress and achieve their potential. We as a department strive to make history accessible to all learners through specific measures including differentiated and scaffolded tasks. We stretch through rigorous challenge tasks that are carefully planned into the curriculum within lessons and homework to push our higher attaining students further.
- We share our school intent of inspiring learning through creating a curriculum that is designed to provide opportunities outside of the classrooms to expand their understanding of history. For example, through our Digging Deeper Project and range of extra curricula programme that exceed the national curriculum. We also strive in history to develop our pupils' transferable skills that will equip them in later life. They will learn to: analyse events and arguments; create judgments and evaluate the past; problem solve key historical questions and critically think about different historical events and causes. These skills prepare our pupils for a range of jobs and careers within all fields.

Implementation

- We have created a blended curriculum that teaches a variety of narratives and histories to reflect the diversity of Harrow. We firstly want our students to understand the history of England and how it has interacted within the world. Equally, we also have created units that highlight other significant societies in world history to help our students build a more rounded understanding of the past which exceeds the national curriculum.
- We have carefully designed our curriculum so students will study all the second order history concepts at different stages to help them expand their understanding of history as a discipline and develop their skills in writing historically. Through carefully crafted enquiries which naturally lend themselves to each concept, we help our pupils build their understanding of history with a big emphasis on developing specific vocabulary. This is a key element to our assessments, which are all designed to check how well students have engaged and progressed in both their understanding of the past and also in the disciplinary concept. It also allows us to check and address any misconceptions.
- We ensure that our students understand history as a discipline through planning our enquiries around a range of historians' interpretations. Students get the opportunity to understand how historians work and explore how history is evolving. For example, our enquiry that focuses on the recent works of Miranda Kaufman, who wrote *Black Tudors: the untold story*, highlights how a historian works with sources to make new claims about the past. Students will regularly read and engage with historians' works to help improve their own historical understanding and ability to write. We continue to prompt literacy development through challenging reading materials, discussions, and opportunities for oracy through presentations, debates, and group work.
- We have placed a considerable emphasis on our pupils building their long-term memories by deliberately sequencing our curriculum to ensure students build on prior knowledge across the key stages. In key stage 3 all history lessons are taught through enquiries that have an overarching question that builds upon prior knowledge. These enquiries create a strong foundation of knowledge for all pupils and provide them with a clear chronological understanding of the past. The units we chose for GCSE directly build upon this knowledge, for example Crime and Punishment is a thematic study that allows students to revisit areas of history from both year 7 and year 8. We also have chosen our A Level units to allow students to build a deeper understanding of the past, for example at GCSE students focus on the Cold War from a European and US view and in sixth form we continue to study the Cold War but looking at what happened in Asia.

- As a department we set high expectations for all pupils which creates a culture and love of learning in our classrooms. Independent learning is emphasised regularly through flipped learning homework activities, research projects, and encouraging students to explore history of each unit they study outside the classroom through our Digging Deeper Project

Impact

- At the end of each enquiry, our students are expected to consolidate key knowledge and their ability to write historically through carefully planned assessments cycles. These are rigorous summative checkpoints which are designed to help meet the needs of all learners and challenge all to achieve and make sure students do make sufficient progress.
- We as a department, regularly use formative assessment to check, model and build key knowledge. Students are regularly assessing how much they know through quizzing and green pen reflections tasks. It also allows us to pick up on any misconceptions and ensure all assessment objects are understood.
- As a department, we diligently track and monitor student progress through moderation and data, which enables us to effectively introduce support measures such as parent communication or targeted intervention efforts where needed.
- To guarantee consistency across the history department we use shared resources which we create and adapt collectively. To ensure high expectations across the team, we have enquiry teacher guides in keystage 3 that outline the purpose and intent of each enquiry to make sure there is consistency across the department and unit links are being made.
- We carefully structure department meetings to ensure we regularly reflect and engage on how to develop and evolve our curriculum which is informed with both current learning and CPD. We also use learning walks, book looks, classroom observations, student voice panels, moderation and data analysis to inform our department meetings and use this data to inform our immediate goals and long term plans. We maintain high standards within the department through regularly sharing of best practice.
- We celebrate student achievements in History through showcasing and modelling students work. We regularly engage with parents to communicate student success through emails and postcards home. We continue to develop the love of learning through having history ambassadors and A Level prefects.
- The impact of our curriculum extends further than assessment results. Our students develop their written and oral communication skills through learning the ability to analyse, think logically and debate effectively. These skills prepare our students for ever changing world. This resulted in a high uptake of our pupils choosing to continue studying history and other related subjects at university. Additionally, our students will be able to apply their understanding of the past to the real-world. This demonstrates the broader impact of our curriculum on our student's overall growth and readiness for future endeavours as we inspire learning in all.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 7	<p>How do we study History at PHS? <i>Introduction and understanding chronology</i> Key content:</p> <ul style="list-style-type: none"> • What is history all about? • Where do historians get their information from? • How do historians measure the past? • Why have historians “broken up” the past? • Why can history be dangerous? <p>How did the Silk Roads change shape our world? <i>Interpretations/evidence</i> Key content:</p> <ul style="list-style-type: none"> • Cities on the Silk Roads • China – where it all started? • Trade – what was traded along the Silk Roads? • Faith – How did Faith develop? <p>Checkpoint 1 assessment:</p>	<p>How far did Anglo-Saxon England survive the Norman Conquest? <i>Change and continuity</i> Key content:</p> <ul style="list-style-type: none"> • What did England look like in year 1000? • What was life like in Anglo-Saxon England (410-1066)? • Why was 1066 a year of confusion in England? • What did William I do immediately after the Battle of Hastings? • What was England like when William died? <p>Checkpoint 2 assessment</p> <p>What does the Doomsday book reveal to us about Harrow? <i>(Local History)</i> Sources Key content:</p> <ul style="list-style-type: none"> • Doomsday book • Why William used the book to control England? • How did the book help William control the Saxons? • What does the Doomsday book say about Harrow? 	<p>How powerful were Medieval Kings? <i>Change and continuity</i> Key content:</p> <ul style="list-style-type: none"> • Who had power in Medieval England? • How much power did royal women have in Medieval England? • What does the death of Thomas Becket tell us about the influence of the Church? • Why did the barons rebel against King John? (Magna Carta) • What difference did the Black Death really have on society? • Peasants revolt <p>Checkpoint 3 assessment:</p> <p>How powerful were the Medieval Caliphs of Baghdad? <i>Similarity and Difference</i> Key content:</p> <ul style="list-style-type: none"> • Who held power in Baghdad? • How did knowledge give power to the Caliphs? • What discoveries helped the Caliphs gain more power? • How different were Caliphs to Medieval monarchs? 	<p>What does the Mali Empire reveal to us about Africa's position in the world in 14th century? <i>Significance</i> Key content:</p> <ul style="list-style-type: none"> • How was the Kingdom of Mali established? • How did Mansa Musa make his vast wealth? • What can we infer from sources about trade in Mali Empire? • How did religion influence Mansa Musa's reign? • Why did Mansa Musa encourage learning in Mali? <p>Checkpoint 4 assessment:</p>	<p>Which Tudor was the most historically significant? <i>Significance</i> <i>Debating</i> Key content:</p> <ul style="list-style-type: none"> • What happened during the Battle of Bosworth? (HW task) Was Richard III really a villain? (claim to the throne – who should be king) • How did Henry Tudor seize power? – type of ruler • Why did Henry VIII break with Rome? • Edward VI • Mary I • Elizabeth I <p>Checkpoint 5 assessment</p> <p>How were hidden lives of Black Tudors uncovered? <i>Interpretations</i> Key content:</p> <ul style="list-style-type: none"> • How historians uncover new historical sources? • John Blanke story 	<p>What was so turbulent about the Seventeenth Century? <i>Sources/ Evidence</i> Key content:</p> <ul style="list-style-type: none"> • What does Gunpowder Plot tell us about the changing power of the King? • Why did the Civil War break out in England? • Why did people start believing in Witches? • What should Parliament have done with King Charles I? • How did plague and fire change the lives of Londoners? (Local History) <p>Checkpoint 6 assessment</p>
Year 8	<p>Why did Britain abolish the trade of enslaved people in the nineteenth century? <i>Causation</i> Key content:</p>	<p>How far does the Industrial Revolution deserve its name? <i>Change and continuity</i> Key content:</p>	<p>Why did women gain the vote by 1928? <i>Causation</i> <i>Writing a speech</i> Key content:</p>	<p>Why is it so important for us to learn about the Holocaust? <i>Significance</i> Key content:</p> <ul style="list-style-type: none"> • What can the story of Frank Bright tell us about 	<p>What were the key turning points in World War Two? <i>Change and Continuity</i> Key content:</p>	<p>What were the biggest challenges facing the people of Britain post 1945? <i>Interpretations</i> Key content:</p>

	<ul style="list-style-type: none"> What does it mean to be enslaved? What was Africa like before European invasion? Why is the Transatlantic slave trade known as the 'triangular trade'? What was it like to be enslaved working on a plantation? How did enslaved people resist against their master's will? Why was the trade of enslaved people abolished? How should the transatlantic slave trade be remembered? <p>Checkpoint 1 assessment</p>	<ul style="list-style-type: none"> Exploring change and continuity and significance Introduction to Industrial England Population increasing Creation of a train network Public health <p>Checkpoint 2 assessment</p> <p>What drove the creation of Metroland? (<i>Local history</i>) <i>Causation</i></p> <p>Key content:</p> <ul style="list-style-type: none"> Metroland – what is it? Why was it set up? Significance of Metroland 	<ul style="list-style-type: none"> What was the position of women in the 1900s? Who were the suffragists? Who were the Suffragettes? How did the movement develop by Suffragettes? How did World War One help women gain the vote? How did women gain the vote in 1928? <p>Checkpoint 3 assessment</p> <p>What does the War Campaign reveal to us about Britain during WW1? <i>Sources</i></p> <p>Key content:</p> <ul style="list-style-type: none"> Why did the government use campaign posters? What is Propaganda? Propaganda aimed at women Propaganda used in the Empire 	<p>the experience of Jews in the period of Nazi Germany?</p> <ul style="list-style-type: none"> Is antisemitism a modern, racist belief? What was life like for European Jews before 1933? How were German Jews treated by the Nazis between 1933 and 1938? How did people respond to the persecution of German Jews between 1933 and 1938? How did the life of European Jews change from 1939? How did the persecution of European Jews turn into 'genocide'? Why was it so difficult to fight back against the Holocaust? <p>Checkpoint 4 assessment</p>	<ul style="list-style-type: none"> Why did war break out in 1939? Was the war really a Phoney one? Turning points: Blitzkrieg, Dunkirk, Battle of Britain, US Entering the war, D-Day Homefront – Impact of War in Britain Ending of the war – use of Atomic weapons <p>Checkpoint 5 assessment</p> <p>What drove the collapse of the British Empire? <i>Causation</i></p> <p>Key content:</p> <ul style="list-style-type: none"> Treaty of Versailles Rise of Nationalism Impact of WW2 Case study on India <p>Checkpoint 6 assessment</p>	
Year 9	<p>Key Topic 1: c1000-1500 Crime and punishment in medieval England</p> <ul style="list-style-type: none"> Crimes Law enforcement Punishments Case study: Power of the Church <p>Key Topic 2: c1500-1700 Crime and punishment in early modern England</p> <ul style="list-style-type: none"> Crimes Law enforcement Punishments Case study: Witchcraft & Gunpowder plot <p>Checkpoint 1 assessment</p>	<p>Key Topic 2: c1500-1700 Crime and punishment in early modern England</p> <ul style="list-style-type: none"> Crimes Law enforcement Punishments Case study: Witchcraft & Gunpowder plot <p>Checkpoint 2 assessment</p>	<p>Key Topic 3: c1700-1900 Crime and punishment in 18th and 19th century Britain</p> <ul style="list-style-type: none"> Crimes Law enforcement Punishments Case study: Pentonville prison & Robert Peel <p>Checkpoint 3 assessment</p>	<p>Key Topic 4: c1900-present Crime and punishment in modern Britain</p> <ul style="list-style-type: none"> Crimes Law enforcement Punishments Case study: conscientious objectors & Ending of Death Penalty <p>Checkpoint 4 assessment</p>	<p>Topic 5: Whitechapel, c1870-1900</p> <ul style="list-style-type: none"> Crime in the area Housing and conditions Policing in the area Immigration to the area Jack the Ripper and difficulties of catching him <p>Checkpoint 5: Full paper assessment</p>	<p>Key Topic 1: The Weimar Republic 1918-29</p> <ul style="list-style-type: none"> Birth of the Republic Period of instability 1919-23 Period of stability Golden Age <p>Checkpoint 1 assessment</p>

Careers

History offers a wide range of careers due to the transferable skills it provides pupils with. History gives students the ability to select and analyse large amounts of different pieces of information to create coherent and logical judgements which they able to both articulate orally and writing. Students learn critical reasoning and analytical skills, including problem solving and thinking creatively. Due to our curriculum, students experience intellectual rigour and build the capacity to think objectively and approach problems and new situations with an open mind. These skills help students suited for roles in: Education, Marketing, Human resources, Law, Project management, Museums curators and Charity organiser to name just a few. Employers of top business firms and graduate schemes value History highly as a degree subject and many top universities offer exciting courses.

Extra Curricula opportunities extending learning outside the classroom

Learning opportunities beyond the classroom are available to all students through: enrichment activities; further suggested reading for students based on individual lessons; and through school trips. Students will get the opportunity to hear the personal testimony of Holocaust survivor to learn more about how the Holocaust happened. Students will also have the chance to visit the historical environment of Whitechapel by going on walking tour to explore how significant this area was during the Industrial Period to understand challenges faced by the police force. Students regularly are encouraged to expand their knowledge on the subject through our Digging Deeper project. On this platform we share regular: work experience opportunities; lectures; news articles; extended reading and wide range of useful websites. Within the year, the history department will run a range of super curricular clubs from Ancient History club; Formal debate club; Scholar club; Historical writing club; and Critical thinking to allow students to learn new knowledge and develop their analytical skills.

Pinner High School: Politics

KS5: Edexcel (9PL0)

Intent

- Our Politics curriculum at Pinner is designed to be an engaging study that focuses on understanding the world through learning the political ideas, institutions and process of the UK and USA. In Year 12, our students will learn the systems of UK government, theories behind politics and engage with political ideologies to create a greater understanding of politics as discipline. In Year 13 we build on this prior knowledge by focusing on the political structures and institutions of the USA. This allows students to build a synoptic understanding of politics, as the impact of US governments on the world beyond its borders has become an increasing feature of international politics in the 21st century.
- Our curriculum is designed to build our students' critical awareness of the changing nature of political systems to help them become active citizens. Our pupils will develop knowledge and an understanding of the rights and responsibilities of individuals and groups within Britain, helping them to further understand British values and democracy.
- Politics is an inclusive subject which encourages all our students to engage in key debates and actively participate. Regardless of students' prior exposure to Politics, our curriculum aims to facilitate progress and raise attainment levels throughout the A-Level course. It places a strong emphasis on teaching literacy and oracy skills through regularly debating key material. Through our rigorous units, our pupils learn the ability to critically analyse, interpret and evaluate political information to form arguments and make judgements.
- We as a Politics department aim to plan and deliver an ambitious curriculum that challenges and enables all groups of students to make progress and achieve their potential. We as a department strive to make Politics accessible to all learners through specific measures including differentiated and scaffolded tasks. We stretch through rigorous challenge tasks that are carefully planned into the curriculum within lessons and homework to push our higher attaining students further.
- Our curriculum also is designed to challenge all to think beyond the specification and engage with current affairs and real political issues. We want to foster the love of learning politics through our Digging Deeper Project and through our extracurricular activities to encourage further study in the subject.

Implementation

- All Politics lessons at Pinner High are taught through enquiries that have an overarching question that builds upon prior knowledge to help students gain a strong understanding of contemporary political structures and issues in their historical context. Within each unit of work, students develop and build their skills and learn specific political vocabulary to describe, explain and evaluate the functions and systems of government in the UK and USA.

- Lessons and homework tasks are carefully crafted to push all students to think beyond the specification demands by constantly engaging with current affairs through wider reading and flipped learning activities. Students on rotation present a weekly news summary of key stories from that week in politics and present how these new stories can be used in exams as examples. This allows our pupils to understand that politics is an ever-changing discipline.
- We have placed a considerable emphasis on our pupils building their long-term memories by deliberately sequencing our curriculum to ensure students build on prior knowledge across the 2-year course. Due to the synoptic nature of politics, students regularly are asked to link knowledge from all papers. We facilitate this through a range of activities that get students to think of the bigger picture and make connections. We have chosen to study US politics due to the increased impact and influence the US has on the wider political sphere. It also allows us to create cross curricular links with History, who study Civil Rights in the USA.
- Our curriculum has been designed to provide students with opportunities to develop their essay writing skills by teaching our pupils to analyse and evaluate key arguments and to support this with specific examples. We regularly teach how to debate key issues to help highlight the importance of balance and evaluate what makes a strong argument. Our students regularly improve their skills in research, communication and team building through our engaging and rigorous curriculum that transpires into the classroom.
- As a department we set high expectations for all pupils which creates a culture and love of learning in our classrooms. Independent learning is emphasised regularly through flipped learning homework activities, research projects, and encouraging students to explore politics outside of the classroom through our Digging Deeper Project. For example, suggesting weekly podcasts to listen to keep informed of current affairs.

Impact

- At the end of each unit, our students are expected to consolidate key knowledge and their ability to write politically through carefully planned assessments cycles. These are rigorous summative checkpoints which are designed to help meet the needs of all learners and challenge all to achieve and make sure students do make sufficient progress.
- We, as a department, regularly use formative assessment to check, model and build key knowledge on key political concepts and theories. Students are regularly assessing how much they know through quizzing, modelling, debating, consolidation and reflections tasks. It also allows us to pick up on any misconceptions and ensure all assessment objects are understood.
- As a department, we diligently track and monitor student progress through moderation and data, which enables us to effectively introduce support measures such as parent communication or targeted intervention efforts where needed.
- To guarantee consistency across the politics department we use shared resources which we create and adapt collectively. To ensure high expectations across the team, we regularly attend CPD and feed this back into our curriculum.
- We carefully structure department meetings to ensure we regularly reflect and engage on how to develop and evolve our curriculum which is informed with both current learning and CPD. We also use learning walks, book looks, classroom observations, student voice panels, moderation and data analysis to inform our department meetings and use this data to inform our immediate goals and long term plans. We maintain high standards within the department through regular sharing of best practice. We also work closely with other departments to ensure high standards are maintained across A Levels at Pinner High.
- We celebrate student achievements in Politics through showcasing and modelling students' work and regularly promote our student's success through our Digging Deeper project. We continue to develop the love of learning through having A Level prefects who promote the subject across school.
- The impact of our curriculum extends further than assessment results. Our students develop their written and oral communication skills through learning the ability to analyse, think logically and debate effectively. These skills prepare our students for an ever changing world. This has resulted in a high ratio of our pupils choosing to

continue studying politics and other related subjects at university. We believe our politics pupils will become well rounded students who champion that it's through politics that many important questions are answered and global challenges are addressed.

Career Development

Politics offers a wide range of careers due to the transferable skills it provides pupils with. Politics gives students the ability to select and analyse large amounts of different pieces of information to create coherent and balanced logical judgements. These skills help students suited for roles in: Political research and advising, journalism, marketing, human resources, lawyers, project managers, diplomats, international relations, charity organiser, and civil servants to name just a few. Employers of top business firms and graduate schemes value Politics highly as a degree subject and many top universities offer exciting courses.

Enrichment Opportunities & Super Curricular

Learning opportunities beyond the classroom are available to all students through enrichment activities, further suggested reading for students based on individual lessons and through school trips. Students will get the opportunity to hear the role of Member of Parliament through a question and answer session. Students will also have the chance to visit Parliament by going on a walking tour to explore how significant this institution is to making laws and representation of democracy. Within the year the politics department will also run a range of super curricular trips and clubs from Debate club and Critical thinking to allow students to learn new knowledge and develop their analytical skills.

Curriculum Overview: PSYCHOLOGY

KS5: Psychology A Level AQA (7182)

Intent - What do we aim to achieve with our subject curriculum?

- The AQA A-level psychology course offers an engaging and effective introduction to Psychology. Students will learn the fundamentals of the subject and develop skills valued by Higher Education (HE) and employers, including critical analysis, independent thinking and research.
- Retaining the most popular features of previous, market-leading qualifications, AQA have worked with teachers, HE and the British Psychological Society to produce clear, up-to-date and stimulating specifications. AQA have built on the success of their previous specifications by introducing some minor amendments that reflect advances and changes in the subject and provide a coherent and holistic programme of study.
- In addition to striving for academic success, we hope that students studying psychology will help young people leave school as maturing adults who are tolerant and open minded; who understand and embrace diversity; who are confident and resilient; who have a strong sense of identity; who learn to value others and treat them with sensitivity; who know how to take effective action for change; who have a sense of spiritual, moral and cultural awareness; who understand and respect other people's cultural backgrounds.
- The curriculum is ambitious and designed to give all learners, including the most disadvantaged and those with special educational needs and/or disabilities (SEND) as well as our most able students, the knowledge and cultural capital they need to succeed in life.
- The A-Level Psychology curriculum is coherently planned and sequenced towards cumulatively sufficient knowledge and skills for future learning and employment. Studying psychology opens students to a range of careers and opportunities to study further.
- All learners study the full curriculum - we will ensure this by teaching a full course in breadth and depth. Ultimately, it is hoped that students will be able to evaluate a range of social-biological-psychological explanations for all types of behaviour and to draw conclusions about behaviours based on analysis and evaluation of research in order to conclude which approaches they view as being the most useful. Students will therefore be able to analyse the world and individuals around them in new ways, incorporating a myriad of approaches and asking questions about the nature of human agency.
- The students will be expected to demonstrate their skills as independent learners through challenging homework tasks and activities in class. However, the students can also expect high levels of support and scaffolding in lessons so that all students can reach their full potential in Psychology. Students Develop essential knowledge and understanding of different areas of Psychology and how they relate to each other. They should master and showcase a deep appreciation of the skills, knowledge and understanding of scientific methods , gain competence and confidence in a variety of practical, mathematical and problem-solving skills.
- Overall our aim is to nurture their interest in and enthusiasm for the subject, including developing an interest in further study and careers associated with the subject so that students understand how society makes decisions about scientific issues and how the sciences contribute to the success of the economy and society.

Implementation - How do we manage to implement these aims in the classroom?

- The course will be delivered in a linear fashion and students will be required to take three two-hour exams at the end of the second year of the course. The subject area aims to assess and support the progression of its students through a combination of independent learning tasks, knowledge assessments, written assessments and homework. Teachers will provide detailed feedback to develop a rich dialogue both verbally and in the written form between teacher and student.
- Psychology teachers have good knowledge of the subject and course requirements. As the subject leader, I will provide effective support, including for those teaching outside their main areas of expertise. In addition, we believe that by sharing our enthusiasm for the subject and modelling the importance of reading

and lifelong learning we will inspire students to undertake their own research. This will, in turn, foster an environment for students to develop self-mastery and engagement in self-regulated learning.

- Psychology teacher/s present subject matter clearly, promoting appropriate discussion about the subject matter they are teaching. They check learners' understanding systematically, identify misconceptions accurately and provide clear, direct feedback. In doing so, they respond and adapt their teaching as necessary, without unnecessarily elaborate or differentiated approaches.
- Over the course of study, teaching is designed to help learners to remember in the long term the content they have been taught and to integrate new knowledge into larger concepts through exam questions, knowledge tests, class activities and discussions. Detailed feedback practice will be provided to develop a rich dialogue both orally and in the written form between teacher and student.
- Teachers and leaders use assessment well, for example to help learners embed and use knowledge fluently or to check understanding and inform teaching. Teachers understand the limitations of assessment and do not use it in a way that creates unnecessary burdens for staff or learners.
- Teachers create an environment that allows the learner to focus on learning. The resources and materials that teachers select – in a way that does not create unnecessary workload for staff – reflect the provider's ambitious intentions for the course of study and clearly support the intent of a coherently planned curriculum, sequenced towards cumulatively sufficient knowledge and skills for future learning and employment
- A rigorous approach to the teaching of reading develops learners' confidence and enjoyment in reading. In psychology literacy is developed through the reading of articles of relevant studies and theories related to the specification course from reputable educational institutions such as the BPS and Psychology Review Magazine.
- To address misconceptions, we employ formative assessment strategies, including class discussions, individual feedback, and targeted interventions.
- Subject expertise is shared across throughout the departments during CPD meetings and departmental meetings.

Impact – What impact will our curriculum have and how do you measure this?

- The result of these should be extremely beneficial to our students who should also feel valued and respected as individuals. Students should feel challenged but also confident that they can do what we are asking them to. We hope that students are not only engaged in our subjects but are also able to achieve academic success and have clear opportunities to develop skills for life.
- Students will develop detailed knowledge and skills across the curriculum and, as a result, achieve well. This will be reflected in results from examinations in the qualifications obtained. This will be quality assured through use of learning walks, book looks, evidence from observations and data analysis of student progress.
- Through the study of Psychology, the students are offered a scientific and rigorous education in how we develop, learn and behave. In addition, an appreciation of 'how science works' in conjunction with the application of the empirical method will be central to all lessons.
- Students will become critical thinkers, engaging with academic literature, which develops their cultural and academic capital in order to participate fully in society. Promoting academic success is crucial to the study of Psychology, broadening student horizons and opportunities in their future careers.
- Students will be ready for the next stage of education, employment or training. Where relevant, they gain qualifications that allow them to go on to destinations that meet their interests, aspirations and the intention of their course of study. They read widely and often, with fluency and comprehension.
- Assessment plays a crucial role in identifying misconceptions and providing timely feedback to students across the department. Formative assessment strategies, including quizzes and essays, are utilised to gauge student progress. Our aim is to ensure that students, including those with special educational needs (SEND), those eligible for pupil premium (PP), and high-achieving students (HAP), meet their projected ALPS grade. The Psychology department diligently tracks and monitors student progress through regular assessments, enabling effective support measures such as parent communication or targeted intervention efforts as needed.

Career Development

- AQA A-Level Psychology extends beyond the academic, technical or vocational. It provides for learners' broader development, enabling them to develop and discover their interests and talents in a broad range of topics that cover bio-psycho-social aspects of topics such as development psychology, social psychology, clinical psychology etc.
- The AQA A-Level Psychology curriculum and our wider work support learners to develop their character – including their resilience, confidence and independence – and help them know how to keep physically and mentally healthy. This is done through class discussions, tests, quizzes, research homeworks and 1:1 discussions in lessons with the class teacher.
- At key stage 5, we aim to prepare learners for future success in their next steps. This is supported through work experiences, UCAS applications and UCAS references.
- We aim to prepare learners for life in modern Britain by: equipping them to be responsible, respectful, active citizens who contribute positively to society; developing their understanding of fundamental British values; developing their understanding and appreciation of diversity; celebrating what we have in common and promoting respect for the different protected characteristics as defined in law.

Assessment

The psychology feedback and assessment policy outlines the approaches to assessment, marking and feedback in the Psychology department. It is designed to achieve four main aims:

1. Provide clear and unambiguous guidance to teachers in this subject about:
 - **What** student work should be assessed, marked or used to generate feedback
 - **How** this assessment, marking or feedback should be carried out and organised
2. Specify approaches to assessment, marking and feedback which work best in the context of individual subjects
3. Provide the framework of expectations and best practice through which work sampling and quality assurance work will be carried out
4. Translate the wider school expectations – that assessment, marking and feedback are **manageable, meaningful** and **motivating** – into a subject-specific set of guidelines and approaches
5. **Summary of approaches** - in Psychology, there are several approaches to feedback and assessment which are expected to take place in and outside of lessons. These include:
 1. Class discussion and questioning
 2. Peer and self-assessment
 3. Mid-term assessments
 4. Mini-quizzes in class, e.g. to recall previously taught information
 5. End of topic tests
 6. Formal mock exams / end of year tests
 7. Teacher feedback on practice exam questions / extended writing

There is a centralised file for the mark book. This is/should be used by all staff for all subjects / years within the Sixth Form Subjects. This is designed to;

- Reduce teacher's time in creating their own mark books and recording student marks.
- Promotes dialogue between teachers with shared classes, allows subject leaders and FL to look at 'working at' data which can be useful when supporting students/staff and also be one source of evidence for reflections on teaching and learning within the faculty.

Mid-Term (Formative) Assessment:

- **Pre-learning homeworks**, of core knowledge and vocabulary and the creation and learning of revision materials.
- **Self/peer marked multiple choice tests and mini quizzes** are used across modules and sub-topics to give quick feedback (students to record marks so that teacher can enter onto faculty mark book)
- **Questioning and discussion** – at a whole class, small group and individual level
- **Annotation** of student work / models / exemplars in class
- **Extensive use of models** and **explicit teaching of AOs/command words** for the purpose of improving students knowledge of course requirements and to allow them to compare with their own work.
- **A range of practice timed exam questions** to be built into lessons / set as homework with whole class feedback given on key areas of strength and development, followed up with specific feedback lessons that focus on the re-teaching of either knowledge or skills. For example, per topic students will do a longer essay (8/16 marker essay, short answer essays and a set of multiple choice quizzes as per the exam).
- **Peer and self assessment** alongside models and criteria
- **Explicit teaching of revision techniques** including revision cards, mind maps and essay planning
- **Folder checks** completed once every 2 terms.

End of Unit (Summative) Assessment:

- **End of topic test**, which is teacher marked (using subject specific standardised feedback sheets) with feedback lesson to focus on progress needed when the topic is revisited in end of key stage tests
- **Use of walking talking mocks** used within lessons to develop and model exam skills
- **Effective revision techniques** and writing revision cards will be **modelled** by teachers to enable all students to access these tests
- **Mock exams** students to be issued with specific guidance prior to the mocks. All mocks to be teacher marked and have a follow up lesson to address key areas of development.

Further notes

How do we ensure that approaches are motivating for students?

- Students will be praised using the schools reward system for excellent effort.
- The focus in feedback lessons will be on improved understanding and knowledge and developing exam and writing skills.
- Marks will never be returned to a class without the class being shown how to address problems that have been revealed.
- Assessments will be designed to develop skills rather than find them lacking, eg lower groups will be supported through annotation, modelling and walking talking approaches to build skills and confidence.
- At key stage 3 revision techniques and the skills required to successfully complete tests will be taught during lessons early in the year, so that no student is disadvantaged. In this way students will build the skills needed to do revision homework tasks later in the year.
- Standardised feedback sheets will be available at KS4 and KS5 to help students focus on areas where they are lacking in knowledge and skill during the feedback lesson.

How do we ensure that approaches are manageable for teachers?

- Notes written in class and general activities in books will not be teacher marked but feedback will be given as a result of selected student exam answers and knowledge test results
- Feedback will focus on moving forward student progress and feedback lessons will be clearly identified in student books
- Teachers will use time previously given to writing comments in books to assess knowledge, understanding and application where students may not be able to accurately assess themselves or each other. An effective feedback lesson will be planned to address the issues that arise from this marking.
- Time will be released by not writing on books so that effective feedback lessons can be planned and carried out. Teaching time will be used to give these feedback lessons, and time will be more effectively managed in these sessions by stressing improved knowledge and understanding rather than traffic lighting

How do we ensure that homework is manageable, meaningful and motivating?

- At key stage 5 homework will include answering questions that develop exam skills, revision of content for mid-term tests, or creation of revision materials (with clear instruction by the teacher).
- For V/PP key stage 5 students revision guides or course textbooks will be provided to support completion of homework.

Enrichment Opportunities & Super Curricular

What trips, subscriptions or Heads Challenge Curriculum will you plan to deliver to enrich the curriculum and take students beyond the classroom in their learning. When do these take place in the year and how do they link to programmes of study?

- We aim to plan a trip once a year for all psychology students. An example of such trips would include a 'Psychology in Action' conference. Psychology in Action is a wide-ranging programme examining the theories and applications of psychology in the modern world! The engaging sessions throughout the day aim to help students realise their potential and discover the impact they can have on the world. Students will hear from renowned speakers from academia and industry which then is also complemented by a special session on examination success.
- We have subscribed to Psychology Review - Each annual volume includes relevant resources, materials and articles with a range of up to date psychological research.

Commitment to Equality, Diversity & Inclusion

How do you as a department consider equality, diversity and inclusion within your subject?

To help on our curriculum policy is the below:

We seek to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. The Curriculum is a key way of meeting these objectives. It has been designed to meet the needs of each individual student, providing opportunities which stretch and excite. Homework should be set to meet these goals in delivering a challenging curriculum. This should be designed by each department to further deepen and broaden the knowledge and skill set of its students. All homework should be set on Google Classroom and is regularly checked by the Head of Department.

Year	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6

---	--	---	---	--

Examples Stretch and Challenge and Reading is provided for each module above in the table.

Homeworks are set according to the needs of the class. They are in line with the psychology department HW policy. HWs are a combination of revision, making of revision resources, answering practice questions, completing activities in relation to the subtopic. Specific consolidation work is also set weekly from their consolidation booklet.

British Values in Psychology

Respect civil and criminal law

- To understand the Mental Health Act and how this protects individuals diagnosed with mental health conditions and how the Act indirectly protects members of society

Appreciate viewpoints of others on ethical issues

- Understanding the issues of using animals in research – how this impacts society for the greater good
- Having an awareness of ethical issues such as socially sensitive research and how measures need to be taken to ensure this is handled appropriately

- Understanding the ethical issues surrounding the diagnosis and treatment of abnormality - dealing with the associated stigma attached to both aspects

Acceptance and engagement with fundamental British Values of democracy

- Respecting theories and concepts put forward to explain human behaviour - engage in debate to consider these and the possible wider social implications of what they predict
- Understand how Free Will impacts on Deterministic behaviour

Contribute positively to life in modern Britain

- Understanding Socially Acceptable Norms and how deviation from these can upset society
- How Social Change occurs through a minority influence

Pinner High School: Philosophy and Religious Education

KS3: Philosophy and Religion Education (PRE)

KS4: GCSE Religious Studies, Route A, WJEC Eduqas

[Harrow agreed Syllabus](#)

Intent

The PRE curriculum at Pinner High School is designed to engage, inspire and encourage students to learn about different religious and non religious beliefs and practices through a variety of different perspectives and equip students with the knowledge and skill to answer challenging philosophical questions. The PRE curriculum provides students with subject specific knowledge and skills they need in order to progress throughout their learning journey whilst giving students the opportunity to build and develop an awareness of their own presuppositions and values.

PRE lessons will reflect the key teachings and practices of the 6 main world religions and prominent religions in the local community such as Jainism and Zoroastrianism. Students are encouraged to analyse their own viewpoints or perspective of the world and religious ideas through being taught substantive content that links to world views and British values. PRE enables students to ask deep and meaningful searching questions about their own belief system and where they fit into society. Through critical reasoning, challenging misconceptions and engaging with moral issues in the world today, students will be able to respect the opinions of others and identify the commonalities and differences between us.

Implementation

The PRE curriculum ensures that it follows the Locally Agreed Syllabus for Harrow whereby lessons throughout Key stage 3 and PRE core contain a study of a broad range of beliefs – reflecting the diversity in our student body and local community. Throughout KS3 and PRE core at KS4, each term will have a unit titled with an enquiry question to focus on. The investigation of the enquiry question implements the principle aim of PRE, which is to engage purposes of systematic enquiry into significant human questions which religion and worldviews address. In doing so, students can develop the understanding and skills needed to appreciate and appraise varied responses to these questions, as well as develop responses of their own.

At Key Stage 3, students are introduced to fundamental knowledge about belief systems; how they originate, how beliefs are practised locally and worldwide and the impact they have on an individual's identity. The diverse curriculum will encourage students to develop a sense of connectedness and responsibility. To facilitate this, students will reflect on religious literature, analyse religious sources and assess the similarities and differences between religious and non religious responses to philosophical and ethical questions. At KS4, students will be able to build on their understanding of world views and begin assessing deeper issues in religion such as miracles, the existence of God and ethical moral dilemmas. Alongside the joint vision across the school, PRE aims to deliver an ambitious and challenging curriculum that

enables all groups of students to make progress and achieve their best. This is done by building upon prior knowledge across all key stages and giving students a thorough understanding of religion and world views in the past, present, and how views may develop in the future.

Impact

In PRE, our intent is for the curriculum to promote a curiosity about philosophical, religious and ethical matters and shape their views about topical issues based on reliable and informative sources. Through a mixture of high quality lessons, listening to external speakers and research projects, students will be able to broaden their mind and understand different perspectives of philosophical, religious and ethical issues.

The curriculum is designed with the intention for students to become well rounded individuals who are able to tolerate and respect a variety of viewpoints. This will be done by students building on their knowledge and making connections between different religious views that have influenced the development of society. Students will achieve their academic potential through analysing a variety of sources and information through different lenses and make well informed judgements as a result. Students will develop skills of teamwork, oral communication, research, debate and logical thinking. At the end of each unit students will be assessed based on a variety of these skills through different activities such as writing a speech or presenting a presentation on a particular topic.

Career Development

Studying Philosophy, Religion, and Ethics equips individuals with a versatile skill set applicable in numerous fields. The ability to think critically, communicate effectively, and navigate complex ethical landscapes is highly valued in various careers, from education and law to business, healthcare, and beyond. Examples of careers in PRE are: Law (lawyer, paralegal, solicitors), Public policy and Government sector (civil servant, public relations officer, policy analyst), Non-profit or NGO's section (programme coordinator, advocate/lobbyist), media and communication (public relations, marketing), research and academia (lecturer, teacher, researcher, archivist), healthcare and bioethics (bioethicists, healthcare administrator) and business and management (human resources manager).

Assessment

How do you assess – what is your departmental feedback and assessment policy.

KS3: One marked piece per term. These vary from whole class feedback to individualised feedback sheets. For each piece of marked work, students are expected to respond and demonstrate their improvement in green pen. We also make frequent use of peer and self-assessment.

KS4: Two marked pieces per half term. These vary from whole class feedback to individualised feedback sheets. For each piece of marked work, students are expected to respond and demonstrate their improvement in green pen. We also make frequent use of peer and self-assessment.

Enrichment Opportunities & Super Curricular

Stand up workshops, Solutions not sides workshops, trips to university open days in Philosophy, religion and ethics, visits to local places of worship

Commitment to Equality, Diversity & Inclusion

PRE seeks to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. The Curriculum has been designed to meet the needs of each individual student, providing opportunities which stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. Homework should be set to meet these goals in delivering a challenging curriculum. This should be designed by each department to further deepen and broaden the knowledge and skill set of its students. All homework should be set on Google Classroom and is regularly checked by the Head of Department.

	Autumn: Symbols	Spring: Inspirational Leaders	Summer: Religion in my local community
Year 7	<p>Enquiry question: How are symbols used in religion?</p> <p>Aims: This unit deepens students' understanding of the six major world religions by exploring key beliefs and practices through symbolism. Students will study how religious symbols are expressed and how they have evolved over time. Through comparative study, students will examine both the unique and shared aspects of religious symbolism across different faiths.</p>	<p>Enquiry question: What makes someone an inspirational leader?</p> <p>Aims: To consider what it means to be a leader. This term students will look at the leadership of religious founders and leaders who are regarded as inspirational in society. Students will learn about how laws and human rights in society have developed over time due to campaigns fought by religious and non-religious leaders.</p>	<p>Enquiry question: How do religions practise their faith in the local community?</p> <p>Aims: To identify how the 6 main religions worship and look at how religions in the local community practice their faith through worship and celebrating festivals. Students will begin to understand what rights religious communities have to worship in line with British Values and analyse what this looks like in a pluralist society.</p>
	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Introduction to symbols 2. Symbols used in early Christianity 3. The importance of the Star of David 4. Symbolism in Islam 5. How are Symbols used in Hinduism? 6. Mid-term assessment 7. Feedback 8. What does the eightfold path symbolise? 9. What do the 5 K's represent in Sikhism? 10. Mid-term knowledge check quiz 8. Feedback 9. Jainism 10. Zoroastrianism 11. Baha'i faith. 12. Pluralism and Secularism
	<p>Assessment: Students complete a mid-term knowledge check assessment and an end of unit formal piece of writing assessment. Throughout the term students will receive verbal feedback throughout lessons.</p>		
	<p>Homework: 6 pieces of homework completed within a term. This includes research tasks, comprehension, flip learning tasks and formal writing tasks.</p>		
	<p>Stretch and Challenge: Comparative analysis tasks, extended writing tasks, independent research projects, creative expression with evaluation, role play, presentations and speeches. Critical source evaluation.</p>		

	<p>Reading: <i>What Do You Believe?</i> – DK Publishing, <i>Usborne Encyclopaedia of World Religions</i> – Susan Meredith, <i>Martin Luther King Jr.: A Dream of Hope</i> – Alice Fleming, <i>Malala Yousafzai: Warrior with Words</i> – Karen Leggett Abouraya,</p>		
	Autumn: Religious and Philosophical Stories	Spring: Ethics and Morality	Summer: Faith in Action
Year 8	<p>Enquiry question: What are the stories that shape us?</p> <p>Aims: This unit explores the power of stories in religious and philosophical traditions, highlighting their role in shaping beliefs, values, and identity. Students will analyse key moral and metaphysical questions, interpret diverse narratives, and reflect on how these stories influence culture and ethics.</p>	<p>Enquiry question: How do we know how to be moral?</p> <p>Aims: Throughout this module, students consider the question, 'how do we know how to be moral?' Students study a range of different ethical viewpoints, with the aim of introducing students to ethical thinking and developing student debating and analysis skills.</p>	<p>Enquiry question: How do religious believers show their faith in action?</p> <p>Aims: This unit explores how both religious and non-religious beliefs inspire individuals to take action in the world. Students will examine key figures, teachings, and movements that reflect 'faith in action'. They will reflect on personal values, key life moments, and rites of passage, developing and understanding of diverse perspectives.</p>
	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Introduction: Why stories matter 2. The Good Samaritan 3. The two wolves 4. The Buddha and the mustard seed 5. Analysing human behaviour part 2 11. Assessment 12. Suffering for a cause 	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Introduction to human rights 2. Xenophobia 3. Social Justice 4. Social Justice activists 5. Enquiry question 6. Religious responses to Human Rights 7. The role of women in worship 8. Wealth and poverty 9. Censorship 10. Freedom of speech Vs discrimination 11. Islamophobia and Anti-Semitism 12. Stand up to Discrimination workshop 	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Atheism 2. Humanism 3. Conspiracy theories and Illuminati 4. Introduction to Scientology 5. Amish communities 6. Mormonism 7. Jehovah witness 8. Knowledge check quiz 9. Rastafarianism 10. Paganism 11. What is a cult?

			12. What is the difference between cults and religions?
	Autumn: Ethics and Morality	Spring: Application of Ethical Theories to Issues of Life and Death	Summer: Key thinkers in Philosophy
Year 10 Core	<p>Enquiry question: What ethical theories have influenced morality?</p> <p>Aims: To gain an understanding of ethical discussion. Students study a range of ethical theories and consider how ethics affects daily life, not only in making decisions about actions but in making judgments about others, giving advice and developing good character to live a good life.</p>	<p>Enquiry question: How do ethical theories respond to issues of life and death?</p> <p>Aim: Students will apply the key teachings of ethical theories they have learned in Term 1 to issues of life and death. In doing so, students will analyse and evaluate different case studies to form a judgement on whether each ethical theory would justify the ethical issue being taught as acceptable. Students will also form their own decision.</p>	<p>Enquiry question: Who are the key thinkers in Philosophy that have a modern influence?</p> <p>Aim: Students will explore ethical theories and key philosophers who have influenced modern thought. They will develop critical thinking and discussion skills, gaining insight into how philosophy shapes society and governance, while deepening their understanding of moral ideas and differing worldviews.</p>
	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Introduction to Normative Ethics 2. Aristotle and values 3. Natural Moral Law 4. Utilitarianism 5. Application of ethical theories. 6. End of unit knowledge check quiz 	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Introduction 2. Capital Punishment 3. Quality of life 4. Euthanasia 5. Prolife Vs Pro choice 6. End of Unit knowledge check quiz 	<p>Lesson / content overview</p> <ol style="list-style-type: none"> 1. Introduction to Philosophy 2. Kantian Ethics 3. 	Autumn: Science, Religion and Ethics	Spring: Religion and Society	Summer
Year 11 Core	<p>Enquiry question: What are the ethical issues surrounding religion and science?</p> <p>Aim: An introduction to issues of scientific development and medical ethics that question the relevance of key religious teachings. Students will look at a variety of different reasoning and</p>	<p>Enquiry question: How has the role of religion in society changed over time?</p> <p>Aims: This scheme of work introduces Year 10 students to sociological perspectives on religion, exploring its role in society, social change, and secularisation. It develops critical thinking, ethical</p>	<i>Students on study leave</i>

	<p>arguments to form a judgement as to whether such issues could ever be accepted by religious believers.</p>	<p>discussion, and evaluative skills through interactive tasks and real-world examples. Students reflect on belief systems, ideologies, and religion's influence on identity and culture.</p>	
	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. Introduction to religion, situation and medical ethics. 2. Cloning / genetic engineering 3. Issues surrounding IVF 4. Organ transplants 5. Animal experiments (group work/different arguments) 6. Medical ethics in theocracy countries 	<p>Lesson / Content Overview:</p> <ol style="list-style-type: none"> 1. What is religion? 2. Religion and society- functionalism 3. Religion and conflict - Marxism and Feminism 4. Secularisation- Is Religion in decline? 5. Religion and social change- religion as a force for change 6. Knowledge check quiz 	
	<p>Autumn: Christianity Beliefs and Teachings</p>	<p>Spring: Christianity practices</p>	<p>Summer: Islam Beliefs, Teachings and Practices</p>
<p>Year 9 GCSE</p>	<p>Aims: This module introduces students to key Christian beliefs and teachings. Students consider key biblical teachings and the core beliefs that form Christianity.</p>	<p>Aims: This module builds on student knowledge of Christian beliefs and teachings, and focuses on how Christians practise their religion. It also allows students to consider diversity within Christian practices.</p>	<p>Aims: This module builds on student knowledge of Muslim beliefs and teachings, and focuses on how Muslims practise their religion. It also allows students to consider diversity within Muslim practices.</p>
	<p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Genesis and creation - Nature of God - Problem of Evil and Suffering - Trinity - Importance of Jesus: Incarnation, Crucifixion, Resurrection, Ascension - The afterlife: Judgement day, Heaven and Hell - Sin and Salvation 	<p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Worship - Prayer - Sacraments: Baptism and Eucharist - Festivals: Christmas and Easter - Pilgrimage - Religious persecution - Reconciliation and atonement - Divine law: The Bible. 	<p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Nature of God - Holy books - Prophethood - Angels - Afterlife - 5 pillars - Festivals: Eid ul Adha and Eid ul Fitr - Jihad - 10 obligatory acts

	<p>Assessment: Students will be set 1 piece of homework every week. This includes research tasks, comprehension, flip learning tasks, extended reading tasks or exam questions. Each term students will have a mid-topic knowledge check quiz, a skills test (practising A01 or A02 exam questions) and an end of unit assessment (exam paper).</p> <p>Homework: Students will be set 1 piece of homework every week. This includes research tasks, comprehension, flip learning tasks, extended reading tasks or exam questions.</p> <p>Reading: My Life, My Religion: Christianity by Cath Senker (suitable for visual learners), My Life, My Religion: Islam by Ruqaiya Haris, The Case for Christ (Student Edition) by Lee Strobel, Does My Head Look Big in This? by Randa Abdel-Fattah, Muhammad: His Life Based on the Earliest Sources (abridged for teens) by Martin Lings, The God Debate by John Humphrys</p>		
	<p>Autumn: Issues in Relationships</p> <p>Spring: Issues of Good and Evil</p> <p>Summer: Issues of Life and Death</p>		
Year 10 GCSE	<p>Aims: This module considers a range of issues within relationships and the diversity of viewpoints towards these. Students focus in particular on diversity within Christianity and Islam.</p> <p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Nature and purpose of families - Roles and responsibilities - Nature and purpose of marriage - Divorce, separation and remarriage - Cohabitation - Purpose of sex - Contraception - Gender roles and gender equality 	<p>Aims: Students consider what morality is and a range of issues within this, such as how to make moral decisions, what evil and suffering is and a range of views and aspects on the justice system.</p> <p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Morality - Crime - Aims of punishment - Utilitarianism - Death penalty - Prisons - Good, evil and suffering - Forgiveness 	<p>Aims: In 'issues of life and death', students explore a range of ethical issues relating to both how the world was created, the origins of life and the afterlife.</p> <p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Origin and value of creation - Intelligent design theories - Stewardship - Sanctity of life and quality of life - Euthanasia (right to die debate) - Abortion (pro-choice vs pro-life) - The soul - Death and the afterlife
	<p>Assessment: Students will be set 1 piece of homework every week. This includes research tasks, comprehension, flip learning tasks, extended reading tasks or exam questions.</p> <p>Homework: Students will be set 1 piece of homework every week. This includes research tasks, comprehension, flip learning tasks, extended reading tasks or exam questions.</p> <p>Reading: The Giver by Lois Lowry, Of Mice and Men by John Steinbeck, Noughts and Crosses by Malorie Blackman, To Kill a Mockingbird by Harper Lee, The Kite Runner by Khalid Husseini, The Handmaid's Tale by Margaret Atwood, Respecting Religious Diversity by Louise Spilsbury</p>		

	Autumn 1: Christianity Revision	Autumn 2: Islam Revision	Spring 1: Issues of Human Rights	Spring 2: Ethics and Philosophy Revision
Year 11 GCSE	<p>Aims: A review and consolidation of all topics studied in Christianity and Islam. Applying reviewed knowledge to exam questions to ensure students are prepared for their mock exams which will take place at the end of the Autumn term.</p>	<p>Aims: Students consider a range of topics relating to human rights, ethical issues that relate to all our rights and freedoms.</p>	<p>Aims: A review and consolidation of all topics studied in Ethics and Philosophy. Applying reviewed knowledge to exam questions to ensure students are prepared for their first PRE exam which will be the Ethics and Philosophy paper.</p>	
	<p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Christianity beliefs and teachings - Christianity Practices - Islam beliefs and teachings - Islam practices 	<p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Human Rights and Social Justice - Personal Conviction - Censorship - Prejudice and discrimination - Racism - Religious expression and religious extremism - Wealth and Poverty - Women in Worship 	<p>Lesson / Content Overview:</p> <ul style="list-style-type: none"> - Issues of Relationships - Issues of Good and Evil - Issues of Life and Death - Issues of Human Rights 	

Curriculum Overview: SOCIOLOGY

KS5: Sociology A Level AQA (7192)

INTENT

Our Sociology curriculum aims to develop students' understanding of the world and enhance their critical thinking abilities. It covers key concepts such as social structures, inequality, power dynamics, socialisation, culture, and research methods. The curriculum is designed to be inclusive, encouraging students to engage in theoretical debates and actively participate in research processes.

Moreover, the Sociology curriculum fosters interdisciplinary connections, linking the prior knowledge and skills developed in the social sciences and humanities to a wider range of subjects. For example, students explore topics related to capitalism and hierarchy as they did in GCSE English, the beliefs in society unit links to core principles studied in RE, childhood differences through a Historical lens, and demographic changes and globalisation which are pertinent discussions in Geography.

Regardless of students' prior exposure to Sociology, our curriculum aims to facilitate progress and raise attainment levels throughout the A-Level course. It places a strong emphasis on teaching literacy and some numeracy skills within the context of Sociology. Additionally, the curriculum promotes an understanding of British values, cultivating respect and tolerance for individuals from diverse social and cultural backgrounds.

To ensure that all student groups can progress to their full potential in Sociology, specific measures are implemented. High-achieving students (HAP) are provided with extra-curricular resources and inquiry-based learning activities throughout the A-Level course. Students with special educational needs (SEND) receive educational access arrangements, such as laptops, extra time, and access to lesson materials in advance. Differentiated work within the lessons also helps reduce cognitive load for SEND students. Students eligible for pupil premium (PP) engage in conversations about how cultural capital enriches their learning experience and academic achievement. The department also provides physical resources and financial considerations for attended trips to support PP students.

Aligned with the school's intent of inspiring learning, our Sociology curriculum aims to spark students' curiosity, nurture their aspirations, and provide pathways to further education and career options. Past students who have completed the course have pursued Social Sciences at university and discovered the wide range of career opportunities available in multiple areas, including teaching, social work, civil service, charities, the criminal justice system, and social policy work.

IMPLEMENTATION

In Sociology, we ensure the implementation of our aims through the delivery of engaging and differentiated lessons, employing various teaching strategies such as scaffolding, modelling and effective questioning techniques.

To go beyond the national curriculum, our Sociology curriculum incorporates additional topics, current events, and real-world applications. Students explore recent social policy changes and contemporary case studies in areas such as Education, Families, Beliefs, and Crime. They are also encouraged to read books that have connections across units, such as Akala's "Natives," which delves into themes of ethnicity, social class, education, and societal power structures.

Success in Sociology is achieved when students can critically and theoretically engage with the world. Our spiral curriculum, which includes spaced practice and retrieval practice, revisits previous knowledge and reinforces key concepts. The curriculum is structured around two core themes: 1) socialisation, culture, and identity, and 2) social differentiation, power, and stratification. These themes align with the consensus and conflict, structure, and action approaches to society, which form the foundation of each lesson.

To promote long-term retention, our curriculum incorporates opportunities for interleaving, allowing students to revisit and connect previously learned topics. Furthermore, exam question practice for Paper 2 explicitly requires interleaving of topics and synoptic links, this is due to the 10mark essays linking two separate topics together. Retrieval activities are included as starter activities, during summary lessons, and during revision practice.

Independent learning is emphasised through flipped learning homework activities, research projects, and encouraging students to explore sociological resources outside the classroom. Homework booklets provide a range of activities, including reading-based, audio-based, visual-based, and action-based tasks for students to engage with during each unit. The Sociology department assigns regular homework through Google Classroom, including one consolidation task and one flipped learning homework activity per week. Furthermore, the department utilises the behaviour policy to foster a conducive environment for excellent behaviour and optimal learning within the department.

We foster literacy development through challenging reading materials, discussions, and opportunities for oracy through presentations, debates, and group work.

To address misconceptions, we employ formative assessment strategies, including class discussions, individual feedback, and targeted interventions.

Subject expertise is shared through regular cross-departmental collaboration, particularly with the Psychology and PRE departments. We engage in sharing best practices and continuous professional development (CPD) opportunities to enhance our collective knowledge and expertise.

IMPACT

At the culmination of each Sociology unit, students are expected to exhibit a reflective comprehension of key sociological concepts, engage in critical analysis of social phenomena, and effectively employ research methods.

Assessment plays a crucial role in identifying misconceptions and providing timely feedback to students across the department. Formative assessment strategies, including quizzes, essays, and projects, are utilised to gauge student progress. Our aim is to ensure that students, including those with special educational needs (SEND), those eligible for pupil premium (PP), and high-achieving students (HAP), meet their projected ALPS grade. The Sociology department diligently tracks and monitors student progress through regular assessments, allowing for effective support measures such as communication with parents or targeted intervention work when necessary.

To guarantee the quality assurance of our Sociology curriculum, we conduct learning walks, book looks, classroom observations, and data analysis. These practices facilitate continuous improvement and ensure alignment with departmental goals. Additionally, the Sociology department places significant emphasis on providing detailed feedback to foster a rich dialogue, both orally and in written form, between teachers and students.

We celebrate student achievements through the Sociology "Hall of Fame" displays, which showcase model answers and award prizes within the classroom.

The impact of learning extends beyond assessment results and is measured by students' engagement in extracurricular activities, their ability to apply sociological concepts to real-world situations, and their preparedness for further study or career pathways. These indicators demonstrate the broader impact of our curriculum on students' overall growth and readiness for future endeavours.

Career Development

Students can find out about future careers through AQA website links, The Sociology Journal and Google Classroom resources.

Careers in Sociology include: teaching, social work, law, policing, criminal justice, advertising, human resources, charity organisations, civil service, policy researcher, youth worker, market research analyse, journalism, lawyer and police officer.

Career Pilot: <https://www.careerpilot.org.uk/job-sectors/subject/sociology>

UCAS Subject Guides: <https://www.ucas.com/explore/search/subject-guides?query=>

Prospects Sociology: <https://www.prospects.ac.uk/careers-advice/what-can-i-do-with-my-degree/sociology>

Social Science related degree choices include: Sociology, Psychology, Social Studies, Anthropology, Criminology, Law, Philosophy, Marketing, Game Design, Teaching, Archeaology, Midwifery, Food Science, Media Studies, Politics, Geography, Economics, Classical Studies, Nursing and History.

Assessment

Formative assessments are carried out throughout the course of the A Level through quizzes, practice exam questions, mini-plenaries and consolidation activities.

Feedback is provided verbally and in written form throughout the course of lessons, alongside regular exam questions at the end of each sub-topic within a unit.

Exam questions are self or peer assessed and marked within two weeks of completion.

Summative assessment consists of 3 2hour exams in the summer term totalling 240marks.

Standardise and moderate work the department to ensure best assessment practice.

Use of shared assessment tracking spreadsheets to ensure that projected grades remain accurate.

Teacher assessed work is marked in purple pen, whilst self and green assessment is undertaken in red, green or blue pen.

Enrichment Opportunities & Super Curricular

Education – Harrow School

Families and Households – Museum of Childhood

Crime and Deviance – Supreme Court Beliefs in Society – Wellcome Collection

For the unit of Theory and Methods the students will conduct observations in the school, alongside visiting another sixth form where students will conduct semi-structured group interviews.

Commitment to Equality, Diversity & Inclusion

The Sociology department ensures equality, diversity and inclusion when discussing various changing social and political areas such as gender identity or ethnic differences. Multifaceted topics such as intersectionality provide a depth of understanding when exploring social characteristics.

Sensitive topics such as domestic violence or suicide are addressed in a manner that encourages gentle conversation with an opportunity for discussion thereafter.

There is consistent breadth and challenge when exploring relevant social issues that are affecting students in today's world and the future that is to come, for instance when discussing if eating meat will be considered deviant in the future.

Autumn Term

Spring Term

Summer Term

Year 1 2	Unit Title: Education		Unit Title: Families and Households		Unit Title: Theory and Methods	
	Specification: The role and functions of the education system, including its relationship to the economy and to class structure. A Level Sociology - Learning Map

Brief: An examination of the British education system and its fairness, past and present.

specification:

- The role and functions of the education system, including its relationship to the economy and to class structure
- Differential educational achievement of social groups by social class, gender and ethnicity in contemporary society
- Relationships and processes within schools, with particular reference to teacher/pupil relationships, pupil identities and subcultures, the hidden curriculum, and the organisation of teaching and learning
- The significance of educational policies, including policies of selection, marketisation and privatisation, and policies to achieve greater equality of opportunity or outcome, for an understanding of the structure, role, impact and experience of and access to education; the impact of globalisation on educational policy.

Assessment Objectives

- **AO1:** Demonstrate knowledge and understanding of sociological theories, concepts and evidence
- **AO2:** Apply sociological theories, concepts, evidence and research methods to a range of issues
- **AO3:** Analyse and evaluate sociological theories, concepts, evidence and research methods in order to: present arguments, make judgements and draw conclusions.

Timing (lessons)	Title and Objectives	Key Words and Key Studies	Pages	HW	Formative Assessment
1	What is Sociology? To understand the purpose of why sociology is an important social science.	<ul style="list-style-type: none">• Norms• Values• Social Institutions• Structural• Social Action• Conflict• Consensus			Baseline Test: Item comprehension and definition questions. (30 marks)

2	<p>Introduction To Education</p> <p>To understand the different types of schools in the UK.</p> <p>To understand different education policies and how it can affect students.</p>	<ul style="list-style-type: none"> • Grammar • Independent • Academy • Comprehensive • Britishness 	TC: 1-2		
3-4	<p>Theoretical Perspectives - Functionalism</p> <p>To investigate the Functionalist view of education.</p> <p>To evaluate the Functionalist view.</p>	<ul style="list-style-type: none"> • Social Solidarity and Specialist Skills - Durkheim • Standards, Status and Meritocracy - Parsons • Role Allocation - Davis and Moore • Human Capital - Blau and Duncan 	T: 67-68 TC: 3-6	1	<p>Define the term 'meritocracy'. (2 marks)</p> <p>Outline and explain two roles that education fulfils according to functionalists. (10 marks)</p>
5	<p>Theoretical Perspectives - New Right</p> <p>To investigate the New Right view of education.</p> <p>To evaluate the New Right view.</p>	<ul style="list-style-type: none"> • State-Run Education - Chubb and Moe 	T: 69-70 TC: 6-8	3	<p>Outline three ways in which the organisation of schooling may socialise students. (6 marks)</p>
6-8	<p>Theoretical Perspectives - Marxism</p> <p>To investigate the Marxist view of education.</p> <p>To investigate the Neo-Marxist view of education.</p> <p>To evaluate the Marxist and Neo-Marxist view.</p>	<ul style="list-style-type: none"> • ISA and RSA - Althusser • Correspondence Principle, Hidden Curriculum and Meritocracy - Bowles and Gintis • Learning To Labour - Willis 	T: 70-74 TC: 9-13	2	<p>Outline and evaluate the Marxist perspective on the role of education. (6 marks)</p> <p>Identify one similarity and one difference between the Marxist perspective and the New Right perspective on the role of education. (6 marks)</p> <p>Item A - Some sociologists claim that education reproduces and legitimises social class inequality. They argue that it operates in the interests of the ruling class, preparing</p>

					working-class pupils for working-class jobs and justifying this outcome as fair. Other sociologists disagree. They claim that education offers all pupils an equal opportunity to succeed.
					Applying material from Item A and your knowledge, evaluate the view that 'education reproduces and legitimises social class inequality'. [20 marks]
9	<p>Theoretical Perspectives - Postmodernism</p> <p>To investigate the Postmodernist view of education.</p> <p>To evaluate the Postmodernist view of education.</p>	<ul style="list-style-type: none"> Intersectionality - Morrow and Torres Adult Education - Usher, Bryant and Johnson Post-Fordism 	T: 74	4	
10	<p>Theoretical Perspectives - Topic Summary</p>	<p>Outline three ways in which the characteristics of schools may be similar to the box characteristics of workplaces. (2019)</p> <ul style="list-style-type: none"> Outline box three functions that the education system performs for society. (2020) <p>Item A:</p> <p>According to Marx, capitalism is based on the ownership of the means of production by a wealthy minority. Capitalism continues to exist because each new generation of workers is forced to undertake low-paid, alienating work to survive. This makes capitalism potentially unstable, since it depends on the proletariat not seeking to overthrow this unequal system.</p>		5	<p>Item A</p> <p>Sociologists agree that education transmits ideas and values. However, they disagree about the nature of these ideas and values, and who benefits from this process. For example, feminists argue that education transmits patriarchal ideology, and that this benefits them. Other sociologists argue that the education system has become fragmented and transmits a diverse range of ideas and values.</p> <p>Applying material from Item A and your knowledge, evaluate sociological explanations of the role of education in transmitting ideas and values. [30 marks]</p>

		<p>Applying material from Item A, analyse two ways in which the education system might serve the needs of capitalism. (2018)</p> <p>Item B:</p> <p>Sociologists agree that education transmits ideas and values. However, they disagree about the nature of these ideas and values, and who benefits from this process. For example, feminists argue that education transmits patriarchal ideology, and that this benefits men. Other sociologists argue that the education system has become fragmented and transmits a diverse range of ideas and values.</p> <p>Applying material from Item B and your knowledge, evaluate sociological explanations of the role of education in transmitting ideas and values. (2017)</p>		
11-14	<p>Social Class and Achievement - External Factors</p> <p>To explore some of the ways how social class can impact differential achievement.</p> <p>To explore the material explanations for differential educational achievement.</p> <p>To understand and explain cultural explanations and cultural deprivation theory.</p> <p>To evaluate cultural deprivation theory.</p>	<ul style="list-style-type: none"> • Cultural Deprivation: Language/Speech Codes - Bernstein • Cultural Deprivation: Parent's Education - Douglas • Cultural Deprivation: Working Class Subculture - Sugarman • Material Deprivation: Housing, Diet and Health - Howard • Material Deprivation: Financial- Bull • Material Deprivation: Fear of Debt- Callendar and Jackson; UCAS • Cultural Capital: 3 Types of Capital - Bourdieu 	<p>T: 16-25</p> <p>TC: 17-20</p>	<p>6</p> <p>Define the term 'immediate gratification'. (2marks)</p> <p>Using one example, briefly explain how the restricted speech code may lead to underachievement. (2marks)</p> <p>Outline three ways in which housing may affect achievement. (6marks)</p> <p>Item B - In general, middle-class pupils achieve better examination results than working-class pupils, many of whom are in receipt of free school meals. According to Feinstein, as early as 22months, working-class children are already lagging behind middle-class children in their intellectual development. Many of these children have parents who also underachieved at school.</p> <p>Applying material from Item B, analyse two factors outside schools that contribute</p>

	To explore and evaluate the impact of cultural capital on educational achievement.			to working-class underachievement. (10 marks)	
15-17	<p>Social Class and Achievement - Internal Factors</p> <p>To explore internal factors for social class differences in education.</p> <p>To understand and explain the concept of labelling and the self-fulfilling prophecy.</p> <p>To evaluate labelling and the self-fulfilling prophecy.</p> <p>To understand and explain the impact of setting and streaming on pupils' educational achievement.</p> <p>To investigate the various subcultural responses to schooling.</p> <p>To understand how identity is linked to differential achievement.</p>	<ul style="list-style-type: none"> • Labelling - Becker; Hempel-Jorgensen • Self-Fulfilling Prophecies - Rosenthal and Jacobsen • Streaming - Becker; Douglas; Gillborn and Youdell • Pupil Subcultures - Lacey • Pro-School and Anti-School - Lacey; Hargreaves • Abolishing Streaming - Ball • Pupil Responses - Woods; Furlong • Habitus - Bourdieu • Symbolic Capital and Violence - Bourdieu; Archer • Nike Identities - Archer • Educational Success - Ingram; McGuire • Self Exclusion - Bourdieu; Evans 	T: 26-35 TC: 20-22	7 and 8	<p>Define the term 'educational triage'. (2 marks)</p> <p>Outline three ways in which pupils may respond to labelling and streaming. (6 marks)</p> <p>Item A There are major social class differences in educational achievement and some sociologists argue that these are the result of internal factors and processes within schools. These include teacher labelling, the self-fulfilling prophecy, streaming and the creation of pupil subcultures. However, other sociologists claim that factors outside the school, such as parental attitudes and parental income, are the main causes of working-class underachievement.</p> <p>Applying material from Item A and your knowledge, evaluate the view that social class differences in achievement are the result of what goes on within schools. (30 marks)</p> <p>Applying material from Item A and your knowledge, evaluate the claim that factors outside the school are the main cause of working-class underachievement. (30 marks)</p>

18	<p>Social Class and Achievement - Topic Summary</p>	<p>Outline two factors external to schools that may affect social class differences in educational achievement. (2020)</p> <p>Item A: Some sociologists suggest that pupils of different social classes have different experiences in schools. The curriculum may place a higher value on middle-class cultural capital and place some pupils at a disadvantage. Both teacher-pupil relationships and interactions within peer groups are likely to affect how pupils of different social classes see themselves.</p> <p>Applying material from Item A, analyse two ways in which processes within schools may affect pupils' identities. (2019)</p> <p>Item B: Social class differences in achievement are found at all stages of the education system and sociologists have put forward several explanations for these differences. Some sociologists focus on factors outside school, such as the material circumstances of pupils' families or the ways in which parents socialise their children. Other sociologists see factors internal to the education system itself as responsible. However, it can be argued that it is the interaction between these external and internal factors that produces class differences in educational achievement.</p> <p>Applying material from Item B and your knowledge, evaluate sociological explanations of social class differences in educational achievement. (2018)</p>	9	
19-20	<p>Ethnicity and Achievement - External Factors</p> <p>To explore external explanations for ethnic</p>	<ul style="list-style-type: none"> • Cultural Deprivation: Linguistic Skills - Gillborn and Mirza • Cultural Deprivation: Attitudes and Values • Cultural Deprivation: Family Structure and Parental Support - Sewell; Lupton 	<p>T: 36-41</p> <p>TC: 28-29</p>	<p>Outline three reasons why some minority ethnic groups underachieve in education (6 marks)</p>

	<p>group differences in education.</p> <p>To evaluate cultural deprivation theory.</p>	<ul style="list-style-type: none"> • Material Deprivation: Does class override ethnicity - Palmer • Racism in Wider Society: Employment - Rex 			
21-22	<p>Ethnicity and Achievement - Internal Factors</p> <p>To explore internal explanations for ethnic differences in education.</p>	<ul style="list-style-type: none"> • Labelling - Gillborn and Youdell • Pupil Identities - Archer • Pupil Responses and Subcultures - Fuller; Mirza; Sewell • Critical Race Theory - Roithmayr • Marketisation and Segregation - Gillborn • Ethnocentric Curriculum • Assessment - Gillborn • Access To Opportunities - Gillborn • New IQism - Gillborn and Youdell 	T: 41-49 TC: 29-32	11 and 12	<p>Item A</p> <p>There are marked ethnic differences in educational achievement. Some minority ethnic groups do much better than others. For example, Indian pupils on average achieve more highly than Pakistanis and Bangladeshis. These differences have an important influence on achievement. Others claim that it is more to do with the material circumstances of different ethnic groups.</p> <p>Applying material from Item A, evaluate the view that ethnic differences in educational achievement are primarily the result of factors outside the school. (30 marks)</p>
23	<p>Ethnicity and Achievement - Topic Summary</p>	<p>Outline two cultural factors that may affect ethnic differences in educational achievement. (2017)</p> <p>Item B: All levels of the education system show differences in achievement between ethnic groups. When explaining these patterns, some sociologists focus on the role of the home and family life in promoting educational achievement for some ethnic groups. However, other sociologists suggest that factors within schools are more important in explaining differences in achievement between ethnic groups.</p> <p>Applying material from Item B and your knowledge, evaluate sociological explanations of differences in educational achievement between ethnic groups. (2019)</p>		13	

24	<p>Gender and Achievement - External Factors - Girls</p> <p>To explore the trends in gender and achievement.</p> <p>To understand the explanations for why females are outperforming males.</p>	<ul style="list-style-type: none"> Impact of Feminism - McRobbie Changes in the Family Changes in Women's Employment Changing Girls' Ambitions - Sharpe 	T: 50-53 TC: 23-25	14	<p>Outline three reasons why girls generally achieve more highly than boys in education. (6 marks)</p>
25	<p>Gender and Achievement - Internal Factors - Girls</p> <p>To understand how the school environment impacts differences in achievement.</p>	<ul style="list-style-type: none"> Equal Opportunities Policies - GIST and National Curriculum Positive Role Models GCSE and Coursework - Mitsos and Browne Teacher Attention - Swann Challenging Stereotypes in the Curriculum - Weiner Selection and League Tables - Slee Symbolic Capital - Archer Hyper-heterosexual Identities Boyfriends/Being Loud Working-Class Girls' Dilemma - Archer 	T: 53-56 TC: 25-27	15 and 16	
26	<p>Gender and Achievement - Internal and External Factors - Boys</p> <p>To understand explanations for why boys are underachieving due to factors outside of school.</p>	<ul style="list-style-type: none"> Feminisation of Education - Sewell Shortage of Male Teachers - YouGov Laddish Subcultures - Epstein Boys and literacy - DCSF Globalisation and Decline of Jobs - Mitsos and Browne Moral Panic About Boys - Ringrose 	T: 57-59	17	<p>Outline and explain two reasons why girls and boys often choose to study different subjects. (10 marks)</p>
27	<p>Gender and Achievement - Subject Choice</p> <p>To understand differences in subject choice.</p>	<ul style="list-style-type: none"> Gender Role Socialisation: Byrne Gendered Subject Images: Kelly Gender identity and Peer Pressure: Dewar Double Standards: Lees The Male Gaze: Mac and Ghail Female Peer Groups: Policing Identity: Archer 	T: 59-65	18	<p>Using one example, briefly explain how the 'moral panic about boys' may affect pupils' experience of schooling. (2 marks)</p> <p>Define the term 'laddish subcultures'. (2 marks)</p>

	To explore how schooling impacts gender identities.				
28	Gender and Achievement - Topic Summary	<p>Outline three ways in which factors within schools may shape gender differences in subject choice. (2017)</p> <ul style="list-style-type: none"> ● <p>Outline three reasons for gender differences in educational achievement. (2018)</p> <p>Item B:</p> <p>The patterns of educational achievement by gender have changed over time. Some sociologists explain these patterns through factors external to schools, such as socialisation and parental attitudes towards education. Changes in wider society, such as employment opportunities, may also contribute to these patterns. However, the way schools are organised and the social interactions that take place within schools are also likely to affect gender differences in educational achievement.</p> <p>Applying material from Item B and your knowledge, evaluate sociological explanations of gender differences in educational achievement. (2020)</p>	19		
29-31	<p>Social Policies and Education - Key Policies</p> <p>To understand the aims of educational policies.</p> <p>To understand and evaluate the tripartite and comprehensive systems.</p>	<ul style="list-style-type: none"> • 1944 - The Butler Education Act • 1965 - Comprehensive System • 1988 - Education Reform Act • 1997-2010 - New Labour Policies • 2010 – 2015 – Coalition Government Policies • 2015 – 2022 - Conservative Policies <p>Government Policies</p>	<p>T: 77-78</p> <p>TC: 38-47</p>	20	<p>Outline two criticisms of the comprehensive school system. (4 marks)</p> <p>Outline two ways in which 'multicultural education' may reduce ethnic differences in achievement. (4)</p>

	<p>To explore the educational changes under the New Labour and Coalition government.</p> <p>To evaluate New Labour and Coalition policies.</p>				Outline and explain the extent to which two educational policies have been meritocratic. (10 marks)
32-33	<p>Social Policies and Education - Policy Impact</p> <p>To explore the impact of selective schooling and admissions on experiences of education.</p> <p>To explore how privatisation and globalisation have impacted experiences of education.</p>	<ul style="list-style-type: none"> • Privatisation - Pollack • Marketisation - Ball; Hall • Globalisation - Molnar, Buckingham and Scanlon, Beder 	<p>T: 78-85</p> <p>TC: 48-51</p>	21	<p>Item B - The education system within contemporary society aims to provide equal opportunities for all students. Some sociologists argue that the transfer of public assets to private companies provides financial resources for local councils who may not be able to develop existing schools. Sociologists have also found that having a shared culture promotes social solidarity. However, other sociologists believe that schools are now being used as a means of commodity.</p> <p>Applying material from Item B and your knowledge, evaluate the claim that globalisation and privatisation policies have created a meritocratic education system. (30)</p>

34	Social Policies and Education - Topic Summary	<p>Outline two reasons why marketisation policies may produce inequality of educational achievement between social classes. (2018)</p> <ul style="list-style-type: none"> Outline two criticisms of schools selecting pupils by ability. (2019) <p>Item A:</p> <p>Since the 1980s, a major aim of government policy has been to increase parental choice in education. There is now a wider range of school types, and league tables on school performance are also publicly available. Increased parental choice has had many effects on pupils' experience of education.</p> <p>Applying material from Item A, analyse two effects of increased parental choice on pupils' experience of education. (2017)</p> <p>Item A:</p> <p>Businesses compete with each other to attract customers. Another route to success for businesses is to provide unique products for their customers. The introduction of marketisation policies into the state education system means that schools are run like businesses.</p> <p>Applying material from Item A, analyse two ways in which marketisation policies have led to schools being run like businesses. (2020)</p>	22	
35-36	Education End of Unit Revision		23	

37	Education End of Unit Test		<p>2021 Past Paper</p> <p>Outline two ways in which globalisation may have had an influence on educational policies in the UK. [4 marks]</p> <p>Outline three reasons why some working-class boys join anti-school subcultures. [6 marks]</p> <p>Item A: Some sociologists claim that the curriculum taught in schools today prioritises some cultures over others. Research also suggests that teacher expectations can be based on stereotypes. Teaching and learning in schools may affect the educational experiences of minority ethnic groups.</p> <p>Applying material from Item A, analyse two ways in which teaching and learning in schools may affect the educational experiences of minority ethnic groups. [10 marks]</p> <p>Item B: Some sociologists, such as functionalists, claim that the education system is based on meritocratic principles and provides all pupils with the opportunity to succeed. Pupils, whatever their background, are objectively assessed through the examination process. Other sociologists claim that meritocracy is a myth. The education system ensures that existing social inequalities are reproduced in each generation.</p> <p>Applying material from Item B and your knowledge, evaluate the view that the education system is meritocratic. [30 marks]</p>
----	-----------------------------------	--	---

Sociology - Families and Households Scheme Of Work

Brief: An examination of the families in relation to the past, present changes, and diversity.

Specification:

- The relationship of the family to the social structure and social change, with particular reference to the economy and to state policies
- Changing patterns of marriage, cohabitation, separation, divorce, childbearing and the life course, including the sociology of personal life, and the diversity of contemporary family and household structures
- Gender roles, domestic labour and power relationships within the family in contemporary society
- The nature of childhood, and changes in the status of children in the family and society
- Demographic trends in the united kingdom since 1900: birth rates, death rates, family size, life expectancy, ageing population, and migration and globalisation.

Assessment Objectives

- **AO1:** Demonstrate knowledge and understanding of sociological theories, concepts and evidence
- **AO2:** Apply sociological theories, concepts, evidence and research methods to a range of issues
- **AO3:** Analyse and evaluate sociological theories, concepts, evidence and research methods in order to: present arguments, make judgements and draw conclusions.

Timing (lessons)	Title and Objectives	Key Words and Key Studies	Pages	HW	Formative Assessment
1	Introduction to Families and Households	<ul style="list-style-type: none"> • Allan and Crow • Nuclear Family • Extended / Modified Extended Family • Reconstituted Family • Lone Parent Family • Cohabiting Couple • Same-Sex Family 	TC: 1-2		
2	Theoretical Perspectives - Functionalism	<ul style="list-style-type: none"> • 4 Essential Functions - Murdock • Functional Fit Theory and 2 Functions - Parsons 	T: 189- 190 TC: 2-3, 8-9	1	Outline three functions that functionalists see the family performing. (6 marks)
3	Theoretical Perspectives - New Right	<ul style="list-style-type: none"> • Dependency Culture - Murray 	T: TC: 5-6	2	
4	Theoretical Perspectives - Marxism	<ul style="list-style-type: none"> • Capitalist Functions and Unit of Consumption - Marx • Inheritance of Property - Engles • Ideological Functions - Zaretsky 	T: 191- 192 TC: 3-4	3	<p>Item B: Capitalist society is based on a wealthy capitalist class exploiting the labour of a propertyless working class in order to extract profit. However, to obtain their profit, capitalists must sell what has been produced and this requires people who are willing to buy it. For capitalism to continue, the proletariat must be persuaded to accept their exploitation. Capitalists also need to retain control of their wealth in order to maintain their privileged position.</p> <p>Applying material from Item B, analyse two functions that the family may perform for capitalism. (10 marks)</p>
5	Theoretical Perspectives - Feminism	<ul style="list-style-type: none"> • Liberal - Young and Wilmott • Radical - Greer; Somerville • Marxist - Ansley • Difference 	T: 193- 194	4	Define the term 'patriarchy'. (2 marks)

			TC: 4-5		Using one example, explain how liberal feminists see gender inequality in the family being overcome. (2 marks)
6	Theoretical Perspectives - Postmodernism	<ul style="list-style-type: none"> Personal Life Perspective Donor Children - Nordqvist and Smart Pets - Tipper 	T: 194-196	5	
7	Theoretical Perspectives - Topic Summary	<p>Item D: Functionalists believe the family has its own important role to play in helping society to function effectively. In each type of society, one particular type of family will be the norm. This family type will fit the needs both of its individual members and of society as a whole. Other sociologists believe that functionalists fail to consider ways in which families are dysfunctional.</p> <p>Applying material from Item D and your knowledge, evaluate functionalist explanations of the role of the family in society. (2017)</p> <ul style="list-style-type: none"> Item D: Feminist sociologists emphasise the harmful effects of the conventional nuclear family on women. They see it as playing a role in the continuing oppression of women. This is evident in areas such as domestic violence, paid employment and power. Other sociologists reject this negative view of the family and argue that it is essential for society. <p>Applying material from Item D and your knowledge, evaluate feminist explanations of the role of the family in society today. (2019)</p>	T: 197 TC: 7	6	<p>Item A: Despite their disagreements, Functionalist, Marxist and Feminist approaches to the family share certain similarities. They are all structural approaches: they see the family as a structure that performs certain functions - although they disagree about what these functions are and who benefits from them. Similarly, they assume that by 'the family' we mean the conventional nuclear family. Other sociologists reject this structural approach. For example, the personal life perspective takes a bottom-up view that focuses on people's meanings and how they themselves define what counts as 'family'.</p> <p>Applying material from Item A and your knowledge, evaluate the usefulness of structural approaches to our understanding of families and households. 19	Childhood - Topic Summary	<p>Outline and explain two ways in which changing gender roles within the family may have affected children's experience of childhood. (2017)</p> <ul style="list-style-type: none"> Item C: There have been a number of demographic changes since 1900. Life expectancy has increased and therefore several generations of a family may be alive at the same time. Also, people now have fewer children. <p>Applying material from Item C, analyse two ways in which demographic trends since 1900 may have affected the nature of childhood in the United Kingdom today. (2018)</p> <p>Item D: Some sociologists argue that UK society has become more child-centred. Children today are more privileged than they have ever been. There are a large range of laws and policies in place to protect them and there is an increasing emphasis now placed on children's rights. However, other sociologists argue that the extent of child-centredness is exaggerated, and that childhood can be a negative experience for some children.</p> <p>Applying material from Item D and your knowledge, evaluate the view that UK society has become more child-centred. (2020)</p>		17	<p>Item A</p> <p>According to some sociologists, children in today's supposedly child-centred society lead lives that are segregated and controlled, but childhood was not always like this. Aries describes a medieval world where there was little distinction between children and adults in either work or leisure. According to this view, industrial society brought major changes. Children's lives became increasingly confined and regulated by adults. Not all sociologists share this view. Some argue that the distinction between childhood and adulthood is again becoming blurred.</p> <p>Applying material from Item A and your knowledge, evaluate sociological explanations of changes in the status of childhood. 		divorce have affected the experience of childhood. (2019)			Applying material from Item B, analyse two reasons for ethnic differences in family and household patterns. (10 marks) Applying material from Item A and your knowledge, evaluate sociological contributions to our understanding of the trends in divorce in the United Kingdom since 1970. (20 marks)
31	Family Diversity - Modernism	<ul style="list-style-type: none"> • Functionalism - Parsons • New Right - Benson • Neo-Conventional Family - Chester • Family Diversity - The Rapoports 	T: 224- 228 TC: 22-26	29	Outline three types of diversity in family structures. (6 marks)
32-34	Family Diversity - Postmodernism	<ul style="list-style-type: none"> • Individualisation Thesis - Giddens; Beck 	T: 228- 233	30	<p>According to the individualization thesis, greater individual choice has transformed family and intimate relationships. Unlike in the past, when individuals' lives were governed by tradition, today both men and women are free to make their own choices about relationships, sexuality and so on, following their own self-interest. Class, gender and family structures no longer limit our choices.</p> <p>Applying material from Item B, analyse two criticisms of the individualisation thesis. [10 marks]</p>
35	Family Diversity - Topic Summary	Item D: Postmodernist sociologists argue that individual choice is now more important to people than their responsibilities to their family. As a result, people are choosing to live in a variety of different ways and the idea of family is more difficult to define. However, other sociologists argue that postmodernists overestimate the extent of change in family life.		31	

		Applying material from Item D and your knowledge, evaluate the view that individual choice in personal relationships has made family life less important in the United Kingdom today. (2018)			
36	Social Policies - Direct and Indirect Policies	<ul style="list-style-type: none"> • Child Benefit and Tax Credits • Child Support Agency • Sure Start • Maternity Leave 	TC: 13-17	32	
37	Social Policies - Global Social Policies	<ul style="list-style-type: none"> • China's One Child Policy • Communist Russia • Nazi Family Regulations • Democratic Societies 	T: 235	33	
38	Social Policies - Theoretical Perspectives of Social Policies	<ul style="list-style-type: none"> • Functionalism - Fletcher • Conflict Theory - Donzelot • New Right - Murray • Feminism - Land and Leonard 	T: 236- 241	34	
39	Social Policies - Topic Summary	Outline and explain two ways in which government policies may affect family structure. (2018)		35	<p>Item A</p> <p>According to feminist sociologists, the main function of laws and policies on families and households is to support the conventional heterosexual nuclear family and reproduce patriarchy. For example, policies concerning the care of children or the old often make the assumption that these are the women's responsibility. Even policies seemingly designed to benefit women, such as paying child benefit to the mother, may</p>

					<p>have the effect of reinforcing their gender role. By contrast, New Right thinkers argue that many policies offer 'perverse incentives' that actually undermine rather than support the conventional family.</p> <p>Applying material from Item A and your knowledge, evaluate the view that the main function of laws and policies on families and households is to reproduce patriarchy. [20 marks]</p> <p>Outline and explain two perspectives on social policies that affect the family. (10 marks)</p>
40	Families and Households End of Unit Revision			36	
41	Families and Households End of Unit Test				<p>2021 Past Paper</p> <p>Outline and explain two ways in which the functions of the family may have been affected by changes to its structure. [10 marks]</p> <p>Item C: In the UK, there has been an increase in divorce since the 1960s. There are also more same sex couples than in the past. Family diversity in the UK has been influenced by government policies.</p> <p>Applying material from Item C, analyse two ways in which family diversity in the UK has been influenced by government policies. [10 marks]</p> <p>Item D:</p>

				<p>Despite many changes in society, some feminist sociologists argue that gender roles and relationships within the family remain unequal. Women still take responsibility for housework and childcare, and men still dominate in terms of power and financial control. However, other sociologists argue that there is evidence that gender roles and relationships are becoming more equal. For example, men now take on a more domestic role.</p> <p>Applying material from Item D and your knowledge, evaluate the view that gender roles and relationships within the family are still unequal in society today. [20 marks]</p>

Brief: To evaluate research methods and apply them to the context of education.

specification:

- Quantitative and qualitative methods of research; research design
- Sources of data, including questionnaires, interviews, participant and non-participant observation, experiments, documents and official statistics
- The distinction between primary and secondary data, and between quantitative and qualitative data
- The relationship between positivism, interpretivism and sociological methods; the nature of 'social facts'
- The theoretical, practical, and ethical considerations influencing choice of topic, choice of method(s) and the conduct of research.
- Students must be able to apply sociological research methods to the study of education.

Assessment Objectives

- **AO1:** Demonstrate knowledge and understanding of sociological theories, concepts and evidence
- **AO2:** Apply sociological theories, concepts, evidence and research methods to a range of issues
- **AO3:** Analyse and evaluate sociological theories, concepts, evidence and research methods in order to: present arguments, make judgements and draw conclusions.

Timing (lessons)	Title and Objectives	Key Words and Key Studies	Pages	HW	Formative Assessment
1-2	Introduction To Research Methods	<ul style="list-style-type: none">• What is included in methods?• Types of Data – primary, secondary, qualitative, quantitative.• Factors Influencing Research Methods – micro, macro, positivist and interpretivist.	T: 90-99 TC: TC: 26-29	1	<p>Outline and explain two reasons why experiments are often associated with the positivist approach in sociology. (10 marks)</p> <p>Applying material from Item A and your knowledge, evaluate the view that theoretical issues are the most important factor influencing sociologists' choice of research methods. (20 marks)</p>

3-4	Research Methods Characteristics	<ul style="list-style-type: none"> Topics, Methods and Focus Practical, Ethical and Theoretical Issues 	T: 100- 107	2	
5-6	Experiments	<p>Research Method</p> <ul style="list-style-type: none"> Experimental and Control Groups Types of Experiments Comparative Method Research - Durkheim; Rosenhan <p>Methods in Context</p> <ul style="list-style-type: none"> Research - Harvery and Slatin; Rosenthal and Jacobsen Practical, Ethical and Theoretical issues 	T: 108 - 115 TC: 46-49	3 4 5	<p>Item A: Some sociologists argue that even though teachers have a professional duty to treat all pupils fairly, they often give negative labels to pupils based on the pupils' social class, gender and ethnicity. Pupils may respond to these labels in a variety of ways, including forming anti-school subcultures.</p> <p>Sociologists may use experiments to investigate teachers' labelling of pupils. One problem is that laboratory experiments are not naturalistic and this can affect the way teachers and pupils act. With covert field experiments, however, the real purpose of the research is not known and this may help to overcome the Hawthorne Effect. Another issue is whether a particular statement or action on the part of a teacher is actually an example of unfairly attaching a label to a pupil. This is very much open to interpretation by researchers.</p> <p>Applying material from Item A and your knowledge of research methods, evaluate the strengths and limitations of experiments for the study of teachers' labelling of pupils. (20 marks)</p>

7-8	Questionnaires	Research Method <ul style="list-style-type: none"> • Types of Questionnaires • Practical Issues - Connor and Dewson • Ethical Issues • Theoretical Issues - Cicourel; Shipman Methods in Context <ul style="list-style-type: none"> • Operationalisation • Sampling Frames and Response Rates • Anonymity and Detachment • Positivists and Interpretivist View 	T: 116- 123 TC: 30-35	6 7 8	<p>Item A - Investigating material deprivation in pupils' home backgrounds</p> <p>Material deprivation is a widespread problem throughout the United Kingdom today. Some pupils experience material deprivation in their home background and this can have a negative effect on their educational achievement. For example, a lack of income with which to buy educational resources, or having to live in cramped conditions, can affect academic performance. Some parents may feel that they have failed if they cannot provide adequate income for their family. Sociologists may use questionnaires to investigate material deprivation in pupils' home backgrounds. To use questionnaires effectively, sociologists need to identify and gain responses from parents, but accessing a suitable database of contacts may prove difficult. Parents may also not be willing to discuss such a sensitive issue as material deprivation. On the other hand, substantial quantitative data may be generated by using questionnaires, allowing sociologists to identify patterns and draw comparisons.</p> <p>Applying material from Item A and your knowledge of research methods, evaluate the strengths and limitations of questionnaires for the study of Material Deprivation in pupils' home backgrounds. (20 marks)</p>
9-10	Interviews	Research Method <ul style="list-style-type: none"> • Types of Interviews • Response Rates • Rapport • Research - Young and Wilmott; Graham 	T: 124- 135	9 10 11	<p>Item B - Investigating the role of parents in pupils' achievement</p> <p>Evidence suggests that there is a close correlation between parental involvement</p>

		<p>Methods in Context</p> <ul style="list-style-type: none"> • Research - Powney and Watts; Bell; Greene and Hogan • Practical, Ethical and Theoretical issues 	TC: 36-40		<p>and pupils' achievement. Sociologists have identified a range of cultural and material factors such as attitudes to school and differences in parents' income levels. In relation to class and ethnic differences, the language spoken in the home and access to educational resources may affect pupils' achievement.</p> <p>Structured interviews can be carried out relatively easily using a large number of students and teachers. The findings can also be used in order to establish patterns and trends in achievement in relation to factors such as how much support parents give. However, there may be practical problems in gaining access and some parents may feel that questions are too personal and that they are being judged.</p> <p>Applying material from Item B and your knowledge of research methods, evaluate the strengths and limitations of using structured interviews to investigate the role of parents in pupils' achievement. [20 marks]</p>
11-12	Observations	<p>Research Method</p> <ul style="list-style-type: none"> • Types of Observation • Research - Griffin; Punch; Patrick <p>Methods in Context</p> <ul style="list-style-type: none"> • Research - Flanders; Wright • Hawthorne Effect • Practical, Ethical and Theoretical issues 	T: 136- 147 TC: 41-45	12 13 14	<p>Item A - Investigating the ways in which classroom interactions reinforce traditional gender identities.</p> <p>Some sociologists have pointed out to the ease with which traditional gender identities can be reinforced in classroom interaction. Verbal abuse and other more subtle processes such as the 'male gaze' can have an impact on gender identity. Sociologists have found that some male teachers may even collude with male pupils in 'putting down' girls. Sociologists may use non-participant</p>

					<p>observation to investigate the ways in which classroom interactions reinforce traditional gender identities. Observing classroom behaviour at first hand enables researchers to see what actually goes on rather than getting a verbal account after the event. There is also the potential for greater insight through direct experience of classroom interaction. However, it is very difficult for the observer to avoid being noticed and this can affect the behaviour of both teachers and of pupils.</p> <p>Applying material from Item A and your knowledge of research methods, evaluate the strengths and limitations of non-participant observation for the study of the ways in which classroom interactions reinforce traditional gender identities. (20 marks)</p>
13-14	<p>Official Statistics</p>	<p>Research Method</p> <ul style="list-style-type: none"> • Difference between official statistics and statistics. • Ways of Collecting Data • Theoretical Issues - Durkheim; Atkinson; Irvine <p>Methods in Context</p> <ul style="list-style-type: none"> • Application - Census, Free School Meals, League Tables, Value Added • Practical, Ethical and Theoretical issues 	<p>T: 148-152</p> <p>TC: 54-56</p>	<p>15</p> <p>16</p> <p>17</p>	<p>Item A - Investigating social class differences in achievement</p> <p>Many sociologists have examined the relationship between social class and achievement and have found that there is a clear pattern of middle-class pupils outperforming working-class pupils. However, sociologists also want to understand the reasons for this pattern. Sociologists may use official statistics to investigate social class differences in achievement. These allow researchers to see trends and patterns over time which can help to reveal cause-and-effect relationships. Official statistics can be highly representative because they are often collected across a wide range of institutions.</p>

					However, it is very difficult for the researcher to be sure that official statistics have not been manipulated in some way by the organisations responsible for their collection.
					Applying material from Item A and your knowledge of research methods, evaluate the strengths and limitations of official statistics for the study of social class differences in achievement. (20 marks)
15-16	Documents	<p>Research Method</p> <ul style="list-style-type: none"> • Public, Personal and Historical Documents • Content Analysis • Research – Scotts; Gill <p>Methods in Context</p> <ul style="list-style-type: none"> • Research – Gillborn; Gerwitz • Practical, Ethical and Theoretical issues 	T: 152- 159 TC: 50-53	18 19 20	Outline and explain two weaknesses of using personal documents (10 marks) Outline and explain two strengths of using public documents (10 marks)
17-18	Research Methods and Methods in Context End of Unit Revision			21	Item A – Some sociologists argue that even though teachers have a professional duty to treat all pupils fairly, they often give negative labels to pupils based on the pupils' social class, gender and ethnicity. Pupils may respond to these labels in a variety of ways, including forming anti-school subcultures. Sociologists may use experiments to investigate teachers' labelling of pupils. One problem is that laboratory experiments are not naturalistic and this can affect the way teachers and pupils act. With covert field experiments, however, the real purpose of the research is not known and this may help to overcome the Hawthorne Effect. Another issue is whether a particular statement or action on the part of a teacher is actually an example of unfairly attaching a label to a

					<p>pupil. This is very much open to interpretation by researchers.</p> <p>Applying material from Item A and your knowledge of research methods, evaluate the strengths and limitations of experiments for the study of teachers' labelling of pupils. (20 marks)</p>
19	Research Methods and Methods in Context End of Unit Test				<p>2021 Past Paper</p> <p>Item C Investigating the academic progress of pupils in schools There are differences in educational achievement between groups of pupils in schools. Sociologists seek to identify patterns of differential achievement and the reasons for these patterns. Academic progress is influenced by a range of factors, both external and internal to schools. One way of studying the reasons for differences in academic progress between groups of pupils is to use secondary data. Schools collect and produce a range of quantitative secondary data, such as exam statistics, as well as qualitative secondary data, such as progress reports and pupils' work. One practical advantage of using secondary data is that it is often available in the public domain. However, access to some secondary data may be restricted. Data on pupil progress may also be presented in a selective way.</p> <p>Applying material from Item C and your knowledge of research methods, evaluate the strengths and limitations of using secondary data to investigate the academic progress of pupils in schools. [20 marks]</p>

				Other: Outline and explain two reasons why experiments are often associated with the positivist approach in sociology. (10 marks) Applying material from Item A and your knowledge, evaluate the view that theoretical issues are the most important factor influencing sociologists' choice of research methods. (20 marks)

Sociology - Crime and Deviance Scheme Of Work

Brief: To analyse the role of crime in society from various sociological viewpoints and examine the patterns of crime across different social groups and organisations.

Specification:

- Crime, deviance, social order and social control
- The social distribution of crime and deviance by ethnicity, gender and social class, including recent patterns and trends in crime
- Globalisation and crime in contemporary society; the media and crime; green crime; human rights and state crimes
- Crime control, surveillance, prevention and punishment, victims, and the role of the criminal justice system and other agencies.

Assessment Objectives

- **AO1:** Demonstrate knowledge and understanding of sociological theories, concepts and evidence
- **AO2:** Apply sociological theories, concepts, evidence and research methods to a range of issues
- **AO3:** Analyse and evaluate sociological theories, concepts, evidence and research methods in order to: present arguments, make judgements and draw conclusions.

Timing (lessons)	Title and Objectives	Key Words and Key Studies	Pages	HW	Formative Assessment
1	Introduction to Crime and Deviance		T: TC: 1-3		
2	Theoretical Perspectives - Functionalism To investigate functionalist ideas of crime and deviance.	<ul style="list-style-type: none">• Collective Conscience - Durkheim• Strain Theory - Merton• Status Frustration - Cohen• Illegitimate Opportunity Structures - Cloward and Ohlin• Focal Concerns - Miller	T: 3-11 TC: 4-13	1	Outline two functions of punishment. [4 marks] Outline three ways in which crime can benefit society. [6 marks]

	What does the term strain suggest when looking at crime and deviance?			Item A - Some believe that criminal subcultures are caused by an inability to achieve society's goals. They may also be caused by relative deprivation.	
				Applying material from Item A analyse two reasons why certain groups may be more likely to form criminal subcultures. [10 marks]	
3	Theoretical Perspectives - Marxism To investigate Marxist ideas of crime and deviance. How do Marxists explain crime and deviance in society?	<ul style="list-style-type: none"> • Criminogenic Capitalism - Gordon • The State of Law Making - Chambliss; Snider • Selective Enforcement - Reiman; Gordon; Pearce • Neo-Marxism - Taylor et al 	T: 20-29 TC: 14-18	2	
4	Theoretical Perspectives - Labelling Theory To investigate the subcultural theory perception of crime and deviance. How does the subcultural theory explain crime and deviance?	<ul style="list-style-type: none"> • Deviance Does Not Exist- Becker • Typical Delinquents - Cicourel • Primary and Secondary Deviance - Lemert • Drugtakers - Young • Moral Panics - Cohen • Reintegrative Shaming - Braithwaite 	T: 12-19 TC: 19-22	3	Applying material from Item A and your knowledge... 1)...evaluate the sociological explanations of the role of the mass media in creating moral panics about crime and deviance. (30) 2)...evaluate the usefulness of labelling theory in explaining crime and deviance. (30) 3)...evaluate the usefulness of functionalist approaches in explaining crime and deviance. (30)
5	Theoretical Perspectives - Left Realism	<ul style="list-style-type: none"> • Causes of Crime - Young • Relative Deprivation, Subcultures and Marginalisation - Lea and Young 	T: 30-33	4	Item B Left realists see crime as a real problem, especially for the disadvantaged groups who

	<p>To investigate Left Realists ideas of crime and deviance.</p> <p>How do Left Realists explain crime and deviance in society?</p>	<ul style="list-style-type: none"> • Square of Crime - Matthews 	TC: 25-27	<p>are its victims. They see the causes of crime as located in the structure of late modern society, with its high levels of exclusion and insecurity. Their views on how to tackle the problem of crime have had some influence on official policy, particularly under New Labour governments. However, critics claim that left realists focus too narrowly on inner-city crime and ignore the crimes of the powerful.</p> <p>Applying material from Item B and your knowledge, evaluate the contribution of left realism to our understanding of crime and deviance. (30 marks)</p>
6	<p>Theoretical Perspectives - Right Realism</p> <p>To investigate Right Realist ideas of crime and deviance.</p> <p>How do Right Realists explain crime and deviance in society?</p>	<ul style="list-style-type: none"> • Broken Windows - Wilson and Kelling • Underclass - Murray • Routine Activities - Felson 	T: 33-38 TC: 23-24	<p>Outline two realist solutions of crime. (4 marks)</p> <p>Item A</p> <p>Right realist theories have had a significant influence on government policies, especially because they appear to offer practical answers to the problem of crime. Like many sociologists, they see childhood experiences as very important in determining behaviour in later life. They focus on the idea that some people are naturally more aggressive or less intelligent than others, and they stress the need to ensure that crime does not go unpunished.</p> <p>Applying material from Item A, analyse two explanations of the causes of crime put forward by right realists. (10 marks)</p>

7	Theoretical Perspectives - Topic Summary	<p>Outline two reasons why deviant subcultures exist. (2019)</p> <ul style="list-style-type: none"> • <p>Outline three functions that crime and deviance may perform. (2017)</p> <p>Outline three criticisms of the labelling theory of crime and deviance. (2018)</p> <p>Outline three functions of the criminal justice system. (2020)</p> <p>Item A:</p> <p>Every society sets goals for its members. However, not every member has an equal chance of achieving these mainstream goals by legitimate means. For example, some young people may underachieve at school. Similarly, living in a deprived or unstable neighbourhood can be a barrier to the achievement of mainstream goals. Deviant subcultures respond to the difficulties of achieving mainstream goals in different ways.</p> <p>Applying material from Item A, analyse two ways in which deviant subcultures may respond to the difficulties of achieving mainstream goals. 13	Ethnicity, Crime and Victimation - Topic Summary	Outline two reasons for ethnic differences in criminal conviction rates. (2017)		14	Outline two reasons why members of some ethnic minority groups are more likely to receive custodial sentences. (4) Item A

The risk of being a victim of crime appears to vary by ethnic group, both in terms of 'ordinary' crimes and racially motivated crimes. This is shown in victim surveys. Surveys are based on the assumption that people are aware of what is happening to them. All suspected crimes have to go through a process of being reported and investigated before they are officially categorised as a crime. The role of the police is crucial to this process.

Applying material from Item A, analyse two explanations of the apparent differences in the rates of victimisation of ethnic groups. (10)

Item B

Official statistics suggest that there is a clear relationship between ethnicity and offending. These show black people and to a lesser extent Asians as being over-represented in the criminal justice system. In the view of some sociologists, this is because at each stage in the system, from policing through to sentencing, institutional racism distorts the picture of ethnic patterns of offending.

However, left realists argue that there are real differences in offending rates and that these differences can be explained in terms of factors such as relative deprivation and marginalisation.

Applying material from Item B and your knowledge, evaluate sociological explanations of the relationship between ethnicity and offending. (30)

14	<p>Gender and Crime – Gender Differences in Offending Rates</p> <p>To investigate patterns of crime when looking at Gender.</p>	<ul style="list-style-type: none"> • Official Statistics • Self Report Studies – Newburn • Victim Surveys – Crime Survey for England and Wales 	T: 56-57 TC: 34-37	15

17	<p>Gender and Crime – Topic Summary</p>	<p>Outline two ways in which gender may influence the risk of being a victim of crime. (2018)</p> <p>Item B:</p> <p>Some sociologists explain levels of offending by girls and women in terms of their socialisation or their position in patriarchal society. For example, one feminist sociologist argues that the weakening of patriarchy has led to an increase in female offending. However, other sociologists focus on the ways in which the police and courts treat females, as well as on the impact of media stereotypes of female offending.</p>		18	<p>Outline two differences between the recorded patterns of male and female offending. (4)</p> <p>Item A</p> <p>Most criminals are men. The most consistent finding of research into crime in different societies and over many decades is that there is a clear link between crime and masculinity. However, the kind of crimes committed varies between different groups of men. So too does what counts as being a ‘real man’ and the resources to achieve it. Changes overtime in the economy and the employment structure – such as de-</p>

		Applying material from Item B and your knowledge, evaluate sociological explanations of levels of female offending. (2019)			industrialisation, for example – may also affect men’s opportunities to express their masculinity.
					Applying material from Item A, analyse two reasons why men commit crime. (10)
					<p>Item B</p> <p>Official crime statistics indicate that there are significant gender differences in the commission of crime. Only about 20% of convicted offenders are female, and they are far less likely to commit homicide, carry out violent crime or be repeat offenders. However, some sociologists believe that these statistics underestimate the true extent and seriousness of female crime. They argue that the leniency of the criminal justice system may result in fewer girls and women ending up in the crime statistics than men.</p>
					Applying material from Item B and your knowledge, evaluate sociological explanations of female crime. (30)

What patterns emerge in victimisation?	<ul style="list-style-type: none"> • Victimology • Patterns of Victimisation - CSEW • Positivist Victimology - Hoyle; Hentig • Radical Victimology - Lea and Young; Jones et al • Critical Victimology - Walklate; Tombs and Whyte 	T: 103- 106 TC: 55-57	31	

31	<p>Crime Control, Prevention and Punishment - Topic Summary</p>	<p>Item A:</p> <p>Crime reduction strategies make assumptions about why and how offenders commit their crimes. Such strategies also make assumptions about what crimes it is important to reduce and about the role or impact of criminal justice agencies.</p> <p>Applying material from Item A, analyse two reasons why crime reduction strategies may not always be successful. (2019)</p> <p>Item B:</p> <p>Societies attempt to prevent or control crime in various ways. These may range from simple prevention strategies to tough punishments aimed at deterring would-be offenders. They may also include policies to tackle the underlying causes of crime. One important type of crime control today is surveillance. This involves monitoring people's behaviour. Surveillance may also include profiling people in terms of their gender, nationality or other characteristics to determine what level of risk they pose.</p> <p>Applying material from Item B and your knowledge, evaluate sociological contributions to our understanding of crime prevention and control. (2017)</p>	32	<p>Item A</p> <p>Different justifications for punishment have been put forward and these can be linked to different policies. For example, the idea that punishment is justified as a means of deterring offenders from committing crimes may lead to relatively harsh punishments. Sociologists argue that there is a relationship between patterns of punishment and the type of society. For example, Durkheim argues that traditional societies favour retributive justice.</p> <p>Applying material from Item A and your knowledge, evaluate sociological explanations of the patterns of punishment found in society. (30)</p>
32	<p>Media Representation - Representations of Crime</p> <p>To investigate the role mass media plays in creating crime.</p> <p>How does the media affect crime?</p>	<ul style="list-style-type: none"> News Values and Crime Coverage - Cohen and Young Fictional Representations - Mandel Coverage - Greer and Reiner; Newburn Pluralism and News Values - Jewkes Construction of Reality - Reiner 	<p>T: 85-87</p> <p>TC: 45-47</p>	33

33	Media Representation - Effects of Media on Crime	<ul style="list-style-type: none"> • Types of Effects - Greer and Reiner • Positive Effects - Durkheim • Media as a direct Cause of Crime - Bandura; Greer and Reiner; Jewkes; Cohen; Hall 	T: 87-92	34	
34	Media Representation - Topic Summary	<p>Outline two ways in which media representations of crime may not reflect reality. (2020)</p> <p>Item B: Much media output is devoted to crime but the media offer a distorted portrayal of crime and criminals. The media are also often seen as causing crime, for example by creating a sense of relative deprivation or causing moral panics. The new media also provide opportunities both for committing crime and for policing it.</p> <p>Applying material from Item B and your knowledge, evaluate sociological contributions to our understanding of the relationship between crime and the media. (2018)</p>		35	<p>Outline three media news values. (6 marks)</p> <p>Item A</p> <p>Some sociologists claim that the media do not just report criminal and deviant behaviour, but may actually be a cause of crime and deviance. Some media portrayals of crime may appear to be very realistic. The media also present a number of different lifestyles in a wide range of programmes, such as reality TV, advertising, documentary and fiction, which some audiences may see as attractive. The same or similar crime storylines and images may be constantly repeated.</p> <p>Applying material from Item A, analyse two ways in which the media may cause crime. (10 marks)</p>
35	End of Unit Revision			36	
36	End of Unit Test				<p>2021 Past Paper</p> <p>Outline two ways that the nature of capitalism may cause people to commit crime. [4 marks]</p> <p>Outline three reasons for gender differences in levels of recorded crime. [6 marks]</p> <p>Item A: The media often portray role models with glamorous lifestyles. The news also</p>

frequently exaggerates the reporting of events. The media may contribute to an increase in crime.

Applying material from Item A, analyse two ways that the media may contribute to an increase in crime. [10 marks]

Item B: Official crime statistics indicate that people from some minority ethnic groups are more likely to be arrested for and convicted of crime than the white ethnic majority. For example, Black people are more likely to be stopped and searched by the police. They are also more likely to be arrested and convicted of crimes or sent to prison. One view is that differences in crime rates between ethnic groups are the result of the way the criminal justice system labels and criminalises some minority ethnic groups. Others argue that there are real differences in criminality. For example, Left Realists highlight issues such as relative deprivation as a cause of crime and Right Realists argue there is a lack of social control in some groups.

Applying material from Item B and your knowledge, evaluate the view that differences in crime rates between ethnic groups are mainly the result of the way the criminal justice system operates. [30 marks]

Sociology – Beliefs in Society Scheme Of Work

Brief: To analyse the role of religious belief in society from various sociological viewpoints and examine the patterns across different social groups and organisations.

Specification:

- Ideology, science and religion, including both Christian and non-Christian religious traditions
- The relationship between social change and social stability, and religious beliefs, practices and organisations
- Religious organisations, including cults, sects, denominations, churches and New Age movements, and their relationship to religious and spiritual belief and practice
- The relationship between different social groups and religious/spiritual organisations and movements, beliefs and practices
- The significance of religion and religiosity in the contemporary world, including the nature and extent of secularisation in a global context, and globalisation and the spread of religions.

Assessment Objectives

- **AO1:** Demonstrate knowledge and understanding of sociological theories, concepts and evidence
- **AO2:** Apply sociological theories, concepts, evidence and research methods to a range of issues

- **AO3:** Analyse and evaluate sociological theories, concepts, evidence and research methods in order to: present arguments, make judgements and draw conclusions.

	To investigate the postmodernist view of the way religion impacts identity,		17-19	
16	Religion as Social Change or Stability - Topic Summary How does religion create social change within society?	Item I: Religion gives people principles by which they can live their lives and gives them a profound sense of being right. Religious beliefs sometimes lead believers to act in ways that can have unforeseen consequences for society. Many sociologists therefore argue that religion can lead to social change. Applying material from Item I, analyse two ways in which religion can lead to social change. (2017) Item J: Some sociologists argue that religion acts as a force for social change. It can be used to challenge mainstream beliefs and values, and inspire protest against the existing social order. However, other sociologists suggest that the relationship between religion and social change is not straightforward and that religion can even prevent social change. Applying material from Item J and your knowledge, evaluate the view that religion acts as a force for social change. (2020)	11	Although many sociologists argue religion is a conservative force, there are those who argue that religion can lead to social change. That social change might be an unintended consequence of the ideas put forward by religion, or else specific religious teachings might encourage people to campaign to change society. Applying material from Item I analyse two ways in which religion can lead to social change. (10 marks) It is often argued by sociologists that religion acts as a conservative force and prevents social change. This comes from doctrines or scriptures themselves, which often seek to justify the existing social structure (such as Christian teachings family structures or on receiving rewards in heaven, or Hindu ideas about reincarnation). In many societies, religious leaders are also part of the powerful and elite groups in society. Applying material from Item J and your own knowledge, evaluate the view that religion prevents social change (20 marks)
17-18	Religious Organisations and Movements - Forms of Organisation	<ul style="list-style-type: none"> • Church - Weber; Troeltsch • Denomination - Niebuhr • New Religious Movements - Wallis; Arweck • New Age Movements - Heelas and Davie; Bruce • Growth in NRM and NAM - Nelson; Wallis; Glock • Postmodern Explanations - Drane 	12	T: 467-480 TC: 20-27

	<p>To investigate characteristics that create a church and denomination. How do denominations develop?</p> <p>To investigate characteristics of sects. How do sects develop?</p> <p>To investigate why Wallis created the term New Religious Movements. What are the three types of NRMs?</p> <p>To investigate the role and progression of New Age Movements.</p>			
19	<p>Religious Organisations and Movements - Topic Summary</p>	<p>Outline and explain two reasons why sects tend to recruit members from particular social groups. (2017)</p> <ul style="list-style-type: none"> • <p>Outline and explain two ways in which churches may act as conservative forces. (2019)</p> <p>Item J: Postmodernists argue that there has been an increase in spirituality in the United Kingdom. For example, there is increased interest in New Age activities such as yoga, meditation and crystal healing. However, theories of secularisation claim that traditional organised religion has declined, while science and rational thought have become more important.</p> <p>Applying material from Item J and your knowledge, evaluate the view that an increase in spirituality in the United Kingdom has compensated for the decline of organised religion. (2018)</p>	13	<p>Item A New Age movements differ significantly from traditional churches – so much so that some question whether they are religions at all. Unlike churches, New Age movements are often loose-knit and individualised, without the formal ceremonies and with different levels of commitment and belief. Some, like yoga for instance, are more like therapy or leisure than religion.</p> <p>Applying material from Item A, analyse two reasons why New Age beliefs are becoming more popular, at the expense of traditional churches. (10 marks)</p> <p>Item B Religious organisations are often divided up into churches, sects, denominations and cults. Different religious organisations are often very different from one another. A study of belief in Kendal found church congregations were shrinking while more</p>

					and more people were becoming interested New Age types of groups. Applying material from Item B and elsewhere, evaluate the view that the main reason for the decline in church attendance is the growth of new religious movements. (20 marks)
20-21	<p>Social Patterns of Belief and Participation - Social Class</p> <p>To investigate patterns of religious participation within social classes.</p>	<ul style="list-style-type: none"> Sociological Research – Ashworth and Farthing; Weber; Marx; Lawes; Willis 	14	T: 481-484 TC: 28-30	<p>Statistics do not provide a clear picture about social class and religiosity. It is suggested that religion has different functions for different social classes, and different social classes might be attracted to different religious organisations. There is a traditional view that working-class individuals are more religious than middle-class individuals.</p> <p>Applying material from Item J and your own knowledge, evaluate the view that working-class individuals are more religious than middle-class individuals. (20 marks)</p>
22-23	<p>Social Patterns of Belief and Participation - Gender</p> <p>To investigate the role of women in traditional and modern religion.</p> <p>Why had women's role changing?</p>	<ul style="list-style-type: none"> Sociological Research – Heelas and Woodhead; Simone De Beauvoir; Glock and Stark; Miler and Hoffman 	15	T: 489-493 TC: 30-31	<p>Statistics suggest that women attend church more than men and generally are more likely to hold religious beliefs than men. While some would explain this in terms of women's role in society, others (particularly some feminists) would explain it in terms of the function of religion in a male-dominated society. Other sociologists consider the impact of gender socialisation.</p> <p>Applying material from Item I, analyse two reasons why women are more religious than men (10 marks)</p>
24	<p>Social Patterns of Belief and Participation - Age</p>	<ul style="list-style-type: none"> Sociological Research – Brierly; Modood et al; Durkheim; Bruce; Collins-Mayo 	16	T: 493-498	

	To investigate patterns of religious participation within age groups. Why do people get more religious as they get older?		TC: 31-33	
25-26	<p>Social Patterns of Belief and Participation - Ethnicity</p> <p>To investigate why ethnic minorities seem to have higher rates of religious dedication.</p> <p>What are reasons for higher rates of religious participation among ethnic minorities?</p>	<ul style="list-style-type: none"> Sociological Research - Bruce; Johal; Durkheim; Bird; Goodhew; Weber 	17 T: 484-489 TC: 33-47	<p>Minority ethnic groups in the UK are much more likely to be religious than their white British compatriots.</p> <p>There are many possible reasons for this, but one is a response to the experience of racism in society. However, other factors, such as levels of religiosity in countries of origin, are also likely to be influential.</p> <p>Applying material from Item J and your own knowledge, evaluate the view that racism is the main reason why minority ethnic groups are more religious (20 marks)</p>
27	<p>Social Patterns of Belief and Participation - Topic Summary</p>	<p>Item I:</p> <p>Minority ethnic groups often arrive in the United Kingdom with a different culture from that of the host society. Also, members of minority ethnic groups often face racism in their everyday lives.</p> <p>Applying material from Item I, analyse two reasons why minority ethnic groups in the United Kingdom are often more religious than the majority of the population. (2018)</p> <ul style="list-style-type: none"> Outline and explain two reasons why women are more likely than men to participate in New Age movements. (2020) <p>Item J:</p> <p>There are differences between women and men in levels of religious belief and participation in religious activities. Feminist sociologists focus on women's</p>	18	

		<p>subordination to men and see religion and religious organisations as playing a part in maintaining patriarchal society. However, despite this, women appear to be more religious than men.</p> <p>Applying material from Item J and your knowledge, evaluate sociological explanations of the relationship between gender and religious beliefs and practices. (2019)</p>			
28-30	<p>Secularisation, Globalisation and Fundamentalism – Secularisation</p> <p>To investigate reasons for the increase in secularisation.</p> <p>How has science led to an increase in secularisation?</p> <p>To investigate statistics that go against the ideas of the increase in secularisation.</p> <p>Why is religion still important in society?</p> <p>To investigate reasons for the increase in secularisation in the USA.</p> <p>How has science led to an increase in secularisation?</p>	<ul style="list-style-type: none"> • Religiosity – Clements; Wilson; Bruce • Statistical Evidence – Clements; Davie • Theories of Secularisation – Bruce; Weber; Norris and Inglehart; Bruce; Lyon 	19	<p>T: 500-510</p> <p>TC: 36-39</p>	<p>There has been a debate in sociology about the extent to which society today is becoming less religious. Grace Davie suggests that lower church attendance does not necessarily mean less religious belief: people might believe without belonging. However, others suggest that religion is becoming more about identity in an increasingly interconnected and multi-faith world.</p> <p>Applying material from Item J and your own knowledge, evaluate the view that religion today is more about believing than belonging. (20 marks)</p> <p>Some sociologists argue that society today has changed greatly and people are less religious and also people are aware of more religions and belief systems than ever before. This, they say, has changed the roles religion plays in society, as it no longer acts as a “shared sacred canopy”.</p> <p>Applying material from Item J and your own knowledge, evaluate the view that religion no longer acts as a “shared sacred canopy” in the world today. (20 marks)</p> <p>In the past, traditional established churches, like the Church of England, had</p>

					<p>considerable power and influence in society, much of which is no longer there. It is also the case that most people used to participate in these religious organisations, which were mainstream, compared with other spiritual organisations and sects.</p> <p>Applying material from Item I, analyse two reasons why churches have lost support during the last 30 years. (10 marks)</p> <p>Religion still plays an important part in many people's lives. However, the development of modern society has been accompanied by a growth in scientific thought. Increasingly people look to scientific and reasoned explanations, based on evidence, rather than relying on faith.</p> <p>Applying material from Item J and your own knowledge, evaluate the view that religion is less significant in people's lives than science, today. (20 marks)</p>
31-32	<p>Secularisation, Globalisation and Fundamentalism – Globalisation and Fundamentalism</p> <p>To investigate the way globalisation has affected religious belief and participation.</p>	<ul style="list-style-type: none"> Effects of Globalisation – Bruce Causes of Fundamentalism – Giddens; Bauman; Norris and Inglehart; Bruce 	20	<p>T: 510- 515</p> <p>TC: 39-47</p>	<p>Globalisation has caused a significant number of changes in religion today. Some suggest that its main impact has been to increase religious pluralism and further undermine the plausibility of religion's claims to hold a monopoly of the truth. However, others have suggested that globalisation has also played a part in the growth of religious fundamentalism.</p> <p>Applying material from Item J and your own knowledge, evaluate the view that the main impact of globalisation on beliefs in society has been the growth of religious fundamentalism. (20 marks)</p>

33	Secularisation, Globalisation and Fundamentalism - Topic Summary	<p>Outline and explain two ways in which globalisation may affect religious beliefs and practices. (2018)</p> <ul style="list-style-type: none"> • <p>Item I:</p> <p>Globalisation involves the spread of a worldview based on science and rationality. In some places people have rejected this worldview and have revitalised religious traditions.</p> <p>Applying material from Item I, analyse two ways in which globalisation may affect the extent of secularisation. (2019)</p> <ul style="list-style-type: none"> • <p>Item I:</p> <p>Secularisation theory explains the decline in religious participation across parts of Europe, but it does not explain why religion continues to be popular in other parts of the world. It also fails to recognise that religion may be changing rather than declining. The extent of secularisation may have been exaggerated.</p> <p>Applying material from Item I, analyse two reasons why the extent of secularisation may have been exaggerated. (2020)</p>	21		
34	Beliefs in Society End of Unit Revision		22		
35	Beliefs in Society End of Unit Test			<p>2021 Past Paper</p> <p>Outline and explain two ways that globalisation may have influenced the way in which religion acts as a force for change. [10 marks]</p>	<p>Item I: Churches are generally seen as traditional and conservative in their beliefs. They also tend to have a strict hierarchy of power. The characteristics of churches are different from those of New Age movements.</p> <p>Applying material from Item I, analyse two ways in which the characteristics of</p>

				<p>churches are different from those of New Age movements. [10 marks]</p> <p>Item J: Secularisation is the declining importance of religion. Some sociologists argue that within the UK, religious beliefs and organisations are losing significance. Fewer people are attending churches than ever before and there are smaller numbers of religious ceremonies such as weddings. However, others argue that religion is not losing importance. This only appears to be the case because the way people interact with religion is changing over time.</p> <p>Applying material from Item J and your knowledge, evaluate the view that the UK is becoming increasingly secular. [20 marks]</p>

Sociology - Theory and Methods Scheme Of Work

Brief: To evaluate the use of sociology as a social science and theoretical perspectives.

Specification:

- Consensus, Conflict, Structural And Social Action Theories
- The Concepts Of Modernity And Post-Modernity In Relation To Sociological Theory
- The Nature Of Science And The Extent To Which Sociology Can Be Regarded As Scientific
- The Relationship Between Theory And Methods
- Debates About Subjectivity, Objectivity And Value Freedom
- The Relationship Between Sociology And Social Policy

Assessment Objectives

- **AO1:** Demonstrate knowledge and understanding of sociological theories, concepts and evidence
- **AO2:** Apply sociological theories, concepts, evidence and research methods to a range of issues

- **AO3:** Analyse and evaluate sociological theories, concepts, evidence and research methods in order to: present arguments, make judgements and draw conclusions.

Links To Careers

Timing (lessons)	Title and Objectives	Key Words and Key Studies	HW	Pages	Formative Assessment
1	Theory and Methods Recap				
2-3	Functionalism	<ul style="list-style-type: none"> • Organic Analogy - Durkheim • 4 Functional Prerequisites - Parsons • Neo-Functionalism: Mouzelis; Alexander 	22	T: 110- 113 TC: 4-6	Outline and explain two problems of using the functionalist perspective to study today's society. (2018)
4-5	Marxism	<ul style="list-style-type: none"> • Key Ideas - Karl Marx • Humanist Marxist - Gramsci • Structuralist Marxist - Althusser • Frankfurt School of Thought - Marcuse and Adorno 	23	T: 114- 117 TC: 7	Item C: Some sociologists take a consensus approach to the study of society. For example, functionalists see society as based on shared values and with all its parts working harmoniously together to meet the needs of the social system. Other sociologists take a conflict approach. For example, Marxists see society as divided by a fundamental conflict in which one class uses its power to exploit the other. Labelling theory and Weber's social action theory also highlight the importance of conflict and power.

					Applying material from Item C and your knowledge, evaluate the view that conflict approaches are more useful than consensus approaches to our understanding of society. (2017) Item C: Marxist sociologists see capitalism as based on class inequality and the exploitation of the proletariat. They argue that all social institutions help to maintain capitalist society. However, in the Marxist view, the proletariat will ultimately overthrow capitalism and create a classless society. Critics argue that the traditional Marxist view of society is outdated. Applying material from Item C and your knowledge, evaluate the contribution of Marxist approaches to understanding today's society. (2019)
6-7	Social Action Theory	<ul style="list-style-type: none"> Symbolic Interactionism - Cooley; Mead; Blumer Dramaturgy - Goffman Phenomenology - Husserl; Atkinson Evaluation - Structuration - Giddens 	25	T: 118- 122 TC: 9-11	<u>Item A</u> The term 'action theories' covers a number of different approaches, but they all share the idea that to a large extent social actors are able to choose their behaviour rather than it being determined by society. They also emphasise the need for sociologists to interpret actors' meanings. However, there are important differences between different action approaches. They have also been criticised for ignoring the role of the wider social structure in shaping behaviour. Applying material from Item A and your knowledge, evaluate the contribution of 'action' theories to our understanding of society. (20)
8-9	Feminism	<ul style="list-style-type: none"> Structural Feminism - Abbott et al Liberal Feminism - Young and Wilmott; Oakley 	27	T: 123- 133	Outline and explain two criticisms of feminist perspectives in sociology. (10)

		<ul style="list-style-type: none"> • Radical Feminism – Greer; Firestone • Marxist Feminism – Henderson; Ansley • Black Feminism – bell hooks (she does not like her name capitalised) • Postmodernist Feminism – Baudrillard 		TC: 8-9	
10-11	Postmodernism	<ul style="list-style-type: none"> • Modernism – Weber • Late Modernity – Beck • Postmodernism – Lyotard; Baudrillard • Evaluation – Marxist Postmodernist – Harvey 	29	T: 134- 142 TC: 14-17	<p>Item C: Postmodernists believe we have entered a new type of society, which is characterised by consumption, diversity, choice and globalisation. Furthermore, postmodernists argue that metanarratives are less useful for explaining how society works today. However, Marxists and others are particularly critical of the view that we have entered a new type of society.</p> <p>Applying material from Item C and your knowledge, evaluate the view that society today should be described as postmodern. (2020)</p> <p>Item A Postmodernists argue that we are now living in a new era, that of postmodernity, which is fundamentally different from modern society. Our identities become fluid and can be changed by changing our consumption patterns. The media has become central to society and the distinction between media image and reality disappears. Postmodernists argue that to understand this new society, we need a new theory – postmodernism. However, many critics argue that we are living in late modern rather than postmodern society.</p> <p>Applying material from Item A and your own knowledge, evaluate the usefulness of postmodernism to our understanding of society today. (20)</p>

12-13	Qualitative and Quantitative	<ul style="list-style-type: none"> Experiments - Bandura; Rosenthal and Jacobsen Questionnaires - Criminal Justice Survey Interviews - Bell Observation - Ofsted; Patrick Official Statistics - Crime Survey for England and Wales Interviews - Willis; Dobash and Dobash Documents - Willis 	31	T: 143-152 TC: 26-29	<p>Outline and explain two problems of using primary qualitative methods in sociological research. (2020)</p> <p>Outline and explain two ethical issues that sociologists using primary quantitative methods would have to consider when carrying out their research. (2020)</p> <p>Outline and explain two advantages of choosing overt participant observation as a source of data compared with covert participant observation. (10 marks)</p>
14-15	Is Sociology a Science?	<ul style="list-style-type: none"> Sociology is a science - Durkheim; Popper Sociology is not a science - Lyotard Science and objectivity - Kuhn Sociology and science similarities - Sayer 	33	T: 153-161 TC: 18-22	<p>Item A</p> <p>Positivist sociologists believe that sociology should model itself on the methods of the natural sciences. This would enable us to produce laws of cause and effect about social behaviour that would give us true, objective knowledge about society. However, interpretivists argue that the methods of the natural sciences are inappropriate for studying human behaviour. Others argue that the natural sciences are not a good model for sociology because they do not actually work in the way that positivists have imagined.</p> <p>Applying material from Item A and your knowledge, evaluate the arguments for and against the view that sociology is not and never will be a scientific discipline. (20 marks)</p>

16-17	Can Sociology be Value Free?	<ul style="list-style-type: none"> • Value Free - Durkheim; Comte • Value Laden - Gouldner; Lyotard • Value Committed - Becker; Althusser; Hammersley 	35	T: 162-168 TC: 23-26	<p>Outline and explain two reasons why sociologists' research may not always be objective. (2019)</p> <p>Outline and explain two ways in which values may play a part in sociology. (10 marks)</p>
18-19	Sociology and Social Policy	<ul style="list-style-type: none"> • Functionalism - Comte; Durkheim • Neoliberalism - Murray; Social Policy Justice Group • Marxism - Marx • Social Democrat - Townsend; Black Report • Feminism - Greer; Young and Wilmott 	37	T: 169-177 TC: 57-61	<p>Outline and explain two ways in which sociology might influence government policy. (10 marks)</p> <p>Outline and explain two reasons why sociological research might not influence government policy. (10 marks)</p>
20	End of Unit Revision		39		
21	End of Unit Test				<p>2021 Past Paper</p> <p>Paper 1 - Outline and explain two arguments against the positivist view that sociology can be scientific. [10 marks]</p> <p>Paper 2 - Outline and explain two sociological perspectives on the purpose of social policy in society. [10 marks]</p> <p>Item C: Before they begin research, sociologists have to make choices about which research methods to use. Positivists favour methods that are more likely to generate quantitative data as they want to discover laws of human behaviour. Others prefer methods that enable a sociologist to gain a deeper understanding of why people behave in certain ways. Alternatively, it could be argued that practical and ethical</p>

factors are more important influences on a sociologist's choice of research method.

Applying material from Item C and your knowledge, evaluate the view that theoretical factors are the most important influence on a sociologist's choice of research method. [20 marks]

Pinner High School: Physical Education

GCSE Physical Education - OCR (J587)

A Level Physical Education - Edexcel (9PE0)

Intent:

'Learners should build on and embed the physical development and skills learned in key stages 1 and 2, become more competent, confident and expert in their techniques, and apply them across different sports and physical activities'. (NC for PE)

'Learners should understand what makes a performance effective and how to apply these principles to their own and others' work. They should develop the confidence and interest to get involved in exercise, sports and activities out of school and in later life, and understand and apply the long-term health benefits of physical activity'. (NC for PE)

Implementation:

Learners will be taught to:

- Use a range of tactics and strategies to overcome opponents in direct competition through team and individual games **badminton, basketball, cricket, football, netball, rounders and table tennis** within lessons.
- Develop their technique and improve their performance in other competitive sports like **athletics and gymnastics**, again within lessons.
- Analyse their performances compared to previous ones and demonstrate improvement to achieve their personal best. In lessons learners will be encouraged to constantly self and peer assess against the perfect technique so they can develop their areas of weakness.
- Take part in competitive sports and activities outside school through community links or sports clubs. Pinner High School will provide information on local sport opportunities and, through involvement in extra curricular clubs, the opportunity to represent the school in inter-school competitions.

Impact:

At Pinner High School, learners' physical education knowledge is developed from basic skills into developing sports specific techniques. Learners will develop their skills in a wide range of different sports, which allow learners to progress in a wide variety of skill sets. Learners will develop the required skills for different sports in conditioned activities and will then put these into practice in competitive scenarios and competitions using the governing body guidelines. In turn, learners will progress in physical, psychological and social skills.

Physical skills:

Speed, muscular strength, muscular endurance, aerobic endurance, power, reaction time, balance, coordination, timing, agility and flexibility.

Psychological Skills:

Determination, bravery, confidence, decision making, self analysis and concentration.

Social skills:

Team work, verbal and non-verbal communication and leadership skills.

Careers in Sport:

- Athletic Careers
- Professional Athlete: Competing at the highest levels in sports such as football, basketball, tennis, etc.
- Coach: Training and developing athletes and teams at various levels.
- Referee/Umpire: Officiating games and ensuring they are played according to the rules.
- Sports Management and Administration
- Sports Medicine and Health
- Sports Marketing and Public Relations
- Sports Journalism and Media
- Sports Science and Technology
- Fitness and Recreation
- Education and Youth Sports
- PE Teacher: Educating students about physical fitness, sports, and health
- Youth Sports Coach: Developing young athletes and promoting sports participation at the grassroots level

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2

Pinner High School: PSHE

Intent

PSHE is a planned programme of learning through which young people acquire the knowledge, understanding and skills they need to manage their lives, and support those around them, now and in the future. PSHE develops the qualities and attributes students need to thrive as individuals, friends, family members, and members of society. The subject aims to contribute towards preparing young people to manage many of the most critical opportunities, challenges and responsibilities they will face growing up in such rapidly changing and challenging times. PSHE helps students to connect and apply the knowledge and understanding they learn in this and other subjects to practical, real-life situations while helping them to feel safe and secure enough to fulfil their academic and personal potential. Evidence shows PSHE's impact in a number of areas, including emotional wellbeing, physical health, academic attainment, and preparation for work¹. Furthermore, PSHE helps students to develop the character, resilience and skills they need to succeed. It can also reduce barriers to learning, and create opportunities for success and esteem-building for the most vulnerable students.

Aims of PSHE at Pinner High School

1. Our curriculum and lessons are well designed, high quality and knowledge rich (they are aligned with the teaching and learning policy). Lessons will be well organised and delivered with enthusiasm, energy and clarity.
2. Guidance is provided to help staff develop expertise by producing standardised resources which are rooted in up-to-date research, alongside models, definitions, and scripted explanations. This will be quality assured through staff learning walks, lesson observations and data analysis of attitude to learning.
3. Students receive a broad, balanced and diverse curriculum which is well sequenced in accordance with and supports the personal development programme throughout the school.
4. The curriculum is consistently refined, and updated in line with contemporary developments. There will always be flexibility within our curriculum to respond to topical issues (within both school and the wider world).
5. We will adapt and change resources to ensure they meet the aims of the subject and the needs of the students.
6. Supporting and strengthening the school ethos and whole school priority of developing personal growth.

As students' progress through the intended curriculum, they will not only acquire new knowledge but also transferable skills which prepare them for the opportunities, responsibilities and experiences of later life. These include but are not limited to:

- Communication, including how to manage changing relationships and emotions
- Recognising and assessing potential risks

¹ <https://pshe-association.org.uk/our-vision/evidence-and-research>

- Confidence
- Seeking help and support when required
- Informed decision-making
- Self-respect and empathy for others
- Recognising and maximising a healthy lifestyle
- Managing conflict
- Discussion and group work

Our PSHE curriculum further supports careers guidance for our students.

Our RSE curriculum enables students to comprehend and respect the range of sexual attitudes and behaviours in present day society. Students are encouraged to understand human sexuality; to learn the reasons for delaying sexual activity and the benefits of such a delay. They will receive guidance to comprehend the legal aspects and explore their personal values, enabling them to make well-informed choices about their attitudes and behaviours during their school years and beyond. At Pinner we use the following definitions of sex, relationships, and health education to guide our curriculum planning: [SRE and PSHE Definitions and Content](#)

Implementation

Implementation – How do we manage to implement these aims in the classroom?

PSHCE at Pinner is in line with the RSE (2020) Guidance where relevant and organised according to the themes suggested by the PSHE Association².

- **CORE THEME 1: Health And Wellbeing**
- **CORE THEME 2: Relationships**
- **CORE THEME 3: Living In The Wider World**

Within each theme students will learn a broad range of topics which are carefully sequenced and taught to students in a culturally sensitive and age-appropriate way. These topics support students' spiritual, moral, cultural, mental and physical development.

It is important to be mindful that there may be students in the class who have direct or indirect experience of the issues covered in PSHE. Nonetheless it is crucial that all students have access to information on how to stay safe and seek help. Therefore, teachers may wish to speak with particularly vulnerable students beforehand and share the lesson intentions with them so they can ask any questions. In order to provide a wider safety-net it may be appropriate to do this in conjunction with the relevant pastoral teams in school.

Our lessons are designed to use non-emotive language, we strive to be factual rather than dramatic. We know students learn best and most safely when presented with facts and given the opportunity to discuss and explore them within safe boundaries. Students deserve to be provided with clear, accurate and consistent explanations. Often there will be key words provided, these should be printed out for students. Encourage students to use and refer to them throughout the lesson. Keywords and concepts are important for improving a student's ability to communicate effectively about the issues that affect them and other people around them.

We also emphasise the importance of being informed to support those around us. This, along with scenarios to practise problem solving, is a way of equipping students with knowledge and skills whilst allowing them emotional distance.

² <https://pshe-association.org.uk/guidance/ks1-5/planning/long-term-planning>

Disclosures: Our team is aware that students may make disclosures at any point during or after the lesson. Should a child make a disclosure within the lesson either directly or indirectly (e.g. a teacher overhears it while they are chatting to peers) staff must follow Pinner's safeguarding procedure and report this to the relevant staff as directed in our safeguarding policy. In these lessons we are vigilant, we take notice and report any concern, however small, as it could be part of a bigger picture.

In order to ensure success in all our students we strive to recognise the value and importance of PSHE education by developing a spiralled curriculum where we revisit and consolidate the knowledge, understanding and skills matching pupils' needs.

Impact

- The result of our curriculum should be extremely beneficial to our students who should also feel valued and respected as individuals.
- Students should feel challenged but also confident that they can do what we are asking them to. We hope that students are not only engaged in our subjects but are also able to achieve academic success and have clear opportunities to develop skills for life.
- Students will develop detailed knowledge and skills across the curriculum and, as a result, achieve well.
- Students will be ready for the next stage of education, employment or training. They read widely and often, with fluency and comprehension.
- At key stage 3, students build on the knowledge and understanding, skills, attributes and values they have acquired and developed during the primary phase. PSHE education acknowledges and addresses the changes that young people experience, beginning with transition to secondary school, the challenges of adolescence and their increasing independence. It teaches the knowledge and skills which will equip them for the opportunities and challenges of life.
- At key stage 4, students deepen knowledge and understanding, extend and rehearse skills, and further explore attitudes, values and attributes acquired during key stage 3. PSHE education reflects the fact that students are moving towards an independent role in adult life, taking on greater responsibility for themselves and others.
- By the end of key stage 5, many young people will leave home for the first time and live independently, possibly in distant locations. We aim to ensure that there is a balance throughout our curriculum between preparing students to manage their current lives and laying the foundations for managing future experiences. As students progress through the key stages, this balance shifts towards teaching related to young people's current experiences. Our PSHE education programme in key stage 5 ensures students continue to learn about issues with real-life relevance to them, at a crucial transition point in their lives.
- Our curriculum aims to provide a variety of learning experiences and will ensure that all learners develop the capacity to make the most of these opportunities. As with all young people, essential knowledge, skills and understanding will be grounded in knowing how to look after themselves, how to access support and how to keep themselves and others safe. This includes recognising what a healthy relationship looks like, and that their bodies, and feelings, will change as they grow up. It is also important to support pupils to recognise some of the complexities of modern life – whether in relation to rules and laws, managing finances or knowing the etiquette of communicating online. This will help ensure pupils are prepared for adulthood and understand the part they will play in the world.
- Unfortunately, young people with SEND can be at increased risk regarding aspects of their health, wellbeing, safety and relationships, including heightened vulnerability to abuse and exploitation – sexual or otherwise, online or offline. They may also face barriers in maintaining their own personal and sexual relationships, meeting new people and avoiding social isolation. Developing the communication skills, vocabulary, strategies and confidence to help identify and try to manage such challenges is therefore crucial, and without planned and effective PSHE provision this may not happen. Our PSHE lessons that are matched to the needs of the learners, provide an inclusive environment where they can feel comfortable and safe to discuss issues they are worried or feel anxious about.

Careers

What careers might a student be able to go into? Where can they find out more about this?

- The curriculum and our wider work in school support learners to develop their character – including their resilience, confidence and independence – and help them know how to keep physically and mentally healthy. This is done through class discussions, tests, quizzes and 1:1 discussions in lessons with the class teacher.
- At key stage 5, we aim to prepare learners for future success in their next steps. This is supported through work experiences, UCAS applications and UCAS references as well as the 'Beyond' programme.
- We aim to prepare learners for life in modern Britain by: equipping them to be responsible, respectful, active citizens who contribute positively to society; developing their understanding of fundamental British values; developing their understanding and appreciation of diversity; celebrating what we have in common and promoting respect for the different protected characteristics as defined in law.

Assessment

Summative assessment - There are no summative assessments or formal TA grade reporting in PSHE, in order that the lessons contribute to a positive wellbeing experience for students. Regular teacher assessments of knowledge and understanding will take place within the lesson through tasks completed as part of the schemes of learning.

Enrichment Opportunities & Super Curricular

We seek to equip our students with an understanding of themselves, an appreciation of the world around them, and a desire to innovate and solve problems as active contributors to society. The Curriculum is a key way of meeting these objectives. It has been designed to meet the needs of each individual student, providing opportunities which stretch and excite. Throughout Key Stage 3 (Years 7 and 8), students follow a common curriculum which provides breadth and depth. We ensure that all students receive a rounded education and can progress with a good understanding of the range of areas of study which they might pursue in more depth as they progress through Key Stage 4 and into the Sixth Form. PSHE education continues to play an important role for learners with SEND — rehearsing and embedding the practical skills and understanding they need to lead independent and fulfilling lives and enjoy safe and healthy relationships. PSHE lessons provide an inclusive environment where learners have the opportunity to explore and reflect upon issues that affect them and can develop strategies and skills to manage different real-life situations.
